

THE SEMI-WEEKLY NEWS

Issued Mondays and Thursdays
and Contains All the Cream of
the Daily and Saturday News.

LOCAL BRIEFS.

Arranging Contest—The state university debaters are trying to arrange a contest with the University of Oregon, to be held in this city, in April next, and a second contest to be held later in Oregon.

Soldiers Paid—It was payday, yesterday at Fort Douglas, and the soldiers were down town in the evening, spending their money in the city.

Water Applied For—President Dan Hanson of Elsinore has filed application with the state engineer for three second feet of water to be taken from Thompson creek in Sevier county, to supply the town with water, as the local water supply has been condemned by the state board of health.

Fires His Bond—County Assessor Campbell Brown, who succeeded himself in that office by the will of the people as indicated in the recent election, has filed his new bond with the county clerk. His bond is in the sum of \$15,000, and the sureties are John Gabbett, Edward E. Jenkins and Ben R. Eldredge.

To Tour the State—Dr. F. E. Clark, inspector of the state board of health, will make a tour of the state, lecturing on the necessity of hygienic principles in living, and endeavoring to awaken among the people a realization of the benefits to be obtained in observing the rules of health.

Wey Buys Property—Fred Wey closed a deal last evening, with Herbert S. Cutler, who has secured 100,000 feet with right of way at Seventh South and Main streets, for \$12,000. G. R. Botwell has bought 55,452 feet on South Temple street between West Temple and First West streets, from Johanna Nelson for \$10,000.

New Addition—When the new 14x103 foot addition to the south side of the Alta club is built, it will include 14 new bedrooms, with additional bath rooms, an enlarged kitchen, coat room and barber shop. The club will have next Saturday evening, on the issuing of \$50,000 worth of bonds to pay for the proposed improvement and take care of the \$14,000 present indebtedness of the club.

Zions Savings Bank and Trust Co.
Pays 4 per cent on deposits, safety deposit boxes for rent.
JOSEPH F. SMITH, Pres.
O. C. BEEBE, Cashier.

WESTERN STOCK MARKET.

Kansas City Stockyards, Dec. 10.—A good supply of Colorado and other western hogs are coming for the last two weeks, and the supply has been running more to stockers and feeders than any time before this season. Practically no head steers from the range were included last week, but there were some very good cows and the quality of the stockers and feeders from the range was included in the season and prices the highest. The market has been firm since the middle of last week, with a tendency toward higher prices, and today's sales a positive advance of 10 to 15 cents on stockers and feeders, best grades, both cows and steers are strong to good. Late sales for the week's record price for feeders was paid at 4.35 and 4.50 for 900 pound Colorado, while the bulk of the stockers and feeders sold at 5.75 to 6.25, a few low grade stockers at 5.00 to 5.50. Colorado cows sold at 3.00 to 3.50 mainly, with quite a number of sales at 3.50 to 4.00, cowboys 2.25 to 2.50. The best cows selling at 2.75 to 3.15, some New Mexico stockers at 3.25 to 4.00, range bulls 2.00 to 3.00. Several lots of Christmas cattle are here today, full loads selling at 6.00 and old head at 5.00.

Sheep and lamb offerings are practically all fair to good feed stuff, very few lots of good to choice stock included. The market is stronger than a week ago. Today, market strong. Buyers take the desirable stock readily at strong prices, without regard to outside conditions. There is nothing about medium grade here today, but lambs are quotable at 5.25 to 5.50, including feeders at 2.25, or better, yearlings at 5.25 to 6.00, wethers 5.00 to 5.50, ewes 4.50 to 5.00. No stock or feeding stuff is available, but such as arrives and ready sale.

"The sheep situation in Utah," said H. Carleton of Thompson, Utah, yesterday, after marketing a shipment of 2,500 carloads of lambs and mixed sheep, "is in a healthy condition. Practically the same number of sheep were sold on this fall as on the same time last year. The sheep taken out last fall, the sheep went out in good condition, as the mountain range feed this season was good. The movement of sheep from the mountain ranges to the deserts was made without any loss, and the sheep are in good condition. There might have been less sheep carried over the winter had we been provided with more care, as the car shortage was the worst we have ever experienced. But the feed on the deserts is all right and there is no doubt but that the sheep will pull through in fair shape. Shepherds, as a rule, have made money, and are satisfied with the results of this season."

WHAT'S
Worth doing is worth doing well. If you wish to be cured of rheumatism, use Ballard's Snow Liniment and you will be well cured. It cures Rheumatism, Sprains, Neuralgia, Bruises, Contracted Muscles and all the ills that flesh is heir to. A. G. M. Williams, Nacoma, Texas, writes:
"I have used Snow Liniment for sprained ankle and it has been the best of satisfaction. I always keep it in the house." Sold by Z. C. M. T. Drug Dept., 112 and 114 South Main Street.

MYRTLE REED'S BOOKS.

Do you wish to read something cheerful and sweet? We have all of MYRTLE REED'S books, including her Love Letters of a musician. These books are beautifully bound, and are in keeping with all our stock of fiction, essays, and historical books.

REAL ESTATE MEN HOLD A MEETING

Offer Made to Subscribe for Purpose of Boosting Salt Lake.

OUTSIDE CAPITAL WANTED.

It is Proposed to Take Page Advertisements in Leading Eastern Daily Papers.

The Salt Lake Real Estate association met yesterday afternoon at the Commercial club, where it was announced that several local business men had offered to subscribe to advertise the city with a view to inducing outside capital to invest here. A subscription list will shortly be opened under the auspices of the association so that all citizens will be given an opportunity to subscribe.

It is proposed to take page advertisements in eastern papers with big circulation in every part of the country. Pacific coast publications will be given space, and several other devices for expending money where it will bring the best returns are being considered.

Ten applications were received by the association for membership and these will be acted upon at once. The association appointed a committee to investigate the shortage in Salt Lake's coal supply and consider means of relieving it as far as possible. Eugene B. Palmer, of Stowe & Palmer; Carl Herdy and J. T. Sinker comprise the committee.

The secretary of the association was instructed to communicate with the boards of trade of Goldfield and other Nevada mining centers, and request them to prepare mineral exhibits for display in the Salt Lake Chamber of Commerce.

The value of such an exhibit was generally referred to as any one who has made here to help Nevada would turn help this city and state.

Judge Colborn in a speech said: "If the railroad building activity, the stock market, the country, the extraordinary development of the mining and smelting industry of Utah and Nevada are generally known, this knowledge will result in bringing money here. But until Mr. Newhouse made his recent real estate deal, no amount of effort was sufficient to cause property owners here to do anything toward carrying the news of the city's opportunities to the country at large. The Real Estate association furnishes the proper channel through which to expend money in advertising the city. Its members make their living by selling real estate."

"While in the east I had ample opportunity to ascertain how Salt Lake stands among the western cities. Fully one-half of the mining interests in New York, which are the most prominent in all history, are confined to Utah and Nevada mines, and the impression prevails there that the two states are only just beginning on a career of mining that will astonish the world. If one will go down Wall street and see the thousands of men who wrangle in riotous noon hours over Utah and Nevada mining stocks, he can easily confirm this statement. Utah and Nevada are the fashion in mining now. Everybody knows that Salt Lake is the mining center of the west and will have tribute from the mines which will result in a residence and business expansion that will double the population within the next three years."

Cosmetics will ruin the complexion. There is no beauty in the world equal to the effects of Hollister's Rocky Mountain Tea. It keeps the entire body in perfect health. Tea or Tablets, 35 cents. Z. C. M. Drug Dept. 112-114 South Main Street.

FIVE WARDS IN SINGING CONTEST

Held Last Evening in the Pioneer Stake Hall by the Sunday Schools.

AUDIENCE WAS ENTHUSIASTIC.

First Prize Was Given to the Sixth Ward Which Scored 90 Per Cent.

There was an interesting singing contest last evening in Pioneer stake hall which was well filled with an enthusiastic audience. The contest was under the direction of the state Sunday school board, five wards participating, viz. the Thirtieth, Sixteenth, Twenty-sixth, Sixth and Fourth wards, the choir being conducted by Mrs. Lewis Brown, Arthur Day, Glen West, James Fullmer and Alma Ellis. The judges were Thomas Ashworth, Liberty Stakes; H. A. Tuckett, English Stakes; Alvin Beesley, Salt Lake Stakes.

The Sacramento hymn, "While of these emblems we partake, In Jesus' name and for His sake," etc., was selected for the opening piece, while each ward was allowed to select one other number for the second song. It is not possible that the contest was under the direction of the state Sunday school board, five wards participating, viz. the Thirtieth, Sixteenth, Twenty-sixth, Sixth and Fourth wards, the choir being conducted by Mrs. Lewis Brown, Arthur Day, Glen West, James Fullmer and Alma Ellis. The judges were Thomas Ashworth, Liberty Stakes; H. A. Tuckett, English Stakes; Alvin Beesley, Salt Lake Stakes.

The Sacramento hymn, "While of these emblems we partake, In Jesus' name and for His sake," etc., was selected for the opening piece, while each ward was allowed to select one other number for the second song. It is not possible that the contest was under the direction of the state Sunday school board, five wards participating, viz. the Thirtieth, Sixteenth, Twenty-sixth, Sixth and Fourth wards, the choir being conducted by Mrs. Lewis Brown, Arthur Day, Glen West, James Fullmer and Alma Ellis. The judges were Thomas Ashworth, Liberty Stakes; H. A. Tuckett, English Stakes; Alvin Beesley, Salt Lake Stakes.

In the singing, the decision was rendered by Alvin Beesley who in his remarks, highly commended all of the schools for their fine work, and awarded the first prize of \$15 to the Sixth ward choir which scored 90 per cent out of a possible 100. The second prize of \$5 was awarded to the Seventeenth ward choir, which scored 85 per cent; and the Fourth ward received special mention, and the prize of \$5 for the best marching.

Words of praise were accorded by many of these points for the excellent work rendered by all of the wards participating and it was recognized that good progress had been made. Between the numbers rendered by the wards, John T. Howers, organist, and Edith Burns played a piano solo.

L. L. NUNN ON THE MALAD RIVER

Large Force of Men Working on Power Project on the Malad River.

MAY BE USED ON SHORT LINE.

Electricity Generated Likely to be Utilized by the Harriman System—Some Details.

The following clipped from the Boise Statesman regarding a great power project on the Malad river now being developed by Utah people will be of interest locally:

A visitor to the Hagerman valley is surprised to find a large force of men at work in the Malad canyon. Inquiry develops the fact that some 50 men are employed there in blasting out a line for a flume for a power plant. The blasting is heavy, the roar of the detonations being heard all over the valley.

Little, if anything, has been heard of this operation until the valley, and when the operation was called to the attention of a representative of the Statesman on the occasion of a recent visit to that section, it was determined to learn what was going on. Investigation has brought out a story of highest interest.

That work is being done by the Telluride Power company of Provo, which L. L. Nunn is the controlling spirit. It is under the supervision of W. G. Swenson, engineer. Though the people of the valley have heard the blasting and know that a large force of men is at work there, there is much mystery about the identity and purposes of the enterprise, but it is known in a general way that a power project has been launched by somebody who means business.

To give a comprehensive idea of the undertaking, it is necessary to go back a little and give a history of the foundations of the enterprise. On July 7, 1904, W. B. and J. W. Slick located 1,100 second-feet of the waters of the Malad river, the point of diversion was fixed two miles up the canyon, just below the springs that feed the stream. That location is subsequent to that of the Telluride Power company and the choice of the point was right, but by turning the water back into the river at the head of the flume of the irrigation company, the water can be used for power purposes without infringing upon the rights of the latter.

Recently the Slick brothers sold their location to Mr. Nunn, and he went to work at once. Work had to be done before the expiration of two and one-half years from the date of location, and Mr. Nunn immediately put his men in there. By Jan. 1 he will have expended some \$75,000.

The river has a flow at low water of 1,100 second-feet. During the flood season it runs much higher, but at season the river above runs over into the canyon, but during all the remainder of the year the stream is fed from three large springs, two miles up the canyon. Throughout the year the water varies less than seven degrees in temperature, and is therefore very desirable for power purposes, as the cold will not interfere with operations, as is common in plants on all other streams.

It is planned to take the water out in a flume 15 feet wide and 10 feet deep. The power plant will be erected at the head of the Telluride flume, where the water will have a drop of 25 feet. The power that may be generated is approximately 3,500 horsepower. It may be remarked incidentally that the fall from the head of the Telluride flume to the river is 151 feet, making a total fall of 257 feet in the two miles.

The site appealed to Mr. Nunn, and is regarded as the key to the entire power situation on the Snake, affording a possibility that will be absolutely free from interruption at any season of the year.

WHO MR. NUNN IS.

L. L. Nunn is one of the most prominent of the country engaged in development of electrical power. He, or his company, owns the plants at Provo and Logan, and half a dozen others in Utah. He also owns plants in Colorado, and it is claimed, he or his company is the owner of the plants of the kind that are other single company in the country. At this time he is engaged in developing a great power plant at Bear lake, 15 miles from Soda Springs, near the Idaho border, and by tapping it some 10 miles below its normal surface, a sufficient head will be secured to generate 16,000 horsepower.

Mr. Nunn is also heavily interested in mines in Colorado, having properties at that state of enormous value. He is a man who goes about his business very quietly, but that he makes his work count by the success he has achieved in so many widely separated sections.

Moreover, it may be added, he evidently proposes to play an important part in the electrical development of the state, for it is believed he is interested in a number of other important power sites, which he will develop in due time.

USE OF THE POWER.

The question naturally arises, What does Mr. Nunn propose to do with the power to be generated on the Malad? It is not possible that he is intending to expend \$75,000 there just for the fun of holding a location as a speculation. Nor is he the kind of a man to pursue such a course. When he starts work it is with a definite purpose, and the conclusion is irresistible that he has a specific purpose in performing that work in the canyon of the wonderful Malad river. It is not possible that he intends to connect with his line to the Logan plant or that at Bear lake, but the former is 10 miles distant and the latter is 10 miles distant. It is a long transmission, though not too long for the additional power were needed, but his new plant at Bear lake will supply the demand at all the Utah points he serves, at least for some years, because it will simply reinforce his present supply.

Therefore it does not seem likely that this power is to be sent to Utah. Such a plan, expending \$75,000, would be likely at this time if the energy to be developed were to be used to supply a future need in that southern field.

There is only one possible nearby market in sight—that is on the Short Line. It is known the Short Line people have taken a great deal of interest in the power situation along the Snake, and it seems altogether probable that this power is to go to that company. There is no other outlet for it at present, while the fact that Mr. Nunn, a man who never goes blundering about in the dark, has come in and taken hold so quietly and yet so vigorously, indicates he has a market in his mind. If that market is not on the Short Line, then it is impossible to guess what field the current is to be sent.

posed power plant is just where it would be most convenient to that part of the line upon which such a change would be likely to be made first—the hills on either side of Glens Ferry. These hills have always been a nightmare to the management of the line, but if they could establish electrical traction on them the problem would be simplified. The enormous electrical locomotives now made would climb those hills with little effort, and the cost of operating that portion of the road would be reduced, perhaps more than half. The enormous consumption of coal would cease, and the locomotives needed to keep traffic moving over that portion of the road would be released for service elsewhere.

For these reasons, the Statesman, were it obliged to make a guess as to the use to which that power is to be put, would have to guess by the use of the locomotives on those hills and perhaps for some distance on each side. The plan may be to run by electric power all the way from Mount Taihuouse to Shoshone.

HOW DIPHTHERIA IS CONTRACTED.

One often hears the expression, "My child caught a severe cold which developed into diphtheria," when the truth was that the child caught the diphtheria germ, which is particularly susceptible to the wandering diphtheria germ. When Chamberlain's Cough Remedy is used, it cures the cold and lessens the danger of diphtheria or any other germ disease being contracted. For sale by all druggists.

CHURCH NOTICES.

The monthly priesthood meeting of the Grand stake will be held Friday, the 14th inst., at 7:30 a. m. in the Twentieth ward meetinghouse.

RICHARD W. YOUNG, JOSEPH S. WELLS, JOHN M. KNIGHT.

The quarterly conference of the English stake will be held Friday, the 14th inst., with sessions at 10:30 a. m. in the assembly hall and 2 p. m. in the tabernacle. Singing will be furnished by the Whitney-Piper-Spencer-Ensign quartet at the morning session.

RICHARD W. YOUNG, JOSEPH S. WELLS, JOHN M. KNIGHT, Stake Presidency.

THAT'S IT!
Cough yourself into a fit of spasms and then wonder why you don't get well. If you will only try a bottle of Ballard's Horehound Syrup, your cough will be a thing of the past. It is a powerful cure for Coughs, Influenza, Bronchitis and all Pulmonary diseases. One bottle will convince you at once. Price, 25c. Sold by Z. C. M. I. Drug Dept. 112 and 114 South Main Street.

TEMPLE NOTICES.

The Salt Lake temple will close on Friday evening, Dec. 21, 1906, and reopen on Tuesday morning, Jan. 8, 1907.

The Mantle temple will close on Friday, December 21, 1906, and reopen on Tuesday morning, Jan. 8, 1907.

LEWIS ANDERSON.

EXPOSURE.

To cold draughts of air, to keen and cutting winds, sudden changes of the temperature, scanty clothing, undue exposure to the elements, and after colds, speaking and singing, bring on coughs and colds.

Ballard's Horehound Syrup is the best cure. Mrs. A. Barr, Houston, Tex., writes, Jan. 31, 1902: "One bottle of Ballard's Horehound Syrup cured me of a very bad cold, and I feel much better now." Sold by Z. C. M. I. Drug Dept. 112 and 114 South Main Street.
