DESERET EVENING NEWS WEDNESDAY JUNE 12 1907

'Phone Bell 57.

work is being pushed as rapidly as con-ditions will allow. It will be pushed more rapidly when power reaches the .48 This week the outside shaft which 86 02 19 15 1716 1536 this week the onisite shift which being suck close to the big working tunnel on the west side of the hill, and which shaft is about 100 feet from the portal of the tunnel, was sampled thor-oughly. The shaft is down 102 feet, all the way in ore, and the four sides and the way in ore, and the four sides and bottom show an average of 5 per cent copper. The character of the ore is can-bonate with some sulphides. The big tunnel is now in 500 feet and has crosscut numerous veins of ore car-rying good values in the red metal. The company is making good head-way now in getting up buildings, and three more carloads of lumber are now at the Nevada and California switch ready to be hauled to the mine by the big traction engine. This makes 10 car-loads of lumber received recently. Three bunk houses have been completed and five more are an-der course of construction. A trans-tormer house has also been completed 2.0235 .46 puny. der course of construction. A trans-former house has also been completed and an office, boarding house, barn, etc., will be built as rapidly as possi-ble. The machinery for use in develop-ing the ground more rapidly—an elec-tric hoist and an air compressor—has about been placed and will be covered with a commodious building. The pipe line from the flat, west and south of the property, which is to fur-nish water for all purposes, is progress-ing. The ditch has been dug and the pipe distributed along the line, and to-day the laying and connecting of pipe begins.

begins. Altogether the company is going to have quite a little settlement of its own on the western slope of the range, and when a reduction plant or smelter is constructed there will be a town of several hundred inhabitants. begins

CENTRAL STANDARD NOW. Merger is Perfected and Board of Di-

rectors to Meet Soon.

A meeting of the Bingham Central and Gingham Standard Copper of-ficials vesterday marked the success-ful consummation of the consolida-tion of those two properties. The new organization will be called the Eingham Central-Standard company. It will be capitalized at \$5,000,000, divided into 1,000.000 starses with the par value of \$5 each: 400,000 shares will go to Contral holders; an equal amount to the Standard crowd and 200,000 shares will be hold as treas-

200,000 shares will be held as treas-try stock. There is now 400,000 shares of Central outstanding and 800,000 shares of Standard issued.

standard stordard issued. Standard stork is to be listed either in New York or Hoston just as stor as details can be worked out. The holding company's directors have heiding company's directors mays been chosen and are: Samuel New-house. D. C. Jackling, Charles Whit-ley, W. E. Hubbard and Judge A. L. Hoppaugh. The board will meet within a few days and elect officers for the ensuing year. The holding company has an excellent block of ground and development is to be carried ahead rapidly

TO OPERATE IN CLIFTON.

To operate in Chipton. A copy of the articles of incorporation of the Copper Queen-Midland Mining company of Grantsville, Tooele county, was filed with the secretary of state to-day. The capital stock of the company is \$125,000, divided into shares of the par value of 25 cents each. John P. An-derson is president; Arthur Sutherland vice president; Charles T. Anderson, secretary: Hilda Erickson, treasurer, The company owns a group of eight claims, including the Copper Queen lede, located in the Clifton district, Toocle county. Tooele county.

cipal mining camps of this section, and have made many contracts. The smelt-ing rate offered by the United States Smelting company in most cases has been \$5 a ton less than the rate of the so-called combine. The Salida smelter offers a better scale on leud, otherwise the freight and treatment charges at Salida and Durango are equalized. Rico made its first shipment to the Utah smelter this week, consisting of a car of concentrate from the tunnel dump of the United Rico Mines com-

SNAKE RIVER GOLD.

Claims Have Been Staked Out But no Real Development Done,

The existence of gold in the gravels forming the terraces along Snake river torming the terraces along Snake river and its tributary streams has long been known. As carly as 1862 attempts were made by various prospectors to extract the shining colors or gold flakes from the coarse gravels and fine san dalong the streams, some of the earliest workings above the Grand compon of the Snake being in Jackson Hole, north of Gros Ventre river. In recent years considerable prospecting Hole, north of throw ventre river. In recent years considerable prospecting has been done along Snake and Fall rivers, but very little real development work has been carried on. Claims have been located and staked out, but only enough work has been done to

only enough work has been done to hold the claims. In the summer of 1906 a geological survey party engaged primarily in a study of the various coal and oil beds of l'inta county, Wyo., gave incidental attention to the occurrence of gold along Snake river, and a preliminary report on this subject has been pre-pared by Mr. Alfred R. Schultz, who had associated with him in the field Messrs. E. E. Smith, B. A. Iverson, and H. C. Schleuter. The investigations of Mr. Schultz

and H. C. Schleuter. The investigations of Mr. Schultz and his party were confined to that part of the Snake valley lying in cen-tral Uinta county. Except for a nar-row strip along the western margin the entire area is a succession of the entire area is a succession of rugged peaks and ridges, cut by nu-merous gorges and canyons whose walls are in many places nearly perpendic-ular. Elevations range from 5,700 feet along the Snake to 11,500 feet on

ly every property and prospect in the district working a fair sized force. The men are out prospecting for them-scives at the present time. The big lead property at St. Lawrence is suf-fering on account of the prevalent scarcity of men; the Nil Desperandum, in which Dr. Hudson of this sity is intereted, is employing 10 men in sinking two shafts and the Nevada Black Horse is sinking on a promising looking granite ledge. These proper-ties, without exception, are showing up encouragingly. y every property and prospect in the

looking grante ledge. These proper-ties, without exception, are showing up encouragingly. "A new formation or combination has been discovered on the G. G. claim on the Amalgamated's posses-sions. This is a vein of copper and silver with some gold lying in line. This is the first find of this kind made in the district. Six teams are loading on the San Pedro dump but on account of the 90 mile haul with wagon nothing less than \$100 ore is being touched. A car is now at Frisco and another will be ready within the next day or so." Mr. Steward grows enthusiastic when talking about the Lexington-Concord. "I have had word from Lexington that the show-ings are improving continuously, horn silver appearing in good quantities in the vein at depth. I was at this prop-erty some weeks ago and consider it one of the first locking progenetic erty some weeks ago and consider it one of the linest looking prospects I ever saw: indeed, from showings made already, it is a mine and will

made already, it is a mine and will prove up big. "Smithville, lying midway between Elack Horse and Deep Creek is at-tracting attention, prospectors going in rapidly. A 10 foot hole opened there some time ago uncovered ore going 80 per cent lead and the pros-pect was sold by Frank Zachery and Charles Rich for \$15,000. This find has caused no end of talk and resulthas caused no end of talk and result-ant excitement. Osceola would be lively if it were not for the scarcity

lively if it were not for the scarcity of minors." Supt. Steward says work has been started upon the sites selected by the Amalgamated for its proposed power plants. The ground is being cleared of brush and debris and within a short time plans and surveys will be filed with the state engineer of Nevada for his approval. Power will be obtained from Baker creek, the east watershed of Mt. Wheeler in the Snake range. This creek has a big fall and can fur-nish 20,000 horse-power and it is the intention of the promoters to build three plants with this aggregate ca-pacity. Power will be carried into Blackhorse, a distance of 10 miles and later carried ahead into Ely, 40 miles to the northwest of the selected pow-er-sites. Blackhorse will have use for 1.000-horse-power and Ely can have the rest.

WOOL.

BOUL. St. Louis, June 12.-Wool, steady. Ter-ritory and western mediums, 29627; fine mediums, 18621; fine, 13617. Boston, June 11.-The activity in quar-ter-blood fleece continues to be the fea-ture of the local wool market, sithough there is also a good demand for fine wool. The supply of fine fleeces, washed and unwashed, is wholly inadequate to fulfill the demand, and there appears no imme-diate prospect of a change. The market is somewhat stronger in the better class of stock; in fact, manu-facturers are looking to a fine wool sea-son. Local dealers have great confidences in the new clip and are operating with freedom and paying good prices. Compe-tion for the new clip continues, to the profit of the growers. Oragon and Idaho are particularly active sections. Heavy transactions are reported from both states, and local firms are buying liber-ally.

Advices from Australia are to the ef-ect that the new clip will not show any nerease over that of last year. Quota-
