The London Electric railroad is certainly a great instrument over certainly a great improvement over anything London has ever had, But at-ter all, it is not rapid transit, in the sense we understand it in the United States. The distance from the Bank of England to Shepherdabush is 400 yards short of six miles. This is covered in twenty-five minutes, including thirteen steps. This is done by means of two-single track tubes which, of course, prevents the running of express trains. The New York line will contain four

A \$2,000,000 Art Collection.

New York, Aug. 25.-The late C. P. Huntington's art collection, if it were sold at auction would probably bring \$2,000,000. In the course of the last six years his commissioners have spent about \$230,000, it is said, in buying the works of American artists. Within the last six menths he bought an "Ool Master" for \$60,000. In his collection are paintings by Meissonier, Millet, Troyon, Rosa Bonheur, Rossenu, Sir Frederick Leighton and Landsoer.

One part of his collection is a series of pictures of Roman Cathelic prelates from pope to bishops, for which he paid \$6,000 francs. His gailery contains also many of Gustave Dore's works. Fins tapestries were always sought by Mr. \$2,000,000. In the course of the last six

tapestries were always sought by Mr. Huntington. One place now in his home as a portier was designed by Teniers The collection includes also mintatures and bric-a-brac.

U. S. Coal for Europe.

New York, Aug. 25.—P. S. Fleming, secretary of the Anthracite Coal Operators' association, will sail today for Europe. Mr. Flyming made a four of Europe two years ago to investigate the possibilities of increasing the export anthracite coal business of the United States. It is understood the present trip is to arrange additional facilities for carrying both anthracite and bituminous coal across the account and bitaminous coal across the account and for handling it when it arrives at the various Mediterranean ports. There is reason to believe that the orgaulzation of a new transportation company is contemplated for the express purpose of carrying very large quantities of coal to Europe. Mr. Pleming, it is understood, has secured bids for the construction and equipment of new ocean going steamships of large capacity, both from American ship building companies from com-panies in England, Beigium and Nor-
