

FRUIT GROWERS HOLD SESSION.

Interesting Papers Read and Discussions at Barratt Hall This Morning.

GOOD ADVICE TO SHOPPERS.

Commercial Club Was Represented by Fisher S. Harris Who Furnished a Characteristic Talk.

Representatives of the fruit districts of the state met this morning in Barratt hall and organized a State Horticultural society. Mr. Fisher Harris, representing the Commercial club, in the absence of ex-Governor Wells, called the meeting to order and in a neat speech set forth the advantages of organization and expressed the interest of the Commercial club in the movement.

Thos. Judd of St. George was elected temporary president and Mr. Robt. Wilson of Ogden, secretary. Committees were appointed to perfect the organization and the meeting proceeded to consider the program.

Joseph H. Parry spoke on advantages of organization and pictured the difference between horticultural conditions in states where the growers are organized and present conditions in Utah. "Other states," he affirmed "are crowding us out of the best markets and even in our home market, Utah fruit is discriminated against. Mr. Snow of Brigham and Mr. Farr of Ogden have built up markets for their products and others can do the same by studying their methods and getting their counsel. We want the experience of all successful fruit men in their respective lines. We must not only raise good fruit, but be able to sell it at the price at which others sell such fruit."

A. H. Snow of Brigham spoke on Peaches. He described the soil and location of his orchard, and said a warm, gravelly soil, with a west or north slope was best in his section. He emphasized the importance of purchasing home grown trees, and care in planting. He said that land in the Brigham peach district has risen from \$100 an acre to \$200 in 10 years. He ascribed his success to the fact that he went to California and studied methods of pruning, cultivating and especially packing of the fruit. He said that he found packers there throwing out fruit with the slightest mark, and as the result their fruit kept well when packed.

Mr. Snow said that half of the new wood should be cut back each year, and that a tree so treated would last 25 years. He stated that he took special pains in packing and last year took between \$5,000 and \$6,000 from 15 acres. The orchard is rented on shares and his share last year was \$2,200 clear profit.

Thomas Judd then discussed "Grapes and Grape Raising." He stated that commercial grape raising was only about 20 years old in America and yet last year California produced 100,000 tons of raisins, 40,000,000 gallons of wine and shipped large quantities of fresh grapes. He stated that Utah can raise just as fine grapes as California and yet last year he paid out \$15,000 for grapes and raisins.

Mr. Judd then went on to picture the pleasures of grape raising and also the profits. He predicted that in a few years Utah would be shipping grapes and raisins instead of buying them. He gave many valuable suggestions on the choosing of site and the varieties and urged that in starting in grape growing that only a few varieties should be planted.

The meeting was adjourned until Monday at 10 o'clock in the City and

County building where sessions will be held by morning and afternoon, the latter commencing at 10 o'clock.

PAPERS SERVED.

Church Attorney Has Injunction Matter Under Consideration.

The papers in the injunction suit brought by Don C. W. Musser and Charles A. Smurthwaite against President Joseph F. Smith, were served on President Smith last night and are now in the hands of the Church attorney, Mr. F. S. Richards. Inasmuch as the defendant has 20 days in which to reply, and Mr. Richards has not yet had time to give the matter consideration, it is not probable that an answer will be forthcoming for some time.

CAPT. WOODWARD SUED.

Joshua Thomas Seeks to Recover \$420 On Assigned Note.

Capt. J. E. Woodward of Fort Douglas was today made defendant in a suit filed in the civil division of the city court by Joshua Thomas, who seeks to recover \$420, alleged to be due for money advanced by E. Hershell and J. B. Barnes, two soldiers who belonged to the captain's regiment. The two men assigned their accounts to the plaintiff in this action.

It is understood that the money is due on a gambling debt contracted by defendant while in the Philippine Islands.

LATE LOCALS.

The special real estate committee appointed to take legal steps to prevent, if possible, the sale of the water bonds, is in conference today with its attorneys.

At the regular weekly meeting of the principals of the city schools next Wednesday, Miss Pollock will give an outline of the courses in geography and Prof. Barton will talk on map drawing.

The weather office looks for cloudy weather tomorrow, as it has been today, but there is no low barometric area in sight on the western slope, so there need be no apprehension as to rain for the last day of Conference.

The Home Fire Insurance management has got out a neat and useful card bearing a novel style of barometer. The latter is nothing less than a cloth frock on the figure of a child, the fabric changing color with the rise and fall of the barometer.

The marriage of Miss Nora Morrison to Mr. Seth Williams was solemnized last Friday evening, the Rev. C. E. Perkins officiating, the family and immediate friends only being present. The young couple have hosts of friends who will join with us in wishing them success and happiness in their voyage through life.

The Christian Union of this city will meet next Monday evening, at 6:30, in the vestry of the First Methodist church, where lunch will be served before the regular business meeting. The executive committee of the State Christian Endeavor Union will meet the same evening, at the Methodist church to arrange for the coming annual convention.

Engineers Beers of the Reclamation survey and aides from the offices in this city, will go down to Spanish Fork canyon Monday, to examine the water-trenched, and to gather hydraulic data in connection with the proposed Strawberry valley irrigation scheme. Then two plane table parties have been put to work under the direction of Messrs. Kline-Smith and Sheeley.

The St. Mark's Cathedral chapter of the Brotherhood of St. Andrew announced the annual mid-day London services for business men in the Y. M. C. A. building, corner of State and First South streets, commencing at 12:05 and closing at 12:30 p. m., and extending from the 10th to the 22nd insts, inclusive. The speakers will be Revs. Geo. C. Hunting, C. E. Perkins, Dean Eddle, Bishop Spaulding and Judge Ritchie.

Acting Governor Tingey today issued

requisition papers upon the governor of California for the return to this state of A. D. Lee, who was captured at Stockton, Cal., and is wanted at Ogden for forgery. It is alleged in the complaint against Lee that he forged the name of Gorman, Brothers of Pueblo to a check for \$25, and induced Fred M. Nye of Ogden to cash it for him. The crime was committed on March 6, 1905. J. F. Pender of Ogden will go after the prisoner.

The Salvation Army will observe the following meeting schedule during the coming week, at the Barracks, 249 State street: Saturday night, April 8, immediately after the street meeting, an up-to-date, halcyon, freemason, when saved drunkards and others will speak; Sunday, 11 a. m., holiness meeting; 2 p. m., junior meeting; 3 p. m., great praise meeting. Christians of all churches are cordially invited to this meeting. At 8 o'clock p. m. a great salvation meeting and swearing in of recruits. "Hard Questions and Wise Answers," by Capt. E. Symmonds. Public meeting every night except Monday, following street meetings.

Report of the city health department for the week ending April 5 shows 31 births, 16 males and 15 females. The death report for the same period reported to the office numbered 26, 15 males and 11 females; of these 17 were residents, males 9 and females 8; 6 were non-residents, 5 males and 1 female; 8 bodies were shipped away from here and 3 brought here for interment. The contagious disease report for the week numbers 55; as follows: Three cases of diphtheria; 2 cases of scarlet fever, 1 case of whooping cough, 23 cases of smallpox and 39 cases of measles.

That local business is growing rapidly is evidenced by the receipts at the Salt Lake postoffice during the month of March just passed as compared with the same month of the previous year. In March, 1904, the sales of stamps amounted to \$11,614.60; postal cards, \$759; second class postage, \$2,811.31. Total, \$15,205.91. In March of 1905, the sales of stamps amounted to \$15,901.99; postal cards, \$238.90; second class postage, \$3,249.61; total, \$19,490.51; a gain of \$4,284.60, or a trifle over 27 per cent. In view of the above, Postmaster Thomas feels much encouraged over the outlook.

The last service over the remains of H. S. Foote, who died ten days ago in Washington, D. C., was held yesterday afternoon at St. Paul's Episcopal church in this city. The widow of Mr. Foote, who had accompanied the remains to Salt Lake, was also intended to reside in the future, had requested that the remains be interred in Mt. Olivet cemetery, and in accordance with her wishes the burial occurred there. The pall bearers represented the bench and bar of the state, were Hon. Chief Justice George W. Bartch, of the supreme court; Judge John A. Marshall, of the district court of the Third Judicial district; Ogden Hiles, H. P. Henderson, W. H. Dickson, C. S. Varian and A. C. Ellis, of the bar of Utah.

President Frank Knox of the Bank of the Republic returned yesterday afternoon with Landlord Holmes of the Knutsford. While they were here they secured a white lot of land valued at \$150,000. This they will put to some use later, when their plans are more fully outlined, though Mr. Knox expressed his doubt as to any hotel being built there, as the location is not suited to hotel purposes. However, Mr. Holmes has long had his eye on San Francisco as the city where he should build a great hotel. He would have done this some time ago, but that through no fault of his own his plans were suddenly disarranged. He thinks now move and build here, then ever, and the chances are that he will carry out the cherished project of years as soon as a suitable opportunity is afforded.

The Ensign stake monthly Priesthood meeting will be held Friday, April 14, at 7:30 p. m., in the Twentieth street meetinghouse. His honor and presiding officers will please make this announcement in their meetings.

R. W. YOUNG, J. S. WELLS, J. M. KNIGHT, State Presidency.

PERSONALS

Mr. C. P. Held leaves Monday for Chicago and other eastern points, where he is going on business.

John James escorted a number of the Red Feather company to Saltair yesterday.

Peculiar to Itself

In Merit, in Cures, in Sales

Hood's Sarsaparilla

In combination, proportion and process Hood's Sarsaparilla is Peculiar to Itself.

It is made from the best blood-purifying, alterative and tonic ingredients, by such original and peculiar methods as to retain the full medicinal value of each and all.

Therefore, it is the most powerful blood purifier known. The severest forms of scrofula, salt rheum, catarrh, rheumatism, dyspepsia and debility are cured by it every day in the year.

We say, positively, It will cure you.

Is America's Greatest

Medicine. Nothing

equal to it for the

Blood, the Stomach,

the Nerves, and the

Kidneys and Liver.

terday afternoon, where some of them ventured into the water, and all enjoyed a dance in the Pavilion with a specially prepared luncheon afterwards.

Mrs. F. L. Oswald and daughter will leave for Los Angeles next Tuesday for a three week visit with Mrs. Abel Leonard and family.

George Y. Wallace has returned from a Los Angeles trip, and says that the people there are awaiting with much anticipation the opening of the Salt Lake Route. Many southern California people will then take the opportunity to visit this city.

CENTENNIAL NOTES.

Exhibits for the Lewis and Clark exposition are arriving daily by the railroad and the completed exhibits structures are being utilized for storage.

With the work of landscape gardening at the Lewis and Clark exposition completed, the department of works is now devoting its attention to finishing the driveways.

Construction upon the California building at the Lewis and Clark exposition was commenced this week. The Washington and Massachusetts state buildings will be started soon.

Five hundred thousand eggs are to be stripped from steel-head salmon at the Yaluk hatchery for the fisheries exhibit at the Lewis and Clark exposition.

The United States government buildings at the Lewis and Clark exposition were advanced 75 per cent Saturday, Feb. 25.

Frank Vincent Du Mond, one of the world's foremost painters and illustrators, and proprietor of the Lyne school at Lyne, England, has been selected as head of the fine arts exhibit at the Lewis and Clark exposition.

Chelan, Wash., is preparing to send an excellent exhibit to the Lewis and Clark exposition, of her fruits, vegetables, grains and forages, fish and game. Photographs of her famous lake will be another feature of the exhibit.

On Sunday, Feb. 26, nearly 8,000 people thronged the turnstiles of the Lewis and Clark Centennial exposition, and devoted the entire day to examining the exteriors of the exhibits, the palaces, or basking in the sunshine.

"Thousands will 'hit the trail,' at the Lewis and Clark exposition. Many new and attractive exhibits have been secured for the gaily boulevard.

"If we could bank a few of these days and draw them when we return home, I could be satisfied," said F. A. Miller, G. P. A. of the Chicago, Milwaukee and St. Paul railroad, in speaking of Oregon weather while on a tour of the Lewis and Clark exposition grounds.

The fire department at the Lewis and Clark exposition is now practicing daily, and making tests of water pressure. The department has a fully equipped station and is able to cope with any blaze.

Hundreds of carloads of exhibits for the Lewis and Clark exposition have already arrived and more come every day. The cars are brought into the grounds by way of a spur and are unloaded, the contents being stored in the finished exhibits palaces.

The electrical display at the Lewis and Clark centennial will be one of the most unique and attractive ever planned for a like enterprise. No expense has been spared to make this feature most attractive.

Ornate staff work now in process on the Bridge of Nations at the Lewis and Clark exposition, will give the structure the appearance of an arched stone bridge of the most beautiful design. The bridge is over 2,000 feet long, connecting the mainland to the Government peninsula.

Several concessions have been let at the Lewis and Clark centennial which require considerably more space than the original plans for the "Trail" would permit. The amusement street will be enlarged so as to provide several thousand square feet of additional space.

Several hundred Burlington, (Ia.) people are planning to visit the Lewis and Clark exposition in July, in order to be present at the sessions of the American Librarian's annual meeting, which will be held in Portland from July 2 to 7.

The railroad companies have extended the time limit for the shipping of exhibits from St. Louis to Portland until the latter part of March. This will serve materially to better the appearance of the exhibits for the Lewis and Clark exposition, as it will afford exhibitors more time in which to assemble and pack them.

THE CATCHER AT BAT.

Why He is Generally the Weakest Man In That Position on Team.

Why is it that the pitcher is the weakest batsman on the team? That is a question that many a man has asked himself as the twirler has thrown down his stick and walked to the bench with a resigned look on his face when a hit would have meant a run.

Occasionally a pitcher is seen who can swing them out with the best of them, but, as a rule, the hard hitting curve merchant is a mighty scarce article. Various reasons have been advanced, one of the favorites being that the pitcher spends so much of his time practicing various "swings" and "throws," that he has no time to put in learning to bat. It has also been suggested, and with good reason, that the pitcher is a nervous man, and combined with the high nervous tension at which the pitcher is always working, so weakens him that he lacks the strength and energy to swing the bat with certainty.

Then, again, no one knows better than the pitcher himself how apt a thrower he is to take sudden and unexpected shots, due often to the fact that the ball is kept under control, even before it leaves the pitcher's fingers. For this reason there is always a fear in the average pitcher at bat. Every line of his figure indicates fear, and he will generally jump back from the base before he has hardly left the opposing pitcher's hand.

But there is another reason, and one that probably has as much to do with it. No matter how good a player a fielder may be, the question is always asked, "What is his batting average?" Good fielders are so plentiful that managers can afford to pass up the weak batting fielders, but when he gets his eye on a pitcher who has the goods, he is snatched up regardless, and with only the hope that he may develop into an average batsman.

Dancing at Saltair tonight, 8:00.

THE HOPE ENGRAVING CO.

23 East First South Street.

Wish to announce that they have secured the services of Mr. C. P. Held, who has disposed of his interest in John Held's Stationery Store, and who will, with the latest improved machinery and skilled engravers, execute artistic and the very latest ideas in Copper Plate work, such as Wedding Invitations, Announcements, Visiting cards, etc., also Monogram and Commercial Stationery. All work will be done promptly and at the lowest prices consistent with the highest class of workmanship and materials.

We register and assume all responsibility for plates and dies while in our possession, and the same are all kept in fire proof safe.

DIED.

FRANCIS—in this city, April 8, 1905, of pneumonia, Clayton, son of Thomas E. and Sarah McKinley Francis, born Nov. 1, 1892. Funeral services Sunday at 4:30 p. m. from family residence, 327 West Second South street, friends invited.

This is only a few of our specialties: to see these bargains is to be convinced.

Come early and avoid the rush. Remember the place, 30 and 32 Main Street, opposite Z. C. M. I. Auction and Private Sales.

How Sickness Starts In the Inside Nerves.

Most forms of sickness start with the inside nerves. Indigestion, sour stomach, heartburn, dyspepsia, weak kidneys, diabetes, Bright's Disease—Liver irregularities—Heart irregularities—Bowel irregularities—all of these ailments, and the ailments which they, in turn, bring on, are due directly to derangements of certain nerve centers.

Understand first that we have two entirely separate nerve systems. When we walk, or talk, or act, we call into play a certain set of nerves—nerves which obey our mental commands. That is why the arm can be raised, or the mouth opened, or the eye shut, at the slightest desire. That is why your fingers can delicately pick up a pin one moment, and hold a heavy hammer the next.

But these are not the nerves we are to consider here. There is another set of nerves which control and govern and actuate the heart and the stomach, the kidneys and the liver and all of the vital functions. You cannot control these nerves. By no supreme effort of mind can you make your heart stop or start—or can you even make it vary by a single beat a minute. And so with the stomach and the liver and the kidneys, and the bowels—they are automatic—they do their work at a certain set speed whether you are awake or asleep—whether you will it or not.

It is on these inside nerves that life and health depend. So long as these nerves perform their proper duties we are well and strong. When they fail, we know it, by the inevitable symptoms—stomach, heart, liver, kidney troubles. And these troubles have no other origin, ever, than in these same nerves. For the stomach, the heart, the liver, the kidneys, have no power of their own, to self control. They owe their every impulse to the inside nerves. The nerves are the masters. The organs their slaves.

But the most interesting part about the inside nerves is the bond of sympathy which exists between all centers and branches of this great automatic system. The center, which, for instance, controls the stomach, is known to science as the "solar plexus." The heart center is called the "cardiac plexus." The kidney center, the "renal plexus." Yet it is a well known fact that in prize fights, a solar plexus blow instantly stops the heart, although its usual operations concern only the stomach. Why? Because of the bond of sympathy between the

various branches. That is the reason why the inside nerves are sometimes called the "sympathetic" nerves.

"This explains why stomach trouble often develops into heart trouble—why indigestion brings on nervousness—why diseases become complicated. It explains, too, why ordinary medical treatment is so often of no avail."

My Free Dollar Offer

Any sick one who has not tried my remedy—Dr. Shoop's Restorative—may have a Full Dollar's Worth Free. I ask no deposit, no reference, no security. There is nothing to pay, either now or later. I will send you an order on your druggist which he will accept in full payment for a regular, standard size Dollar Bottle. And he will send the bill to me.

C. I. Shoop, M. D.

ments are wrong—why medicine so frequently fails. More than thirty years ago this thought came to me: "If life and health depend upon perfect heart and proper stomach digestion, upon correct kidney filtering why does not life itself depend upon these life

governing power nerves—these inside nerves?" I realized, too, that all ailments which result from one cause may, of course, be cured by one remedy. I resolved, then, to doctor the organs but to treat the one nerve system which operates them all. These were the simple steps which I took. I needed a different remedy for each. Such treatments are only palliative, the results are not lasting. A cure can never come in disease of the stomach, the liver, the kidneys until the inside nerve power is restored. When that is done, Nature removes the symptoms. There is no need of doctoring them.

My remedy—now known by Druggists everywhere as Dr. Shoop's Restorative—is the result of a quarter century of endeavor along this very line. It does not dose the organs or derange the balance—it does go at once to the nerve—the inside nerve—the power nerve—and builds it up, and strengthens it and makes it well.

There is no mystery—no miracle. I can explain my treatment to you as easily as I can tell you why cold freezes water and why heat melts ice. Nor do I claim a discovery. For every detail of my treatment is based on the most reliable facts that none can deny them. And every ingredient of my medicine is as old as the hills. I grow my own simple herbs, the truths and combined the ingredients into a remedy that is practically certain. I have made my offer that strangers to my remedy may know. It is not intended for or open to those who have used my remedy. They need no further evidence. But to those who have not heard, or hearing, may have delayed or tried, I send you an order on your druggist which he will accept as gladly as he would accept a dollar. He will hand you from his shelves a standard sized bottle of my prescription, and he will send the bill to me.

Will you accept this opportunity to learn at my expense absolutely, how to be rid forever of all forms of illness which are caused by inside nerve weakness—to be rid not only of the trouble, but of the very cause which produced it? Write today.

For a free order Book 1 on Dyspepsia, for a full dollar bottle of Dr. Shoop's Restorative, send me a dollar. Dr. Book 2 on the Heart, Dr. Book 3 on the Kidneys, Shoop, Box 913, Book 4 for Women, Shoop, Box 914, Book 5 for Men, State which book Book 5 for Men, you want. Book 6 on Rheumatism.

Mild cases are often cured by a single bottle. For sale at forty thousand drug stores.

DR. SHOOP'S RESTORATIVE.
