DALY-WEST CLOSED FIRMER

Mammoth Unchanged - Petro Much Weaker-Star Con. and Valco Get a Setback.

?

TODAY'S METALS:

SILVER 60% LEAD, \$3.871/2 CASTING COPPER 1614

community

The stock market was suffering today from the sensational cut recorded yesterday in the price of lead. In anticipation of a decline similar to that made a few days ago, holders of Daly West sold as low at \$16 at the beginning of the call. It was soon seen, however, that the bears were powerless. The stock rose with every sale, and before the call closed, sales were made as high as \$16.50. The assurance of Manager Bamberger that the decrease in the price of lead will not curtail 25 cent dividends seems to give assurance to the stockholders.

Grand Central let go 100 today at \$5.70, while Mammoth sold at \$2.22%. Petro was traded in at 25, Four Aces brought 4, and Ben Butler changed

Star Con was much weaker today, selling down as low as 20. No definite information is obtainable regarding the

Valeo sold down to 96 in spite of rumors of a strike in the tunnel which are contradicted by several brokers. May Day declined today, as a result of the turn lead has taken, and sold down to 89.

SALT LAKERS FOR CAPE NOME.

Slump in Lead Slightly Affected Vice President Sewell of American Smelting Company Arrives.

TALKS OF LEAD SITUATION.

Slump Not Entirely Caused by Over-Production-Other Causes-Condition of Mammoth.

Special Correspondence, Portland, May 20 .- Nearly every city of any importance in the West is giving up some of the best men to the Cape Nome fever. Salt Lake is not behind in this respect. As near as can be learned Salt Lake City will be represented at Nome by about 100 of her business and professional men, who will brave the dangers and hardships of the Journey for the anticipated golden re-

Mr. F. E. Simons and associates have entered the transportation business. By double decking his large barge Mr. Simons expects to easily float 600 men at a time down the Yukon and up the coast to Nome, at \$125 per man. A snug little sum will be banked as the result of three or four such trips. The newspapers will also be well represented. Among the city's professional men, the lawyers seem to be making the greatest spread of means in providing elaborate and expensive outfits for extracting the gold from the beach sands.

Judge Dickson and associates to the number of fifteen, are putting \$1,000 each into machinery to wash and save

the yellow metal from the suriferous sands of Nome. sands of None.

Several physicians are going from Utah, but there is only one as far as known, who is taking anything more than his drugs, pick and shovel and rocker, and that is Dr. Harvey of the Sanitarium. Dr. Harvey will enter the sald stall selfs a bosnital outsit, congold field with a hospital outfit, con-sisting of waterproof tents, two male nurses, medicines, surgical instruments and other equipment necessary to take of those who may need his ser-s. Something like 300 cases of typhoid fever were reported at Nome last year, with only a very small population. The doctor figures, no doubt correctly, that with a population of 40,000 or 50,000 he will have work enough

Some of the adventurers are coming north nearly every day. A number of them have booked a passage by the Ohio, which left San Francisco on the 14ht inst. She will take on the Salt Lake passengers at Scattle, from which port the date of her departure is set for the 24th Inst.

SLUMP IN LEAD.

Vice-president Sewell of the American Smelter Co. Discusses It.

A distinguished party arrived in town today from New York, among whom are Vice President Barton Sewell of the American Smelting & Refining company, Mr. A. Eilers, vice chairman of the operating committee, and Mr. August Raht, superintendent of superintendents The party expect to remain in this city for several days. In company with District Manager T. R. Jones the gentlemen named looked over the smelters south of the city this after-

Mr. Sewell could only be seen for a few minutes, but when approached this afternoon at the Knutsford regarding the present slump in lead, he said it was not due to any effort to depress it on the part of the American Smelting company. "We are with the produc-cers," said Mr. Sewell, "and we expect to make a change in the present condition of things before a great while." Mr. Sewell is confident that the miners will get better prices before many

When asked as to the possibility of a further decline, the gentleman stated that it is impossible for the company to outline its policy, owing to the fact that such information would be acted upon by brokers and considered stated, however, that certain things are now being considered which it is hoped will cause a change which it is no late day. "Only let for the better at no late day. "Only let the producers be patient," said Mr. Se-well. "The Smelting company is doing all it can for their benefit and it belleves it will soon secure the needed advance in lead." A federation is already being considered, it was said, which if successfully consummated will

have important bearing on these mat-In the East," said Mr. Sewell, "the Smelting company has been considered in the light of an octopus because it is said to have robbed the people by get-ting high prices for its lead. We do not so much mind the consumers because it fails lightly on them as Indi-viduals. It is different with the proicers to whom rises and declines mean a great deal."

"The present slump is not wholly due to increased production," said Mr. Sewell. It is said to have been brought about to a great extent by the lead producers in Missouri being able to produce lead so cheaply. The Ameri-can Smelting company found it could not hold the price up in the face of the Missouri lead producers who are said to be able to produce lead with profit at ss per hundred pounds. The Smelting company has 40,000 tons of lead on hand which, Mr. Sewell says, has not been contracted for at high prices. Such a thing is said to have been impossible. Mr. Sewell is strong in his assertion that the Smelting company is tion that the Smelting company is t speculating on the market and that lange for the better will come before

he lead output for the present year rill be very large, said Mr. Sewell, much larger than that of last year, he production last year was not much greater than the supply owing to the shutting off of ore supplies from the Coeur d'Alene and Leadville mines."

MAMMOTH MINE.

Good Ore Body on 1900 - The Reported Purchase of the Control.

President McIntyre of the Mammoth Mining company reached town today, having come from Fillmore, where he has been engaged in a water sult. From Fillmore Mr. McIntyre traveled to Leamington and thence to Mammoth

In discussing the condition of the mine today. Mr. McIntyre said it is looking well. The 3 foot stringer of ore that was encountered on the 1900 level has been followed some 30 or 40 feet and has now disclosed a fine ore body, 3 tim-ber sets wide. A high percentage of copper was found in the ore first | dust,

This has disappeared and a gold and silver ore has taken its place. Some of the ore on the 1990 runs up to 4 ounces in gold, but the bulk of that t present extracted is milling ore. Mr McIntyre says it is exceptionally good milling ore, and for this reason nearly all of it is being sent through the mill. A sump is being sunk at the 1900, but it is the intention of the management to put a winze down in the vein before continuing any deeper with the shaft. In about ten days it is expected that connection will be made with the new ore body on the 800 level through Grand Central ground. This will prove a great advantage to the company. The values of the ore on this level are principally in silver and gold, though body of lead ore was broken into yes-

In speaking of the talked of purchase of the Mammoth control, Mr. McIntyre said that Messrs. Farrell and Grant had not snown any great desire for his holdings, though he understood from other parties that they want them. The matter was discussed last fall when Mr. McIntyre offered them at \$4 per share. Since that time it is intimated that the control has been offered at a lower control has been offered at a lower price, but at just what figure Mr. Mc-Intyre declined to mention. The gen-tlemen named have recently secured a great deal of data regarding the mine from whence it is inferred that while nothing has yet been consummated it will probably be done in the near fu-

NORTHWEST COPPER MINE. This Oregon Property Has Been Sold for \$85,000.

A dispatch from Union, Ore., today says: The Northwest Copper company's mine at Iron Dyke, Union county, was sold yesterday by the United States court. The property was bid in by C. M. Warner of Pennsylvania for \$85,-

VERNAL MINING NOTES.

Bromide to be Operated - Sufficient Means Now on Hand.

Just before going to press we have learned a few additional particulars regarding the Bromide mine. This morning Messrs. Collett, Colton, Miner and Miller started over the mountain to the mine, where they will meet the new manager and another important conference will be held. The new organization when completed among its officers, unless present plans are changed. James K. Bornham, of Kansas City, as president; Rice R. Miner as secretary and treasurer, and J. E. Lawrence, an old mining operator of Nevada, who at one time held large interests in the Constock look, and who has had a Comstock lode, and who has had a long and varied experience in the practical working of mines, has been chosen as beginess manager.

A sufficient amount of money has been placed in the treasury with which to successfully operate the mine. The smelter will not be startuntil enough ore blocked out to keep the furnace supplied continuously. An understand-ing has been reached by which the labor is to be supplied by the Vernal stockholders.

Those holding a share in the old company received two shares in the new one as the number of shares were

In private conversation last night with disinterested parties, Mr. Miner said: "The Kansas City capitalists are not blindly taking hold of this propo-sition. We have had experts on the ground watching the working of the mine for a long time, and we know that the only reason why the mine has not been a dividend payer was because of the lack of capital to work it properly. We know what we are doing?

doing."
C. P. Lively, who came over the mountain from Red Creek, reports that the work on the property of the Ulntah Copper property of the Ulntah Copper over the contract of the Unitah Copper case. property of the Ulntah Copper and Gold mining company is progressing nicely. They have found spien-did croppings on the vein 600 feet from their present workings. They are pushing the work on the tunnel right along and just before Mr. Livey's departure they had struck a body of iron ore. The manager, W. D. of iron ore. The manager, W. D. Munday is moving his family to the interested intend making their home there for a while. The indications are that a body of copper ore will be encountered in a few more feet, in fact long before they tap the vein for which they are now tunnelling.

John Pope reports what may prove to be a new strike in tunnel A in the lower workings of the Dyer. It is not known whether the two foot streak, which is of the usual high grade of ore is part of the ore bodies already dis-covered, or whether it is the edge of a new pocket—Vernal Express. new pocket.-Vernal Express.

Iron County Notes.

James McGarry has been filling in his spare time this week in securing options on iron properties for the Walker Bros. of Salt Lake. The figures range from \$200 to \$1,000 per claim.

Three shifts are driving the tunnel on the Jumbo vein on Rice mountain, which

in a distance of 300 feet. Some nice re has been encountered, showing handsome values in gold.

Mr. Lerch, who is superintending work at the Milner, Dear and Lerch iron mines, recently sent to Beaver for a force of new men to put to work on the properties. It was expected that they would ar County Record. would arrive this week .- Iron

MINING NOTES.

R. E. McConaughy went out to the Sacramento at Mercur today.

A car of ore was on the market today

The Taylor-Brunton sampler reported seven cars of ore from Tintic today. Charles A. Dinsmore, who edits the Mining Journal of Weiser, Idaho, is inthe city on business.

John Cleghorn reports the strike some rich lead carbonate ore about fif-teen miles west of Park Valley.

The Mercur has reported at the campling rooms with a consignment of nearly 1,000 pounds of gold cyanides. Six cars of ore, the arrival of which previously reported in the "News," were

on the market today from the Grand James A. Pollock returned today from fishing trip to Idaho, where he met

with much success in landing the finny

Samples of very good ore have been assayed from the mountains near Skull Valley. The claims are ewned by John and Frank Clark.

Supt, Christensen of the Ingot has hopes yet of making a paying property there. A large body of low grade ore is being opened up. A. J. Orem has gone East to endeavor

ing propositions in which he is inter-ested. The Lucky Boy of Custer, Idaho, reached the local sampling rooms of the Consolidated Kansas City Smelter and Refinery company yesterday afternoon with about 175 pounds of cyanide

MARKET STILL DEPRESSED

Movement is Light, and Market Generally Dull and Apathetic.

Bulk of Dealings in Sugar and To bacco Stocks-Live Stock Strong - Produce Quiet.

New York, May 22.-The depression which marked yesterday's stock market was still in evidence at the opening today, Declines of a fraction were the rule throughout the list. Pronounced strength soon developed in some stocks which were notably weak yesterday. Sugar and the tobaccos recovered from 11/2 to 2 points, as compared with opening figures. The Pacifics and western stocks hardened quite generally to about last night's close and the traction group moved slowly upward. Toward 11 o'clock the specialties became unsettled and the market generally was dull and apathetic near last night's level. Only the specialties showed activity. The bulk of the dealings were in sugar and the tobaccos, the former. declining and the latter advancing in the second hour, but neither movement being well held. The New York city stocks moved upward, Consolidated gas gaining 3 points. Pennsylvania dropped point.
With the culmination of the rise in

sugar, the market dropped again, Stocks fell below last night's level. The market closed dull and weak. The prominent bonds advanced, but some of the lesser issues sold off.

******** LONDON STOCK MARKET.

SHOE BUILDERS. . 124 Main St.

London, May 22.-There was sharp Paris selling on the stock exchange today, accentuated by the rumor that Gen. Buller had been defeated by Boers at Laing's Nek. Nothing is known in London tending to confirm this report, but French selling had a decided ef-fect, especially in Kaffirs, that market suffering also from the failure of the public to enter the market.

LONDON WOOL AUCTION.

London, May 21 .- The offerings at the wool auction sales today numbered 8,256 bales, more than half of which were Queenslands. The attendance was good: there was a steady demand, the home trading leading in purchases af-ter good competition. The home trade secured the bulk of good greasy, paying full rates. The continent was also active. American representatives bought occasionally. Cape of Good Hope and Natal greasy was in slow demand and was mostly withdrawn.

VISIBLE GRAIN SUPPLY.

New York, May 21.—The visible sup-ply of grain Saturday, May 19th, as compiled by the New York Produce Exchange, is as follows: Wheat 46,263,000 bushels, decrease

1,358,000 bushels. Corn, 15,227,000 bushels, decrease 928,-Oats, 6,386,000 bushels, decrease 933,000 Rye, 6,386,000 bushels, increase, 93,000 bushels.
Barley, \$29,000 bushels, decrease 124,-000 bushels.
