THE DANFORTH

Non-Explosive

PETROLEUM FLUID!

THE terrible and fatal disasters, which are
almost daily occurring by the careless use
and explosions of kerosene oil, should call the
serious attention of using it to its deadly qual-
ities and induce them to procure a substitute
for it.

Thousands have perished by using kerosene
oil, and thousands more will be offered a sacri-
fice to its death-dealing properties without its
use is discontinued or its destructive element
done away. If a fluid capable of a far more
brilliant light,

**Cheaper, More Cleanly and Per-
fectly Free from the Danger
of Explosion!**

can be found, is it not perfectly suicidal to de-
lay for a single day to use it? Such a fluid, by
years of patient experiment and the expendi-
ture of over fifty thousand dollars, has been
provided by R. F. DANFORTH, of Cleveland,
Ohio, and it has been introduced to the public
with great success.

For the Danforth Non-Explosive Petroleum
Fluid it is claimed:

1st. That it is Non-Explosive and perfectly
safe in whatever form used.

2d. That it is entirely free from filth and
grease, and will not stain silks or fabrics of the
most delicate colors or tints.

3d. That it is entirely free from all disagree-
able odor.

4th. That it gives a purer, more brilliant and
at the same time a softer light than any oil or
fluid in use, and is fully equal to gas light.

5th. That it is (except daylight) the cheapest
light ever discovered.

Surely, if the fluid is as above represented
kerosene oil should be discarded in every fam-
ily where it is used, and the Danforth Fluid
used in its stead. Not to use it would be trifling
with the lives and property of every member of
the family.

The Fluid 75c. per gal.

The Fluid, Burners, Chimneys, etc., in
large or small quantities, can be procured of

cupied by Dr. Clinton.

the best Stoves in the market.

They have been constructed specially for the
use of our Western Bituminous Coal (for which
all stoves of Eastern manufacture are so ill
adapted). Enlarged Flues insure a perfect
draft; the plates that line the fire chamber are
unusually heavy, and combine certain pecu-
liarities in their construction which give these
Stoves superiority over all others in the con-
sumption of their smoke, thus saving a large
per centage of fuel.
