NEW LIGHT WEIGHT PIPE

E. SCHULTZ

Fig. 2

Superior for Hydraulic Mining, City Water Works, and all other purposes for which iron or wood is used in any pipe now manufactured. It combines

LIGHTNESS WITH STRENGTH

(Being from 1 to 1 1/2 the weight of iron,) and

CHEAPNESS WITH DURABILITY.

It is made of the Best Oregon Lumber, and is specially Bored with French Irons of Sizable Strength in Sections any Required Pressure.

Its whole Exterior is Completely Protected from Rust or Decay by a Thick Coating of Asphalting, while the Interior is Entirely Smooth.

It is connected with the water

WITH LEAST LOSS OF HEAD.

Tested with 50 lbs. pressure to the sq. inch, it will sustain a head of 50 to 75 feet more. Cheaper than the Iron Pipe, and will sustain a head of 100 feet, or over 200 pounds pressure to the square inch.

It is already in use in many of the Mining Crops of the Pacific Coast, and is rapidly taking the place of iron pipe, the Lead or Wrought Iron Pipe. It is used for Fire, Steam, Oil and Water, and for all purposes, from the Farm, to the Factory.
