

Idaho News From Her Main Cities and Towns.

WALK OUT OF BOILERMAKERS

Pocatello Mechanics Obey Strike Order From Headquarters At Headquaters.

CRUSHED BETWEEN CARS.

Awful Accident at Onyx Station—Watson Family Hides to Immense English Fortune.

Special Correspondence.

POCATELLO, Ida., Aug. 8.—Forty-six boilermakers and helpers laid down their tools last night at quitting time in compliance with strike orders received yesterday from the Oregon end of the union, in compliance with a call for a general strike on the Harriman system over some disagreement at Los Angeles, California. Acting Master Mechanic Harry Carrick was fully notified yesterday as to the men walking out, they telling him the reason of the same.

CRUSHED BETWEEN CARS.

Albert P. Quinn, a freight brakeman and son of Conductor T. P. Quinn, was badly hurt yesterday afternoon at Onyx station, nine miles south of here, while engaged in coupling the train, which had broken in two. He was caught between two "box" cars of the "Bathurst" style, and partly crushed. He was taken at once to Pocatello and was attended by Asst. Division Surgeon Adams, and it is believed that he will recover.

FALL HEIRS TO FORTUNE.

An English fortune of \$5,000,000 is ready to be distributed among three heirs in Idaho, two of whom live in Pocatello, and one in Blackfoot. The heirs are Mrs. John L. Riggs, of Blackfoot, Arthur Watson, her brother, employed in the Oregon Short Line car shop, and his brother John T. Watson, at present employed as a sales clerk in the supply department of the railroad. The fortune in question was the accumulations of their wealthy grandfather, the mother's side, a Mr. Holt, a crockery manufacturer at Manchester, England, who bequeathed his fortune to his grandchildren, who are the children of Mrs. Emma Holt Watson, wife of David Watson, both of whom are dead.

The first intimation of the death of the deceased came last week when Mrs. Riggs, who is the eldest child in the family, was notified that she was one of the heirs, and an advance check of \$350 was enclosed. Saturday night Arthur Watson was also notified by letter from the lawyers who have the settlement of the estate. John came up to see his sister Monday last night, and all three are making arrangements to go to Manchester to accept the transfer of the inheritance.

A similar check will reach each of the Watsons shortly, upon the receipt of which they will sever their connections with the railroad company, and start life afresh under new conditions.

DESTRUCTIVE CLOUDBURST.

A one-hour rain storm hit Pocatello Saturday, which wound up with a cloudburst at 11:30, which occurred half a mile east of the Academy of Idaho, and badly damaged the school lawn, filling basements with water, and threatened to undermine the new wing just being erected.

Every man had to assist by picks and shovels to throw up temporary embankments to save the threatened parts of the buildings.

The lightning did damage to the electric power in the city, burning out one transformer and rendering useless the fire alarm system for a season.

CONTEST WITH FOILS.

An interesting sword contest with foils was given at the Auditorium Friday night between Major H. A. McGuire, who claims to be champion of the world, and Prof. Gerard, champion all-round athlete of Canada, who is spending his vacation here while on his way to Boise to accept the position of physical director of the Y. M. C. A. Early in the bout the major's foil was broken, and he fought on the defensive until the sixth round, when foils were exchanged. In the remaining four rounds points were gained fast by the major, the contest ending 22 to 8 in favor of the latter. The wager was \$500.

TROUBLE WITH WATER CO.

There is trouble now between the city council and the Pocatello Water company, and war is practically declared, and the outcome is watched with interest. The city refuses to pay the water company until better service is granted and more flow of water added. The council makes the allegation that water is allowed to run to waste over the reservoir, and that the valves are reduced to a trickle. A demand is made on the company to connect the new mains on the west side of the river. "In the meantime," says the council, "the city will not pay anything for the service it now receives unless compelled to do so by the courts."

PRESS CLUB MEETING.

The sixth quarterly meeting of the Eastern Idaho Press club will convene in this city Sunday and Monday, Aug. 12-13. Ten counties will be represented by about 50 representatives.

LAND SALE.

On Monday, Aug. 19, 3,000 acres of land will be offered for sale in Pocatello. Register M. L. Church of the state board of land commissioners will conduct the sale. The land will sell from \$10 to \$100 per acre; the terms of the sale are as follows: On all lands selling for \$25 per acre or less, one-fourth of the purchase price and one-half of the interest on deferred payment, cash on day of sale, the balance at 5 per cent interest on all lands selling for more than \$25 per acre, two-thirds of the purchase price and interest on deferred payments, cash on day of sale, the balance in 16 annual installments at 6 per cent interest.

CURIOUS RELIC.

A curiosity was exhibited by a Yellowstone Park tourist the other day. Charles M. Kane, a Pennsylvania it is a petrified animal's foot attached to what looked like a braided buckskin hobble. The foot and leg appeared to be that of a wolf. The loss were well-

bed. The relic was found near the grade of the Park bench.

WILL TALK EDUCATION.

Miss Grace Leighton, county superintendent of schools, is sending out invitations to the trustees of the various school boards in Bannock county to meet in this city on Aug. 28. Invitations are also extended to the other neighboring counties, through their respective superintendents, to attend. The topic to be discussed at the meeting are the compulsory school law, consolidation of school districts, and a number of other vital questions pertaining to school affairs.

BRADY BUYS PROPERTY.

Hon. James H. Brady has purchased the residence of Mrs. Margaret A. Stone, which adjoins his own residence on North Arthur avenue. The estate consists of five city lots and the stone dwelling house. The consideration was \$5,500. Mrs. Stone will go to Portland to live with her son, George. The first change in the premises will be the removal of the two dwelling houses.

SON OF WASHAKIE.

Dick Washakie, a full-blooded Shoshone Indian, and son of Chief Washakie, visited Pocatello and Ross Fork last week. At this place he changed to renew acquaintance with Deputy Sheriff Barney McGarvey, who, strange to say, was raised among the Shoshones. Dick and McGarvey were a mutual friends, and the meeting was a mutually happy one, and a great surprise to both. The redman holds the position of chief of Indian police at Fort Washakie, Wyoming, and he came down on a visit to the tribes now at Ross Fork.

PAINFUL INJURY.

Leo Hood, the 14-year-old son of Mr. and Mrs. John Hood, who at play last Sunday with some companions, fell from a ladder and dislocated his left shoulder. The shoulder was reset and he is getting along as well as can be expected.

Al. Manassa, the undertaker, was released from quarantine the day before yesterday, having been ill with a mild case of smallpox for the past three weeks.

A switchman named Earl Whitely caused a little excitement Sunday evening when a crowded passenger coach at the depot and succeeded in getting himself jailed and placed under \$50 bonds. Miss Rieley and Miss James were going away on a pleasure trip to Salt Lake and Denver, but for some unexplained reason he objected to this arrangement, and protested, and drew a knife as if he would kill one or both of them. The fellow was disarmed by Deputy Sheriff McGarvey, who placed him in jail, but as no one complained against him he was released the following afternoon upon giving a bond of \$50.

CIRCUS DAY BROUGHT CROWDS TO IDAHO FALLS.

IDAHO FALLS, Aug. 8.—The Ringling shows did an immense business here today and there were more people in town than ever before in the history of Idaho Falls. Some people drove a distance of 100 miles to attend the show. The result was that there was not a bed to be procured here for love or money and a number of persons slept out in the open.

Idaho Falls is growing by leaps and bounds and it is a problem to supply the demands of the newcomers. A big business is being transacted in farm implements and the farmers are now all hard at work getting in the harvest. The weather is perhaps a little too hot for ideal operations but everybody save the ranchers has taken to the hills in search of cooler climes.

On Monday night a burglary occurred here the scene of operations being Anderson Bros. Big store. Five dollars was secured from the till together with four fine razors, some scissors, tea spoons and plated goods.

Mrs. William Thomas is very ill and some doubts are expressed as to her recovery.

There was a bad runaway on Tuesday on Capitol Avenue when the team driven by the collector for the Shims Coal

Crawford Shoe

SPRING STYLES READY

That Custom Look

that has made Crawford's famous is very apparent in this full dress shoe. All of our button styles fit perfectly over the instep and around the ankle, as patterns designed especially for Crawford's are used in their manufacture.

Made by CHARLES A. EATON COMPANY, Brockton, Mass.

NICOL'S
210 So. Main

and Commission company dashed into telephone pole after a lively break following the dropping of a tongue of the vehicle. The man was thrown out and received serious injuries on his head.

George Brunt, Henry Bicklin and A. T. Shane have returned to their mine on Birch Creek.

WORK ON MONTPELIER HIGH SCHOOL DELAYED.

Special Correspondence.
MONTPELIER, Ida., Aug. 8.—The work on the new bank building is progressing nicely, but that of the high school building is progressing very slowly, being retarded by the inability to procure materials, and unless some action can be done to insure more prompt action on the part of the factories and especially the railroad company it is feared the building will not be completed until long after the time specified in the contract. In some instances it would rather appear that there were some carelessness on the part of someone when it comes to require from two weeks to a month to get a car of brick from Salt Lake to Montpelier, and such seems to be the case with not only the brick but other materials as well for the high school building.

The local brick factory promises to be able to get a car of brick to the town and will greatly facilitate building in the future, the one kiln is ready for use and another nearly ready to burn. The water supply has been plentiful this year and the crops are doing well with prospects for an abundant harvest. The first crop of hay is all in and the farmers are busy preparing for the next crop. The dry grain never looked so well and promising as at the present time and the prospects are that dry farming will be carried on more extensively in the future.

A quiet but very pretty wedding took place at the home of Mr. and Mrs. Charles Hoff of this place last evening, when Bishop W. W. Clark performed the ceremony which made Harry A. Severn and Miss Mae T. Hoff companions for life. Only a few of the intimate friends and relatives were present to witness the ceremony. Many beautiful wedding presents were sent by the happy couple, who are just embarking upon life's journey, carrying with them the best wishes of the entire community. After the ceremony light refreshments were served and the bride and groom taking the early train for a trip to the coast.

LOCAL HAPPENINGS. BY BURLEY CORRESPONDENT.

Special Correspondence.

BURLEY, Aug. 8.—President O. N. Stohl and family of Brigham City passed through town on their way home after a week's visit to Oakley and Albion.

Jas. Mahoney of Albion started to California last Wednesday. Mr. Mahoney's health has been very poor for the past two years, and it was thought a change of climate would be a benefit to him.

Local implement houses seem to be doing a thriving business this summer. Several carloads of machinery have been shipped here, and several threshing outfits have been sold during the past week.

A great deal of admiration is expressed by people passing along the railroad to see a beautiful patch of corn about 25 acres, on the farm of D. A. Harding, growing one mile from town. The corn is from 4 to 6 feet in height and still growing, without any water, save that which falls from the clouds. It is the intention of G. E. Crater, who has it in charge, to feed stock for market during the winter. Mr. Crater has on his place about 50 acres more of corn, all looking fine.

State Senator G. A. Day of Oakley went to Boise Tuesday evening, taking with him his wife, whom he will place in the hospital. Mrs. Day has been sick for some time, and it was thought best to take her to Boise where good attention could be given her.

The Red Cross drug Co. is the name of a new firm starting in business here. The firm has been quietly married at the doctor's home on Wednesday. Bishop David Kinghorn performing the ceremony. A wedding dance was given Saturday evening, which was well attended, every one wishing the pair a happy married life.

PERSONALS FROM LEWISVILLE THIS WEEK.

Special Correspondence.

LEWISVILLE, Ida., Aug. 8.—William Nibley and wife from Shelley have been here for several days making preparations to go to Halsey for an outing, in company with Mr. and Mrs. Roy Jardine, and Mrs. Arrowsmith. But on Saturday Mrs. Arrowsmith was taken seriously ill. She is reported improving, and the trip will be taken as soon as she is able to go.

Dr. R. D. Tucker and Mrs. Emma Miskell were quietly married at the doctor's home on Wednesday. Bishop David Kinghorn performing the ceremony. A wedding dance was given Saturday evening, which was well attended, every one wishing the pair a happy married life.

Mr. Lester Belknap from near Blackfoot was visiting Miss Vera Ellsworth last week. They both attended the Hicks academy last winter. One day last week Frank Boyce was riding a broncho, when one of Mrs. Harrah Hanson's little boys ran in front of the horse, fell down, and got his hand stepped on, throwing the broncho out, and breaking one or two bones in the hand.

A household of relatives spent yesterday afternoon and evening with Mrs. L. M. Atkinson, who leaves today for Logan to stay several weeks, probably all winter.

Quite a crowd from town spent Friday afternoon and evening out at Henry Joyce's, in honor of his birthday.

Miss Jennie Waldram of Sugar, and Miss Leone Morston of St. Anthony were making plans with their many friends here, Saturday and Sunday.

The Taylors here are making preparations to attend the Taylor reunion at Harrisville, Utah, next week.

BEETS COMING ALONG ON SUGAR CITY FARMS.

Special Correspondence.

SUGAR, Ida., Aug. 8.—Fine growing weather prevails here. Beets are doing splendidly. A heavy crop of hay and grain is practically assured. The high school building is coming along nicely. It will be out of stone.

On Tuesday evening the officers and teachers of the Sunday school held a large lawn party and reception on the lawn of the Eastern Beet and Seed farm in honor of the retiring superintendent, James B. Worthing. The blanchard President Anderson and about 50 guests were present.

J. A. Cornish was presented with a blue girl today.

GOVERNOR TO ACT ON COAL FAMINE

Chief Executive of Idaho is Going Out After the Railroads This Fall.

CALLS ON COMMERCIAL CLUB

With the Object in View of Direction of Interstate Commerce Commission to Existing Conditions.

Special Correspondence.

PAYETTE, Ida., Aug. 8.—Guy Flenner, secretary of the Southern Idaho League of Commercial clubs, has sent to all the Commercial clubs of the league a letter asking for information respecting the coal situation. "It is the purpose to place your report," the letter says, "with those from other cities, in the hands of Gov. Gooding, who has expressed a willingness to call the facts respecting the fuel situation in Idaho to the attention of the interstate commerce commission, which body, it is believed, can furnish some measure of relief."

The letter received by the Payette Commercial club was referred for answer to C. E. Brainard, who has prepared the following reply:

"I find in looking up the coal situation at this point that there was a great shortage here during the past year, there being demands for something like 50 cars more coal than was obtainable from all sources. It will require over 125 cars to supply the demand for the coming year."

"The dealers only received about 50 cars during the past year, and claim that their orders are not being filled this summer, only an occasional car being received where orders are placed for a large number of cars."

COAL GOES UP.

"On account of the shortage during last year, the price of coal was advanced \$1 per ton, and this year some of our wealthier citizens are ordering hard coal from Pennsylvania at a price of about \$18 per ton, to be paid."

"Last winter during the coldest weather the suffering in this community was sometimes unbearable, and at one time the citizens stopped a train load of coal going farther west, and forced the company to set out three or four car loads."

"From information obtained by various members of the Commercial club, it is well understood that this shortage has largely resulted from the policy of the railroad companies in forcing business and thereby stopping the development of competitive coal mines, which, together with the rapid growth of the country, now renders the mines controlled by the railroad companies powerless to produce the amount of coal necessary for the present consumption, even if they are able to furnish rolling stock to transport it. "Unless something can be done immediately by the government and railroad companies to foster the development of additional coal fields, many of our best citizens will be forced to remove their families to the coast or other more favored localities."

OPPORTUNITIES AT NEW TOWN OF MANARD, IDAHO.

Special Correspondence.

MANARD, Aug. 7.—Manard is a small settlement of Latter-day Saints, located in Blaine county, on Camas prairie. At a recent visit of William T. Jack, president of Cassia stake, a ward organization was effected. I. G. Thurber, J. L. Butler and H. H. Dyer held positions as bishop and counselors respectively.

The settlement of Manard dates back some two years at which time active operations began on the Twin Lake reservoir. In October of last year the dam was completed, at a cost of \$13,500. The people under the water \$25,000, which covers some 10,000 acres, have built the dam themselves. The canal is partly completed now, and part of the people are enjoying the use of water on their crops. The entire canal system will be completed next season. It is estimated that there will be more water than can be used under the water system, and water could be had at very reasonable terms by settlers, and there are no better opportunities anywhere in the west than are afforded on Camas prairie. If any desire information regarding this country, address J. E. Thurber, Manard, Idaho.

ACQUITTED OF CHARGE THEN ARRESTED AGAIN.

Special Correspondence.

REXBURG, Fremont Co., Idaho, Aug. 8.—After being acquitted of elk slaying, William Binkley and Thomas Purdy were immediately arrested by Deputy United States Marshal Bryan of Boise and taken to the Yellowstone park to stand trial before Park Commissioner Molander. They were tried this week in Justice Blackburn's court of Rexburg by jury and acquitted. They are now charged with killing elk within the national reserve. They will be escorted to Fort Yellowstone by federal officers.

Funeral services over the remains of Ariel Young, the boy drowned in the canal, were held yesterday in the second ward meetinghouse at 10 a. m. Interment took place in a Rexburg cemetery.

A special train was run to the "Palis" this morning for circus goods and a large number availed themselves of the opportunity to take a little outing.

Miss Nellie Thompson of Richmond, Utah, is here visiting with her brother.

or Oliver Thompson, bookkeeper for the C. W. & M.

Mrs. J. P. Thompson presented her husband with a baby boy a few days ago. The mother's health is in a critical condition.

Mrs. David Nelson of Salt Lake City is visiting her daughter, Mrs. Heber A. Ricks.

Harvesting of dry farm grain has commenced. The irrigated farm grain is not yet matured but the warm weather is turning it rapidly. Some oats near town will yield about 100 bushels on a number of farms.

Coal is as scarce as it was last winter. Local dealers have orders on the books for two months before getting their filled.

The health of the people is excellent. There has scarcely been a case of severe illness of any kind during the summer. The people are prosperous and building up good homes. This is an excellent place for a young man to make a home.

MRS. JOHN HERD SUCCEUMS TO TYPHOID.

Special Correspondence.

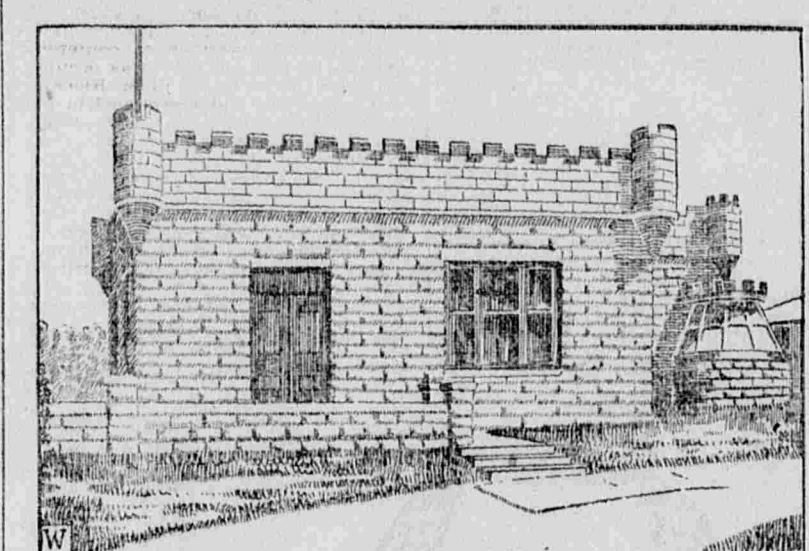

MALAD CITY, Ida., Aug. 8.—Today the funeral services over the remains of Mrs. John Herd were held at the tabernacle. Mrs. Herd was formerly Miss Babbitt of Malad. She has suffered greatly for two weeks with typhoid fever, which finally developed to a hemorrhage of the lungs.

The deceased leaves a husband and five children, besides relatives and friends, to mourn her loss.

Next Tuesday evening at the tabernacle, the tabernacle choir gives its second annual festival. Prof. Gleas is very enthusiastic over its success.

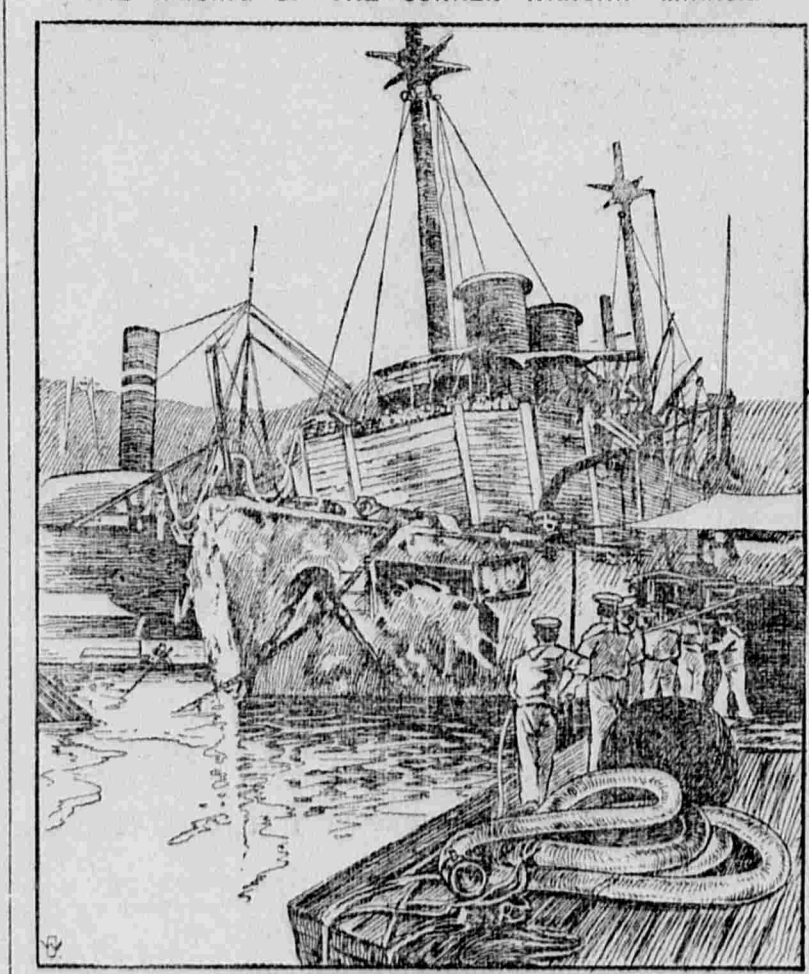

Mrs. John Fredrickson gave a hayrack party to her club members and friends Tuesday night. A dainty luncheon was served after the ride.

ART MUSEUM BUILT BY INDIANS.

The cut shows the Leupp art museum recently completed by the Indian students at Carlisle Industrial school. These Indian students not only raised this structure with their own hands, but the football team of the school earned the money for the material, using for the purpose all of the profits of the games played last year.

THE RAISING OF THE SUNKEN WARSHIP MIKASA.

The cut illustrates the engineering triumph won by the Japanese in the raising of the big Mikasa, which took fire and sank in the harbor of Sasebo during the late war with Russia. It seems that the Japanese never consider a vessel lost as long as she hangs together. After many months of patient engineering the Mikasa has been refloated, and she will be put in shape and resume her old position in the navy.

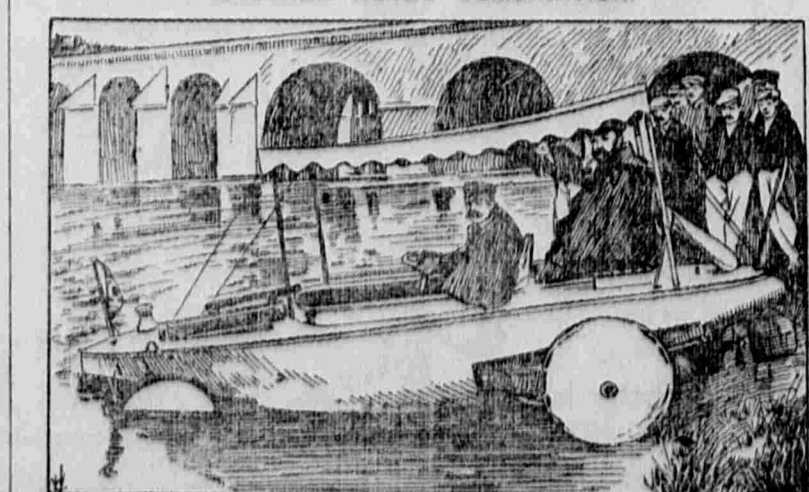

GERMAN WINE.

At home the German sparkling wine industry long remained neglected and even almost despised. A change set in after the war of 1870, when Germany was united and a national feeling aroused. Protected by the fiscal policy, the German sparkling wines began to be more and more used, their quality being steadily improved.

OLDEST SOLDIER.

The oldest enlisted man on the rolls of the United States army is Sergeant David Robertson of the hospital corps, stationed on Governors Island. He is a native Scotchman. He first enlisted May 27, 1854, and he has been in continuous service, having the extraordinary record of never having lost a day. He is seventy-four years old.

ANOTHER NOVEL COMBINATION.

The combined motor car and boat is now making its appearance in many places. The example shown in the cut is a Ravallier device of twenty horsepower which is being exploited in England. At a recent trial it made a run of thirty miles an hour.

CANYON COUNTY'S CREDIT HIT HARD

Commissioners Fail to Get Any Bids on the Issue of \$40,000 Bonds.

HAYWOOD TRIAL THE CAUSE.

Prospective Purchasers Fight Shy of The Proposition Since the Jury Brought in Its Verdict.

Special Correspondence.

PAYETTE, Ida., Aug. 8.—The county commissioners of Canyon county met in Caldwell yesterday for the purpose of opening bids for bonds amounting to about \$40,000, voted at the last general election for the purpose of building bridges across the Boise river at Middleton and Notus, and they found there were no bids offered. This aroused the suspicion that the credit of the county has been hurt considerably by the Haywood trial.

Some time ago the commissioners thought they had the bonds sold but the prospective purchasers kicked out of the deal by an alleged technical point which did not suit them. Before refusing to take the bonds they sent their attorney here to investigate, which was after the expenditures began to pile up in connection with the Haywood trial.

Since the case against Haywood was unfavourably to the state and it is a question whether the next Idaho legislature will vote to reimburse the county for the sum it has expended in connection with it, and in the face of the amounts that will have to be expended in the prosecution of the case against Pettibone, it seems that Canyon county's credit on the outside is not attractive enough to bring bids for county bonds.

The bonds will be advertised again at once.

DON'T BE BLUE

And lose all interest when help is within reach. Herbine will make that live. perform its duty properly. J. H. Vaughn, Elba, Ala., writes: "Being a constant sufferer from constipation and a disorder of the bowels, I have used Herbine for the best medicine. It has done for me what no other medicine has. I believe it to be the best medicine of its kind, and I will not get into any more trouble to know that good Herbine has done me. For sale by Z. C. M. L. Drug Dept., 112 and 114 South Main Street, B.

Talks on Teeth

By B. I. REX, M. D., D. D. S.

YOU MUST HAVE TEETH.

A man must have teeth. He can go through life minus arms, legs, eyes, ears, hair or any other portion of his anatomy and live, but he must have teeth or he will die.

Teeth prepare the fuel for the human engine—and if this fuel is thrown into the firebox, which in this case is the stomach—without preparation and without being ground up—then it is going to put the fire out.

You must have teeth. When man or woman is so unfortunate as to lose nearly all his or her teeth because of disease or poor dentistry, it is time to listen to what we have to say.

Delays are dangerous. If the stomach is abused it will not stand the abuse very long. Then comes the worst of all troubles—poor digestion.

When a man's stomach goes back on him he has lost his best friend. He deserves pity. The whole truth in nine cases out of ten is that he has not been maintaining his food—because he has lost his teeth. There are dark days ahead of you.

You must have teeth. Now for the bright side of the picture.

By the Alveolar Method we can supply real teeth in place of those that are lost—and put them in your mouth so they will act and feel like nature's teeth. We won't bore into the gums or hurt you. The work is practically painless. It can only be obtained in our offices in St. Louis, Denver, Salt Lake and Los Angeles. We own the patents on the process for this country and six of the foreign countries.

We mention this because other dentists, jealous of the marvelous growth of this business, claim to be able to restore teeth by the Alveolar method. Fight shy of these substitutes. They can't deliver the goods.

This business has grown from a small beginning to the present commanding position of the largest dental concern in the world—all in four years—because we have made good in the 10,000 cases that have come to us, and our business is increasing month by month. More offices must soon be added to the chain. Men must have teeth!

If you have lost nearly all your teeth, or are a victim of pyorrhea, and are threatened with the loss of all the rest, we have a great message for you.

We can supply those you have lost with the Alveolar method and cure the cause of the loose teeth—pyorrhea. Will you investigate this, now, before you get to a point where we can't help you?

If you can come to one of our offices we will examine your teeth without charge. If you can't come now, do the next best thing, send for our free book, "Alveolar Dentistry" which explains the method in detail.

This is the most valuable book on the teeth ever written, and it is yours for the asking.

Send for it today. That is the first step to take in order to get good teeth. Our charges are moderate—no higher than other first-class dentists would ask for the simpler forms of dentistry—because of the enormous volume of business done by us in our offices.

We straighten teeth, cure loose teeth and tighten them—all and crown teeth and all such work is done by experts. Alveolar dentistry calls for expert operators.

You may as well be in expert hands—the prices are equal.

Don't put this off. Write today. When teeth begin to go they go fast.

Don't be a "plate victim"—when it is not necessary. Send for book or come and see us. Rex Dental Co., 11
