BOOK BINDING AND PAPER RULING

GEORGE Q. CANNON,
EDITOR & PUBLISHER.

## BREVITIES.

An exchange describing a funeral says: "The procession was very fine, and nearly two miles in length; as was also the prayer of Dr. Perry, the Chaplain."

A case is recently said to have occurred beyond the skill of ordinary oculists. It is that of a young lady who, instead of a pupil, has a college student in her eye.

A client remarked to his solicitor, "You are writing my bill on very rough paper, sir." "Never mind," was the reply of the latter, "it has to be filled before it comes into court."

Cecil Logan Kellogg has given up her Treasury clerkship in Washington, to take a place on Don Piatt's newspaper; and Grace Greenwood, tired of literature, asks Secretary Boutwell to give her the first vacancy in his Department.

"Don't your think my son resembles me?" asked an apothecary, as he introduced his greasy-faced boy to the witty Dr. H. "Yes," replied the doctor, pretending to scan the physiognomy of each. "Yes, I think I see your liniments in his countenance."

The simplest and cheapest way to cool a room is to wet a cloth of any size, the larger the better, and suspend it in the place you want cooled. Let the room be well ventilated, and the temperature will sink from ten to twenty degrees in less than an hour.

The collection of skulls from the battle-fields of the Franco-Prussian war is mentioned by a German writer as an opportune means of adding to our knowledge of ethnology. He urges particularly the importance of obtaining a good series of skulls of Turcos and other African tribes represented in the French army.

Sponge paper, a French novelty, is said to have all the peculiarities of sponge, absorbing water readily and remaining moist for a long time. It has been used as a dressing for wounds with considerable advantage. For its fabrication, evenly and finely divided sponge is added to ordinary paper pulp, and worked as in a common paper-making apparatus into sheets of different thickness.

The New York *Mail* says: "Another sign that the millennium is at hand—for here is something new under the sun at last. Our local Jehus last night held a meeting and formed a Low Fare Association, agreeing not to charge any more than fifty cents for a single passenger and trunk to any part of the city. We regard this as the most astounding event since the discovery of America."

A gentleman was one day composing the music of a rondeau for a lady to whom he paid his addresses. "Pray, Miss D.," said he, "what time do you prefer?" "Oh!" she replied, "any time will do, but the quicker the better." The company smiled at the rejoinder, and the gentleman, it was surely thought would take her at her word, but he didn't.

THE San Diego *Union* of July 27th, gives us the annexed: "Mr. George McCombe, who came in the other day from the Indian Wells, informs us of the death of two soldiers who perished of thirst on the desert. He says that three soldiers started from the Wells for Carisa Creek, a few days since, on foot; they were somewhat under the influence of whisky, and took some liquor with them when they left. A day or two later some Indians brought one of the men back to the Wells in almost a dying condition, and reported that the other two were dead. It seems they had lost their way and traveled in the burning sun without water, until they sunk utterly exhausted. The Indians discovered the third man just in time to save his life."

Tobacco grows something like cabbage; but I never saw none of it boiled, although I have eaten boiled cabbage and vinegar on it, and I have heard men say that cigars that were given to them on election day for nothing was cabbage leaves. Tobacco stores are mostly kept by wooden Injuns, who stand at the door and try to fool little boys by offering them a bunch of cigars which is glued into the Injun's hands, and is made of wood also. Hogs do not like tobacco; neither do I. Tobacco was invented by a man named Walter Raleigh. When people first saw him smoking they thought he was a steamboat, and as they had never seen a steamboat, they were frightened. My sister Nancy is a girl. I don't know whether she likes tobacco or not. There is a young man by the name of Leroy who comes to see her. I guess she likes Leroy. He was standing on the steps one night, and he had a cigar in his mouth; and he said he didn't know as she would like it; and she said, "Leroy the perfume is agreeable." But the next morning, when my big brother lighted his pipe, Nancy said, "Get out of the house, you horrid creature, the smell of tobacco makes me sick." Snuff is Injun meal, made out of tobacco. I took a little snuff once, and then I sneezed.

Per WESTERN UNION Telegraph Line

### WASHINGTON, D. C.

**Report on the "Westfield" disaster.**

WASHINGTON, 19.—The board of inspectors appointed by Secretary Boutwell, to inquire into the cause of the *Westfield* explosion, have reported that in their opinion the explosion was produced by a pressure not much in excess of twenty-seven pounds; that the flaw in the boiler was in when made; that the inspector did his duty conscientiously, but the flaw was where he could not see it; that engineer Robinson was guilty of a direct and wilful violation of the law in carrying more steam than the inspector's certificate allowed; and that Superintendent Braisted ought to be held equally responsible with the engineer. They suggest that no engineer should be employed who can not read and write, and that carrying an amount of steam in excess of that allowed by law should be sufficient cause for a revocation of license.

### NEW YORK.

**Heavy expenses.**

NEW YORK, 19.—The Tamany official records of county expenditures for the years '68, '69 '70, show there was paid for furniture, stationary, repairs and rebuilding the public building, the sum of six million and thirty-nine thousand dollars.

**Horse Plague.**

The horse plague has broken out a second time, and with greater violence, in the stables of the Brooklyn City Railroad Company.

**Cholera in New York.**

Mary Kelly died this morning at the Bellevue hospital of Asiatic cholera.

**To be arrested for forgery.**

U. S. Commissioner Shields this afternoon issued a warrant for the arrest of the president of a leading insurance company on Broadway. The name and facts are withheld by the commissioner until the arrest is made. The charge is uttering a forged bond for $10,000.

**Wonderful escape.**

AVON, 19.—By the caving of a well this morning, John Donelly was buried twenty-five feet deep, and dug out only slightly injured.

### PENNSYLVANIA.

**The Evans embezzlement case.**

PHILADELPHIA, 19.—A special to the *Evening Telegram* says that in the Evans' case the Governor has instructed the Attorney General to adopt such measures as he deems necessary to enforce justice to the State. The arrest of Evans for embezzlement will follow. A powerful ring is believed to be connected with Evans, and it is believed they have divided the money and decided not to refund it to the State. Eminent counsel have been consulted, and they feel assured that Evans cannot be convicted of embezzlement. His bond is only for ten thousand, and they expect the bond will be collected and there the farce will end. It is a most complete conspiracy to defraud the State.

### MASSACHUSETTS.

**An expensive blunder.**

BOSTON, 19.—The steamer *Robert Lowe* is engaged in underrunning and repairing the French cable between the Island of St. Pierre and Duxbury, Mass. The fact has developed that the loss of both English cables last year, and the consequent expense and inconvenience, resulted from a stupendous blunder. When the cable of '66 gave out, the fault was treated by the usual tests in mid-ocean, whither a repair steamer was dispatched to take it up and reunite the two ends. In grappling for these cables, the cable of '65 was picked up and accidentally severed, and the efforts to find the break in that of '66 were fruitless. This left the public dependant entirely upon the French cable until late last spring, when it was discovered that the fault in the cable of '66 instead of being in mid-ocean was in close proximity to the Newfoundland coast, where it might have been repaired in a few hours except for the original mistake, which resulted in the rupture of one cable by the efforts to find the break in the other where it did not exist.

## FOREIGN NEWS.

### GREAT BRITAIN.

**Cholera increasing.**

LONDON, 19.—A dispatch from Gumbinen, east Prussia, a town sixty-five miles east of Konigsberg, says cholera has appeared in several districts on the German side of the Russian frontier.

**Swiss arbitrator appointed.**

It is unofficially reported that the President of the Swiss Confederation has appointed M. Jacques Staempfli, sr., federal councilor and formerly president of the republic, arbitrator, on the part of Switzerland, under the Treaty of Washington.

**Garibaldi reported dead.**

The Paris *Salut* publishes a report that Garibaldi died this morning, but the dispatches from Florence, dated to-day, announce that he is better, and that his physicians have left Caprera.

**How Russia sees it.**

A story is circulating in Paris, that an important Russian personage recently told a French diplomatist, that the result of the late war placed Russia in the position of France after the battle of Sadowa.

### FRANCE.

**German forces withdrawing.**

PARIS, 19.—The German forces are withdrawing from the neighborhood of the fortifications on the north-east of Paris.

**The army bill.**

VERSAILLES, 19.—In the Assembly to-day the committee on the army bill made a report recommending its passage. The bill, as returned to the chamber, makes military service compulsory, allows no one the right to procure a substitute, prohibits soldiers from voting in political elections, and dissolves the national guards throughout the country.
