MINING, BUSINESS AND STOCKS

PLEASED WITH THE CAMP OF COPPER.

W. A. Scott, the Well Known Mining Writer, Never Saw Bingham so Prosperous.

IMPRESSED WITH THE NAST.

Manager Adkinson Getting Results From Jigging Plant-Experienced Miners at the New Haven.

W. A. Scott, traveling representative of the Engineering & Mining Journal, has been making a round-up of the camp of Bingham in behalf of his publication. Mr. Scott is a frequent visitor to the great copper camp. He was there earlier in the year-about four months ago, since which time he noticed a perceptible improvement. The camp is very lively; and contains a larger population than ever before, the tonmage coming from the mines is greater and, in fact, the camp never did look quite so prosperous as it does at the present time. Mr. Scott says the manngement of the Bingham & New Haven has carried on a very systematic plan of development at that property in the past with the result that the mine is now ready to pay its own way and it ought not be a great while until the property reaches the dividend paying

Mr. Scott was very favorably impressed with the Nast property, which is being operated by the New England Gold & Copper company under the management of Henry M. Adkinson. The jigging plant installed some time ago is in operation and is giving satisfactory re-

OXFORD WILL RESUME.

Contract Will Soon be Let to Extend Tunnel 100 Feet.

The vigorous development of the Oxford mine at Alta will commence in the near future. Manager Rooklidge was in conference today with parties who are figuring on taking a contract to drive the main tunnel into the mountain

another 100 feet.

The Oxford is situated at the head of Peruvian gulch, south of the Alta-Quincy ground. Its location is said to be good.

DALY-WEST RECOVERS.

Rose a Dollar a Share Over the Afternoon Sales Yesterday.

There was a recovery in Daly-West today and the stock sold at least a dol-lar higher than it did yesterday after-noon. At the close the stock was held at \$17 a share, while \$15.50 was bid for it. A well known broker declared dur-ing the day that the break of yesterday was due to disposal of a bunch of stock which had been held on a margin for some time. With the warm weather on and the indifference displayed by invesand the indifference displayed by investors it does not take much to break the market. There was no change in Con. Mercur compared to yesterday. Grand Central not being offered, was passed with a bid of \$3.75. Century continued weak and was bought at 53 and 52½ cents. A 600-share lot of Swansea went closing quotations and sales were

ONLY A RUMOR.

Ophir Property at Stateline lins Been

Abandoned for Good. correspondent writing from

A correspondent writing from Modena is out with a story to the effect that officers of the Ophir mine at Stateline are expected to arrive in camp soon to arrange for the starting of operations at that property. While it may be possible representatives of the company are coming, it is hardly probable that the mine will resume again. An official said not long ago that no more money would be put up for the development of

would be put up for the development of the groatd; that it was given up as a failure and that the company would likely sell the machinery and buildings for whatever the company could get.

AT LOST PACKER MINE.

Salt Lakeltes Arrive at Idaho Property On Inspection Trip.

Henry Walsh, James Ivers, Miles Fin-lan and John Lynch of Utah, arrived in Custer Tuesday evening and went over

to Loon Creek Thursday to look at the Lost Packer mine, in which they own the controlling interest, says the Custer Prospector. They are all western men and are familiar with the condition of the new camps of the west, and are men whom we are pleased to see become interested in this section.

Mr. Walsh visited the Packer last summer and on his judgment about \$80,000 worth of Packer stock was purchased by himself, Mr. Ivers and Mr. Finlan which gave them the control of the property. In mining as in business politics or war the experienced men are quick to see the opportunities and to take advantage of them as they occur.

HEINZE SUED AGAIN.

Amalgamated Copper Company Wants A Judgment for \$1,500,000.

Suit has been filed in the courts at Butte against F. Augustus Heinze, the Montana Ore Purchasing company and the Johnstown Mining company. Heinze-concerns, by the Butte & Boston Mining company, one of the Amalgamated Copper company's concerns. The latter claims ore to the value of \$1,500,000 has been extracted unlawfully from the Michael Davitt mine and asks judgment for this amount and costs.

chael Davitt mine and asks judgment for this amount and costs.

Helnze and his associates are alleged to have secretly invaded the mammoth ore bodles of the Davitt claim through crosscuts and blind passages driven from the Heinze mines, deep under-ground to the ore bodles, the possession of which is claimed by the Amalga-meted Corner company. mated Copper company.

THUNDER MOUNTAIN ROAD. The Only Feasible Route is by Emmett, Says R. W. Purdam.

General Manager R. W. Purdum of the Belle of Thunder Mountain company, accompanied by Prof. E. M. Ray, the noted mining expert, returned from Sunnyside, Thunder Mountain country, last Tuesday evening, says the Nampa (Ida.) Herald. Mr. Purdum came back several days sconer than had been his intention in order to hasten the departure of 25 carpenters to work on his Sunnyside mine and he will leave with this force tomorrow. To a Herald representative he gave the first accurate and detailed description of the new state road that has been published, and also a full and interesting statement concerning mining conditions.

concerning mining conditions.

"Mr. Dewey's survey of two years ago," said he, "established the fact that there is only one feasible route into that section. It follows the water courses for the entire distance and is the route adopted for the state road. Leaving Emmett The road follows up the Payette river for 64 miles to Warner's ranch, now known as Thunder City, where they have started a lively little town. Thence it follows Big Creek, for 14 miles over a very easy grade to the summit. Thence down Trap creek all the way to the south fork of the Salmon and through a nice valley to near the mouth of Sabin creek, 13 miles, This is also a very nice grade.

This is also a very nice grade.

The road then follows up
Cabin creek to the summit, distance Cabin creek to the summit, distance of six miles, and down Trout creek to Johnson creek, at the mouth of Buck creek, a distance of nine miles. Thence up the north slope of Buck creek, with a nice grade, to Trappers' flat, three and a half miles. From Trappers' flat it extends over a 6 to 12 per cent grade a distance of 12 miles to the summit of the southwest for of Monumental creek and then down Monumental creek to Roosevelt, 10 miles.

"This description is absolutely ac-"This description is absolutely ac-curate and it is the first that has ever-been published. The distance from Emmett to Roosevelt is 136 miles and is follows the natural water course

the entire distance. It is certainly the finest mountain road ever built in the state of Idaho. and no other wagon road will ever be constructed from any railroad town to the Thunder Mountain

country.

"Prof. E. M. Ray, who has just made his third trip into Thunder mountain for the Dewey mine, after examining the Sunnyside in detail, pronounced it the biggest body of free milling pay ore ever opened up in the same length of time and stated that the thickness of this great hody almost precluded the this great body almost preciuded the possibility of its thinning out between the Sunnyside and Dewey workings. The Dewey mine is working a strong development force and will start up the mill again on the 20th of this month. The snow war so deep in March and The snow was so deep in March and April that they could get no fuel for the mill, but now have a good supply. the mill, but now have a good supply. The ledge that is being stoped in the Dewey is over 70 feet thick and they have vast bodies that will average \$17.

MR. LEWIS COMING.

Beaver County,s Senator Will Reach Salt Lake This Week.

A message from the east, received during the day from A. B. Lewis, con-veyed the information that he had left New York and that he expects to land in this city by the end of the week. Not a word was contained in the telegram bearing on the pregress of negotiations pending for some time towards the organization of the Monarch Copper company. per company.
It was learned from a reliable source

however, that since the fixing up of the financial affairs of the Majestic com-pany, the horizon looks decidedly brightfor the Monarch. The report of Prof. Maynard, the

The report of Prof. Maynard, the New York expert, who visited the properties which the Monarch company proposes to take in, has never been allowed to become public. The parties who compensated the engineer and his assistants, have been doing little talking; but there are reasons to believe that the report submitted to them was couched in favorable terms and that the delay now hinges only on an investigation of the titles.

Grading for Zine Plant.

The grading for the new zinc plant to be installed at the Horn Silver mine at Frisco is progressing favorably. Material is arriving daily and it will only be a matter of a short time until the building will begin to take on form.

Doctors said He would not Live.

Peter Fry, Woodruff, Pa., writes: "After doctoring for two years with the best physicians in Waynesburg, and still getting worse, the doctors advised me if I had any business to attend to I had better attend to it at once, as I could not possibly live another month as there was no cure for me. Foley's Kidney Cure was recommended to me by a friend, and I immediately sent my son to the store for it and after taking three bottles I began to get better and continued to improve until I was entirely well." CAPT. STALLINGS AND THE LINCOLN

Superintendent of Well Known Idaho Mine on His Way Home From St. Louis.

ATTENDED THE BIG CONVENTION

Democratic Nominee a Large Shareholder in the Lincoln-Where Work is Progressing.

Capt. Stallings, who has occupied the position of superintendent of the Lincoln mine in the Pearl, Idaho, district, since its very inception, was in the city today greeting his many friends. The captain is just returning from his vacation which was spent in the east and included a trip to the St. Louis fair and the Democratic national convention, which was of particular interest to him for the reason that Alton B. Parker, the nominee of the Democrats is an extensive shareholder in the Lincoln and has been since about the

organization of the company.

As to the mine Capt. Stallings said he had heard very little from it since he left on the first of the month. When he came away Manager John T. Hodson and President Kenneddy were both on the ground to direct operations. The captain is just as confident as he ever was that the Lincoln is going to make a record for itself and will compare favorably with any other mine in the state of idaho.

state of Idaho. Some interesting developments have Some interesting developments have taken place lately on the 350 level where an exploratory campaign has been in progress. A four-foot vein of fine ore has been disclosed here. In the west drift on the same level has been disclosed seven feet of good milling ore. Both drifts have been in ore all the way from the incline. Work is also being pushed on the 950 level east from the incline where satisfactory results are being obtained. The mill is running and turning out a good grade of concentrates.

CONCENTRATES.

SENATOR FAIRBANKS IN COLLEGE.

Young Fairbanks, by farm work and wagon-making had saved \$41 by the time he reached the age of 15 years. With it and one suit of clothes he traveled to Delaware, O., where he entered Ohlo Westerner of the Weste tered Ohlo Wesleyan university. He turned to account his rudimentary knowledge of carpentery by working on Saturdays for a local contractor for \$1.25 a day.

A few weeks after young Fairbanks arrived at college he fell and split his only trousers beyond immediate repair. It was necessary for him to borrow a pair from a fellow student, and the loan had to be continued because he was denied credit for a new pair at the stores in town. He had to send home for his mother to make him another

working in college during the college year and in the harvest in vacation, he was graduated from the college and its law course at 20. At 22 he was admitted to the Supreme Court of Ohio, and later he went to Indianapolis.—Lesile's Monthly Magazine. assocococococococococo Monthly Magazine.

POLITICAL OUTLOOK DEPRESSES MARKET

International Stocks Reflected the Low Tone Prevailing in London.

THE CENERAL LIST WAS DOWN.

Lowest Prices Proved Attractive to Buyers, Causing a Quite General

New York, July 19.-The international stocks reflected the depression in the Lon-lon market on account of the political outlook, and carried the general list downward with them with the exceptions of a few specialties.

The lowest prices proved attractive to buyers and a pretty general recovery fol-lowed. Selling orders were met in United States Steel preferred, after it rallied to 62, and it yielded to 61%, dragging down the general market again. The decline in United States Steel preferred carried it 1% under yesterday. A rise to 54 in Amalgamated Copper caused the market to harden a fraction in sympathy, but trading became very dull. Anaconda, Paper and the Rubber Goods stocks rose 1 to 1½, and United States Rubber preferred 2%. Bonds were irregular.

THE BASKET WILLOWS,

The Bureau of Forestry, United States Department of Agriculture, suggests a new method or growing willows that will yield a better grade and

ncreased production per acre.

The culture and manufacture of basket willow have not attained in the United States the degree of perfection and profit States the degree of perfection and profit that mark the industry in Europe. This is for several reasons, the most important being the relative compensation of labor and the failure of the American grower to adopt the most improved methods. The growing, harvesting, care and manufacture of willow require manual labor wholly unassisted by machinery. The cheap labor of Europe has grown willow and weven it into baskets at a profit impossible with us and our better paid labor. American ingenuity has still further complicated the issue by producing a cheap split wood basket to take the place of the more expensive and durable willow. Thus an industry of good possibilities is languishing.

The Bureau of Forestry has taken up the matter and given it a careful study, its expert has thoroughly investigated the methods of culture and manufacture both in this country and in England, Germany and Hollard. In addition, the Bureau has astablished a willow plantation on the department's experimental grounds near Washington, D. C., where the best species of basket willows were set out on different soils and spaced in accordance with different methods of planting. The results of this research will shortly be made known by the bureau in a builetin entitled, "The Basket Willow." that mark the industry in Europe. This

will shortly be made known by the bureau in a builetin entitled, "The Basket Willow."

The bureau's purpose was to discover a means of reducing the cost of the raw product, peeled and unpeeled willow rods, and also of improving the quality. This has been definitely ascertained. It is entirely a matter of properly regulating the distance between the sets in planting, care in cutting the crop of rods, and in selecting better species and strains of willow. The custom has been to plant in rows 3 feet apart, spacing a foot in the rows between the sets. A far better plan is to put the rows only 20 inches apart, and reduce the distance between the sets to 9 inches. When this is done and the crop is cut close to the ground the rods will be longer and less branchy, the plants longer lived, and the yield per acre much greater. The initial cost is slightly higher than under existing methods, but this is more than offset by the increased returns. At present, an average production of six tons of green rods per acre is exceptional; by the method now advocated by the bureau eight or more tons per acre of better rods can be produced. When to improved methods of culture the advantages from a choice of better European varieties of willows for pianting are added, the result will be a marked reduction in the price of the raw material and a distinct betterment of the condition of both the producer and manufacturer.

The growing of basket willows was introduced into the United States some sixty years ago by German basket makers, who settled in western New York and Pennsylvania. They first attempted to use wild willows, but soon abandoned these as impracticable and imported the purple or Welsh willow, They grew the rods and the manufacture into baskets was made profitable by whole families engaging in the weaving. Their product has always been a cheap variety of basket, since they use steam in peeling the rods, which gives them an undestrable dark color. When the industry was extended farther west and down to the Baltimore district,

tured. But this country, in the extensive use of whow ware, has never approached Europe, where are found not only heavy farm baskets and receptacles made of unpeeled willow, but market, clothes, and fruit baskets of peeled willow, furniture, hampers, and trunks, and most artistically wrought split willow ware designed for countless other uses. Could all these be as cheaply manufactured here as there, their use by us would doubtless be as extensive as that across the sea. For willow ware is not only pretter than its substitutes, but, what is still more importan, lighter and more durable.

Another use for willow in this country is found in the growing demand for willow furniture, which has become fashionable in the north, while in the warm climate of the south it is rapidly taking the place of uphoistered furniture, Good wages can be paid in the manufacture of this kind of furniture. It is a profitable industry and steadily growing in importance, while willow basket making has barely held its own in the last decade. The demand for furniture material has been met to this time chiefly by importing French rods. But this can be changed if our own willow growers will adopt more scientific methods of culture and market their rods only after they are well seasoned—not soon after cutting, as is now customary.

rods only after they are well seasonednot soon after cutting, as is now customary.

In the builetin the bureau will issue
in a few days every aspect of willow culture and manufacture is exhaustively
treated. The character of the ground
to be used, preliminary cultivation,
planting, weeding, and cultivation, cutting, sorting, peeling, and packing all
are discussed thoroughly and advice as
to each branch of the work is clearly
given. The virtues and defects of the
different species of willows suited to
basket manufacture are described.
Inundation in the spring after harvest
and before the new crop season opens is
a new aid in protecting the holts from
insects and in fertilizing the sets especially advised by the bureau.

A valuable part of the builetin is a
chapter on insects injurious to basket
willows, prepared by the bureau of entomology. This not only describes the
insect enemies of the willow, but also
gives methods for their control. The
builetin should prove invaluable to all
present producers and manufacturers of
basket willow, and of great interest to
farmers who desire to add willow growing to their other crops. It can be obtained by application to the forester,
United States deepartment of agriculture,
Washington, D. C.

SUMMONS.

In the District Court of the Third Judicial District of the State of Utah, County of Salt Lake, Niels P. Paulson, Plaintiff, vs Nathan Rozenberg, Defendant, The State of Utah, to the Sald Defendant: You are hereby summoned to appear within twenty days after the service of this summons upon you, if served within the County in which this action is brought, otherwise, within thirty days after service, and defend the above entitled action; and in case of your failure so to do, judgment will be rendered against you according to the demand of the complaint, which within ten days after service of this summons upon you will be filed with the cierk of sald Court.
