SINGER'S

New Improved Silent

FAMILY SEWING MACHINES

The Best in the World,

ARE

Because all of them are in constant use, while

others are in the hands of a few, and are no

used, owing to their being partially or utterly

impracticable.

THE SINGER

NEW FAMILY MACHINE

Has been brought to perfection, regardless of

time, labor or expense, and is now incompar-

ably the best Sewing Machine in existence.

It is simple, compact, durable, beautiful, quiet,

light-running, and capable of performing all

range and variety work in every variety of

stitched upon a single machine, using right or

left, Twist, Linen or Cotton Thread, and sew-

ing with equal facility the very finest and

coarsest materials, or anything between the

two extremes, in the most beautiful and sub-

stantial manner.

The New Improved Attachments for Hem-

ming, (any width) Braiding, Embroidering,

Machine Sewing, Gathering, Binding, etc., are

Quilting, Felling, Trimming, Binding, etc., are

novel and practical, and have been invented

and adapted especially for this Machine.

Folding Tops and Cabinet Cases.

New designs of the unique, useful and popu-

lar Folding Tops and Cabinet Cases, peculiar to

the Singer Machine, permitting her to all

Wood, such as Black Walnut, Mahogany, Rose-

wood, Redwood, and from the plainest to the

most elaborate pattern and finish. The Ma-

chine themselves are plain or highly orna-

mented with pearl and gold to correspond

with their tables of cabinet.

In the Singer work is fed or passed

through the Machine in the natural direc-

tion, namely, from the operator, permitting her to all

a natural and healthy position. In many

other Machines the work moves from right to

left, or the reverse, compelling the operator to sit

in a cramped and unhealthy position, and thus causing

weakness of the back, etc.

The Singer uses a SHORT STRAIGHT

NEEDLE, which is not liable to break or miss

the stitch. Many other Machines use a long

crooked needle, which is liable to break and

to miss the stitch.

In the Singer Machine the Shuttle is carried,

thus avoiding nearly all wear. It requires no

oil, and does not soil the thread or goods.

Other Machines draw their Shuttles, in a race,

thus causing great wear, and requiring oil,

soiling the thread and goods.

On the Singer, the Tension on both the upper

and lower threads is absolutely under the

ready control of the operator, thus rendering

the work always available for good sewing,

which is not the case with any other. Making

so-called cheap Machines are really worthless,

and so are many of their new peculiarities and

supposed advantages.

The SINGER is the

Oldest Practical Sewing Machine,

Being about twenty years in the market,

having been constantly improved by the en-

gaged and unlimited capital, it is now divided

of all necessary parts and possesses All the

Very Latest Improvements and Improvements.

It is the only Machine sold on Honest Terms,

as all its parts are Practical and will do all that

is claimed for them. Some other Machines are

Greatly Complicated, to do Unusual and Sully

the name of the Machine. The Singer is a Con-

stant Development. The Singer Sewing Ma-

chine is the only one that is readily and easily

managed by those who utterly fail on other

Machines.
