SALT LAKE CITY, Feb. 6, 1911.
Doubled at \$100.00 selling at \$112.

LOCAL AND OTHER MATTERS.

REMEMBER THE Tenth Ward Lecture this evening, by Elder Thomas Taylor, Subject: "Forming the Mind." Seven o'clock for the time for the lecture to begin.

FIRE AT PLEASANT GROVE.—The following telegram was handed in for publication this morning, by A. M. Munser, Esq., Superintendent Denver Telegraph Lines:

"Pleasant Grove, February 6, 1911.
A. M. Munser, Salt Lake City.—Our Meeting House and Tithing Office was burned down this morning at 11 o'clock; contents lost except books and papers."
K. MATTHEW.

THEATRE.—On Saturday evening a very large audience saw "The Lost Ship," and manifested their appreciation of the acting and mechanical effects in frequent bursts of applause.

To-night, "the greatest attraction of the season," in the grand spectacular romance called "The Ice Witch" will be put upon the boards. The preparations for the production of this piece have been on a large scale and have extended through a long time. Mr. Lambourn's new and gorgeous scenery, Mr. Reid and his assistants' complicated machinery, the extensive and magnificent properties of Mr. H. Baker and his assistants, with the music and choruses under the direction of Professor Hawley, will combine to make a treat rarely enjoyed now-a-days.

Among the scenes most prominent upon the bill are: The Sea of Ice; Grand transformation of the Fairy Power; Tableau of Rapidity; The Golden Gallery; glorious descent of the Sun; attended by his spirits, and the grand final transformation scene of "the home of the sun in the realms of light."

Mr. Harris, the efficient stage manager, has been indefatigable in his endeavors to make it the best of all entertainments.

MINISTERS.—A few days ago a resolution was passed, on the authority of Mr. C. H. Hays, Jr., of which the following note is a correction:

"SPRINGVILLE, February 2, 1911.
Hon. G. C. Cannon.—In your daily issue of Jan. 26, I discovered that Mr. C. H. Hays, Jr. stated that Elder George O. Noble was captured by a man named Jones, of Springfield. Such is not the case, myself and Thomas Herbert captured them, in a charge of horse stealing. Herbert was the first to take them, and I delivered them to the Deputy Sheriff. Yours,
Thomas L. Mendenhall,
Constable of Springfield, Utah."

Do Not Forget the meeting of the Deseret Parent Society for the introduction and improvement of Stock, etc., to-night, at the City Hall; six o'clock is the time for convening.

ITEMS FROM THE "MILLENNIAL STAR."—The following items are from the "Millennial Star" of the 10th ult.

"Elder George O. Noble has been released from his duties as President of the North-western Conference, and appointed traveling elder in the Nottingham Conference.

"Information was received of the whereabouts of George Lawrence, who left England for Utah in 1882. It will be to his advantage to write to his sister, Address, Mrs. Sarah Richardson, 2, Balas street, Bedford, Beds, England.

"Died.—At Bristol, Dec. 2, 1878, James R. Berry, aged 38 years and 8 months."

THE SEVENTH LECTURE.—Professor Orson Pratt will deliver his seventh lecture on astronomy, in the Tabernacle, to-morrow night, and will treat upon the following subjects:

Names of the primary planets.—Distance of Mercury from the Sun.—Its period and magnitude.—Inferior and superior conjunctions.—Its speed and phases.—Eastern and western elongations.—Its seasons.—Synodical period.—Transits across the Sun's disc.—Height of mountains on Mercury.—Its period of rotation.—Intensity of the solar light and heat on its surface.—Common features of the celestial globe.—Mercury's orbital velocity.—Its mass.—The planet Venus, including the various characteristics attending Mercury.—Its mass and its characteristics.—Jupiter's distance and period, conjunction and opposition.—Velocity of light.—Jupiter's magnitude and rotation.—Effects of the combination of its orbital and rotational velocities.—Great variations of gravity on its surface arising from rotation.—Mass.—Weight on its surface.—Rapidity of the vibrations of a clock pendulum on Jupiter's surface.—Density.—Its seasons, seasons, belts, and atmospheric currents.—Satellites.—Weight of bodies on the satellites.—Their densities, volumes and masses.

PARSONS.—Co-OPERATIVE TANNERY AND SHOE COMPANY.—Elder W. C. McGregor, writing from Parsons on the 1st instant, says:

"We have established a Co-operative Tannery and Shoe Company, with a capital of \$4,000, and are supplying the community with more durable kind of boots and shoes than the imported article, and at the same price.

The Female Relief Society of this place gave a grand entertainment on the 15th ult.; also another dinner and ball on the 15th ult., that day being the twentieth anniversary of the settlement of Parowan. The success of the entertainment was due to the fact that each man attending should labor with his team one day in hauling building rock from the mountains to the spot on the lot where the Society is building. The move was very popular, many doing much more than was required, and judges say there is more plenty of rock on the ground to build a large and commodious house, such as the Society owns. The ground for the house was donated gratis to the Society by Charles V. Webb, Sister Phoebe Benson, the President of the Society, in connection with her sisters, are ever watchful to assist the needy. Success to the F. R. Societies! they are a great blessing among the people, and will yet be a far greater.

The Harmonic Society gave their second concert on the 27th ult., under the direction of Elder Durbin. It was a complete success. The programme was choice and entertaining. Professor Durbin presided at the cabinet organ."

Do Not Forget the meeting of the Deseret Parent Society for the introduction and improvement of Stock, etc., to-night, at the City Hall; six o'clock is the time for convening.

NEW ZEALAND.—Elder Henry Allington, writing from Karori, New Zealand, Nov. 30th, 1870, says that the work of God in that region is progressing slowly; a few baptisms had recently taken place. Elder Robert Beauchamp, of Salt Lake City, now on a mission in that part of the world, had labored a month at Karori, and the Lord's work was progressing so that he had done more good in that short time than the united labor of all the sectarian ministers had accomplished for years.

In Christmas week Elder Beauchamp was expected from Australia, when it was the intention to hold the first Conference of the Church ever held in New Zealand.

THE SQUEAL.—The Oregon Junction of Saturday contains the sequel to the Pickett War. The Green Army, at that place, on Wednesday last, the day after the marriage, the Picketts, by the aid of the sheriff, succeeded in securing the release of their daughter and her husband, but finding that they had no legal power to do so, they could not avoid, and because of this, the sheriff, the former continuing their journey back to Chicago.

4,000 made and sold per week!

SINGER'S

New Improved Silent

FAMILY SEWING MACHINES

The Best in the World,

Because all of them are in constant use, while a very large proportion of other makes are not used, owing to their being partially or utterly impracticable.

THE SINGER

NEW FAMILY MACHINE

Has been brought to perfection, regardless of time, labor or expense, and is now indisputably the best Sewing Machine in existence.

It is simple, compact, durable, beautiful, quiet, light-running, and easy of performing a range and variety of work never before attempted upon a single machine; using either Silk, Twist, Linen or Cotton Thread and sewing with equal facility the very finest and coarsest materials, and anything between the two extremes, in the most beautiful and substantial manner.

The New Improved Attachments for Hemming, (any width) Braiding, Embroidering, Magic Stiffening, Gathering and sewing on (at the same time) Self-Sewing, Cording, Tucking, Quilting, Felling, Trimming, Binding, etc., are novel and practicable, and have been invented and adjusted especially for this Machine.

Folding Tops and Cabinet Cases.

New designs of the unique, useful and popular Folding Tops and Cabinet Cases, peculiar to the Singer Machine, are in every variety of Wood, such as Black Walnut, Mahogany, Rosewood, Satinwood, and from the plainest to the most elaborate and costly. The new machines themselves are plain or highly ornamented with pearl and gold to correspond with their tables or cabinets.

In the Singer the work is fed or passed through the Machine in the natural direction, namely, from the operator, permitting it to sit in a natural and healthy position. In many other Machines the work passes from right to left, or the reverse, compelling the operator to sit in a bent and unhealthy position, and thus causing weariness of the back.

The Singer uses a SINGLET STRAIGHT NEEDLE, which is not liable to break or miss the stitch. Many other Machines use a long crooked needle, which is liable to break and to miss the stitch.

In the Singer Machine the Shuttle is carried, thus avoiding nearly all wear. It requires no oil, and does not soil the thread or goods. Other Machines drive their Shuttles, in a race, thus causing great wear, and requiring oil, soiling the thread and goods.

On the Singer, the Tension on both the upper and lower threads is absolutely under the ready control of the operator, thus rendering the Machine always available for good sewing, which is not the case with any other Machine. So-called cheap Machines are really worthless, and so are many of their new peculiarities and supposed advantages.

The SINGER is the Oldest Practical Sewing Machine.

Being about twenty years in the market. Having been constantly improved by the employment of the most skilled ingenuity of the age and unlimited capital, it is now the Very Latest in Inventions and Improvements. It is the only Machine sold on Honest Claims, as all its parts are Practical and will do all that is claimed for them. Some other Machines are Greatly Complicated, to do useless and silly things, and thus render the Machine inefficient and liable to break down. The Singer, on the other hand, is simple, strong, durable, and easily managed by those who utterly fail on other Machines.

SINGER'S

New Manufacturing Machines

Claim the same advantages over others of their class as the new Family Machines. These old and well-tried Sewing Machines are applicable to all kinds of heavy and light manufacturing in Cloth, Leather, etc., and run in the most perfect and reliable manner without trouble to the operator.

HAVE ARRIVED!

A Full Assortment of those Beautiful and Unrivalled MACHINES.

(The numbers on which show a manufacture of between Five and Six Hundred Thousand.) Considerable quantities of these new and improved Sewing Machines are on hand, and we shall sell at Eastern Prices, with addition of Freight on all orders. To persons who cannot pay all down, we will sell on

EASY MONTHLY INSTALLMENTS

So that all may possess one of these Blessings.

For the convenience of our Patrons we have arranged the service so that they can have their new Sewing Machine in the morning, and pay for it in ten easy monthly installments. We can do this because we have had twenty years experience and are one of the most skillful experts in the world in repairing and adjusting Sewing Machines. We will put each Machine in complete and practical running order before it leaves our factory, and will also inform to purchasers all needful instructions, so that they can at once commence work.

We resort to no trickery whatever to sell our Sewing Machines. We show them to all who desire to see them, and we are so great that although the Singer Company have more than all other first-class companies combined, they cannot nearly so easily be deceived as those who are compelled to purchase their Gigantic Works.

We have been so fortunate as to secure the General Central Agency,

For this Territory, we extend a cordial invitation to all to come and see the Machines, whether they wish to purchase or not. We do not do any without you examine the Singer.

We Guarantee every Machine we sell to give entire satisfaction.
