Fred Petersen had caught fire and before anyone saw it the fire had gained such headway that all that could be done was to keep it from spreafing. However, it spread so that it consumed the pig pen<sup>3</sup> and pigs, a granary, poultry, five tons of hay, fences, barns and several other things. It almost reached the dwelling but a bucket brigade kept water on the house, which at one time was in great danger. Fortunately the wind changed and the sparks went northward, where there were no dwellings. The loss is up-wards of \$500 with insurance of \$250. The barn and granary were new and recently built. Providentially Mr. Petersen's horses and cows were in the pasture. Fire crackers are supposed to have caused the blaze.
