### DESERET IVENING NEWS WEDNESDAY OCTOBER 30 1907

For the Three Months Ending September 30 They Were \$43,304,285.

## BUSINESS ON THE INCREASE

Bookings at Rate of 18,000 Tons a Day -Exports Are About a Million Tons a Year.

Naw York, Oct. 23 .- The directors of the United States Steel corporation todeclared the regular quarterty dividends of 1% per cent on the preferred stock and 16 of 1 per cent on the com-

The earnings for the three months anded Supt. 30 were \$40,304,355, an incrouse of \$5,699,661 as compared with

the same quarter last year. Chairman Gary made a statement to the board of directors of the United guates Stoel corporation in which be

 <sup>10</sup>On June 30, 1907, our company had on hand unillied orders aggregating 1,362,878 tons. On Sept. 30 this tomage had been decreased by about 400,099 tons. Bookings are now at the rate of 19,000 tons per day. We are exporting at the rate of ubout 1,050,000 tons per year and at prices substantially on a parity with domestic prices.
<sup>10</sup>From information received it is be-leved the domand for our products has, during the last fow years, been con-stantly increasing and that the present necessibles are very great.
<sup>10</sup>Proce have been well maintained. The leading steel manufacturers are in agreement consultation, though under no agreement committee concerning their on June 30, 1907, our company had

agreement committee concerning their business. It secons to be a recognized ruct that stability of prices is to be de-sired by both the producer and the con-sumer: that extremely high prices and emely low prices are both objecince the corporation was organized,

In addition to the phymonic of dividends and interest, there has been provided from carding's a reserve for extinguish-ment of explicit of \$70,750,900, and there has been added to the casets from the same source \$266,000,000, which includes same source \$266,000,000, which includes havestments in additional fixed proper-ties, \$112,000,000; additi and used proper-ty represented by socurities created and held in the trensury as submide assots, \$48,600,000; liquid assets on hand, \$10.-mered:

"The total assets of the organiza-tion Oct. 1, 1907, amounted to \$331.506,-006, cash in banks being \$75.573.000." The surrent liabilities, including ac-crued taxes, accrued inferest and the dividend for the last quarter, he said, were \$2.187,000.

were sights, 18, 1000. Mr. Gary added: "When the corporation was organized subsidiary comparies had outstanding unsecured notes and bills of \$42,000,000. All of these except \$1,047,000 have been paid. The latter amount is deposits of employee under a savings account ar-morganizet.

employes under a savings account ar-rangement. I decide 'On consolction of the new work now under way the productive capacity of the manufacturing plants will be ma-terially increased. Up to Jan, 1, 1967, the average increase already amounted to 44.33 per cent. "There basis been reserved and set night.

rallway companies have supplemented the appropriations made by the fed-eral government and the District of Columbia by some \$13,000,000, the sta-tion being estimated to cost \$20,000,000 when completed. But the amount set apart by the railroads for their indi-vidual shares in the building of this magnificent station by no means com-pares with that donated by the federal government. Not content with taking the money from the citizens of the United States and the District of Co-lumbia for the purpose of erecting this building the railroads have decided to still further tax the citizen by demand-ing a 25 cent extra charge from all travelers entering the district. FEELING AROUSED.

HOTEL GOSSIP.

F. H. Parsons of the First National nk of Halley, Idaho, is a hotel, having made a er here while on route bis old home in Vermo Parsons he has Which time he has be Wood River country with several many marks of advance in that section. Everything and body is prospering in those pures, raising and mining are the lead dustries. Horses, sheep and costs bringing high prices and costs bringing high prices and costs and mountain is covered with and hearis. The prines, too are p ing steadily. Some of the larger says Mr. Parsons, are installing to machiner, because of the sain and many marks of a scotton. Everythin hiner; because of the scarvity . The banks in Halloy and vict are in splendid financial coulding of them have at least 60 per co

their surplus on hand, and of florry that is embarrassing of the country has positively in that part of the Gem state offect in that part of the Gein state. Most of the people now setting in the Wood River country are well to do. They have sold their bands in other places for \$150 and \$200 an acre and have come into western Haho, where they nave been able to purchase better inde at \$20 and \$25, and have plenty of money left for improvements and some to space. All in all, the Gem state in general and western Idaho in particular, according to Mr. Farnors, furnishes about the best opportunities of any state in the Union.

# FINANCIAL SITUATION.

#### Bankers Hold Long Conference-Decide Monetary Matters Sound.

Ogden, Oct. 20 .- The bankers of Og-Ogden, Oct. 20.-The bankers of Og-den met last night in the Reed hotel to discuss the financial situation. Af-ter a three-hour conference, it was decided unnecessary to put Ogden on the certificate base, adopted by many other cilies. The monetary situation here is absolutely sound, and no con-cern is felt either by the public at large or the money-handling institu-tions. The gathering lasted until mid-night.

FEELING AROUSED. The polley laid down by the associa-tion of general passenger and ticket agents at their meeting in this city this week so far as exacting an en-trance charge from passengers coming into Washington cannot help but ac-centuate the feeling the general public has towards common carriers and this charge cannot help but be the subject of discussion during the next session of Congress. It would seem that the rall-roads were dying in the face of Provi-dence and that instead of going with the country in their efforts to bring about a better understanding between the rallroad managements were losing their senses altogether. PEOPLE INDIGNANT. PEOPLE INDIGNANT.

PEOPLE INDIGNANT. When the great tubes to be used by the Pennsylvania company under the East and North rivers in New York are completed for purposes of shorten-ing distances and getting into the city's heart will the Pennsylvania Railroad company dare charge an extra 25 cents upon each passenger for the use of the river tunnels? That is the condition in Washington and the citizens are rightfully indignant over the hoggish-ness of the railroads who purpose to make the traveling public psy for the beautiful building which will be ready for occupancy about Dec. 1 by the railroads entering Washington.

railronds? Between the general government and the District of Columbia \$5,00,009 have been appropriated for this new union station which is to house every mil-road entering the nation's capital. In addition to the money appropriated lands were given, streets widened and strest railway terminals changed to most the demands of the new railway passenger station. It is true that the railway companies have supplemented the appropriations made by the fedpresident of the French republic. Harr Saver has had numerous opportuni-ties to come to America, but he can not make up his mind to undertake the voyage.

### THE PRESIDENT'S CHOICE.

The monument shown herewith was the choice of the president as a me-

morial to be erected by the United States in honor of the Pollsh patriot Kosciusko.

## SCIENTIFIC MISCELLANY.

The care pleanomanon of "snow gar-lands" was first described by Hellmann in March, 15%. As seen last January by Dr. Kassner of Herith, the Garland is a rope-like roll of melting snow hanging penchait from the edge of the tool, in the shape of a very flat U.

One of the marvels of modern research is the photographing of minute unseen objects by means of invisible light. The details shown by a minuscope are in-creased not only by using higher magni-fying power, but also by employing light of shorter wave length, and nearly by years ago it was suggested that ultra-violet light should bring out in photo-graphs many minute features that cannot appreciate wave violet light should bring out in photo-graphs many minute features that cannot be revealed by the much lenger waves of ordinary light. The suggestion proved impracticable, on account of the difficulty of focuring invisible images and because the glass lenses were almost completing opaque to ultra-violet market be prop-erly corrected lenses and also fur the prisme violet microscope brought out by Kohlor mass fused quartz for the prop-erly corrected lenses and also fur the prisme violet microscope brought out by Kohlor mass fused quartz for the prop-erly corrected lenses and also fur the prisme violet may from the spark of radmium, and a floorescent screen over the expletes lights up under these rays, supplying a focusing finder. With this apparatus very remarkable piteures have been obtained. A further improvement has now been made by W. T. Swingle and L. J. Brings of fue U. S. depart-ment of agriculture, who obtain a more exact focus of just the details wanted by the visible image given by the ead-mium spork a pure blue light, then turn on the shoustive plate. In this way minute details are pictured very dis-tinctly.

The barbaric looking individuals pictured berewith are the members of a mission of state recently sent by King Mencilli to Emperor William. This was in return for a similar mission sent by the German sovereign two years ago. In spite of their savage appearance the Abyssinians are Christians, members of one of the oldest churches in the world.

The handsome building abown in the picture, to be erected for the use of the international bureau of American republics, will be headquarters for na less than twenty-one American governments. It will cost nearly \$1.000.000, and Andrew Carnegie has contributed 5750,000 to the amount.

the railroads entering Washington. WOULD REMODEL HOUSE.

WOULD REMODEL HOUSE. Congressman Henry S. Boutelle, of Illionois, one of the ablest an most polished members of the lower house, a student, not only of his own coun-try's institutions, but the institutions of other countries and a scholar in the best acceptation of that term, believes that the house of representatives so far as its seating capacity is concerned should be changed. He has had this impres-sion for years but it has become ac-centuated owing to the growing mem-bership, Oklahoma adding five five mem-bership, Oklahoma adding five membership, Oklahoma adding five mem-bership, Oklahoma adding five membership, Oklahoma adding five mem-bership, Oklahoma adding

desks in the house be changed for benches. Speaking of this hobby, if such it be, Mr. Boutelie said when it was sug-gested to bim that the benches in the house would look like a copy of the arrangement in the British bouse of commons. So far as I know we are the only great nation in which the papular deliberative body is so ar-ranged as to permit of debate and the iransaction of ordinary business at the more time. The two do not work well together and now that the new house office building is nearly completed it is time that something should be done to improve the congested condition of the House."
