ANOTHER CUT-OFF FOR ROCK ISLAND

New Line Which Will Clip Off Considerable Time.

AFTER MAIL CONTRACTS.

Route Between Chicago and Kansas City to be Reduced Thirty-five Miles.

The management of the Rock Island road has had a survey made for a new line which will reduce the distance of the present route between Chicago and Kansas City by 35 miles. The track will be laid from Eldon, Iowa, to Trenton, Mo., and it is understood that the grading will begin early next spring.

The new move on the part of the Rock Island is another indication that there is going to be a struggle among the Kansas City lines for the bulk of the traffic, says the Chicago Times-Herald.

While no official statement has been made by the Rock Island management, it is understood that when the new spur is in operation there will be a slash in the schedule time, and a strong bid will be made for Chicago-Kansas City traffic, both freight and passenger.

It is probable that when the mail contracts are again bid for the Rock Island will be a competitor of the Burlington, which now hauls the mails. Rich coal fields lie in the territory which the new line will tap.

Another Scenic Road.
The purchase of the Niagara railroad by the O. R. & N. has revived the old rumor about the road building along the north bank of the Columbia, which would give an all-rail line to the Washington resorts, or the extension of the beach road to Frankfort, where it would connect with steamers not dependent upon tides. According to all signs, one of these roads will be built in time, and the all-rail route has much the better show.

The O. R. & N. officials say that the road has no present intention of carrying forward either of the plans. It is known for a fact, says the Portland Telegram, that a route has been surveyed by engineers in the employ of the O. R. & N. company's interests.

Union Pacific Improvements.
Francis B. Choate returned this morning from a trip on the Wyoming division of the Union Pacific. He brings back with him the information that the work inaugurated under the regime of President Burt upon the big track improvements of that system is being pushed to the limit and that the big 40-mile cut-off from Rawlins will be thrown open to the regular traffic within the next two weeks.

He states that already ten miles of the cut-off (between Rawlins and Solon), is now part of the main line and that trains commenced running over the new road bed last Wednesday.

When these improvements now under way are perfected, several hours will be lopped off the running schedule between Omaha and Ogden.

Spikes and Rail.
General Agent Ben Nevins of the Denver & Rio Grande has returned to town.

General Superintendent A. E. Welby will return from his inspection trip down the line tomorrow.

One of the last Ogden canyon excursions of the season will be run over the Rio Grande Western tomorrow morning. The special will leave Salt Lake at 9:30 a. m., to return, leaving Ogden at 7 p. m.

John McGuire, a machinist in the employ of the Oregon Short Line at Pocatello, was brought to St. Mark's hospital last night, suffering from a splinter of steel in his eye. An operation is deemed necessary.

Vice Presidents Cornish and Bancroft and General Superintendent Colvin of the Oregon Short Line left last night on a special train for northern Idaho. After a thorough inspection of the road in that direction they will return to this city this evening.

Joseph A. West, constructing engineer of the S. Y. railroad, was in from the front yesterday and reports construction progressing rapidly. Seven miles of grading from Sumpter toward Whitney are completed and rails have been laid for a mile or more—Baker City Democrat.

J. C. Bland, an eminent bridge engineer of the East, left this morning in company with Chief Engineer Yard of the Rio Grande Western for a trip over the main line. This inspection is a preliminary to the substitution of modern plate girders for the wooden bridges and culverts between Salt Lake and Grand Junction. This change is deemed necessary on account of the heavy engines that are now being used over the main line of the system.

Hill's big tunnel in the Cascades on the Great Northern system will in all probability be completed, as far as the boring is concerned, within the next two weeks. More than 800 men are at present engaged upon the tunnel, and so far, the amount paid out for labor is more than \$2,700,000. It is estimated that when the 14,000 foot tunnel is completed that it will have cost the company in the neighborhood of \$4,000,000.

R. A. Donaldson, assistant general passenger agent of the Southern Pacific, is in a recent interview in Chicago, said that by November 1 the company's new Pacific coast line would be opened to traffic. The line is 430 miles long, extending from Santa Barbara to San Francisco. It skirts the ocean for 100 miles, traversing the fertile Santa Clara valley. The intention of the company is to use the new road as a part of the main line handling much of the traffic over it that now is being routed through the San Joaquin valley.
