

MINING, BUSINESS AND STOCKS

PERSEVERANCE
IS REWARDED

What must be considered by a great many mining men, acquainted with the district, as one of the best results of long and persistent work, recorded for a long time past, is the news of the discovery of high grade ore in the Tinto Moore property at Bingham.

The discovery, which resulted after about 10 years' hard and expensive work, was made at the depth of a few feet below the working known as the Bingham tunnel, and was the more immediate result of expert opinion, after a recent examination of the property.

Some indications of the presence of an ore body were discovered in the tunnel, and expert examination resulted in the statement that probably the apex of a large body of ore had been touched, which a tunnel driven from a lower level would cut.

A winze was started to verify this opinion, with the result stated, and the Tinto Moore is now said to be in possession of a large body of shipping ore.

During the past ten years the Surbaughs, owners of this property, have been busy prospecting the ground at their private expense, with a perseverance which merits the final result. Till very recently there was practically no return from the mine for the work cost and upon it, and then only a partial one. This was derived from the sale of converter clay. Now, however, it is believed the property will soon be among those paying handsomely for its working, and besides the fact that it adds one more to the list of paying properties, it opens further possibilities in the outskirts of a rich district, and stimulates the work on other new ground.

STOCK EXCHANGE QUOT.

A slight tendency was shown at this morning's session of the stock exchange toward a falling off in the business which has marked the sessions during the past few weeks, the volume of business being considerably less. This is largely attributed to the storm and to the approaching holidays, which invariably mark a duller season for the stock market. The principal points of attack this morning were Iron Blossom Consolidated and Sinter, both of which stocks were rather heavily dealt in.
