Hints on the Care of the Eyes.

NEWS, is the person who killed Dr. There are, perhaps, more indi-viduals who ascribe their weakness Baxter, at Tintic, some time ago, of sight to a use of their eves under and who subsequently broke from an insufficient artificial illuminain a provincient artificial flumina-tion than to any other one cause. In a great many instances this may not be strictly true, but there can be no doubt that faulty artificial light is one of the most productive causes of a certain class of injuries, the County jail at Provo, and es-RICHFIELD, Utak, 5. Wallace Wilkerson called at the causes of a certain class of injuries, to which the eye can be exposed. The two sources of trouble with the ordinary artificial lights are—first, that they are not pure white, and secondly, that they are unsteady. The first defect is found in all artifarm house of James Gurr, who lives one mile north-east of Pratt ville Bridge, on the Sevler River, for breakfast, yesterday. He was identified by John Gardner, who notified Sheriff James A. McBride, who resides at Richfield. The Sherficial lights except the lime, elec-tric and magnesium lights; the second especially in candles and gas. The yellowness is, in a meas-ure, counteracted by using, in the case of lamps and gas, chimneys of riff took George Frazer and Mr. Avery and went in search of and found him in some brush, two miles up the river from where he took breakfast. When covered with the Sherifi's shot-gun and ordered to throw up his hands, he requested a violet or blue tint, and the flicka violet or blue tint, and the flick-eling of the gas may be obviated largely by employing an Argand burner. All things considered, a German student lamp furnishes the most satisfactory light. The next best is gas with an Argand burner. The chimneys of both may, as above suggested, be advan-tageously of a light blue tint. The position of the light in rela-tion to the body is of great importthe officer to go no further, as he would surrender. He is here, but
