

FARM-GARDEN FOR EACH SCHOOL

Is the Ideal Indicated by the Nature Work at the University.

EUROPE TOOK THE LEAD.

And America is Rapidly Following up The Movement for Agriculture In Schools.

The special feature of the work in the nature-training class at the state university yesterday was the proposition that each school should be supplied with a garden. This was a few years ago considered desirable, but is now coming to be regarded as necessary, in the common schools, and teachers should be ready to take up the work, since they will, no doubt, do so before long.

THE SCHOOL GARDEN.

One of the most popular of recent movements in elementary education is in the work of the school garden. These features of schools have been known and their value appreciated for a number of years in Europe, and they are now coming much into vogue in this country. The school garden is in the first place good for the children by co-ordinating their muscular and mental activity. The teacher selects a piece of land, and takes the children to it. It is found by the children themselves that the soil is not yet ready for planting; it must be cleaned of brush, plowed and harrowed, the pupils suggesting the successive steps to be taken. Soil with too much gravel or too much clay in it, or with a surface too sticky or too hard, will be criticized by the class. Then comes the question, What shall be planted? We select for schools the vegetables that mature very early, since the school will be closed by June. The school makes use of the products, eating the radishes, lettuce, etc., in school luncheons. The practical solution of various problems that now arise in cultivating, irrigating, harvesting, etc., is found by the pupils.

STUDY OF GERMINATION.

Get some cheap shallow baking pans for holding clay, sand and other soils. Let some of the children rip a lath into three strips. Take three strips of the lath and four of the width of the pans, and lay them over the pans. Cover with cotton batting, and put wet sand beneath. Have the pupils plant peas, beans, corn, etc., the larger seeds being preferred because in them the process of germination can be better observed. The seeds are simply laid upon the damp cotton. The students watch and make a record of what occurs. They see that the seeds (1) swell, (2) then burst, (3) form a root, (4) stretch up, (5) put out leaves, and (6) the seed is found to change its taste, becoming sweet from the transformation of the starch into sugar.

WHAT THE SEED IS.

Observation shows that the seed is composed of two essential parts: (1) the germ, (2) the food stored in the seed for the first growth of the germ. The abundance of this stored food is taken advantage of by man in the case of the cereals and other seeds. When the stem of the sprouting wheat is only half an inch in height, the children should be permitted to taste the growing seeds and the wheat that has merely been soaked with water without germinating. They must not be told what the taste will be like, or they will imagine rather than experiment.

STARCH AND SUGAR.

Put some starch in water, and test with iodine (say five cents for it at the drug store); the mixture turns blue. This is the test for starch, which is seen to be insoluble in water. Sugar placed in water completely dissolves, leaving the water clear as before. Show by filtering that the sugar passes through, but the starch is retained by the filter paper. Then teach the work of the plant in turning starch into sugar at the time of germination, and show why this change is necessary in order to allow the sap to circulate.

HOW DEEP TO PLANT.

Is there any commonsense principle that controls the depth at which seeds should be planted? Why, for instance, should the corn be planted deeper than the squash? Because the corn has a long stalk to support, and must be kept from the squash. Therefore, wheat on dry farms is planted deep enough to be affected only by a heavy

"First Aid" to the Bowels

WHEN Heartburn, Sour Stomach, Headache, Bad Breath, coated Tongue, Belching of Stomach, Gas, or any of these forerunners of Indigestion appear, Old Dr. Cascares wants to be right on the spot in your pocket.

Dr. Cascares guarantees to cure the most obstinate cases of Constipation and Indigestion, without discomfort or inconvenience.

His medicine does not gripe nor purge, but exercises naturally the muscles that line the walls of the Intestines and Bowels.

Want of Exercise weakens and relaxes the Bowel-Muscles, just as it weakens Arm and Leg muscles.

Old Dr. Cascares goes directly after these Bowel-Muscles. He wakes them up just as a cold bath would wake up a lazy man.

Then he works them (through the nerves) till they get so strong from that Exercise that they don't need any more help to do their duty.

Heavy dinners, late suppers, whiskey, wine or beer drinking, nervous excitement, sudden exposure to cold or heat and a dozen other everyday likelihoods tire the Bowel-Muscles.

In such cases a little Cascares in time is worth fifty dollars worth of Treatment later on, to say nothing of the suffering, discomfort, loss of Business Energy, and loss of Social Sunshine it saves.

Little thin Cascares Box, shaped so you don't notice its presence in purse or vest-pocket.

Contains six Candy tablets—Price Ten Cents a Box at any Druggist's. Be sure you get the genuine, made only by the Sterling Remedy Company, and never sold in bulk. Every tablet stamped "COC."

rainfall, so that the wheat will not germinate from light showers. Other similar cases are presented.

SOME EXPERIMENTS.

Plant several other pans or boxes of regular soil with various kinds of seeds, some of the same seeds being put into each box. Put one into a cool place, another into a warm one, a third into a wet place, a fourth into a dry place, a fifth into a dark corner, etc. Let the children observe the results, make sample collections, take notes, and report. From the basis thus gained, applications are made in such a way as to lead the mind to the leading conditions for success in farm gardening.

EVOLUTION OF THE PLOW.

The development of industry as shown in the plow is an instructive study. By means of pictures cut from magazines, or sets of pictures obtained from improved plows the development of this industrial implement may be made out. First there was the primitive plow, consisting of a crooked limb, of which one end scratches the soil, and the other is fastened to a pole. The various steps by which the plow has been improved are noted, till the gang plow, the steam plow, etc., are reached.

ABOUT IRRIGATION.

The subject of irrigation is first taken up from the plant's relation to moisture. We first observe what effect a good supply of water has upon plants both wild and cultivated. Visit a wet district and make collections of water-cress, flags, bulrushes, cow parsnips, etc. Visit a dry bench and bring in samples of its vegetation. Compare the two sets. Let the students state where each came from, and why they knew. The roots and the leaves tell their own story as to the amount of water required for each. Then consider the mechanical part of irrigation—the ditches, canals, water races, amount of water required for different crops, etc. Demonstrate practically upon the school garden, allowing the students to work at irrigation, not as a task, but as a privilege. Each student is permitted to plant something, to care for it, and to be responsible for its results. Each class has also a certain plot to cultivate, and the school as a whole has its garden. This individual responsibility, class pride, and school patriotism are simultaneously developed.

CURED A COMRADE OF CHOLERA MORBUS AND SAVED HIS LIFE.

"While returning from the Grand Army Encampment at Washington City, a comrade from Elgin, Ill., was taken with cholera morbus and was in a critical condition," says Mr. J. E. Holsman, of Elgin, Iowa. "I gave him Chamberlain's Colic, Cholera and Diarrhoea Remedy and believe saved his life. I have been engaged for ten years in immigration work and conducted many parties to the south and west. I always carry this remedy, and have used it successfully on many occasions. No person traveling or at home should be without this remedy." For sale by all druggists.

ROBERTS PLEADS GUILTY.

Man Who Burglarized Hempstead Residence Goes to Jail.

Herman Roberts yesterday pleaded guilty in the criminal division of the city court to a charge of having burglarized the Hempstead residence on upper East Temple street. He went to jail, in default of bail fixed in the sum of \$500.

John Holmes, accused of being Robert's accomplice, entered a plea of not guilty, and was released pending a hearing, after furnishing a \$500 security. The bonds would have been fixed at a less sum, according to an agreement partly entered into by counsel on both sides. Holmes had stoutly maintained that he had not been near the Hempstead place but once, but it was gleaned from Roberts that Holmes had not told the truth in this particular. He is said to have entered the house a number of times, and D. B. Hempstead informed Asst. County Attorney Job Lyon that he had not contented himself with carrying away property, but had been guilty of numerous acts of vandalism. Spoons, pictures and other valuable articles had been ruthlessly destroyed and thrown about the room. When the alleged facts had been stated to the court, Holmes' bond was fixed at the sum stated.

AGRICULTURAL LANDS.

Circular Issued Relative to Those in Forest Reserves.

The local U. S. land office is in receipt of a circular from the department of agriculture relative to applications for the classification and listing of agricultural lands in forest reserves under the act of June 11, 1906. The circular says: 1. Only lands chiefly valuable for agriculture and not needed for administrative purposes by the forest service or for some other public use will be classified and listed under the act. 2. Land covered with a merchantable growth of timber will not be declared agricultural except upon the strongest evidence of its value for agricultural purposes, such as its productivity and accessibility to a market. 3. Areas known to have been occupied by actual settlers prior to Jan. 1, 1906, will be examined first, and when such areas are found chiefly valuable for agriculture, they will be listed in order that the occupant may make entry under the act. The mere fact that a man has settled upon the land will, however, not influence the decision with respect to its agricultural character.

WEATHER BULLETIN.

Review of Past Week Issued by the Government Bureau.

Following is the weather bulletin issued by the local weather bureau for the week ending July 16:

"Temperatures remained high throughout the week, with slight exception, characterizing it as the second successive warm week of the present season. The continuation of the warm weather had a very good effect on the growth of vegetation, which has heretofore this season been greatly retarded. During the major part of the week the forenoon and midday skies were quite clear, permitting unobstructed sunshine, which, together with the comparatively high relative humidity, produced a marked oppressiveness. This daily condition was often followed in the latter part of the afternoon by light, threatening skies. The absence of influential high or low pressure areas over this region was indirectly the cause of the sameness in the temperatures recorded from day

to day; the only notable variation being the cooler weather Friday during the general cloudiness prevailing at that time. The average temperature for the fiscal week ending Monday, and many indicating now. The showers of last Monday and Tuesday were regarded as very helpful, particularly over the southern portion of the state, where they were heard of.

CONTRACTORS MUST HURRY.

Board of Public Works Has Several Up on the Carpet.

At the meeting of the board of public works last night the contractors who are constructing all sidewalks, sewers, water mains and macadamizing the streets were called before the board to report on the work under way. They were instructed to rush the improvements as fast as possible, so as to complete all of them before winter sets in. They promised to use all possible diligence in prosecuting their work as provided in their contracts. The board instructed the city engineer to verify for bids for cutting and curbing the hay on Mountain Dell ranch, the same to be opened next Monday morning at 11 o'clock.

LIGHTNING STOPPED IT.

Organ Recital at Tabernacle Brought To a Sudden Close.

The tabernacle organ recital was brought to an abrupt close yesterday afternoon, by a flash of lightning which paralyzed the power from the supply wires, and extinguished the light over the console. Fortunately, however, the recital was within a few hours of the close of the last number on the program, so but little was lost. The great success of the afternoon was the D minor fugue of Bach, one of the most difficult musical compositions ever written, and the organist was playing the rich chords of the finale when a clap of thunder shook the building and the end came there and then to the recital. The "Old Melody" was Gounod's "Divine Medley," played with the cox-humorous combination of a soft, duet and quartet, and Prof. McCellan was the happiest in giving it. The audience remained in the tabernacle until the heavy shower was over.

The following program will be presented next Friday afternoon:

"Jesu, My Joy".....Sparks
"Pastorale".....Schumann
"Andantino".....Lemare
"Oberon Overture".....Von Weber
There will be no recital next Tuesday on account of it being Pioneer day.

HOW TO TELL A STORY.

Miss Sara Cone Bryant Gives Teachers Some Good Points.

The students of the University of Utah summer school were addressed yesterday afternoon by Miss Sara Cone Bryant. The subject of her remarks, which were very interesting, was "Story Telling in the Grammar Grades." The speaker delighted and scared against her own story telling, and the body recently found makes the fifth. Hence the name Laughing spring is derived. Yet in what more appropriate manner can a person enter the kingdom of heaven than passing through the gate with a hearty laugh—Caliente Lodge-Express.

MODIST CLAIMS OVEN CARRY THE MOST CONVICTION.

When Maxine, the famous gun inventor, placed his gun before a committee of judges, he stated its carrying power to be much below what he felt sure the gun would accomplish. The result of the trial was therefore a great surprise, instead of disappointment. It is the same with the manufacturers of Chamberlain's Colic, Cholera and Diarrhoea Remedy. They do not publicly boast of all this remedy will accomplish, but prefer to let the users make the statements. What they do claim, is that it will positively cure diarrhoea, dysentery, pains in the stomach and bowels, and has never been known to fail. For sale by all druggists.

WILL ATTACK CAMP.

Novel Indian-Pioneer Show to be Feature of July 24.

Plans for the 24th of July celebration at Liberty park are being matured by the committee in charge. An Indian attack on a pioneer camp being one of the principal features. The plan is to present a camp in full activity and have a band of Indians sweep down upon it. They will try to carry off the children, and loot the camp, while the Navajo Legion members will be there with their ancient muskets to repel the invasion. The pioneers of 1847 will be given seats of honor near the camp.

LAUGHING SPRING.

Gruesome Water Hole in Nevada Adds Another Victim to List.

Word comes to DeLamar that the remains of a man were found at Laughing spring the other day by two prospectors who happened that way, and indications showed that the man had not been dead more than three or four days. A small pack, consisting of a blanket, piece of canvas and supplies, indicated that the man was a prospector. Fresh burrow tracks were seen, but the animal was nowhere to be found. There was nothing on the corpse to recognize who it had been in life, but in the pack was found a coil of location notices and a bundle of leadpencils, which established the fact that the man had been an honest (?) prospector, and was willing to claim his share of the earth.

Laughing spring is located in Groom's district, in the vicinity of the Conception mine, which has been worked for at least 25 years, and derives its name from the fact that during the warm weather the water is filled with minute tadpoles, which are not visible to the naked eye until a person takes a cup of water to drink, when the little wigglers can be seen by a person with a strong eye, but indistinguishable to a person with imperfect sight. Many of the wanderers passing that way lie flat on the ground to drink, and swallow the tadpoles and all, while on going down the throat keep wiggling, and generally cause a person to laugh, but when the little tadpoles, which do not

Mrs. Gertrude McKiernan.

MOTHER AND DAUGHTER.

PRaising PER-UNA
Mrs. Gertrude McKiernan, of 121 South street, Empress, Kas., writes:

"I suffer very much with a severe cold in the head, and am always complaining of being tired and drowsy. When my mother suggested and insisted on my taking a few bottles of Peruna, I did so, and in a short time I felt like a new person. My mother praises it very highly, and so do I."

Confidence in Per-una.

Mrs. M. F. Jones, Burns Springs, Ky., writes:

"We have been using Peruna for some time and have no hesitancy in recommending it for the thousand and one ailments of humanity."

"From a personal test I shall not hesitate to recommend it, especially to all suffering women."

"Peruna has gained full confidence and a permanent stay in our home."

A Great Tonic.

Mrs. Anna Linder, R. R. 5, Dassel, Minn., writes: "I took Peruna and am well. I would not be without that great tonic for ten times its cost."

always go down with the water, climb to the side of a person's throat, keeping up a constant wiggling, frequently cause the unfortunate to go into hysterical laughter. From this there have been four men buried at the spring who died from laughter, and the body recently found makes the fifth. Hence the name Laughing spring is derived. Yet in what more appropriate manner can a person enter the kingdom of heaven than passing through the gate with a hearty laugh—Caliente Lodge-Express.

There is no use Fighting Nature.

Dr. Kennedy's Favorite Remedy does nothing of that kind. It acts tenderly and in sympathy with what nature is trying to accomplish. Do you have trouble with your digestion, your liver or kidneys? Does rheumatism pain and rack you? Is your head thick and heavy? It will charm away these ailments almost ere you are aware.

BIG GRASS FIRE.

Soldiers and Brewery Employees Fought Flames Last Night.

Grass fire swept over at least three square miles on the benches east of the city yesterday afternoon and evening. At one time the Wagner brewery was in imminent danger, but employees worked diligently and saved the premises from injury. Soldiers from Fort Douglas did a heroic service for the fort cemetery. Many electric light poles went down before the greedy flames, which raged until nearly midnight.

AT THE RESORTS.

Cambrian Day—The Welsh are gathering at Saltair today on the occasion of the annual outing of the Cambrians and their friends. Aside from the usual features the main event of this evening will be the singing out of a superb musical program, which will include the Tont Sisters, Mrs. Lizzie Thomas Edward and Charles Kent.

At Calder's Park—Yesterday the Pioneer State Sunday schools indulged in a very happy reunion at Calder's park, and a most joyous day resulted. One of the big events from a juvenile standpoint was the free-for-all around a 100-pound sack of peanuts which was sent down to the park for the youngsters. When it was found that the parents and teachers also had a weakness for this brand of nut, another big sack was sent down in the evening so that this morning peanut shells are scattered from one end of the place to the other. The Liberty Stake Mutual Improvement association are having their outing at Calder's today.

Band Day at Lagoom—Early today little men bearing huge trombones and big men carrying small cornets boarded the trains for Lagoom. Incidentally the number of uniforms of varied and imposing design and color are not the least of the features at Lagoom today. The occasion is band day, and about every man who can tuck a bugle or pound a drum throughout Utah county is on the ground. The contest commences at 3 p. m., and good music is promised. Among the bands scheduled to appear are those of Ames Fork, Eureka, Lehi, Spanish Fork, Payson, Springville, Provo and Pleasant Grove. Special trains and excursion rates from the south are responsible for the invasion of musicians and residents of Utah county.

Again, Scottish Mission at Calder's—"Come awa doon" is the characteristic manner in which the Scots are bidden to attend tomorrow's festivities at Calder's park. The affair is the annual work of the Scottish Missionary society, and the following program will be rendered during the day:

Baptist selections.....Dennie McPhie
Highland Fling in costume.....Agnes Willis
Recitation.....Ed McCellan
Chorus....."Ye Banks and Braes"

Salute the Heroes.....A' Together
Sailors' Hornepipe.....Alfon Murdoch
Scot, Mary O'Garra.....Fred Sanford
Selection.....Orpheo Quartet
Song "Oh the Sweet Frae the Knowen".....Geo. G. Campbell

In addition there will be a game of Scotch rounders, a game of association football, foot races and other sports, with suitable prizes.

Catholic Day—Yesterday was Catholic day at Saltair, and in addition to many adults who took advantage of the occasion to visit the famous resort, the inmates of the Kearns-St. Ann's orphanage were all there. Bishop Keenan and Father Ryan were there, and these gentlemen added much to the pleasure of the little ones, both by participating in the games and in helping to attend to the tots while the lunch

was being partaken of. There were 100 children present, and the day for them was enjoyable throughout. One little colored girl, four years of age, came nearly being left at the resort, but she was found just in time to be carried screaming to the waiting train. Among the ladies and gentlemen who lent their assistance for the entertainment and care of the children were Miss Nora Gleason, Mrs. C. C. Slade, Mrs. E. D. Brooks, Mrs. Ronald Morrison, Mr. and Mrs. Albert Herz, Mr. C. A. Locke, Mrs. P. Gibson, Mrs. Selby, Mrs. Butts and John Fouts.

CUT IN PRICE OF COAL.

One Local Dealer Lets Customers in On the Storage Rate.

One coal dealer has started in to sell coal at 4.75 instead of the standard price of 5.25, as he says the railroads have not paid him for his storage coal, and he is not willing to be allowed just the same. It seems that the railroads allow dealers to store coal in the close of the season, but the summer, but as the roads fail to be able to supply the demand for coal they are allowing the dealer to store the coal at a 50-cent advance, and the dealer is being given the advantage of this. Other dealers say it is not more than 4.25 to 4.50 for every ton handled, and they cannot afford to make any reduction from the regular price.

STOLE 45 CENT WAIST.

Mrs. Frank Oster, Wife of Salt Lake Walrus, is in Trouble.

It is reported from St. Louis that Mrs. Frank Oster, wife of a former Salt Lake man, is in prison in the Missouri city, charged with the stealing of a 45-cent waist. The accused had been in the employ of the Deimont restaurant in St. Louis, and was a waitress in the establishment. She caught Mrs. Oster with the waist of clothing upon her person, and when she was taken to the police station, she was found to be wearing a 45-cent waist. Mrs. Oster was detained there until a policeman could be summoned and she was taken to jail. Mrs. Oster claimed that she was a waitress in the restaurant, and that she was wearing the waist for the purpose of going home to get her other clothes. She was released after a few days, and is now in St. Louis, where she is a waitress in various restaurants. She went to St. Louis to visit her mother, and her former wife. She had won a beauty contest and was awarded a trip to the Portland exposition. Oster was a widow when she met her, and has twice by his former wife.

PUPILS' RECITAL.

Program for the One to be Given in Salt Lake Theater Tomorrow Night.

Following is the program for the first recital to be given by the pupils of Prof. J. J. McCellan in the Salt Lake theater this evening, beginning at 8:20 o'clock:

Concerto in B flat, opus 15 (first movement).....Beethoven
Orchestra parts on second piano by Prof. McCellan.
Spring song.....Merkel
Miss Eva Jensen.
"Pearly Fingers".....Mills
Miss Mae Hawley.
"Dora Bella".....Loeschhorn
Lynn Finkelson.
"Recollections of Home".....Mills
Miss Marie Jones.
a. "Etude" in A flat, op. 25, No. 1
b. Movement "Moonlight" sonata.....Chopin
Miss Edna McCellan.
"Seguidilla".....Bolin
Miss Helen Croft.
Madame Amanda Swenson's Ladies' Double Quartet.
a. "The Bird of the Birds".....Richard
b. "Star of Hope".....H. Welterling
Soprano—Miss Leanne Morse, Miss Minnie Gallacher, Miss Grace Berge, Miss Norma Fenton.
Alto—Miss Adeline Jacobson, Miss Anna McIntyre, Miss L. Goddard, Miss Edna Carter.
Mrs. Kirkman, accompanist.
a. "Butterflies".....Ketterer
b. "Gigue".....Goddard
Miss Hazel Dorins.
a. "Gavotte".....Goddard
b. "The Music Box".....Bohm
Miss Marion Hall.
"Soiree de Vienne".....Schubert-Liszt
Miss Estelle Langford.
"Faust" Waltz.....Gounod-Liszt
"Neapolitan".....Goddard
Miss Marion Hall.
Valse in A flat major (four performers).....Moszkowski
Walter Poulton, Miss Bertha West, Miss Constance King, Joseph Tueller.
No encores will be allowed. A number of tickets may be had upon application at the Clayton Music company's store on Wednesday, and seats will be reserved only until 8:00 o'clock, when all unoccupied seats will be given to those who do not hold tickets to better seats.

TOMORROW EVENING'S RECITAL.

Program for the second pupils' recital by other students of Mr. McCellan, Salt Lake Theater, Thursday evening, July 19, 1906, at 8:30 o'clock sharp:

Concerto in G minor (first movement).....Mendelssohn
Miss Estelle Langford.
"The Maiden's Wish".....Chopin-Liszt
Miss Edna McCellan.
"Eulogy of Teas".....Schubert-Liszt
Mr. Noali Pratt.
"Second Mazurka".....Goddard
Miss Lucile Purefoy.
a. "Two Voiced Invention" (C minor).....Bach
b. "La Gondole".....Henshi
c. "Romance" in E flat major.....Rubenstein
Mr. Joseph Tueller.
"Rondo Capriccioso".....Mendelssohn
Miss Laura Rasmussen.
a. "Myra".....Clutman
b. "Jean".....Sprons
Mr. Fred C. Graham.
a. "Barcarolle".....Rubenstein
b. "Improvisi".....Marquise
c. "Berceuse".....Chopin
Miss Rosemary Korman.
"Romance" Opus 51, (two pianos).....Grieg
Miss Marion Cannon, Mr. McCellan.

a. "Three Voiced Invention" (C minor).....Bach
b. "Three Voiced Invention" (C minor).....Bach
c. First movement of major sonata, Op. 41, No. 1.....Beethoven
Miss Bertha West.
"Grand Valse" in A flat.....Chopin
Miss Bertha West.
a. "Without Words".....Lassen
b. "It Was a Dream".....Lassen
Mr. Fred C. Graham.
a. "Theme and Variations".....Schubert
b. "Valse Caprice".....Rubenstein
Third movement of minor concerto.....Mendelssohn
Miss Frances Joyce.
Orchestra parts on second piano, Mr. McCellan.
Note—No encores.

SOCIAL AND PERSONAL.

Mrs. C. A. Walker received informally many of her friends at the Walker farm on Sunday last.

Miss Elizabeth Curtis will return during the week from New York, where she has been studying art, and will spend the remainder of the summer in this city.

Phil Margetta and his daughter Minnie left yesterday on a visit to friends at Idaho Falls. They will be absent from this city for several weeks.

Mrs. Emma Sandels and Miss Julia Jones are spending a few weeks visiting the various beaches of southern California.

The big social event of the week was the marriage of Miss Clara McCreedy, daughter of Mr. and Mrs. C. H. McCreedy, and Miss A. H. McCreedy, the well known young school man, which took place at 1:30 this afternoon, the Rev. T. B. Brown, of the First Baptist church, officiating. The wedding was at the McCreedy home, and was witnessed by only relatives and intimate friends of the bride and groom. Beginning at 4 o'clock this afternoon a reception was held that will last till 6 o'clock during which time scores of friends of the young couple gathered to extend their congratulations. Assisting in the reception were Mrs. Ellet Kindall and Evelyn Thomas, Anne Adams, Elsie Officer, Helen Burton, Helen Shepard and Lucy Gaby. Both the marriage and the reception occurred in the most artistic and refined manner, the wedding being artistically decorated with white sweet peas, while the dining and living rooms were done in pink. Mr. and Mrs. Nelson leave this evening for Portland and other

Pacific coast cities to spend their honeymoon. On their return to Salt Lake Mr. and Mrs. Nelson will be at home to their friends in this city.

Another large event of the week and around which much interest is centered is the marriage this evening of Miss May Price, daughter of Mr. and Mrs. Eli L. Price, and Mr. Ernest Liron, Apostle Orson F. Whitney officiating. The bride will be unattended and the ceremony will be witnessed by only the immediate family, but will be followed by a large reception to the many friends of the young couple. After Aug. 10, Mr. and Mrs. Liron will be at home to their friends at No. 1 Woodbine this city.

Mrs. Walden announces the engagement of her daughter Louise to George James McLaughlin of Rochester, N. Y., the wedding to take place in the near future.

Mr. and Mrs. Edmund Logan Thompson have returned from their honeymoon and are now at home to their friends at 129 1/2 South Temple street.

Mr. C. E. Allen, Miss Ester Allen and Jack Allen are at home at 929 First street. Mrs. Allen and the remainder of the family are expected to sail for New York from Germany during the week, after an absence from Utah of about two years. They will arrive in Salt Lake during the latter part of August.

Ross Brown is home from Yale and is accompanied by one of his classmates, Mr. St. Hopkins, who will visit with him for the next week or 10 days before going to California for the remainder of the summer.

Mr. and Mrs. R. M. White and Miss Pearl Weiler have gone to Glenwood Springs, Colo., to attend a house party given by Mr. and Mrs. Ewing. They will be back the latter part of next week.

Mrs. H. D. Stever and children have returned to Leam and Captain Stever has gone to Fort Russell with the infantry on their long march.

Mr. and Mrs. Jessie Loring Savage leave for Idaho tomorrow morning.

Mr. and Mrs. Elias Smith are entertaining Mrs. W. H. Good of Philadelphia, Mr. Good, who is now at Yellowstone Park, will arrive in this city in a few days and will join his wife here.

Mrs. W. Edward Fife left for Wyoming today to visit with her brother, T. A. Craig.

Mrs. Monroe, who has been visiting her sister, Mrs. J. J. Moran, has returned to Mammoth.

Mrs. J. T. Donohue left today for a week's visit at Mammoth.

Miss Sarah J. Jenkins has gone to Park City for a few weeks' outing with friends.

There is but One Real Soda Cracker because there is but one that comes to
