Soon after capturing the train, the savages set fire to the wagons and destroyed them and their contents. The property is valued at not less than twenty thousand dollars. The *Times* says it is quite in keeping with the general policy of the Union to secure for the printers as much money for as little work as possible, but the hostility of a combination, which assumes to fix the prices for which the printers may work and to regulate their hours, and degrades and brands all who will not obey their dictation, and which seeks legislative interference to sustain their absurd assumptions of monopoly, and their tyranny to the associated press is simply ridiculous, and they might just as well demand that every person who desires to start a new paper shall have the right to use the correspondence of the editorial force, and the law, market, and general reports, and whatever else in the old established journals that he might find useful to his enterprise. This would greatly facili-

tate the starting of fresh papers and so increase the demand for printers and would be quite as just as the Union's demand concerning the associated press.

Parowan, June 15.—Last night J. W. Crosby camped at Little Creek; this morning his team of animals, two mules and two horses, were gone. Our picket guard struck the trail of the animals taken by the Indians and followed it seven miles, where they found two mules belonging to Brother W.
