J. W. Lowell, Esq.,

Dear Sir.-The J. I. Case Agitator we bought of you last season is the best machine we ever saw or used; it will thresh more grain and thresh it better and cleaner than any other machine we have ever seen, and we can confidently recommend it to any persons wishing to purchase a good Thresher. Yours, etc.,

G. W. LUFKIN, W. A. BARRON.

ASHLEY'S FORK. UINTAH Co, Feb. 26th, 1882. John W. Lowell,

Dear Sir.—The Agitator Separator and Woodbury Power that we bought of you, we can truly say give entire satisfaction. It beats anything that we ever saw to thresh and clean. We have run seven different kinds of machines, but this is the champion. The cleaning and the sep- Twenty of these famous Threshill arating are perfect. We bave not had a man find fault with it yet, and we believe that the people here will testily to our statement as being the truth. It comes as near being perfect as it is possible for a machine to We cannot tell you upon paper!

all its superior quality or how much we think of it, but can say this, that could we not get another like it, no money would buy it. Yours truly,

GEORGE BROWN, S. J. CAMPBELL, WM. P. REYNOLDS, ROBERT BODILY.

CEDAR CITY, Sep. 23rd, 1881. John W. Lowell,

Dear Sir .- Our machine, Agitator, is doing excellent work. Cleans the best and threshes faster than any Thresher we ever saw. We remain,

CORRY & HUNTER.

LEHI, Utah County, February 7th, 1882. To John W. Lowell, Esq.,

Dear Sir .- As our opinions have often been asked about the merits of the Agitator Threshing Machine we purchased from you last fall, we take pleasure in sending you the following as our experience with it. To answer the numerous inquiries, and perhaps others who would like to know, we recommend the following points of superiority over all other machines we are acquainted with-

1st.-Lightness of draft. Our team of five span of average native horses and mules, being fully equal to the work, and without crowding or hurrying them, they gave us all the speed and power we needed.

2nd.—Thorough threshing and cleaning, and that without extra ef. fort on our part; such a thing as the sieves being crowded or clogged, or requiring the attendance of one person at the tail end of machine having never occurred or been needed.

3rd.—Lightness of wear. After having thereshed 18000 bushess of grain, lucern seed, etc., the general wear on the machine being scarce ly perceptible. 4th.-Lightness of running ex-

penses. By comparing notes with our friends of other machines, we find ours have not exceeded half of theirs.

We also consider the capacity for threshing in quantity, superior to other makes of machines. Although the farms here are small, necessitating a great deal of moving, and often to distant points, yet we threshed as high as 800 bushels per

day. We also consider the Straw Stack er, End Shake, Elevator principle and many other points are all worthy of notice and examination of any and all persons who may contemplate purchasing a machine.

A. J. EVANS, M. T. WOODHOUSE, H. M. ROYAL, M. B. BUSHMAN. I have helped wear out four ms

chines of other kinds, and I hearth endorse all of the foregoing points. A. D. RHODES, JR.

CEDAR CITY, March 18th, 1882. Mr. J. W. Lowell.

We bought one of the J. I. Can 32 inch Agitator Threshers la year and consider it by far the best Thresher ever brought to this coun try. It runs very light, saves the grain and is a very durable ms. chine. We threshed grain at the rate 2½ bushels per minute. Yours, etc.,

CORRY & HUNTER.
