

they are, they are deserving of praise. Adolph T. Ulin, a musician-mechanic, having wearied of being idle and hearing people talk of "hard times," went quietly to work making musical instruments, and thus far he has turned out quite a number of very fine guitars. Mr. Ulin has long had a local reputation of his fine toned violins, but the public didn't know he could make other instruments equally as fine.

Sanpete county teachers held their monthly institute at Mt. Pleasant last Saturday. The next one will be held at Fairview the last Saturday in April.

The educational interests of this and surrounding counties will be greatly enhanced by the summer school to be held at Manti during vacation. Dr. Tanner, of Salt Lake City, is working hard to make it a success. Already a number of the counties, among them Juab and Sevier, have expressed their desire to join with the Sanpete teachers in holding their official summer institute at Manti.

People of Sanpete, when you have any items for the NEWS, and you are too modest to have them printed above your own signature, send them to box 5, Ephraim, and "Wilderness" will help you.

WILDERNESS.

SCHOOLS AT OGDEN.

A representative of the NEWS paid a visit March 29 to the Weber Stake Academy and found the teachers busy in conducting the closing examinations of the winter term.

The academy was founded in 1888, by the following gentlemen who still constitute the educational board: President, L. W. Shurtliff; secretary, Joseph Stanford; treasurer, Robert McQuarrie; other trustees, C. F. Middleton, T. J. Stevens, David McKay, N. C. Flygare, L. F. Moench.

Its first principal was L. F. Moench, who assumed charge in 1888, continuing in that relation until 1892, when he was succeeded by E. B. Isgreen, who accepted the principalship for the year 1892-93. In 1893, Dr. Geo. F. Phillips, of the University of Glasgow, was elected principal. He appears to be a gentleman well equipped for the position.

Primarily the aim of the institution is to acquaint the students with principles of the Gospel of Christ. Its other object is to develop the highest degree of academic culture. The present building was erected in 1889. The design at first was to only prepare students for academic work, but in 1893 its scope was extended by the organization of a normal department.

The entire personnel of the teaching force is as follows:

Dr. Phillips, Greek, Latin, French, algebra, geometry, botany, chemistry, and physics. W. H. Jones, grammar, penmanship, physiology, book-keeping, political economy, English literature. A. F. O. Neilson, fourth and fifth grades; also teacher of phonography, typewriting and general history. Miss Marion Burton, sixth and seventh grades. Miss Mercy Burton, fifth grade. Miss Clara Chambers, first and second grades. Squire Coop, of the New England Conservatory of Music, vocal and instrumental music. Carl Anderson,

drawing and painting. Miss Mamie Gates, physical culture. The theological department is in charge of Bishop T. J. Stevens.

The Athenaeum, a literary society, has been established by Dr. Phillips, and meets every Friday evening. Among the educators who have delivered addresses before this society may be mentioned Prof. C. A. Whiting, Salt Lake; Prof. J. H. Paul, Logan; Prof. Joseph Whiteley, Provo. Among those expected to deliver lectures are Dr. J. E. Talmage, Salt Lake, and Prof. Benjamin Cluff, Provo.

The academic department contemplates the preparation of students for both the Church University and the Utah University. The courses of study parallel those of the Latter-day Saints' College, Salt Lake, a statement of which has already appeared in the NEWS.

The attendance in each department is as follows: Normal, 19; academic, 66; intermediate, 85; preparatory, 73; primary, 40; total, 283.

With the return of prosperous times, it is expected under the new regime to have a period of increased usefulness.

NEW WEST ACADEMY.

A visit was also made to the New West Academy. The institution is under the auspices of the Congregational church and was founded in 1883.

As stated in its articles of organization, it contemplates "affording the youth of Ogden the means of acquiring a Christian education. The New West Commission and its teachers recognize that a proper development of character is more necessary than a merely intellectual education."

Pupil are accepted at the lawful age at which a child may commence attending the public schools, and a course of study provided to fit them for college or university.

The academy was opened under the principalship of Prof. H. W. Ring, who was succeeded in 1879 by the present principal, Prof. D. A. Curry, of Indiana University.

The present attendance is as follows: Academic department, 38; intermediate, 22; primary, 50; total, 110. The teaching force is: Principal, D. A. Curry; associate teachers, Miss Fannie Day, Mrs. H. H. Smith, Miss V. N. Loden, Miss Amelia A. Binder.

It is learned that this academy has made a good record for efficiency, and that under the present policy it is doing well. Following are the courses of study offered:

First year.—First term: Arithmetic, physiology, English, civil government. Second and third terms: Arithmetic, physical geography, English, zoology.

Second year.—Three terms: English—scientific—Algebra, rhetoric, general history. Preparatory or classical—Algebra, Latin, general history.

Third year.—First and second terms: Greek or physics, French or Latin, geometry. Third term: Greek or astronomy, French or Latin, botany.

Fourth year.—First term: Greek or chemistry, French or Latin, botany. Second term: Greek or chemistry, French or Latin, geology. Third term: Greek or literature, French or Latin, geology.

A class in bookkeeping will be con-

ducted each year and full credit given in either course. Studies in American and English literature will be required throughout the last three years of either course.

HOME INDUSTRY FAIR.

The Home Industry Fair makes a grand showing, and a genuine surprise is in store for the crowd of people who will throng to the opening ceremonies March 31st. Most of the exhibits are in place now, and present a picture that is highly complimentary to Utah industries. The section of the Continental market facing on First South street is a scene of beauty and life that cannot fail to bring cheer to visitors, as they gaze at the tastily arranged display.

March 31st at 7 o'clock the doors to the Fair will be thrown open to the public, and while the people are obtaining their first glance at the grand display, Held's Band will discourse sweet music. At 7:30 o'clock the regular opening program will be entered upon, when Governor West and other leading citizens will address the assemblage. The services of the evening will be in full harmony with the interesting surroundings.

That the Fair has taken a wide scope may be seen from the following list of exhibitors, who had their displays mostly in place this afternoon. A few others are expected in on Monday:

Johnson's marble works, display of marble monuments and headstones.

Anderson Pressed Brick company, varieties of building brick.

Salt Lake Pressed Brick company, varieties of building brick.

Elias Morris, tiling, plaster of paris, etc.

Burton-Gardner, combination fence.

J. W. Eardley, combination fence.

Johnson's new patent churn.

Crager Wire and Iron Works, iron fence and ornamental wire work.

Salt Lake Co-operative Iron Works, iron and brass castings.

Neder & Clelland, fine carriages and buggies.

James I. Gallagher, trunks, valises, etc.

F. Platt & Co., saddlery and harness.

Jenkins & Sons, saddlery and harness.

Hulbert Brothers, trunks, valises, etc.

Salt Lake City Railway company, electrical machines, fine machine work, etc.

James Anderson & Sons, iron and brass castings.
