

# MINING, BUSINESS AND STOCKS

## UNCLE SAM CON. ORE SHIPMENTS.

Surplus in Treasury Will be Augmented by Proceeds of Shipments at Sampler Today.

### CONCENTRATES ARE CRUDE.

One Car of the Latter from the Richmond-Anaconda—Outlook for Future Bright.

The Uncle Sam Consolidated, which has something like \$20,000 piled up in its treasury, continues to add to this by shipments of ore, which have been coming into the local markets with considerable frequency of late.

Secretary Thompson reported the arrival at the samplers today of three car loads of concentrates and one car load of crude ore, that latter coming from the Richmond-Anaconda mine, the control of which is owned by the Uncle Sam company.

Like some other mines, the Uncle Sam has improved steadily under development during the present year.

The management is very hopeful of the future, and does not expect to depend to be sent out to shareholders next week will be the last one.

### ON MINING EXCHANGE.

Stocks Sold During Forenoon Brought \$2,565.75.

The sales of the forenoon on the Mining Exchange amounted to the transfer of 5,440 shares for which was paid \$2,565.75. Daily-West opened weak and was started off with a sale marked up at \$13. The stock strengthened as the call progressed and on the open board was taken at \$13.30. Century fell below 20 cents. There seems to be little likelihood of a dividend from this source for a month or two. Tetro continues to report in the local markets with frequent shipments of ore and the stock holds up to about stationary prices. There seems to be on demand for Grand Central just now. It was offered at \$2.50. For Mammoth \$1.43 was offered, but no stock was brought out at the figure. Goldfield Bonanza seems to be moving slowly and it was bought on the open board at 5 cents a share. The closing quotations and sales were as follows:

### MAY DAY IMPROVES.

Manager Danner Optimistic as to the Future.

Manager J. E. Danner of the May Day mine of Thistle said today that conditions at that property are looking better than they have been for some time and expressed the confidence that the property would soon be able to pay its own way again.

### THE RICH JUMBO MINE.

Company Has Received \$20,000 in Royalties from Lessees.

Of late it is expected that at least one of the Jumbo leases will furnish a sensation each week, says the Goldfield News. This week it was claimed for the Richmond & Co., lease, but when traced down it was found not to be as reported. The strike was found on an upraise from the 50-foot level, and while specimens could be picked out which would go most any old thing, the average of the ledge is but the extra good grade of shipping ore which is common on the Jumbo. Sixty sacks were taken out of an 8 to 10-inch streak which goes \$500 to \$600 per ton. A car-load of 20 tons will be shipped from this lease tomorrow, which is expected to net the lessees \$10,000.

Vermilyea and Bartlett are upraising in the rich streak which was found on the surface, and are also in a good grade of shipping ore.

The Kernick and Bowles' lease is taking out 5 to 6 tons daily, which goes from \$250 to \$300 per ton on the aver-

age. In addition they have already on the Mammoth 125 tons of mill ore that will go \$45 per ton and 400 tons that will go \$20 or better. At the 150-foot level there are 14 feet of ore that will go \$20 per ton.

The Curtis and Ridge lease lost the rich ore for a short time, but are now into it again as rich as ever.

At a meeting of the Jumbo Mining company, held yesterday in John McKane's office in Tonopah, all the leases were formally ratified and as over \$20,000 have been accumulated, the pool on the above stock has been released, and the stock will be at once issued.

### BLACK WARRIOR DISTRICT.

New Road Being Built to Rico Mine from Atlanta, Idaho.

Engineer Carl Maugher, who accompanied F. J. Conroy to the Rico-Mammoth property in the Black Warrior district, returned Thursday, says the Nampa Herald. Mr. Maugher completed the contour and profile survey of the Rico ground, the big mill will be located, and made the preliminary survey of the company's claims. He said that Mr. Conroy had let the Rico-Mammoth road to the Rico-Mammoth mines, a distance of 18 miles. A part of the big plant of machinery has been ordered, and the remaining section is now en route from Mountain home.

While at the Rico-Mammoth Mr. Maugher also showed some very rich quartz, said to have come from some claims owned by Postmaster Fenton of Boise, located just over the mountain from the Rico ground. The quartz was of a honey-combed character and revealed fine gold in particles as large as grains of wheat. Mr. Conroy will return to Nampa some time next week.

### More Delegates Named.

Inasmuch as a number of the gentlemen appointed by Gov. Wells as delegates to the mining congress cannot attend the forthcoming meeting, the following were named yesterday to take the places of those who have resigned: David Keith, vice Hon. Thomas Kearns; C. L. Dignowity, vice C. C. Goodrich; S. S. Morrissey, vice Hon. Joseph Howell; and Henry C. Lawrence, vice Harry Joseph.

### CONCENTRATES.

A new steam hoist has been ordered for the Red Top mine at Goldfield, Nevada. J. T. Fulton expects to depart this evening for the camp of Goldfield.

G. W. Topf, local manager of the Bend Drive company, returned from a trip to Butte this morning.

Dr. M. B. Bolles, assistant professor of metallurgy at the Columbia School of Mines, is investigating the valley smelting plants.

The Annie Laurie dividend checks for this month, aggregating \$12,500, will be mailed from Kimberly today by Treasurer A. A. Ball.

It is said the American Smelting and Refining company is seeking ores from the mines of Nevada City, California, for its local plants.

Manager Simon Bamberger of the Hammer-DeLamar mines returned from an inspection trip yesterday, accompanied by F. P. Swindler.

Secretary James Shorten of the Mining Exchange expects to attend the St. Louis fair during his vacation, which commences in about two weeks.

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, \$52,500; base bullion, \$38,700; gold bars, \$4,200.

Prof. W. H. Tibbals expects to leave for Portland to attend the session of the mining congress early next week. He will go ahead of the regular delegation from this state.

Thomas Homer was yesterday named as a delegate to the Mining congress by the Real Estate association. W. J. Halloran and J. W. Houston will also represent this organization as delegates.

Some extensive shipments of silver-lead ore is coming to this market from the mines located near Gilmore, Idaho. The product is hauled to Dubois, a distance of 55 miles, where it is loaded onto the cars.

Parties interested in the iron mining districts of Iron county are endeavoring to get the representatives of the geologists survey to examine into the vast deposits in the south, which are awaiting development.

Broker James A. Pollock returned last evening from a trip to St. Louis and other points east. He visited the big fair and says it is something every one ought to see, even if they have to make some sacrifice to do so.

Officials of the Mammoth Mining company, who say the receipts from the property recently sold to Goldfield by Editor J. F. O'Brien, for a consideration of \$100,000, mention of which was made in the "News", was for the Franklin syndicate. A representative of the Franklin expects to leave for the Nevada camp today for the purpose of making an inspection of the ground.

Thomas P. Walsh, a Denver architect, who is president of the American Standard Mining and Milling company, was also in Nampa this week on his way to South Mountain. This company owns the extension of Mr. Soumenman's vein from the Bullion level to the property. Mr. Walsh left for the Mountain last Tuesday. (Nampa 14d.) Herald.

The assessment on the stock of the Copper Mountain Mining & Milling company becomes delinquent next Saturday. Secretary Lloyd says stockholders are sending in their assessments money quite satisfactorily and believes there is little doubt but that the company will soon be out of its late financial entanglements and on the road to prosperity again.

## EL PASO WILL BE IN THE CONTEST.

Texans Preparing to Send a Big Delegation to the Mining Congress at Portland.

### FAMOUS MEXICAN BAND GOING.

May be an Opportunity for Utah Delegates to Work a Little Game Of Strategy.

Among the places to contest for the permanent headquarters of the American Mining congress at the Portland meeting—which commences one week from next Monday—will be El Paso, Texas.

According to late advices from the southern city, a large delegation from that point will leave for the Oregon metropolis sometime next week.

The El Pasoans will set up the claims among others, that their town is the proper place for the permanent headquarters of the Congress because it is the gateway to the Mexican mining camps which have become popular with American investors.

An El Paso paper has the following to say:

"With all the brilliancy of brand-new uniforms, silver decorated sombreros, most picturesque and colorful, the famous Mexican National band of Juarez, Mexico, will be taken to Portland to sound the praises of El Paso as a convention city for the mining congress. The fame of El Paso as a convention city has been gained within a few years, and the military band of the city across the Rio Grande has had no small part in its achievement.

"Last year El Paso sent a delegation to Ogden to capture the National Irrigation Congress that wanted one of the most unique convention cities ever conceived. The Mexican government had released the band to make the trip, and the musicians, dressed in white, with capped with the ornate sombreros that bore a weight of silver lace far greater than the weight of the closely woven material of which they are made, arrived in the convention city there was a constant echo of the southern republic; serenades heard in front of delegation headquarters, hotels, newspaper offices, and even the headquarters of the delegates from cities that were rivals for the next convention.

"Headquarters will be maintained by the local delegates, where some of the most famous musicians will be on tap for the caller, and long, black Mexican cigars will be freely dispensed to the Mining Congress delegates as a sample of the El Paso way of getting things done. It is day clerk at the borderland, and it is not improbable that a promise of a contest in which matadors match their skill and nerve against the mad-dance of wild bull.

"Secretary Clifford of the International Miners' association, who is getting up a delegation to Seattle to attend the Congress from El Paso: Morris P. Kirk, mining engineer; Eugene E. Neff of the E. E. Neff company; mining man, August Meisel, a capitalist and mining man; W. H. Grandover, electrical supply store; J. W. Fisher, proprietor of the Hotel Sheldon; Bert Orndoff, day clerk at the Hotel Orndoff; Otto Laut, a mining man; Morris B. Baker, mining engineer; Dr. S. T. Turner; J. W. Malcolmson, mining engineer; and H. Bassett, lumberman, engineer, and Eugene Flechet of the United States Barracks, California, and R. Lightbody, now journeying in California, are also expected to join the delegation.

It will be seen from the foregoing that the Utah delegates are not going to have things all their own way when they get to Portland. An Associated Press dispatch from the convention city of yesterday's date contained the information that Denver already has a representative of the Bullion level, and the preliminary plans for the session of the Congress.

One Utah delegate suggested today that with both Denver and El Paso in the fight, the chances of Salt Lake would undoubtedly be strengthened. Again, he said, it may be that if the El Paso delegates should conclude they cannot win they may throw their support to Utah by way of recognition of the services rendered the Texas delegates by the Texas Congress at Ogden last year. Had it not been for the support of the Utah delegation on this occasion it is believed the Texas delegates to the Congress would not have taken place in El Paso this year.

### AGAINST THE BECK.

Referee P. L. Williams Renders His Decision in Eureka-Hill Damage Case.

Referee Parley L. Williams rendered a decision late yesterday in the damage suit of the Eureka-Hill Mining company against the Bullion level. The decision was in favor of the plaintiff.

In the complaint filed the Eureka-Hill company sought to recover \$200 for damages caused by the extraction of ore. The officials of the Bullion level believed they would win out in the action, but the decision of the referee was a surprise. It is claimed that lessees would have been recently broke into a stone containing Eureka-Hill timbers, and there is a good chance for other litigation.

We beg to announce that Mr. Fred Harris has this day severed his connection with this company for which he was formerly sales agent. Rand Drill company, New York, July 20, 1904.

### LOCAL MARKETS.

The local markets are shortening up on pork products, owing to the strikes at the River and Chicago packing establishments. The scarcity of hogs promises to increase as time goes on. But one prominent local dealer said today, that he would have a carload in a few days from the River. He said he was now on the grocers' tables. The pumpkin crop is spoken of as especially good. The flour commission man continues the prices as given below, but look for a slight rise shortly, as wheat continues

### Today's Metal Quotations.

## UNION PACIFIC WAS TRADED IN.

Four Thousand Shares Were Sold At an Advance Over Last Night.

### STOCKS A FRACTION HIGHER.

Prices Made a Good Gain Over Opening Through Heavy Offerings To Take Profits.

New York, Aug. 11.—The stock market today opened active and a moderate fraction higher. The southwestern railroads were comparatively strong with Union Pacific and Southern Pacific the features of the trading. Four thousand shares of Union Pacific sold at 97 and 97 1/2, compared with 96 1/2 last night, and Southern Pacific was lifted a half on the purchase of large blocks running to 4,000 shares. Prices rose higher than the opening through some very heavy offerings to Union Pacific. Union Pacific gained 1/4, Southern Pacific 1/2, and Atchafalaya and Kansas & Nebraska a point. There were gains of a good fraction in the grain markets generally. The Metropolitan Trust company and United States Steel preferreds held back. The strength of the market shifted to new quarters after Southern Pacific had extended its rise to 2. In Pacific Mail, Chicago & Alton, Southern railway and Brooklyn Union gas. The tone became strong throughout.

Bonds were strong at noon. Metropolitan Securities broke the restraint which held it back and rose to 96 1/2. Prices elsewhere were inclined to fall back.

### LIVE STOCK.

Chicago, Aug. 11.—Cattle—Receipts 7,000. Dull.
