

Mining, Business and Stocks.

STOPPING IN THE STAR CON.

Getting Ready to Extract Ore From The 400 Level.

ONE HUNDRED OZ. GOLD ORE

Streaks Found in This Part of Mine—Fifteen Feet of Good Shipping Ore Disclosed.

Special Correspondence.
Eureka, Juab County, Utah, June 1.—Stopping in the 300-level at the Star Con. mine is progressing finely, and the men are getting the 400-level in good shape for stopping. This will greatly increase the output of the property. In the Berquist & Wahlberg lease streaks of ore have been found that assay 100 ounces in gold, and will average \$100 to the ton. The ore body in the territory increases in value with every shift and 15 feet of valuable shipping ore has been opened up.

All handwork at the Grand Central mine is to be dispensed with; in the future nothing but Fairleigh drills will be used. The blacksmith shop is being enlarged to make preparations for the change. Nine men will be employed in this department and five fire places will be kept busy.

Active arrangements are being made to resume operations in the shaft at the Black Jack mine at Mammoth, adding the Lower Mammoth and Ajax properties. It is believed that the rich ledge of the latter group penetrates the Black Jack property, though no development work has been done in this direction to demonstrate as much, as all drifting has been done towards the apex of the ridge. A four-car sample of iron ore has been taken from a blowout, and 14 results proves profitable regular shipments of the ore will be made.

William Ball and Albert Wilder have taken a lease at the Carls mine.

FORENOON ON 'CHANGE.

Business was brisk among the stock brokers.
After a vacation, lasting since last Thursday, the members of the stock exchange were ready for a good day's business. They were not disappointed, for \$2,500 shares were transferred, totaling the sum of \$14,800. None of the high-prices Park City stocks sold. The trading was confined almost entirely to Littleton favorites. Lower Mammoth development work has been done in this direction to demonstrate as much, as all drifting has been done towards the apex of the ridge. A four-car sample of iron ore has been taken from a blowout, and 14 results proves profitable regular shipments of the ore will be made.
