

JAPAN FEARS WAR WITH RUSSIA

Anticipation is Making Same Careful Preparations That Preceded Former Conflict.

BUILDING DREADNOUGHTS.

Army Being Largely Increased—New Arsenals Being Established in Different Places.

Victoria, B. C., April 16.—That Japan fears another war with Russia and is making the same careful and systematic preparation for it as was made before the recent war, is the news given by passengers from Yokohama. Two large battleships of the Dreadnaught class are being built, one at Kure, to be named the Settsu, and the other at Yokohama, to be named the Sawachi. Both will be stronger and with larger guns than the big Aki and Satsuma.

An arrival on the Tosa Maru said that great additions had been made to the fleet of Japan.

In military way preparations have been continuous, but the greatest secret has been maintained. The army being increased to more than 20 divisions, so that a force of 1,000,000 could be mobilized when necessary.

Prior to the last war in half a dozen men represented the total number that could be put into the field, including all reserves, and that number proved inadequate.

New arsenals are being established,

and to supply the numerous arsenals and depots scattered throughout Japan the military authorities have constructed a central arsenal at Choshi, near Nagoya. Even in Sarasaki, military preparations are known to be under way, despite the secrecy. Among other things a military railway is being constructed from Korsokovsk to Vladivostok, the scene of the future central administration, and not of the whole island. The Japanese portion of the staff of the Japan Gazette brought out on the Tosa Maru says:

"Japanese papers report that a Japanese retired naval warrant officer was arrested at Shinagawa on the 27th last, on suspicion of being concerned in the recent attempt to sell secret plans of the Yokosuka, Kure and Sasebo naval ports to the Russian embassy."

RHEUMATISM.
More than nine out of every ten cases of rheumatism are simply rheumatism of the muscles, due to cold or damp, or chronic rheumatism. In such cases the internal organs are not involved. The treatment of Chamberlain's Liniment is all that is needed, and it is certain to give quick relief. Give it a full dose for your rheumatism, and it relieves the pain and soreness. The medicines usually given internally for rheumatism are phrenous, or very strong, and are useless in cases of acute and muscular rheumatism. They are worse still in cases of acute and muscular rheumatism. For relief by all druggists.

GOT \$150 PEARL
IN A 5 CENT SANDWICH

New York, April 17.—John Turley, a cook lieutenant of the New York police department, is the proud possessor of a pearl said to be worth \$150 which he found last night in an oyster sandwich. The pearl struck his teeth while he was eating and at first thought it was a piece of shell. But investigation revealed a gem larger than a pea. The sandwich cost 5 cents.

ID RATHER DIE DOCTOR.
"I'd rather die doctor, than have my feet cut off," said M. L. Bingham, of Princeville, Ill., "but you'll die from gangrene if you don't." He had an ulcerated toe. Instead, he used Buck's Aronica Salve till wholly cured. Its cures of Eczema, Fever Sores, Boils, Burns and Piles astound the world. 25c at Z. C. M. I. Drug Dept., 112, 114 So. Main St., Salt Lake City.

A DEAL IN TIMBER.

Col. Greene Sells His Holdings in Mexico for \$32,000,000.

Portland, Or., April 17.—Consummation of the purchase of the entire timber holdings of Col. W. C. Greene in Mexico by a syndicate of San Francisco and New York capitalists for \$32,000,000 is reported by W. S. Cone of Bay City, Oreg., who has just returned from Mexico.

Mr. Cone about two years ago organized a party in Portland for the purpose of inspecting the timber land, the purchase of which was then under contemplation by the men who have participated in the deal. The tract into which other parties were also sent is about 60 miles wide by 120 miles long and lies just south of the international boundary line in the state of Chihuahua. It has a growth of yellow pine timber to the extent of 15,000,000,000 feet.

These railroad lines had already been extended into the tract by Col. Greene's companies and covered immense lumber mills.

The purchasing syndicate has acquired the railways and mills and now has a millwright at El Paso looking over available sites for another great mill. It is announced that by 1911 the new company will be prepared to manufacture lumber at the rate of 20,000,000,000 feet a year.

At the head of the syndicate is Hiram C. Smith of San Francisco. Another principal in the transaction is J. S. Pearson of New York City.

Take me back to old Wisconsin,
Where the sugar beets and tobacco grow,
Where the farmers are healthy, happy and bright—
They all take Rocky Mountain Tea at night.
—Godbe-Plus Drug Co.

PROFICIENCY IN MARKSMANSHIP SOUGHT BY ARMY MEN

Washington, April 17.—Proficiency in marksmanship on the part of the enlisted men of the army is sought by the military authorities and to this end after a thorough test made by the Board of Ordnance and Fortification of the War Department, it has been decided to use the sub-target rifle machine gun and recording rifle case outfit in the training of soldiers in the use of small arms.

Major Gen. J. Franklin Bell, chief of staff, has issued a circular to the service stating that the ordnance department will issue on requisition one sub-target gun machine to each squadron of cavalry and battalion of infantry and one each to recording rifle and outfit for small arms sighting and aiming instructions to each troop of cavalry and to each company of infantry, coast artillery, engineers and signal corps.

About \$10,000 has been spent by the department on this apparatus. With

the sub-target rifle machine soldiers may practice shooting indoors without a rifle range and without the use of shells. The machine may be described as a rifle with a captive bullet the position of which relative to target is visible. The objective target is located 60 feet from the marksman. The gun holder is so constructed that it is impossible to secure a point of rest with which to steady the gun in aiming. The rifle is held, aimed, and discharged in the prone position.

WHOLESALE SHOULDER SHOT.
McAlester, Okla., April 18.—Mike Zamora, shot his son, William Doss, and his sister-in-law, Mrs. Willitt, today. Within a few minutes he was shot in the neck and serious injuries by his father-in-law, William Doss.

HEYBURN WOULD PLACE TAX ON DISPLAY SIGNS

Washington, April 17.—Display signs will be the subject of a federal tax if the bill recently introduced by Senator Heyburn becomes a law. It is provided that a tax of two cents per superficial square foot shall be levied upon every posted display advertisement or any article advertised to enter into state commerce.

Opposition of the tax is to be based on the total number of square feet contained in the surface of the thing on which the advertisement appears.

RAYMOND LORRAINE MISSING.
Portland, Ore., April 17.—Raymond

Lorraine, who is said to be the son of Frank Lorraine, a capitalist of Montreal, Canada, is missing, and it is feared he has committed suicide. Young Lorraine came here a few days ago with friends who were enroute to Europe. He has been restaurants, and his friends say, made threats of making away with himself.

UNIQUE ENGINEERING PROJECTS ON PANAMA CANAL

Washington, April 17.—Officials in charge of the Isthmian canal work reported to the war department that some of the most unique engineering projects in the entire construction have just been undertaken. One is the excavation below sea level in the Andes hills,

near the Atlantic entrance to the canal; and the other is the dredging from Limon bay at the mouth of the canal on the Atlantic side to the Mediterranean. The dredging is made difficult by reason of the fact that for two miles the canal runs through a bed of silt, overlying argillaceous sandstone. The excavation below sea level is being carried on by means of two pumps keeping the cut dry.

BILL TO EXEMPT PATENTS FROM SEIZURE FOR DEBT

Washington, April 17.—An amendment to the patent laws, proposed by Senator McLean, who has introduced a bill exempting from seizure for debt of any kind letters patent or any in-

terest in them issued by the United States, the ownership of which is vested in the original inventor or conveyee of the thing patented.

Exception is made, however, to debts which are due to inventors, hypothecators, or pledgees of such letters patent. It is also provided that the exemption shall not apply to the proceeds arising from

the sale of the letters patent nor to any product of them "in whole or part, that may be dissociated from such letters patent."

ARCHER AND MITCHELL OPTICIANS, are now ready to see their friends at their Optical Parlors, 212 Main.

Three great sales—Suits—silks—waists—all spring styles—best offers yet

Entire stock of silks. 75 new tailored suits. 350 sample waists at surprising reductions

Monday Starts Furious Silk Buying!!

Our entire tremendous stock of plain, fancy, black, white and colored silks at as low as half prices. Read

Messalines and rough pongees—
