AXTELL.

Golden Wedding of Mr. and Mrs. Rasmus Knudsen.

Special Correspondence. Axtell, Sanpete Co., Sept. 17.—Last Saturday the 14th inst., will long be remembered by their many friends as the golden wedding of Rasmus Knudsen and wife, Helene, at little Cottonwood.

Unaware to the old folks, who live across the street from their son, Rudolph, a number of friends and relatives gathered at the latter place, and when everything was in readiness the old folks were informed that some of their friends wished to see them. When the venerable pair appeared the greeting they received rather astonished them. Tables had already been set with good things and a bride and groom and guests sat down to a delicious supper.

The sentiments expressed by Christian Orlov and others were touching and appropriate, referring to many kind deeds of the Knudsen in early days to friends and also to our mutual friends both in their old and new homes.

The evening was spent pleasantly with music, songs and recitations. The merriment was kept up till a late hour, and all were happy, the old couple (Mollie-bigger and wife) particularly so.

OUR NEIGHBORS.

IDAHO.

Weekly Crop and Weather Bulletin.

Special Correspondence. U. S. Department of Agriculture, Idaho Section, Climate and Crop Bulletin of the Weather Bureau.

Boise, Idaho, Sept. 17.—Throughout the week the temperature in all parts of the state averaged below the normal and frosts were of frequent occurrence, not only in the elevated sections, but in the valley districts. On the 11th and 12th showers occurred in the northern counties. In other sections of the State the weather remained fair.

CROPS.

Fruit: Cool nights having prevailed over the fruit districts for more than ten days has resulted in ripening the fruit as rapidly as is desirable. Fall apples and melons and some varieties of grapes are being picked. While the fruit crop is much lighter than the average, the quality is very satisfactory, except in apple orchards having light yields, which are thought to have increased probably as the result of neglect.

Hay and Grain: Threshing is practically complete in many of the western sections, but is still progressing in the eastern counties. The conditions as to yields are about the same as reported in previous bulletins. In northern sections the yields exceed the average; in sections well irrigated the results are very satisfactory and crops generally below the average and in many instances extremely light.

The alfalfa harvest continues, but the cool nights have retarded growth to such an extent that haying for the present season is nearing its close. Farmers are busy baling and shipping the hay to market.

Vegetables, melons and corn show the effects of the recent cool weather and frost. Corn and potatoes are maturing and cantal
