OGDEN, UTAH, - - SEPT. 15, 1902. In the presence of a few relatives and intimate friends, Miss Lorna Cahoon, one of Ogden's most highly esteemed and accomplished young ladies, was married to Mr. D. J. Farrell at 10:39 yesterday morning at the home of the bride's aunt, Miss Niece, on Adams

avenue. The wedding was a very quiet and pretty affair; the home decorations pretty affair; the home decorations were white and golden. Rev. A wedding breakfast was served after the ceremony, and the orde and groom left on the midday train for Portland, Oregon, where they will make their future home.

SKELETON FOUND.

Late Saturday afternoon a number of boys were playing on the bank of the Weber river, west of the city, when to their great astonishment they found the skeleton of a human body artially covered by sand and underbrush, only a short distance from the water's edge. The body was almost entirely decomposed. The skele ton was that of a woman about five feet six inches in height, but no clothing or anything else could be found that would give any clue that might lead to the identity. The matter was reported to Sheriff Layne who had the skeleton placed in a box for burial. The matter will be investigated.

The company is receivng prunes for evaporation on shares this year, giving the producer 16 pounds of evaporated prunes for 00 pounds of the ripe fruit delivered at the plant. The prunes furnished must be ripe and may be shaken from the trees. The evaporating plant is a great benefit to the Weber county fruit grow-

in Virginia, and joined the Church in his boyhood. He lived with the Saints in Nauvoo and helped in the building of that beautiful city and temple.

When the call came for volunteers to serve his country in the Mexican war, Henry G. Boyle was one of the brave boys who left the camp of Zion in the vilderness, bade good-bye to his sweetheart and loved ones, took up his musket and joined his comrades in that

After his honorable discharge he came up to Salt Lake and joined hands with the pioneers. Elder Boyle was an early missionary in California and was instrumental in bringing into the Church a good number of the respected citizens of Utah.

As a traveling missionary Elder Boyle labored in the Southern States filling not less than 14 honorable missions during his young manhood, covering 20 years' service. Upon reporting for his last call he was advised by President

so we must part, my body, you and I We've spent so many pleasant hour together! Tis sorry to lose your company, Who clove to me so close, whatever

the weather, From winter into winter, wet or dry; But you have reached the limit of your tether,
And I must journey on my way alone And leave you quietly beneath a stone

(Forgive me, 'tis not my experience). And think me very wicked to be sad At leaving you, a clod, a prison

They say that you are altogether bad

Perhaps I may be so, a few days hence; But now, methinks, 'twere graceless not A tear or two on my departing friend,

Now our long partnership is near completed, And I look back upon its history,

I greatly fear I have not always treated You with the honesty you showed to And I must own that you have oft de-Unworthy schemes by your sincerity; And by a blush or stammering tongue

have tried To make me think again before I lied. Tis true you're not so handsome as

you were, But that's not your fault and is part-You might have lasted longer with more care, And still looked something like your first design;

And even now, with all your wear and tear, 'Tis pitiful to think I must resign You to the friendless grave, the patient

Of all the hungry legions of decay. But you must stay, dear body, and 1

And I was once so very proud of you! You made my mother's eyes to over-When she first saw you, wonderful and new, And now, with all your faults 'twere hard to find

about you Can scarcely tell what I can do without

A slave more willing, or a friend

Ay-even those who say the worst

more true;

PROFITS FROM KEEPING SHEEP.

The sheep is primarily a meat pro-

ducing animal, and needs to be bred and fed for that purpose. It involves changes in methods from these prevailing when the wool did pay for the feed. There is no reason at all why men who have been accustomed to keeping sheep and have their farms and their buildings equipped for their management should not continue to keep They need to change the type o change their method of growing oly on the skimping plan that did sepound. The profit is in the lamb, and the earlier in its life it can be marketed the greater the profit. There are thousands of lambs in this and adolning states that should be marketed this month that their owners do not realize are ready for market, and will keep until fall, and probably sell for less than they will bring now, for they will be worth less, because as an animal increases in age its ability to make gain out of feed consumed decreases. Lambs that weigh 65 pounds or above should be sent to market at once. A we old enough to produce a lamb can be purchased for what it will bring, and in that way the producing flock be doubled. I know of no other stock that brings returns so quickly and with so little labor and so little risk

Then the immediate dollar is not all to be considered in farm operations, A farmer's capital is not wholly gauged n fertility and the character of the herbage of the farm are important resuits that follow the keeping of sheep. They eat a wider range of herbage than any other animal, and carry fertility to the higher points of the field. It takes a rich corn farm to insure profits from hog feeding, but a farm will constantly grow more productive under sheep. Two ewes to the acre will pay as good it with very little labor.-H. P. Miller,
