BLACKHORSE DISTRICT.

Properties Are Being Developed for Nil Desperandum and Ohana.

A. G. Burritt, general manager of the Nil Desperandum Mining company leaves for Blackhorse district, Nevada, heaves for Blackhorse district, Nevada, within a day or so for the mine. Mr. Burritt announces that work is to be commenced upon the property in great shape as soon as a good sized gang of workmen can be assembled at the mine. Material and supplies were shipped some time ago and are now in readi-ness for the men. A dozen men at least are to be put to work at once and more will be added to the force as progress justifies. Mr. Burritt says that while he is confident the Nil Desperandum company has the making of a big mine, he does not care to make any big pre-

CONCENTRATES. J. F. Brim of Provo, Utah, has bought from Harry Randall of Ely, an eighth interest in the Nevada Northern mining lode claims adjoining the strom-berg claims of W. N. McGili and A. D. Construction

Campton. Frank A. Shirmer, treasurer of the Boston Con, is out from Boston on a trip of inspection to the various prop-erties of the company. He will in-spect the mines at Bingham and the smelter out at Garfield, and during his visit will be shown the Newhouse holdings

The merger proposed for Silver King holdings and these of the McGregor and other surrounding holdings will be soon an accomplished fact. Stockholders have already expressed their ratisfaction of the proposition iaid before them by the company and it is almost an absolute certainty that the consolidation will be effected without one dissorting vote effected without one dissenting vote. The meeting at which the vote is to be taken will be held April 10.

Colorado, May Day and other mines Colorado, May Day and other mines has created great attention towards the Tintic district. E. C. Coffin has re-turned from a trip to that part of the country enthusiastic over showings in the Uncle Sam. The \$00-foot level, worked thoroughly after studying the location of ore bodies in the Godiva, is showing a big body of good ore and while development is not far along yet a width of from 35 to 40 feet has been uncovered in one place. Through this mass runs a streak of rich ore from 6 to 12 feet in width. This stuff is be-lieved to be a continuation of the Beck Tunnel dividend-making vein and if it is proved to be the same, it is more than likely the Uncle Sam has 1,000 feet of Beck vein to work. This is but one of many other similarly significant developments in the Tintic district. REAL ESTATE TRANSFERS. The Aetna Real Estate & Invt. Co. part of lot 6, block 32, plat B..... L. S.
