**DANGEROUS SUBSTITUTES FOR HORSFORD'S ACID PHOSPHATE**  
Several inferior and dangerous "substitutes" for the genuine "Horsford's Acid Phosphate" are being offered for sale; and we hereby caution the dealers and public against buying or using them, as they will not produce the same effect upon the system as the genuine "Horsford's," and the ingredients in some of them are dangerous to health.  
Some of these "substitutes" or imitations are simply Dilute Phosphoric Acid, which interferes with the digestion; while the genuine "Horsford's" not only causes no trouble with the digestive organs, but materially assists in their action.  
One preparation that is being offered for sale, by the gallon, contains Meta- or P. Phosphoric Acid, which are declared by the highest authority to be poisonous. The same preparation also contains Chloric Acid, which is a compound of Chlorine. "Horsford's" contains neither of these ingredients.  
These "substitutes" are liable to be found at soda fountains, because of their cheapness.  
CALL for "HORSFORD'S," and TAKE OTHER. NEVER SOLD IN BULK.
