## GENERAL.

WASHINGTON, 24.—The wheat and corn prospects, according to the department of agriculture, are not flattering for the country generally. The acreage appears to have been somewhat increased, but the crop will not increase in like proportion, owing to a variety of causes, the chief of which is a dry spring in most parts of the country. The largest increase in acreage of wheat is reported from Kansas, where it is thirty per cent. greater than last year. The report on the whole is not specially discouraging, except as failing to show such an increase in product over other years as might be expected.

NEW YORK, 24.—A special dispatch to the *Herald*, from Berlin, of the 23rd, says serious complications have arisen between Germany and England, and severe dispatches are passing between Bismarck and Granville. The government observes impenetrable silence on the subject of the present difficulty, but I am informed that Bismarck addressed a note to the German representative in London, informing him that the imperial government desired to acquire Heligoland, empowering him to make propositions to the British government for the purchase of the island. Earl Granville replied in the same manner, saying England will not part with Heligoland, and that the British government could entertain no propositions looking to the cession of that island; upon which Bismarck again addressed the British government, through Count Bernstorff, declaring that the acquisition of Heligoland was necessary for the protection of the German coast, citing, as an instance, the facilities for coaling and the immunity from attack which the French fleet enjoyed at Heligoland, which thus was enabled to blockade Hamburg and endanger the commerce of the German coast. He looked upon the possession of Heligoland by any foreign power, as a standing menace to Germany, on account of its close proximity to the German territory. Earl Granville again replied that England was only bound to consider her own interests, and that the wish of the German government to acquire Heligoland did not constitute for her a right to it, as it had never been under German rule.

An imperial demand has been made for the immediate payment of the first instalment of the indemnity, which it was agreed should be paid in thirty days from the re-establishment of the Versailles authority.

LONG BRANCH, 24.—A committee appointed by California and Nevada capitalists, to present their case against the Utah judiciary, arrived yesterday. The President took all the papers.

CHICAGO, 24.—A terrific rain storm, accompanied by thunder and lightning, passed over this city last evening. The rain fell in torrents, transforming the streets into miniature rivers, flooding hundreds of basements and causing the loss of many thousands of dollars. The lightning struck several places, but no damage is reported from this cause. The weather is still threatening.

A terrible murder and suicide occurred in Van Buren Co., Indiana, on Thursday last, Chauncey Barnes shooting through the brain and instantly killing Miss Anna Dwight, an estimable young lady to whom he had been engaged, but who subsequently discarded him. He then fired four balls into his own head, and lies in a dying condition. There is great excitement in the neighborhood, the people with difficulty being restrained from lynching him in his dying condition. Barnes went to the school-house where Miss Dwight was teaching school. He was accompanied by an unknown woman, who has been arrested.

Letters from Lower California say of all the emigrants landed at Magdalena Bay, only about a dozen remain, the others having left in disgust, and are scattered over the entire peninsula. About fifty arrived at Lopez destitute, and were humanely provided with rations by the Mexican military commander. The colonization scheme appears a total failure.

WASHINGTON.—The instructions for Captain Hall's expedition to the north pole by the Secretary of the Navy have just been printed. They are full and specific, and appended is a letter from Professor Henry, in which he says that although the objects and peculiar organization of this expedition are not primarily of a scientific character, yet

many phenomena may be observed and specimens of natural history be incidentally collected, and therefore, in order that an opportunity of obtaining such results might not be lost, a committee of the national academy of science was appointed to prepare a series of instructions on different branches of physics and natural history, and to render assistance in securing a scientific outfit. The Smithsonian Institute, coast survey, hydrography office, and the signal corps have contributed the necessary instruments.

Mayor Hall has written a letter to President Grant, in relation to the rumor that the friends of Congressman Bowen are applying to the executive for pardon. The Mayor asks whether Bowen might not disclose the means by which he procured a false and fraudulent decree of alleged divorce through the deputy clerk of the office of the county clerk of this city, and without the knowledge of the latter; and adds that the county clerk authorizes and is desirous of exposing and punishing the fraud which was committed in the interest of Bowen, if not at his direct instigation, and may need if not his evidence, information necessary to convict the deputy clerk of fraudulent intent and complicity, if he be found guilty.
