

TRADE BROADENS IN HEALTHY MANNER

Colder Weather Stimulates the Demand for Heavy Weight Goods.

PRICES MAKE ADVANCES.

President's Message and Other State Documents Contained Nothing to Injure Business.

New York, Dec. 8.—Dun's Weekly Review of Trade tomorrow will say:

"Trade broadens in a healthy manner in response to lower temperatures and holiday demand. Staple lines of heavy-weight wearing apparel are steadily distributed, and the movement of Christmas goods promises to add one more to the many new high records established by 1905. Prices have made further advances. Dun's index number for 1905, 100,000, on Dec. 1, against 100,000 a month previous, and the past week has brought a still higher level. "There was nothing in the state documents to disturb confidence, industrial activity is showing greater progress than at any previous time, and railway earnings in November were 6.1 per cent larger than last year's. Foreign commerce at this port for the last week showed a gain of \$1,119,395 in imports and a decrease of \$2,419,696 in exports, as compared with the same week of 1904. "Recent large purchases of hides supplied the leading markets for some time to come, in a few cases contracts covering sales as remote as February, and packers' stocks are so light that they do not forebode a consequent market is light. "Failures this week numbered 232 in the United States, against 239 last year, and 24 in Canada, compared with 26 a year ago."

TO COLLECT FUNDS FOR THE RUSSIAN BUND.

New York, Dec. 8.—Morse Goussach, one of the leaders of the revolutionary organization in Russia, known as the bund, has just arrived in this city from that country, where he was recently released from prison, after serving two years for his revolutionary activities. He is in this country, he said yesterday, to collect funds for the cause from the sympathizers of the bund. To that end Mr. Goussach announced that he would make a trip through the United States, etc.

"The revolutionists have established a perfect underground government, and notwithstanding the vigilance of the authorities we are enabled to carry on our work without detection or hindrance. Of course, now and then one of our members is arrested."

There are about 100,000 members of the bund in Russia and double that number are associated with us. We publish our proclamations and circulate them, despite the fact that the government has made for our presses, to circulate our proclamations we employ women, who conceal them about their persons and carry them from place to place.

FIRST TRAIN TO CROSS THE VICTORIA FALLS BRIDGE.

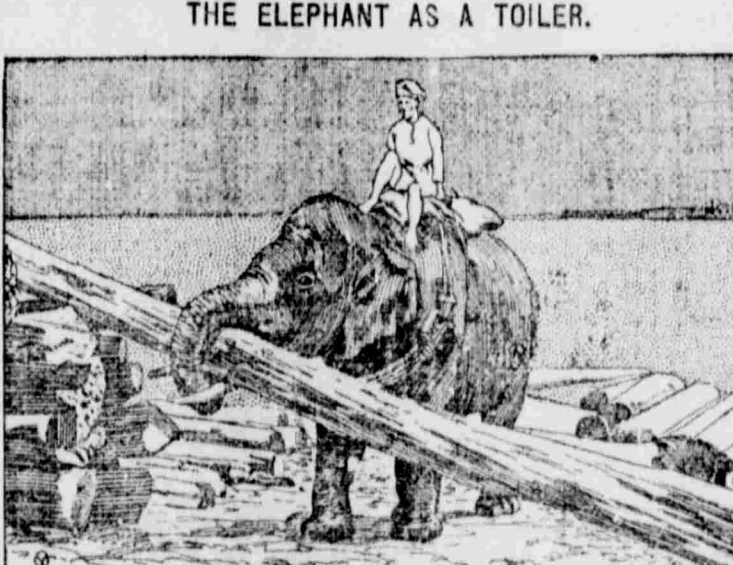

The great bridge over the Victoria falls on the Zambesi river, South Africa shown in the cut, was recently opened for traffic. The first train that crossed over had among its passengers Professor George H. Darwin, son of the great evolutionist, and the members of the British association. When the train was midway on the bridge the engine was stopped and Professor Darwin made the dedication. This bridge has been under construction for several years and is one of the most wonderful feats of engineering ever attempted.

THE FIRST SUCCESSFUL GASOLINE AUTOMOBILE IN AMERICA.

The first automobile ever propelled by means of gasoline that was a success was the one invented by Elwood Haynes of Kokomo, Ind., who is still the owner of the machine. As may be seen from the cut, it was simply a motor attached to a one seated buggy. After a great deal of experiment and repeated failures Mr. Haynes succeeded in getting a speed of twelve miles an hour out of the machine. The idea of an automobile was so novel at the time that Mr. Haynes' friends were afraid that he was becoming unsound mentally.

THE ELEPHANT AS A TOILER.

The picture shows the elephant as a bearer of burdens which are far too ponderous for man to lift. It is from a photograph of a lumber yard at Rangoon, British India, and portrays an elephant in the act of piling enormous teak wood logs. The huge beasts show great intelligence in this work, lifting the log in the center so as to maintain a proper balance, and putting it in its allotted place with extreme precision. A herd of thirteen elephants trained to this work is kept at the Paris Zoological gardens and the sagacious animals work all day long at the pile of logs which is provided for the purpose of illustration.
