NEW YORK.

In favor of C. F. Adams for Vice-President of the U. S. - The case of a female prisoner - General Garrison resigns.

New York, 8. - A special Washington dispatch states that Senator Schurz has written a letter to a gentleman in Washington, in which he strongly expresses his opposition to the nomination of Charles Adams, of Maine, for Vice-President of the United States in 1872.

The national banks continue to hold their 20 and 25 percent bonds, and it has been discovered at the Treasury department that some of these banks have advised their depositors, who are holders of 5 percent bonds, to keep them. Though these national banks are a creation of the government, it is from them that the most serious impediments to success in the new loan have been made.

Official advices from Russia declare that the Grand Duke, Alexis, Alexandrovich, will certainly visit this country next fall, and will probably arrive here in September. The squadron to accompany him, which now lies at Constantinople, numbers several of the finest vessels in the Russian navy.

A special dispatch states that the testimony in the case of Mrs. Sherman, the Connecticut wholesale poisoner, is in, and the examination has been adjourned till Monday, when the counsel for the prisoner will probably make an argument in favor of the dismissal of the charge as not sustained. It is believed in New York, however, that the case will go to trial, and that the defense will be the "fashionable one of insanity."

It is now known here, upon semi-official authority, that the commission of internal revenue, Gen. Pleasanton, has resigned his office, in account of the misunderstanding between himself and Secretary Boutwell. As soon as his withdrawal was handed in, it was accepted by the President, and Gen. C. A. Arthur, of New York, was shortly after tendered the position. He expressed his inability to serve, however, and it became necessary to make another selection. No one has yet been chosen, but it is thought that deputy commissioner Douglas will be appointed.

ILLINOIS.

The Horse plague spreading.

Chicago, 8. - New York special agents report a great apprehension is felt about the horse disease, which seems alarmingly on the increase. It is now believed to be not only an epidemic but contagious. A great many blood horses are said to have been seized with the disease, those of Bonner, Vanderbilt, Wilkes, Belmont, Fisk and Stewart among the rest. It is reported that during the week as many as thirty or forty horses, valued at five to ten thousand each, have died of the plague, and all the horse owners are greatly alarmed for the safety of their property. At least a hundred thousand animals are suffering from the contagion, which afflicts all the skill of the veterinary surgeons. There is little doubt the epidemic will spread hence all over the country, and no limit can be set to its diffusion. The disease has increased in violence to more than an ordinary degree within the past two weeks.

The weather is extremely hot, and the thermometer at ten a.m. being ninety in the shade.

NEW JERSEY.

Tramway accident.

Newark, 8. - A shocking accident occurred on the Newark & New York R. R. this morning, near the Ferry street station in this place, resulting in the death of several persons, and the wounding of very many more. This 8 o'clock train from this city, and another from New York, were running on the same track and came in collision. The cars were a heap of burning ruins. Already seven bodies have been recovered, and it is supposed that there are many more.

FOREIGN NEWS.

ITALY.

Rome, 8. - The French charge d'affaires at the Italian court has taken up his residence in Rome. The Austrian minister is expected at an early day.

GREAT BRITAIN.

Excitement over Count de Chambord's proclamation - Washington delighted.

LONDON, 8. - The Times publishes a letter expressing the confidence of U. S. Minister Washburne, during the siege of Paris, by the Versailles army.

The National Assembly is engaged discussing the bill recently introduced, providing for the election of consuls-general, and fixing the day on which the same will be held.

Count Chambord has gone to Bruges, in Belgium.

Faidherbe is making preparations for a history of the war with the Germans.

Many prominent French Republicans, including a number of members of the Assembly, gave a banquet in honor of Gambetta.

The deaths in Paris are rapidly decreasing.

It is announced that Paris will issue a loan of six hundred millions.

The Count de Chambord, now at the Chateau de Bruges, refuses to see the Orleans princes until he consults the people of France. His proclamation calling upon the people to rally around the Bourbon throne creates great excitement, and unless the authorities interfere, there will be an imitation of Napoleon's Strasbourg programme.

PACIFIC COAST DISPATCHES.

SAN FRANCISCO, 8. - The coroner's jury in the case of the Hurt who was crushed to death by the International Hotel coach, while walking in the Booth procession last Saturday night, returned a verdict of accidental death.

The ship Washington, Libby, which arrived on Sunday morning from Callao with seven hundred tons of railroad iron for the California Pacific Railroad, is discharging at Vallejo, and will load railroad ties for Harry Meigs' new railroad in Peru.

One hundred and eighty-seven barrels, six hundred pounds in each, of Alaska fur seals, were shipped east by railroad yesterday, for the annual fur sales in London in September.

J. B. Howell, of Deer Creek, Cal., died in the cars at Reno yesterday, when on his way back to Illinois with his family. He had been ill several years.

The members of the society of California Pioneers participated in a banquet, which was kept up till a late hour this morning, after the annual election last night.

Col. Von Schmidt's new water company, incorporated this week, will commence work immediately on the upper branch of the American river, with a view of furnishing miners and towns in Sacramento valley with water before the Lake Tahoe tunnel could be completed. In the meantime the Lake Tahoe enterprise will be pushed ahead, and it is expected that eventually the two companies will consolidate, and their works form a part of a common system.

It was reported in the City Hall that human remains had been found buried in the mud by boys playing on McAllister street this morning. An officer was sent to investigate the matter.

Intelligence has been received here of the death of Augustus Moore, jr., late superintendent of public schools for Nevada county and editor of the Nevada Gazette. He was previously a resident of Alameda; where he held a similar position. He died at Hartford, Conn., June 25, of consumption.

This morning a policeman caught a Chinaman shoving a deceased Chinaman out in the street to die, in Alkali Alley. He arrested him and sent the woman to the hospital.

The Democratic State Central Committee this morning denounced John Rosefield for State harbor commissioner, to fill the vacancy in the nomination by the declaration of the committee by Friedlander.

Charles Wilson, died at the French hospital to-day of small pox, the first case for several months. There were fifty-one deaths in San Francisco this week.

A seaman named Moon was found dead in bed in the Railroad house this morning.

Mrs. Walters, residing in Sixteenth street, Mission Dolores, was out walking near her house last night, and was taken suddenly ill and died before she could reach the door.

A Vegetable Wool.

The name of vegetable wool is applied to a fibrous material obtained from the leaves of the fir, a manufacture for this purpose having been established near Breasau, in Alsace. The species of pine thus operated upon is the pinus sylvestris, or wild pine; and it would seem that every member of the pine tribe might be turned to similar account. The leaves of these trees on examination, and in all respects agreeable; moreover, it possesses the excellent quality of preserving a certain balsamic and decidedly wholesome smell, which nevertheless is so inimical to insects that they never harbor in it, as they do in almost all the ordinary descriptions of bedding material. The fibrous matter holding the woolly fibres together, and which is eliminated or dissolved out by the alkalies - is also turned to account, medicinal bath being made with it, and balsams, and which are found to be useful in various chronic diseases.

CURTIS MODELS - PRICES REDUCED TO MEET THE TIMES - The merits of this system for cutting all kinds of garments worn by Ladies, Gentlemen and Children are known by scores of ladies in this City and Foreign countries. There will be no alterations in taking up or letting out, which not only injures the material but destroys the proportions and often ruins the garment. The system is very simple and can be learned in a few hours.

See Mrs. JOSEPH HULL, 11th Ward, Agents.
