Richfield, Feb. 28, 1878.

MR. DENNY LEBEL.

We have perused a letter from Elder Charles D. Denny, of Springfield, now in England, to a friend in this Territory. It is dated February 13. He had a month in Hull, Yorkshire, where he had delivered a number of discourses, in Father's Hall, which had been largely attended. A deep interest in the gospel had been awakened in a number of people. He had appointed a Brother Melick to baptize four men who had applied for admission to the Church, and he expected that that ordinance would be administered shortly to a number of the believers. On account of his being so promising, Elder Denny's letter was read in Hull, another month. He had accepted invitations to visit some very intelligent people who were interested in the work. While engaged in his missionary labors, friends have been raised up to him on every side to his own astonishment, causing him to feel deeply grateful to God for his watchcare.

CITY COUNCIL.

The Council met last evening, Mayor Little presiding.

DISINFECTANT.

Suggestions by the Quarantine Physician.

SALT LAKE CITY, March 4, 1878.

Whereas, the City Council of Salt Lake City have recently passed a resolution requiring the Quarantine Physician to publish, as often as considered necessary, the best method for disinfecting, where cases of SCARLET FEVER and DIPHTHERIA are concerned.

The following is respectfully submitted:

All cases should be isolated immediately from the public.

All visiting and passing to and from the infected premises should be prohibited, only for as is absolutely necessary for the proper nursing and caring for the sick.

The rooms of the sick should be kept as cool as possible, and the patient should be constantly disinfected.

The glasses, cups, spoons, etc., used in the sick room should not be used in any other part of the house, nor by any other members of the family; and should be cleaned several times daily in hot water containing chlorinated soda or carbolic acid.

The room in which the patient is kept should be constantly filled with the vapor of lime, easily procured by placing a tub or large bucket of water in one corner of the room and throwing in sufficiently to keep the water boiling, a lump of quick lime as large as a man's fist.

All rags and rubbish coming from the room should be carried some distance from the house and immediately burned or buried.

Neighbors visiting at the sick room for the purpose of rendering aid to the patient should be so advised that they should not enter the room, and to be removed when passing to their own homes. Also it would be well to fill their rooms at home with vapor of lime as a precautionary measure.

No children should be allowed to visit under any pretext whatever the afflicted ones nor to attend at the funeral of those who have died.

THE DAUSMAN & DRUMMOND

Tobacco Company's

CROSS BAR.

THIS 16 ounce armypound is marked into 16 equal spaces (1x1) each space representing an ounce. It being justly divided, the consumer is satisfied with his allotment, and the retailer knows that he has given neither too much nor too little; as he is liable to do where the lump is not so marked. This lump also renders it unnecessary for the retailer to have more than one package of Tobacco open at a time, as he can accurately cut any size lump needed from a 16 ounce lump down to a single thick pocket piece. It is the only plug of Tobacco marked for the benefit of the dealer and consumer. All others

marked with tin, wood, leather, or other tags, or in any other manner are solely for the benefit of the manufacturer.

It saves interest, as a single package gives the dealer all the sizes he requires, it is not necessary to keep six or eight open at a time as is usually the case.

The manufacturer is able to make a better chew in a pound lump than in a smaller one for the same money. No loss can accrue from change of styles or variation in prices. Most dealers know by bitter experience how great an advantage this is. It is manufactured with the utmost care and each plug is perfect in chew and style.
