THE PARADISE OF BABIES,—One of the first problems presented to a foreign teacher in Japan is the rea-son of the great apparent happiness and light-heartedness of Japan children. One may walk for hours bhrough the streets of Tokio, and scarcely ever hear a child's cry of distress. Four principal causes of this superiority of the children over those of other nations have been suggested by an English lady real-dent here. They are so well worthy of the attention of teachers at home that I reproduce them here. They are—

1. The style of clothing, loose yet warm, is far more comfortable than

the dress of our children. 2. Japanese children are much more out in the open air and sunshine.

3. The absence of furniture, and therefore, the absence of repeatedly-given instruction "not to touch." prosecuting attorneys, and other court officials to read up the judi-cial history of the Territery a little and avoid needlessly indicting and annoying people?
