

SUMMER CALM IN ALL BUSINESS

Little Demand for Money From
Banks During Week End-
ing Today.

REAL ESTATE IS VERY DULL.

Brickmakers Have Hard Time to Keep
Up With Demand and Lumber
Situation is Not Good.

This is midsummer, and in commercial circles there is the usual midsummer quietness. The money market has not been very active, although the general run of business is good. There is little demand reported for money this week, and as it will be a month before the crops begin to move, the market is likely to remain without special interest. The sheepmen have disposed of their wools and deposited their money in the various banks, and are resting on Easy street. Very little commercial paper is handled in this market, such as does appear coming from eastern banks. Deposits are being held by their own, with perhaps a slight increase over the general figures of a year ago. The Salt Lake banks are all in a healthy condition.

DULL IN REALTY LINE
The real estate dealers report another uneventful week. In fact as Mr. Woolley remarked this morning: "I never saw a duller week since I have been in the business. During the first six months of the year, business was very brisk and we were all doing something with hopes of steady business through the summer. But it has greatly fallen off, and we are at present doing little or nothing. Perhaps it is the heat and when cooler weather returns will probably spring up afresh."
There is a good demand, however, for residences renting from \$15 to \$20 per month, and travelers who visit the city make inquiries as to local realty conditions which may later on amount to something. The Real Estate association continues its semi-monthly luncheons and meetings through the summer, and the discussion of how to awaken a profitable interest in real estate is still on tap.

IN THE BRICK FIELD.
Local contractors report building as still much embarrassed by the scarcity of special lines of brick, owing to the constant demands of the smelters. The result has been that not a few good brick masons have left town for other points, where there is no delay in furnishing building material, and where wages are even higher than the \$6 per day that is paid in Salt Lake. San Francisco is paying \$7 per day, and of course has the call on other cities, where less wages are in order. However, local building is continuing as rapidly as possible under the circumstances, and contractors hope that the brick situation will be cleared up before fall, so that the structural changes in the weather will not find many new buildings without their roofs on.

KAYSVILLE EXPERIMENTS.
The scarcity of brick has led Senator Berger to give special attention to the situation with a view to alleviating it. So in conjunction with Mr. Junk of the Improved Brick company, he has secured extensive samples from the clay or adobe deposits near Kayville, and if he finds the results in examination equal to his expectations, he will secure possession of quite a tract of land, and lay out a \$15,000 or \$20,000 plant. This will be for ordinary open air burnings, and not involve any "indoor" plant operations, as the senator does not think that with this mild climate it really pays to invest in any plant that can be operated in wet weather as well as in dry. When this is done, and the Salt Lake Brick company have their great plant completed, there will be no more scarcity of brick in this city, if a new smelter is built here every year.

LUMBER STILL SCARCE.
The lumber situation continues in an uncertain condition, principally on account of the scarcity of cars; and there is no telling when there will be any relief in the car shortage. The crops are not moving, so there is no trouble from that source, but in another month the crops will be on the road and then the shortage will not be relieved until late in the fall. Local wholesalers are advising retailers to get in their orders at once, even to ordering six months or more ahead, for if they do not they will be vexation and grief.

O. M. Clark, a well known lumberman of Portland is in town, and he says the mills are head over ears in business with order stacks high, so that between the excess of orders and the scarcity of cars, things in the lumber trade have come to a pretty pass. Wholesale prices are suffering, and threatening to go further up the scale. The local retail yards are however so

well supplied that there ought not to be any special curtailment in furnishing building supplies.

HARDWARE TRADE.
The hardware trade continues to be rushed, although the midsummer weather has made business a trifle lighter than usual. There is a steady and heavy demand for refrigerators, freezers, garden hose, lawn mowers, and such other articles as the heated weather occasions a demand for. There is much inquiry about mining machinery, and the demand for harnesses and saddlery is steadier than ever. Every feature of the hardware trade is reported in healthy condition, and dealers are having all they can attend to. The good trade is expected to be kept up not only all summer, but for the remainder of the year. Dealers report a fine trade in the Keller assay balance which was invented in this city, and which is of such excellency that the government has adopted it. But the cost of one puts it out of the general reach, as the figure is \$300.

DRY GOODS ACTIVITY.
In the wholesale dry goods trade the old difficulty of getting goods delivered on anything like contract time continues, so that western jobbers are finding it to their interest to order eight months or more ahead. The result is that eastern manufacturers are taking orders for next spring's goods, and styles and patterns for 1907 are now being determined upon. Samples of these will shortly be in the market. This is rushing things a little, but then in this age of prosperity most anything in the rushing line may be expected. Local jobbers report trade in this state 15 and 20 per cent better than it was last year at this time. The prosperity of these western districts is making Utah as it has in the rural districts of Kansas and Nebraska, and Supt. Webster of Z. C. M. I. remarked today upon the fact that country girls are dressing just as stylishly and in as good taste as the city sisters, a fact that has been noticed as holding good clear through Utah to St. George.

The retail trade feature at present is the bargain sales of summer dresses which the dealers are anxious to get rid of at sacrifice rather than carry them over to another year, by which time the fashions will have changed. There is a marked run still on white shoes and hosiery to match, and the trade in notions is good. Some of the local establishments are sending purchasing agents to New York and even to Paris for next fall's styles. But parties who know claim it to be affectionate to send to Paris, as the Parisian fashions are reaching New York quicker than they are reaching London, for the English capital is proverbially slow in such matters.

CLOTHING TRADE.
The clothing trade and business in hats and men's wear continue very good, one large firm reporting twice the business of a year ago at this time. There is such a demand for straw hats that telegraphic orders have to be sent on to bring in the goods.

Offices for Rent.
The Capital R. E. I. Co. has desk room and ground floor offices for rent in their commodious quarters, No. 17 West Second South. There is no better location in the city.

PIONEER DAY.
Park Grocery can supply every want

BUSINESS NOTES.

During the week there was one class of people in Utah who did not want rain in many sections, and that class was the farmers, who said that a heavy downpour would have caused untold damage to hay and even to grain. What they wanted was hot weather to cause growth and maturity, and that they surely have had, so they should be happy. Crops generally are reported in excellent condition. Only good news comes from the beet fields. Commercially small stock sales have been the order of the week. The following institutions paid dividends this month: Deseret National bank, 3 per cent; State Bank of Utah, 3 per cent; Home Fire Insurance company, 2 per cent; Consolidated Wagon & Machine company, preferred, 2 per cent; Zion's Savings bank, 2 per cent; Amalgamated Sugar company, preferred, 1 1/2 per cent; common, 2 per cent; Sugar City Townsite company, 2 1/2 per cent; National Bank of Republic, 1 per cent; Barnes Banking company, Kayville, 4 per cent; Davis County bank, 4 per cent; First National bank, Ogden, 3 per cent and 3 per cent extra; First National bank, Murray, 1 1/2 per cent; First National bank, Logan, 3 per cent; Lehi Commercial & Savings bank, 2 per cent; Ogden Savings bank, 2 per cent; Provo Commercial & Savings bank, 2 per cent; Rocky Mountain Bell Telephone company, 1 1/2 per cent; Thatcher Bros. Banking company, Logan, 2 per cent; Church bonds, 3 per cent; Salt Lake City Railroad bonds, 3 per cent; Sumpster Valley railroad, 3 per cent and Utah Independent Telephone company, 1 per cent on its stock. Following are the latest quotations:

Parley Austin, who has acted as field agent of the Utah Sugar company for many years, was up from Sanpete and Sevier counties during the week. He reports that both these districts, which used to be poor, are now more than making good for last time this season. In fact, he says he will not be surprised to see both counties lead all others in the beet tonnage. The acreage will at least double that of last year.

CROP PROSPECTS ARE SPLENDID

Create Confidence: Bring Out
Large Orders for Fall and
Winter Goods.

SAW MILLS ARE VERY ACTIVE.

New Coke Ovens in Course of Construction—Foreign Commerce Increasing.

New York, July 20.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

"The best news of the past week comes from agricultural sections, where progress is fully maintained, harvesting of winter wheat promising a larger yield than expected and of good quality, while corn and oats exceed anticipations. As results on the farms become assured there is a growth of confidence that brings out large orders for fall and winter delivery of all staples. In the northwestern states are running eight crews, new coke ovens are in course of construction and there is a general disposition to extend facilities in order to keep pace with expanding needs. Official returns show that foreign commerce in the fiscal year ending June 30, 1906, far eclipsed all records, both as to exports and imports, while the new year promises still better returns because of the surplus on the farms available for consumers abroad. For the last quarter of this port alone exports were \$1,352,245 larger than in 1905, and imports gained \$914,253. Railway earnings thus far reported for July show an average increase of 7.2 per cent over last year.

"Restoration of a foundry pig at \$14 is probably the best development of the week in the iron and steel industry. Failures this week numbered 194 in the United States, against 193 last year, and 22 in Canada, compared with 23 a year ago."

Offices for Rent.
The Capital R. E. I. Co. has desk room and ground floor offices for rent in their commodious quarters, No. 17 West Second South. There is no better location in the city.

AFTER STATE LANDS.
Commissioners Receive List of Applications From Prospective Purchasers.

The state board of land commissioners has received the following applications to select and purchase state lands:

Niels C. Nielson, Huntsville, Utah—Lot 2, section 1, township 7 south, range 8 east.
Milton Oppenheim, Elgin, Utah—Southeast quarter of southwest quarter of section 4, township 22 south, range 16 east; south half of southeast quarter of section 4, township 22 south, range 16 east; lot 17, section 4, township 22 south, range 16 east; southeast quarter of northwest quarter of section 9, township 22 south, range 16 east; north half of northeast quarter of section 9, township 22 south, range 16 east.

George C. Herbert, Salt Lake City—Southeast quarter of southwest quarter of section 12, township 4 south, range 1 west; east half of northwest quarter of section 23, township 4 south, range 1 west.

Edward Mackelprang, Cedar City, Utah—Southwest quarter of northeast quarter of section 33, township 64 south, range 11 west.

John S. Webster, Cedar City, Utah—Northwest quarter of southwest quarter of section 25, township 33 south, range 11 west; northeast quarter of southeast quarter of section 26, township 33 south, range 11 west.

Two applications have been received by the state board for offered lands. They are as follows:
George Kilpatrick, Bridgeport, Utah—Northeast quarter of southeast quarter of section 16, township 2 north, range 25 east.
William M. Howell, Logan, Utah—All of section 26, township 13 north, range 6 west.

THREE SITES OFFERED.
Consolidated Exhibits of State and City Resources and Products.

The joint committee representing the state fair association, the M. & M. association and the Real Estate association on the consolidation of exhibits proposition, met yesterday afternoon, when it was reported that three sites had been offered for the exhibits. The offers included a building to be erected by Spencer Clark immediately south of the library building on State street, the Salt Lake Drug company premises on south West Temple street, and the new Swan building on west Third South street. The members of the joint committee will confer with their respective organizations as to these offers and report at the next meeting.

A MERCHANT PHILANTHROPIST

The largest merchandise store in all the Willamette Valley is that of James Craig, in Silverton, Oregon. And Mr. Craig is not only a big merchant, he is a philanthropist as well. He takes a genuine interest in the welfare of his neighbors, as this letter will show: Office of James Craig, General Merchandise.

JNO. J. FULTON, Gr., Oct. 16, 1905.
I would like you to send me a bunch of your pamphlets. I can send lots of customers to our local druggist, as I am a strong believer in your cure for Bright's Diseases, due to the following: The local physicians gave a young lady up as incurable. Her father brought a pamphlet of yours to me for my advice. I found I knew two of those whose names were given, viz.: Dr. E. S. Sub-Treasurer Spaulding and Dr. Zella. I wrote Spaulding. His reply was so satisfactory that the young lady's father ordered six bottles. Before she had finished two she was out driving and to-day is teaching school in Arizona, hearty and well. I have done lots of talking for you this past year, and a good many of my customers who have been afflicted are well. The reason that I am writing this is that another one wants to start taking the compound, and wants to read up on your literature.
Yours truly,
JAMES CRAIG.

Did you ever hear of anything else in all the world that was so effective that business men would go among their neighbors and urge them to take it?
We solemnly declare to you that Bright's Diseases and Diabetes are now curable in about 87% of all cases by Fulton's Compound. Send for free booklet to Jno. J. Fulton Co., 409 Washington St., San Francisco, or to F. J. Hill Drug Co., Local Agents, Salt Lake.

BEEKEEPING IN RELATION TO HORTICULTURE.

I am of the opinion that horticulturists would make a poor showing without the help of bees. On the other hand the beekeeper needs all the help he can secure in early spring from fruit bloom. I would not say there could not be any fruit raised without the help of insects in fertilization, but I am sure they are great aids, and in many instances almost prevent a failure of the fruit crop.

In many tests on white clover, and in one case in particular, some 20 heads of white clover were protected from these visits of insects and no seeds were formed; and 20 heads not protected had over 2,000 seeds formed. In the case of fruit bloom, where the bloom was covered from the visits of insects, but little, and in most instances, no fruit formed.

In the matter of raising cucumbers in the winter time, it becomes necessary to do so in a warm place or greenhouse, and also becomes necessary to pollinate the flowers by either hand or some other method, as one cannot have the wind to help in these circumstances. At Minneapolis, where they have a large number of greenhouses devoted to the same, it has been found that the keeping of bees in these houses is the easiest and cheapest way of getting pollen distributed, the parties running these different greenhouses securing the bees from apiarists for no other purpose than the fertilizing of the cucumber. Mr. Peter Henderson, in his book on gardening, speaks of the help and necessity of bees to secure the fertilizing of cucumbers at this time.

Mr. W. M. Scott, department of agriculture, Washington, D. C., who, in the matter of spraying fruit trees for harmful insects, advises not to do so during blooming time, as the experience given by many that it can be done either before the blooming time for fungus diseases or after blooming time for harmful insects. I have held to this opinion for many years, yet I never dreamed that Mr. Scott, with all that the best fruit-growers would say that, after giving this thing of spraying fruit trees during blooming time a most thorough trial, it did not do any more good at that time than could be accomplished either before or after, but was a positive disadvantage and injured the bloom by so doing, some nearly ruining their crop of fruit, and some coming to destroy it.

Such trees so sprayed at that time, I am not here to talk about spraying, as the horticulturists know a great deal more about that than we do, but only I wish to say not to do any spraying during blooming time and thus prevent the destruction of bees.—J. W. House in Rural Californian.

WARRANT FOR ARREST OF JOHN D. ROCKEFELLER.

Findlay, O., July 20.—Sheriff Groves, who has in his possession a warrant for the arrest of John D. Rockefeller, based on the criminal information recently filed in the probate court here by County Prosecutor David, charging Mr. Rockefeller, as the alleged head of the Standard Oil company, with violation of the Valentine anti-trust law, says either he or one of his deputies will attempt to serve the warrant upon the landing of Mr. Rockefeller in New York. It is stated further that if the papers are served Gov. Harris will at once be asked to make requisition on Gov. Higgins of New York for extradition papers. The claim is set up, however, that the information only charges a misdemeanor, and requisition under the law can be issued.

EX. CO'S WANT TIME EXTENDED.

Washington, July 20.—Following the appointment of the United States Express company to the interstate commerce commission for an extension of time beyond Aug. 25, in which to file its rates with the commission, the American Express company and the Wells-Fargo company today filed with the commission similar applications. It is likely that the requests will be granted by the commission, authority to extend the time being conferred on the commission by law.

VIOLATED THE LAW.

French Lick Springs Co. and West Baden Springs Co.

Indianapolis, July 20.—State Auditor Bigler has written to the French Lick Springs company and the West Baden Springs company that as the result of the investigation that he instituted there last week he finds that the two hotels and their managers have engaged in "wanton and willful violation of the criminal laws" of the state, and demands that both companies cease their "unlawful practices."

ICEMEN ENTER PLEAS.

Washington, July 20.—In the criminal court today Samuel F. Kimberly and George F. Hoover, officers of the American Ice company, and Arthur A. Chapin and Samuel C. Redman, officials of the Chapin-Sachs company, pleaded not guilty to indictments recently returned, charging them with conspiracy in restraint of trade under the Sherman anti-trust act in connection with the sale and distribution of ice in the District of Columbia. They were given leave until Sept. 1 to withdraw their pleas and file demurrers to the indictments.
