# MINING, BUSINESS AND STOCKS

# ALTA'S PIONEER HOTEL KEEPER

Thirty-Three Years Ago Mr. J. J. Burnswood Entered the Famous Wasatch Mining Camp.

## INTERESTED IN GRANITE CROUP

On Patsy Morley Hill - Property is Now Being Developed-New Section of Camp.

Thirty-three years ago J. J. Burnswood established the first hotel in Alta and engaged in mining in that camp. He is still mining there and, along with A. R. Oberlander, chief chemist of the American Smelting & Refining company's smelter at Murray, is the owner of the Granite group, located on Patsy Marley Hill, between the Albion and Mountain lake preperties, now being vigorously developed.

veloped.

The Granite group consists of 14 claims and is in a comparatively new, but well mineralized section of the famous old camp of the Wasatch mountains. Mr. Burnswood, who is in the city for a few days on business, speaks very hopeful of this end of the district and believes some great ledges of high and believes some great ledges of high grade ore will be developed there. At the present time four men are at

work on the property driving a tun-nel. The adit is now finished to the length of 125 feet and Mr. Burnswood figures that it will cut the first vein, the croppings on the surface showing that there are several, within about 100

Assuming a reminiscent mood, the Alta pioneer related some of his early ex-periences in the camp. "When I built the hotel there it was doubtful as to whether it would be a financial success; there were only a few prospectors and miners there at the time, yet everyone was hopeful of lively times which, happily, were afterwards realized. For several years the hotel brought good returns-while the Flagstaff and the Emma mines were at the zenith of their glory. But when the mines ceased op-eration, every other industry was killed and then came the long season of in-activity, which was not broken until the advent of the Columbus Consolidat-

### SALES OF MINING STOCKS. Trading Was Fairty Brisk Among the Low Priced Ones Today.

Business opened rather brisk on the Mining Exchange and for a time it looked as if the forenoon session would end up with some good totals, but when the footings were made it was found that 23,025 shares had been transferred for \$7,594.75. There was not much call for the higher priced stocks, while the sale of those less expensive was well distributed. Consolidated Mercur held about even with last week's close, while Daly-Judge was somewhat weaker. Sacramento kept around 20 cents and Uncle Sam Consolidated was strong around 22 cents. Some brokers had orders to sell Silver King, but no buyers were found for it. The closing quotations and sales were reported as follows:

### MINES OF BEAVER COUNTY. Operations in the Pine Grove District-At the Estella.

The Pine Grove district is now com-ing to the front and developments of importance are reported from that sec-tion. Superintendent Schepers of the Revenue mine passed through Milford Wednesday night on his way to Salt Lake with samples from a new ore body that has just been encountered. It is fine looking rock and the samples indicate that it will run high in silver and gold, but no assays have been made. Mr. Schepers states that the lar we ore was encountered in a new shaft at extra.

a depth of eighty feet, in a lime-porphry contact, and that the ore body is runly 10 feet wide.

quietly developing this property for a number of years, making no nurrah, put pursuing its course in a systematic and practical way. It deserves all of the goo dthings it may find.

Good reports also come from the property owned by Messrs. McAulay and Martin, in the same district. Mr. McAulay has received samples of ore that certainly look good. There are two and a half feet that will average 75 ounces sliver, with bunches running as high as 200 ounces. The owners will probably incorporate in the near future.

The Estella company is just starting in upon a more vigorous campaign than it has ever conducted before and the prospects are that this property will come to the front before the end of the year. During the week money was received to cover the October payroll, accompanied by the assurance that the November and December payrolls would be discharged by the 20th. It is explained that the delays that have occurred have been due to the sickness of the secretary-treasurer, who has been confined to a hospital. The finances of the company are said to be in excellent shape, with an abundance of funds in sight for all needs.

Superintendent Sam Tarbet has been promoted to the position of general manager of the company, succeeding the late General Penrose, a promotion that will give general satisfaction in this section. Mr. Tarbet is a practical mining man and thoroughly under-stands conditions at the Estella.

The new working shaft, that has been started at a point near the ore body, is now down 50 feet. The steam hoist is in place and ready to start up at a moment's notice. It is given out that should the ore body that has been opened on the 200 level be found equally at ong at the 300 the company will undowhedly creek a steam will. doubtedly erect a stamp mill, with an auxiliary cyanide plant. It is a note-worthy fact that in the Estella the richest ore has been found in the deep. est workings, from which rock carry-ing \$40 in gold has been taken.—Milford

### THE MARTHA WASHINGTON. Stockholders of Tintle Property Met in

Annual Session Today,
At the annual meeting of the stockholders of the Martha Washington, held this forenoon, 220,000 shares out of the total of 300,000 was represented.

A new board of directors was chosen consisting of A. S. Beaman, M. R. Brothers, Ed. W. Duncan, A. R. Carter and Alviras E. Snow. The organization of the board was deferred for a few days. few days.

Manager Snow, in his report, stated that during the past two or three weeks the mine had been opening up very satisfactorily and that if the ore bodies dis-closed at the pesent time continue to hold out there will be no necessity for an immediate assessment. About three tons of ore of a good grade, the manager stated, are being extracted daily, the extraction being from two places, from the upraise o nthe Martha vein and the winze, which has attained the depth of 100 feet from the 250-foot

would do, the directors of the Daly-Judge on Saturday afternoon authorized the issue of \$300,000 worth of gold bonds, the sale of which is for the pur-pose of raising funds with which to carry on further development.

In an address issued to the stock-

holders, the following was contained: "Interest on the bonds will be paid quarterly, and, under the stipulations therein contained, they may be called in for redemption at the expiration of any interest-bearing period. They wil be issued in denominations of \$1,000, and may be subscribed for and issued at any time, so long as their sale is found necessary. It is the purpose of the company to issue these bonds only as funds are needed, and it is not thought that it will ever be necessary thought that it will ever be necessary
to sell the entire amount authorized,
while it is hoped that a comparatively
small proportion of the total will be
found ample for all requirements.
"The management will at once begin the exploration and development of
that portion of the company's holdings

in which it is convinced that the best and richest ore bodies will be found. The length of time and money necessary to carry out these plans cannot be stated with any degree of certainty, but substantial results are looked for by or before the close of the present

'As a matter of sound business poldown at once. There is exposed in the mine at the present time a large tonnage of ore estimated by Manager Dunyon at 150,000 tons), carrying sufficient values in silver, lead and lead zinc that, if they could be separated and saved, with its present output, would make the property a good dividend-earning proposition; but as a certain percentage of loss occurs in the tailings which the management is contailings which the management is contailings which the management is con-vinced can be recovered, and as an-other loss occurs through the values in silver and lead that now go into he zine middlings, it seems too much like disipating the company's resources to allow it to continue. Mili Superintendent Sherman, who has made great improvements since assuming charge of the mill and who is still doing good work for the company, will continue to make tests to determine the best methods of correcting these leakages, and so far advanced are these experiments that it can be stated as almost a certainty that the problem will, before many months, be solved. The should be viewed by the stockholders closing down of the mill, therefore, as a matter of economy, entirely, and not in the light of a confession on the part of the management that the plant cannot be made to pay, for such is not methods of correcting these leakages, part of the management that the plant cannot be made to pay, for such is not the case. Gauged by the work done at similar plants on other properties, the mill is doing first rate as it is, earning a small sum monthly; but it is being done at the sacrifice of what amounts to a very large sum in the course of a month and year, and it is to correct this drainage and waste and convert it into money for the shareholders that the decision has been reached to keep the decision has been reached to keep the ore in the mine temporarily, or until such time as the highest percentage of its value can be recovered. It should not take many months to settle this problem, and then the mill will again be operated at capacity. The losses now being made will many times over new the interest on the honds in over pay the interest on the bonds to be issued, so the shareholder will reap the benefit of the policy being pur-

Have you a friend or acquaintance in your former field of labor, to whom you would like to send a copy of the Semi-Weekly News? If so, take advantage of our special offer, made to aid the great missionary work. We send the paper one year to any point in the United States, Canada or Mexico at half price, \$1.00. This does not apply to points where there are regular wards or stakes. Foreign postage extra.

# SOUTH COLUMBUS

Stockholders of the Bingham-Centennial Met Today and Authorized Change.

### BINCHAM MINE IS ABANDONED.

And Operations of Company Transferred to Alta-Directors and Officers Chosen.

The stockholders of the Bingham-Centennial met in regular annual session today and elected a new board of directors. At the conclusion of this meeting a special session was held, at which a change in the name of the corporation was authorized. Hereafter it will bear the title of the South Columbus Mining company with the capital stock remaining unchanged.

This action was taken for the reason that during the year the company transferred its operation from Bingham to Alta and is now working a group of claims adjoining the Columbus Consolidated.

In his report to the stockholders, Manager J. A. Jacobson gave a comprehensive account of events leading up to the transfer from Bingham to Alta. He says:

From the time of starting work on the Bingham property up to about Oct. 1, 1903, when the operations at this point were discontinued, I drove the main tunnel ahead 400 feet and did about 150 feet of cross-cutting on stringers that at times showed some ore which looked encouraging. At one or two places we encountered some very good milling ore and at these places I put upraises to a distance of about 70 feet, with the hope of striking some ore of sufficiently high value to justify shipping. Unfortunately, such a grade of ore was not met with and I abandoned the lower tunnel and started to work in the upper tunnel, where I did about 200 feet of drifting and cross-cutting. In the upper workings some small pockets of shipping ore were encountered which encouraged me to believe that we were nearing a large deposit of high grade ore. Further de-

velopments, however, proved that the indications were misleading. These several disappointments, to-gether with the fact that a payment on the bond and lease of the property was BONDS WERE AUTHORIZED.

Action of the Daiy-Judge Directors on Saturdsy Afternoon.

As was stated that they probably would do, the directors of the Daiy-would do. to endeavor to make more advantag-eous terms with Mr. Lashbrook, from whom the bond and lease was secured. After several conferences, that gentle-man advised me that he could not and would not make any extension of pay-

ments. "In the meantime, I had been looking over properties in the Alta camp and had taken an option on some well lohad taken an option on some well lo-cated claims with the intention of turn-ing over these claims to the Bingham-Centennial company. The move met the approval of the directors of your company and, later, when Mr. Lash-brook concluded to make the asked-for extensions of payment on his bond and extensions of payment on his bond and lease your directors decided that it would be for the best interests of the company to abandon the Bingham proposition entirely and transfer operations to the Alta camp.

"On my recommendation the board of directors authorized me to negotiate

for the purchase of the Winner claims Nos. 1 to 6, inclusive. I did so, and these claims are owned outright; also a onethird interest was purchased in the Soft Copper and Corba claims Nos. 1

and 2, and a year's option was secured on the remaining two-thirds interest. "I consider this one of the most promising prospects in the camp. In the early days a considerable amount of high grade ore had been stoped out above the old tunnel, and is said to have brought the owners and lessers

good returns.

'On my recommendation work has been started in a lower tunnel with the idea of tapping the ore bodies under the old workings where the vein appears to go down good strong. To this I estimate that the tunnel will have to be driven 300 feet, which should give a depth under the old stopes of 600 feet. I am of the opinion that we will strike one or more veins before we get under the old works and would advise that this tunnel be pushed as fast as possi-ble. If this can be done, I predict that we will be shipping ore by the middle of next summer."

of next summer."

The board of directors chosen to serve the new South Columbus consists of Tony Jacobson, J. A. Jacobson, Walter L. Maas, W. B. Dougall and H. S. Tanner. The first three named are president, vice president, secretary and treasurer, respectively.

# VALLEY CREEK MINE.

A Cyanide Plant Has Been Installed at This Wood River Property.

Judge Lyttleton Price left yesterday to return to Hailey, says the Boise Statesman. The judge stated while here that work on the Valley Creek mine in Custer county was progressing The mill had been put in shape for operation and it was the plan to start it last Saturday. The judge had not heard whether the start had been made as planned, but he had no reason to doubt

the plant was in operation.

The Valley Creek is one of the most promising mines in that part of the state. Work done on it during the past year has shown the ore bodies to be much larger than had been supposed, while the grade of the ore is very good.

A cyanide plant has been installed in connection with the mill, thus avoiding the necessity for shipping any por-tion of the product except in the form of bullion. The property is, therefore, likely to be one of the steady poduc-ers of the state.

# CONCENTRATES.

A Van Patten of Ogden is said to have tied up the Castro group of claims in Bingham on a bond of \$60,000.

The Grand Deposit Copper company which acquired properties at Muncle Creek, Nevada, is experiencing some slight financial difficulties.

The Copper Belt railway in Bingham is moving ores again and the furnaces of the Yampa smelter were fired up yesterday.

Marrion Merrill is in from Deep Creek region and says the citizens there are very hopeful of the building of a rail-

FAIRLY WELL.

Rule While Higher Prices in London Helped Stocks.

Fractional Advances Were the

# BUYING WAS QUITE VICOROUS

Dealings in Speculative Bonds Were Large-Undertone Was Somewhat Strong

New York, Jan. 18 .- Fractional ad-

vances were the rule in te opening prices for stocks, helped by higher prices in London this morning. Dealings were small except in United States Steel preferred in which some heavy blocks exchanged hands. Pacific Mail rose a point, Buying of stocks went on with some vigor at various points, notably the Chicago & Alton, Brooklyn Transit and United States Stel preferred. The general list sympathized moderately with the movement in these stocks and others of less prominence Top figures were not held very long, profit taking reducing the movement in the active stocks. Pacific Mail more than lost its opening gain. The market yielded in spots but hardened in sympathy with the rise in teh local tractions. Minneapolis, St. Paul & Sault Ste Marie rose 2%, the preferred and St. Louis & San Francisco second preferred 1. Pacific Coast 2%, the second preferred 1. General Electric 1½ and eWstinghouse Electric 2%, Lackawanna lost 1. Prices reacted slightly again before noon.

Bonds were firm at noon. United States 5s were bought in large amounts at an advance of a point.

Trading became rather dull but the firm undertone was not disturbed by reactions in some of the minor stocks. Dealings in the semi-speculative bonds were large, Rock Island 5s rising 3 points with a jump of 1½ between transactions. Denver & Rio Grande and North American advanced 2. prominence Top figures were not held

Denver & Ho Grande and North American advanced 2.

Professional traders in search of daily profits evinced little interest in the prominent stocks whose movements were too narrow to admit of a profitable trade, and gave their attention to a few low-priced stocks. Amalgamated Copper was bought heavily at 2 o'clock and advanced above 51.
