WHAT IT MEANS TO LIGHT A CITY

Facts Which Should be Carefully Considered Before Reaching Rash Conclusions,

COMPANY'S PLANS FOR 1905.

Heavy Expense to be Met in Making Necessary Improvements for Better Service,

In view of the existing agitation directed against an enterprise which has been of incalculable benefit to this community, the following from the Ogden Examiner of Monday, March 27, is timely:

Anticipation is always sweeter than realization. When it was definitely settled that one of the greatest electric plants in the whole world was to be built in Ogden every citizen was puffed up with pride over the public benefit such a plant would mean to this city and the state at large.

After almost a decade of existence After almost a decade of existence the great light and power scheme, with its wonderful pipe line, its mag-nificent mechanical plant, and evi-dences of its utility on every hand, has almost, to the average citizen, been lost sight of as the grandest monu-ment of Ogden enterprise. The view is so close we lose the idea of immen-sity.

ment of Ogden enterprise. The view is so close we lose the idea of immen-sity. The plans of the original builders have, by force of circumstances, creat-ed largely by business necessity, been radically changed. The domin-ating idea behind the project was the manufacture of cheap power to be util-ized in all kinds of manufactories. The long distance from market, the double expense of importing raw material and again shipping the finished product to all parts of the compass to reach the trade, and the unwillingness to stake investments in a new country, the fu-ture of which could not be determined, combined as objections against the lo-cation of factories to any large extent from taking advantage of the cheap power offered, and so the company turned its attention towards the man-ufacture of electricity for light. The manufacture of power has been limit-ed to the demands of local concerns. Thus, in order to meet the real situa-tion, the manufacture of light was made the business of the company. In order to enter the field with some as-surance of success, the other plants which were in the field doing business, though of much smaller capacity, were added to the company's holdings at an expense which the original plans did not take into consideration. In this way the plants of the Citizen's Electric Light company, the Utah Power com-pany and the Salt Lake & Ogden Elect-tric Light & Gas company, Later the street car system of Salt Lake City tric Light & Gas company, were com-bined with the new company. Later the street car system of Salt Lake City was added to the other holdings, in or-der to get a consumer for the power, which was being manufactured but not utilized. These various combinations increased the capital of the big concern until the original value of \$1,500,000 was Augmented to \$4,000,000. The stock is held in equat amounts by Utah and eastern capitalists. be greatly reduced. In addition con-siderable saving will be effected by the management and increase in the feeders for the railway system, which is now being carried out. Further economics have been effected by changing the transmission volt-age from 16,000 to 28,000; and still more will be gained when the voltage t the city lines is changed from 2,000

to 4,000. With all these economies effected, it is expected that the maximum demand on the system for the coming winter will not exceed that of last winter, when the maximum demand did not exceed 9,500 horse power, except on a few nights when it ran up to 11,000 horse power for a few hours at a time. Last fall the company added the Last fall the company added the Bear river power house to its re-ources. This was started on Dec. 22, sources. This was started on Dec. 22, but only one of the two generators has been needed, and a third generator is now being added. This power house will have a capacity of 4,000 horse power by October next, and up to date rot more than 1,500 horse power of the capacity has been drawn upon during the past winter.

The company will have at its dis-posal, after making allowance for the receing up in the canyons, 12,000 horse power from water power plants, and 2,000 horse power, from steam plants.

AMUSEMENTS.

Last night at the Theater was one of the occasions that might almost be said to mark an epoch in amusements, if not to the average theater goer, certainly to the average theater goer, certainly to the lover of music. Sait Lakers not fortunate enough to be able to visit the big cities of the country, have yearned for years to see a production of standard opera, one in which the orchestra, chorus, principals, and mounting, should all stand abreast of each other, and interpret a score and a libretto as they came from the hands of their makers. Such an opportunity has been denied us for almost a gen-eration. Some there were in last night's eration. Some there were in last night's audience who recalled the beautiful performances of the Emma Juch company seventeen years ago, and the glimpses of grand opera which Emma Abbott occasionally furnished in such performances as "Mignon," and "The Bohemian Girl." Those whose mem-ories ran farther back, recalled Maas, Carleton, Castle, Zelda Seguin, Annie Carleton, Castle, Zelda Seguin, Annie Beaumont, Peakes, and others who belonged to the strolling singers of over a quarter of a century ago. Oc-casional one night feasts we have had, too, in the long ago, when Ma-pleson's companies filted past to San Francisco, the most memorable of whose visits was the great production of "Lucia" by Gerster. But to the great proportion of the present day generation, grand opera as it is seen in the big centers, was only a tradition. In the big centers, was only a tradition, and a Wagnerian production especially, one of the misty things to be thought

one of the misty things to be thought of only in dreams. With the fame of the Savage com-pany, therefore, and the wide advance advertising it received, it is small won-der that the Theater last night proved too small to hold the throngs that de-sired to attend the production of "Lo-hengrin." The house was a beautiful one in appearance and in numbers, even the galleries being thronged with handsomely gowned people unable to obtain seats below, and much of the standing space up stairs and down be-ing occupied. In money results the box office perhaps did not tell so elo-quent a tale as at the "Ben Hur" or box office perhaps did not tell so elo-quent a tale as at the "Ben Hur" or "Mother Goose" performances, a re-sult, however, solely due to the fact that nearly 160 parquet soats, which would have readily sold at \$2 each, had to be removed to make room for Mr. Savage's big orchestra. While mentioning the orchestra, it can be said that, beautiful and admir-able as the whole presentation was, it

able as the whole presentation was, if is to the orchestra that much of the highest praise should be given, if not indeed the very highest. The instru-mentation was about 40 strong, under the baton of a skilled director, and contained a number of performers, es-pecially the harpist and the brass players, who were undoubtedly artists. The strings too, worked with beautiful precision, and the mammoth bursts of ound that arose in some of the characteristic Wagnerian crashes were little short of electrifying. But it is difficult indeed to select any one feature of the grand presentation and give it preference over the others. Mr. Savage's company is built up on the admirable principle that the works of the masters call for all round excellence rather than for the employment of any one star, the principle on which the most famous theatrical stock com panles of the world are organized, and the one which, when carefully followed, is most pleasing and flattering to intel-ligent audiences. In the cast of "Lo-hengrin," each character stood abreast of the others, and all rose ful-ly to the occasion. It would be flattery to say that there is a Nordica, a Schumann Heink or a DeReszke in the list of principals, but a Decession of the list of principals, but it is none the less frue that the dis-tance between Savage's singers and those of Corried, and the margin be-tween their productions as a whole, is astonishingly small. Indeed, that Savage's presentation should be able to im-part so much of the true artistic at-mosphere of a Wagnerian work when mosphere of a wagherain work when rendered in our own tongue, was a mat-ter of wonderment to many last night, who had supposed that Wagner could only be presented fully and truthfully in the original German. To all such, Savage production was almost a Mr. Wegener, the tenor, in the part of Lohengrin, caught the fancy of the audience from the moment of his first beautiful entrance, when drawn by the swan, he appeared in answer to Elsa's prayer. His volce, a full, ringing tone, its greatest beauty showing in its soft passages (at which times it is reminis-cent of Nat Brigham's), rang out in fervid style, and did full justice to all the vast difficulties of the score. His acting, too, was full of grace and feel-ing, and he left the impression that he was an artist of undoubted attain-ments. Miss Bennyson, the soprano, has the style of volce, manner and ap-Wegener, the tenor, in the part ments. Miss Rennyson, the soprano, has the style of volce, manner and ap-pearance that eminently fit her for roles like Elsa. She was an ideal Ger-man princess, and her volce—a full and powerful one—also met all the require-ments. Miss Rita Newman, in Schu-mann Heink's famous role of Ortrud, did the wost dramatic acting and sing-ing of the work and proclaimed herself and the roost dramatic, acting and sing-ing of the right, and proclaimed herself an undoubted actist in every respect, except that of enunclation. She might well study in this respect from Miss Rennyson. Mr. Goff, the baritone, in the part of Telramund, has a ringing voice, and is a fine actor. The part is voice, and is a fine actor. The part i one of great difficulty, but the dust be tween him and Miss Newman was on of the most dramatic hits of the night of the most dramatic hits of the night. Mr. Bennett, who looked the imposing part of the king sang his music in good fashion, while Mr. Richards as the heraid sang his music correctly. The chorus, number-ing about 60, rose to the ensemble oc-casions with immense force and power,

And the second sec

and the beautiful bridal chorus, one of the few moments in Lohengrin when Wagner seems to have unbent, was given in charming fashion. The choral opportunities, however, will come more fully in the other operas, especially "Carmen" and "Tannhauser."

Tonight's opera "Carmen," will be presented by another and entirely new cast, Miss Marian Ivell appearing in the title role, Miss Jean Lane Brooks as-suming the part of Micaela, Mr. Rob-erts, the tenor, the role of Don Jose, and Mr. Arthur Deane, the baritone, the part of Escamillo.

Much of last night's enjoyment was spoiled by late comers. Half the audi-ence came on time at \$ o'clock, the hour set by the advertisements to enjoy the overture to "Lohengrin;" the other half came in late and absolutely runed many of the features in the rendition. "Carmen" tonight begins at \$:15 sharp: "Tambauser" temorrow afternoon at 3 . . . "Carmen" tonight begins at 8:15 sharp: "Tannhauser" tomorrow afternoon at 3 sharp, and "LaBoheme" tomorrow night at 8:15 sharp. In "Tannhauser" Miss Rennyson, Miss Newman, Mr., Wegener, and Mr. Bennett again ap-pear, and tomorrow night will be the only appearance of Mr. Sheehan, the high tenor. Miss Ivell, Miss Brooks, Mr. Goff and Mr. Bennett will also be Goff, and Mr. Bennett will also be in the cast.

The scenes in the lobby and around the box office between the various acts last night were specially animated, many local musicians grouping together and talking enthusiastically of the rare treat they were experiencing, and each giving his individual views as to the interpretation. Among others seen were Prof. Shepherd, Squire Coop, Mr. Kent, and Professors Lund and Ander-son of Provo, all more or less excitedly exchanging ideas.

The advance sale for "The Marriage of Kitty" opens at the Theater box office tomorrow morning.

Harry Corson Clarke last night opened the last of his six weeks' en-gagement at the Grand before a fair sized house. "Mr. Foster of Chicago," a clever three-act comedy, was the ofa clever three-act comedy, was the of-fering, and like each of its predeces-sors, proved to be without a dull mo-ment. As usual, Mr. Clarke held the center of the boards, but in a role entirely unlike any of his previous ef-forts. This time he was John Philip Macready Foster, a character actor of the old school, who has come from Chi-cago to assist in an amsteur performcago to assist in an amateur perform-ance at Bridgeport. The complica-tions grow out of the fact that a detec-tive, the author's mother-in-law and the leading lady's husband, overhear a rehearsal and believe that a deep plot is thickening around them. The result is wholesale arrests, with a final clear-ing up of mysteries, and a final curtain with Foster of Chicago in the center of the stage offering to sell his photo-graph at seventeen chances for 35 cents, Margaret Dale Owen was less happily graph at seventeen chances for 35 cents, Margaret Dale Owen was less happily cast than usual. She had to scowl fre-quently, and try as she would, the au-dience refused to believe sha could do it. She made the same stunning display in gowns, however, as when her lines were in her natural field of smiles and fetch-ing glances, and despite her efforts to look shewaish she played the favorite ook shrewish, she played the favorite

OTHERS WILL ARRIVE TONICHT. Manager Reilly Rather Quiet, but Says His Men Are a Bunch Of Winners. The advance guard of the Salt Lake baseball team arrived in Salt Lake this morning and is now quartered at the Southern hotel where they will be

and a so a second to the sound

joined tonight by 10 more who are coming in from the northwest. The four men who came from Portland, Or., this morning and reported to Manager Reilly are O. W. Ecklund, Charles Crisp, George Mead and John Morton. The first named is a catcher, the second two are pitchers and the fourth man is an infielder. Beyond this information Mr. Reilly is silent for the

information Mr. Reiny is sheat for the present; neither will he announce the names of the 'mysterious 10 who are due here tonight. Aside from the state-ment that they are good men, and that Sait Lake is to have a winning team this year, genial Mr. Reilly is as mute as the proverbial bivalve.

SALTAIR IMPROVEMENTS.

Lower Floor Will be Enclosed and Big Dining Room Built.

This morning the Saltair Beach company closed another contract with the Salt Lake Building & Manufacturing company of a nature that would indicate that the popular resort is going to bid strongly for patronage this season. In addicton to enclosing the lower deck, or lunch floor, with aiding sashes which will keep the big fower floor sinug and dry during the heaviest gale, the con-tract calls for the erection of a big diningroom and up-to-date kitchen. The diningroom, which is to be located at the southeast corner of the pavilion and is to extend south, will be 40 feet by 60, and the kitched 26x16. Work is to be commenced at once so that everything will be in good running order when the resort opens for the season. With the completion of this contract both floors of the big pavilion will be enclosed, should the weather at any time call for such a move. Under hor-mal conditions, however, the resort will be open to the balmy breezes of the lake as heretofore. cate that the popular resort is going to

lake as heretofore.

TO CURE A COLD IN ONE DAY

Take Laxative Bromo Quinine Tablets. Druggists refund money if it fails to cure. E. W. Grove's signature is on hox. 25c.

FUNERAL OF MRS. CANNON.

The funeral of Mrs. Ann Amanda Cannon, wife of President Angus M. Cannon, will be held in the Fourteenth ward assembly rooms tomorrow, Wed-nesday, at 1 p. m. Friends are invited ntle PATENTS AND POSTMASTERS.

Pawson was politely told to get out into the yard to await the arrival of the isolution hospital wagon and a rep-resentative of the board of health. In due season both arrived and the patient was taken away. He claims to have relatives in this city whom he proposed to visit. The social call has been post-

to visit. The social call has been post-poned. Three cases of smallpox were report-ed to the board of health today, one of which is that of the 3-weeks-old son of William Snider, who resides at 160 south Tweith East street. The other cases are Ida and June Russell, agos 9 and 21 years respectively, residing at 455 south Eighth East street.

BAD MAN AND GUN.

Cleared Restaurant at Murray in Quick Time.

Jim Whitaker of Murray started out yesterday afternoon to take on a full cargo of Murray whisky, and ended the day by driving the diners out of the Dewey restaurant with a big six-shooter and then going with Marshai Mauss for a night in the city bastile. Jim ordinarily is known as a peace-able and good citizen but vasteday ha able and good citizen, but yesterday he had domestic troubles, with his wife ac-tively engaged in the other side of the quarrel. A big drunk was the only way he saw to bring quiet to his troubled feelings, and the attack on the restaur-out random grade of a plan to raise teenings, and the attack on the restaur-ant rapidly grew out of a plan to raise plenty of noise in general. He entered the restaurant preceded by the business end of the gun, and told all those within to clear out on pain of being scattered over the floor. Once in complete posses sion he loosened up a bunch of Indian war whoops, which continued unti war whoops, which continued until Marshal Mauss arrived, and pursuaded him to come out and accompany him to a nice bed he had waiting up at the At last reports he was sleeping soundly.

PADDING THE LISTS.

"Straw" Committees Formed to Pro test Against Light Franchise.

The morning papers are making strenuous efforts to swell the list of those opposed to the granting of the light franchise. It will be remembered that at Sunday night's meeting a citithat at solutary lights historing a chi-zens' committee was appointed, a great many of whose names were used abso-lutely without authority. Now comes a supplemental list with similar ear-marks attached, the names of a number

marks attached, the names of a number of influential citizens having been add-ed thereto without permission. Among those who discialm any con-nection with the so-called "People's Protective Committee," which is sched-uied for a meeting at the Commercial club tonight, is Hon. John T. Caine, who says he is not in sympathy with the movement and will have nothing to do with it. Others have also ex-pressed their disapproval of the tactles pursued, and have given their assur-ance that, despite the use of their names, they have no connection whatpursued, and have given their assurance that, despite the use of their names, they have no connection whatever with the scheme. Here is the list: John James, Bernard J. Stewart, D. O. Willey, James Christiansen, Glen Miller, James H. Moyle, George Sutherland, E. H. Callister, J. U. Eldredge, Jr., Ashby Snow, A. B. Irvine, Joseph Lippman, Joseph A. Silver, P. W. Madsen, Heber M. Wells, S. H. Love, Ray Van Cott, Daniel Harrington, John Hughes, J. M. Marrlot, C. Frank Emery, F. S. Richards, R. K. Thomas, John H. Bailey, John T. Caine, Spencer Clawson, Samuel C. Ewing, J. B. Cosgriff, G. F. Culmer, J. A. Cunningham, J. J. Daynes, Jr., H. M. Dinwoodey, James W. Dwyer, Edward Jenkins, Thomas Kearns, George F. Felt, C. J. Foulger, James Sabine, John A. Maynes, S. L. Moyle, P. J. Daly, A. C. Nelson, C. S. Tingey, Mathoniaha Thomas, C. M. Nielsen, R. W. Sloan, H. S. Tanner, George W. Morgan, Hugh Watson, C. S. Zane, C. W. Midgiey, M. S. Woolley, C. R. Savage, L. S. Hills, W. W. Riter, Albert S. Reiser, James Chipman.

block 57, plat C, Salt Lake City survey, and several other parcels of land in the city and county.

A petition for letters of administra-tion of the estate of John Tuddenham deceased, has been filed in the probate division of the district court by W. J. Tuddenham, who asks to be appointed administrator of the estate. The estate consists of real property of the value of \$6,000.

Charles Kamerle has filed suit for divorce in the district court against Christine Kamerle, on the grounds of drunkenness and infidelity. They were

married in this city on March 29, 1893, and have two children, of whom plain-tiff asks the custody.

LATE LOCALS.

Local furniture dealers report grati-fying condition of the spring trade. Judge W. R. White, assistant attorney general, has resigned, his resigna-tion to take effect the first of the month.

Mrs. H. S. Cutler and Mrs. E. A. Lambourne will entertain about 50 friends Wednesday afternoon at the latter's home on First street.

National Bank Examiner Béebe drop-ped in on the Commercial National bank this morning, entirely unan-nounced, only to find the bank like the five wise virgins, its financial lamps trimmed and burning.

Mrs. W. E. Clements and three chil-dren, who reside at \$50 Palm ayonuo, are reported as having smallpox. One case of scarlet fever was reported to the board of health today, that of James Cook, aged 12, residing in the rear of 26 wast Coventh South Street rear of 206 west Seventh South street.

Prof. Swendsen is preparing an ex-haustive report of his investigations over the Weber river watershed, and which will be taid before the consulting engineers, Messrs, Savage and Davis, on their arrival in this city Wednesday or Thursday. The report will then be sent to Washington. sent to Washington.

Warren Jones, "doing time" in the Carbon county jail for involuntary manslaughter, filed petition with the state board of pardons for pardon. He was sentenced last June to one year. Thomas McGee, sentenced in this city, Dec, 27, 1902, to nine years in the state prison, for manslaughter, files petition for commutation of sentence.

The skies are clear today, but there this way from the northwest, threatening to shut out the high area prevail-ing here; and so the weather office here predicts possibly rain or snow to-night, or Wednesday. The average temperatures are steadly rising all over the country.

The committee of officers from the national guard appointed at Thursday evening's meeting to consider plans for the organization of an Officers' association, met last evening at the armory and decided to send to national guard headquarters in Nebraska, Ohio, New York, Pennsylvania and California for such information as might enable them to formulate satisfactory plans.

The \$7,000 Peerless automobile, which Wallace Bransford and friends made a tour of southern California, armade a tour of southern California, ar-rived in this city yesterday, and is the object of admiration on the streets to-day. While in California, the car ran into a deep mud hole, from which the might of six horses was unable to ex-tricate it, so that in addition a block and tackle had to be resorted to. The car accommodates five people easily, and is a handsome affair. and is a handsome affair.

The case of the State of Utah against The case of the State of Utah against George Williams, charged with grand larceny, is on trial before a jury in Judge Armstrong's court today. Wil-llams is charged with stealing a bug-gy from Chris Christensen on the night of Dec, 1, 1904. The value of the buggy is \$125. Williams also has another complaint against him for grand lar-ceny and he will be tried on that case tomorrow. He is being defended by Afty, J. F. Smith, and the state is rep-resented by Dist. Atty. Loofbourow.

DIED.

Few people realize that in a concern Few people realize that in a concern capitalized at such a stupendous figure, the chief expense is in the deteriora-tion of machinery and the constantly increasing demand for betterments. In 1804 the one item of expense for betterments amounted to \$275,000. This year the changes and improve-ments in one street in Salt Lake will ments in one street in Salt Lake will cost \$80,000, while the total cost of new machinery and necessary changes will figure in the neighborhood of half a million. It can thus be readily understood why the company must be assured of a certain fixed income and have a clear idea of future busi-ness in order to provide for all exi-

Among the changes contemplated for 1905 is the building of a steam plant at the company's site on South Temple and Tenth West streets, to be used in and Tenth West streets, to be used in case of emergency, and also to provide power during periods of maximum de-mand. It also provides for a trans-former station on the same site at which will be received the power from Ogden, Cottonwood and Bear river power houses, and from the Telluride Power company's plants. From the transformer house the power will be transmitted over heavy feeders located on First and Second South streets to the West Temple station. This will provide a duplicate line of supply for this station, which is to be used as a distributing station for all power used in Salt Lake City, including street railway, power for elevators and power used in Sait Lake City, including street raliway, power for elevators and other mechanical purposes and for all lighting. All other stations in Sait Lake City will be closed up, except the Citizens' station, which will be used, only in emergencies. Work on the West Temple street

Work on the West Temple street station was commenced in November, 1903, and up to November 1904, there will have been spent about \$100,000 in re-equipping and modernizing this sta-tion. The poor has been recovered: the old floors torn out, a basement ex-cavated, new concrete floors support-ed on steel girders have been put in and a freproof gallery for switchboards has been built. A 20-ton crane to han-dle the machinery has been ordered, a new motor-generator weighing over 60 die the machinery has been ordered, a new motor-generator weighing over 60 tons has been installed and a second one is on order, part of the machinery has already been brought from the rail-way sub-station on Second East street, and the rest is being moved over now; switchboards are being erected and ap-paratus for regulating the lighting cir-cuits, now at the Fourth West station, together with additional regulators on order will soon be erected. The power will be brought into the building from the Jordan station by

The power will be brought into the building from the Jordan station by cables laid in underground conduits, and conveyed to the switchboards in the gallery. Thence it will be convey-ed to the several light and power circuits of the city, passing first through automatic regulators which will maintain a constant voltage on all the lighting circuits, irrespective of any demands on other parts of the system. Power for operating the railway will be conveyed from the switch-board on the gallery to the machines, which are used to convert the alter-mating current power, generated at the water power and steam plants, into the direct current power resulted for the direct current power required for the railway. This machinery consists of rallway. This machinery consists of two 750 horse power rotary transform-ers, built by the Westinghouse Electric and Manufacturing company in 1897, generation of the statement of the second and two 1,000 horse power motor-gener-ator sets, also built by the Westing-house company, one of which was put in operation in January, the other to be running in October next.

This station being built in the very center of distribution is ideally situ-ated for serving the city. It is large enough to meet all future demands. and when complete will be up to date every respect.

In every respect. By the concentration of stations and the consequent pincing of the control under the hand of one operating en-gineer, the maximum demand upon the water power and steam stations will

IRRIGATION IN WYOMING.

Capt. Hammond, Government Expert Tells of Work Near Cody.

Captain E. A. Hammond, the drill expert of the reclamation survey, re-turned last evening, from a month's absence from headquarters on business of the survey. He reports satisfac tory progress in the work on the Sho shone river dam above Cody (Wyo.) and advantage having been gained by discovery a little further up the any discovery a little further up the can-yon of a site where the dam founda-tion will have to be sunk 60 feet in-stead of 80, as at the former site. It will, however, require four or five years to build this dam, owing to the peculiar difficulties attending the work of condifficulties attending the work of con-struction in such a situation. The canyon is of the box variety, and very high, and in the flood season, as much as 25,000 second feet flows through So the construction can only there. carried on for the first year or two in hitches, and temporary diversion dams will have to be used in the pri-mary stages of the work. But after the foundations are in and the water tunnel excavated through the side of the canyon, construction can be pushed right ahead without any delay what

Captain Hammond brings back with him photographs showing the new roadway tunnels cut through solid rock, 14 feet high, and one of them 100 feet long. He also has photographs of the beginnings of the work on the new dam for the Palouse river project, where Capt. Hammond has been of late.

RUNAWAYS BROUGHT HOME.

Clarence McCornick, aged 12 years, f Chestnut court, and Joseph Matthews aged 10 years, of 435 west Seventh outh, were brought back from Woods cross this morning to be returned to their homes. The youngsters ran away yesterday and started for Ogden. They walked to Woods Cross where they were taken into custody. When asked why they ran away, they said: "Oh, jes fer fun."

THE NEVADA-ALPINE.

W. P. O'Meara Decidedly Pleased With Conditions There.

A letter was received during the day from W. P. O'Meara, now at Tonopah, who recently left San Francisco with an expert to make an examination of he Nevada-Alpine mine on Lone moun.

In speaking of conditions at the mine he stated that the reports published re-cently relative to late developments had not been exaggerated; that the property is certain to become a big pro-ducer. He closed by saying: "It is simply great." Mr. O'Meara is not expected home

until next Week.

OLD FOLKS AT GRAND.

Veterans of Salt Lake Guests of Hono, Of Harry Corson Clarke.

The familiar saying, "There's many a slip twixt the cup and the llp" was Today was a gala event for the old folks of Salt Lake. They were guests certainly true in the case of a young folks of Salt Lake. They were guests of honor at a special matinee of the Harry Corson Clarke company at the Grand theater, and when the curtain went up on "Mr. Foster of Chicago" it was before a house crowded with the older generations, presenting an inspir-ing illustration of the kind of people who have grown old in the building of the west. The distinctive badges of the old folks were everywhere in evi-dence, the red designating those beman who, with his sweetheart, secured a marriage license in the county clerk's office several weeks ago. According to a letter received today from the young man by County Clerk Eldredge, it ap-pears that, after the license was secured, the bride-to-be changed her mind, as women sometimes do, and de-cided that she did not want to marry the old folks were everywhere in evi-dence, the red designating those be-tween 70 and 80 years of age, predomi-nating, with a light falling off of the plue that marks those between 80 and 90, and a heavy decrease in the white, designating those over 90 years. The gallery was filled with orphans from the different orphan-homes in the city, whose childish laughter mingled with All efforts to induce her to marry him have failed thus far, and the disap-pointed lover now writes and wants to know if the license could be transferred o some other young lady or, in the went that the bride-elect could still be induced to marry, if the license would still be good. County Clerk Eldredge informed the whose childish laughter mingled with whose children laughter mingled with that of the old folks in enjoyment of the clever performance. The street car conductors accepted the badges of the old folks as fares on the cars to and disappointed man that the statute of limitations does not run against mar-riage licenses and that if he can win the girl back again, the license will be good, but that it cannot be transferred from the performance. to another young lady. The clerk awaits with much interest further in-formation and proceedings in the case.

Nurses Want Compensation.

Suit was filed in the district COUL this afternoon by Teresa Hackford against W. C. Burgon, administrator of the estate of Ishmael Phillps, deceased, to recover a total of \$784.75 al-leged to be due plaintiff and Thomas and Elizabeth A. Hackford for services rendered in nursing the deceased dur-ing his last illness.

O'Brien Guilty.

The jury in the case of the State of Utah against John L. O'Brien, charged with criminal assault, returned a verof guilty yesterday afternoon in Judge Armstrong's court. The crim for which the man was convicted is criminal assault upon his 9-year-old stepdaughter, Hattle Sharkey, alleged to have been committed on the night of May 9, 1903. Judge Armstrong will den rallway on Third West and South Temple streets and convert the same into coin of the Republic contrary to any 5, 1803. Judge Armstrong will pass sentence upon defendant on March 30 at 10 o'clock. The penalty for such a crime is imprisonment in the state prison for not less than five years. the statutes. George says that it is all
