gent and gould as cows could be A dairyman who had a brid of them-would be assessed as large quantity of milk of the quality of the property of the relative to the property of the relability of milk of fine quality and richness, and he would have besube a herd blat would make it is from one of the since places of the relighborhood, so picture-sque and attractive are in Damin Halls, as a fine At Horselber, the Court of the state fairs and captured nine prince.

At Horselber Court, The drew the themselves much attend to the state fair and captured nine prince.

The Dutle Bothe are very hardy in constitution, estimating extremes of weather well. In color they are entirely black except for the wide white band around their bodies. The Bulls make the characteristics of the breed strongly inpon their grade offspring. In a herd of critic his Train Belt cross is sametimes dieven in too cower with the white band around their bodies.

cround their bodies.

Classe of Cremory Patrona.

First.—There is the genuine dairyman, who silveys hands least 20 cows giving milk and smoothness of our more. The cowe and his mind are both, will cared for. The futter malor who attempts to instruct each a man atompts to matrocrops of his milk must be well informed and result at least a freat three agricultural or dairy jappers every week.

Second.—The farmer who keeps from two six cowe. He does must of the work immed and house. Mo is very work immed and house. Mo is very reads the workly entities of the day jappers and some of the mustily jappers and some of the mustily jappers and some of the mustily japper.

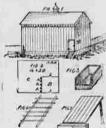

Third.—The man who farms a good of the day.

payers and some of the results; magnitude more than the does line as equivalently apper.

Therd.—The man who farms a good many acres of hard, but lives in a small boxes which its surrounded by an activitier; and many other thines that have been dropped in the shuffe of his everylay work. Plus, goess and chickens doing around this mass of material or root on the water task. They may exceed until parter the house, but the human inhabitants of this complicated dropy and seem to be either healthing about, as if they were nearly evercents by the amount of work they are trying the most of the seem of the children of the control of the

Which the Positry.

When foods are judiciously fed, made to take exercise and their quarters kept clean and free from lies; there is comparatively no trouble with sickness, accept to cases of contagine.

When the combs and wattles of the facely are of a bright end color, it institutes a condition of touths.

When the combs are wigner exceeding, the best leying and stuping and the cooks eroreing, these are signs of good health.

When you can enter the benkouse after dark and hear in wheesing, it proves there are not any range fawls in the their.

Who the edge of the comb and wattles to day a purplish red and the movement slingship. Here is something when the study is the content of the comb and wattles to day a purplish red and the movement slingship. Here is something when its line and is a something when its line and in the content of the comb and wattless to day the facel is a great and the movement of the content and wattless to day the facel is a great and the movement of the content and wattless the day of the content and the movements of the content and wattless the day of the content and the movements of the content and the c

Who the edge of the comb and wattiles to of a purplish red and the move-rentie singuish, there is something
wrong.

When fowls lie around, indifferent
to their surroundings, they are too fat,
and doubt from apoplexy, indigestine
or liver compliant will result online.

When the fawls are excless and equstactly picking their feathers, they are
infossed with vermin.

Wion young poultry, superchally sinklings, appear to have a sore throat and
swellnessing is difficult, it is the symp-tom of the large gray lies on the nock.

As soon as a fowl great oil, isolate it
and commence decirring it at more. The
trouble with for too many is that they
