Can Anything be Expected From Him But What is Based on His **Eloquence and Adroitness?**

PREDICTIONS UNFULFILLED.

His Character Makes Him an Unsafe Man With Whom to Try Experiments in Government.

Cincinnati, Sept. 22 .- The real activities of the campaign have begun for William H. Taft, the Republican presifential candidate. Three political addresses were the demands upon him today. Early tomorrow he will begin his journey of speech-making through the west.

Not since the candidate was notified officially of his nomination has the city of Cincinnati been so thoroughly awak politically as tonight, when marching clubs from Indianapolis, Columbus, Hamilton and other places lent the blaze of torch and the blare of trumpet is the escort to the candidate, was the feature of the rally of the National League of Republican clubs at Music

hall. At noon Mr. Taft addressed the dele-fates to the national convention of ne-gro Baptists, who had come here from Lexington, Ky., for the purpose. Pre-vious to this he looked in upon the work of the convention of the National League of Republican clubs and at once was introduced for a speech. In these League of Republican clubs and at once was introduced for a speech. In these two efforts the candidate was brief. His expression of sympathy for the strug-gles of the negro race elicited warm ipplause from the Baptist ministers, who met the candidate at the Sinton hotel, and his words to the convention were warmly received. It was tonight, however, that Mr. Taft made his strongest effort. After reviewing the record of the Républican party as one of action and future relia-ollity, he depicted his idea of the Demo-ratic policy of "promise." and then

ratic policy of "promise," and then levoted himself to an analysis of Mr.

The Music hall, the largest assembly hall in the city, was crowded, GOES FOR BRYAN.

The Bryan feature of Mr. TafUs speech came at the conclusion of a 10.-00-word address, in which the accom-plishments and purposes of the Repub-

plishments and purposes of the Repub-ican party were contrasted with what the speaker termed the Democratic rec-ord of opposition and promises. "Turning now to the other pleture." said Mr. Taft, after his review of the ssues, "what is it that we have to ex-ect from Mr. Bryan? Have we any-ching to expect but what he promises? Have we anything to expect but what s based upon his eloquence and his idroitness as a public critic? Has he wer given any practical demonstration wer given any practical demonstration of his ability to meet problems and solve them? Has he ever done any-hing but formulate propositions in his ining but formulate propositions in his loset of an utterly impracticable chir. icter, largely with a view of attracting rotes by their plausibility and very lit-le with a view of their operation? 'By heir fruits ye shall know them.' What s the history of Mr. Bryan? It is, from beginning to end, a record of failures in public questions." Mr. Taft reviewed Mr. Bryan's career as a public man, and contin-ued:

And a Tablet Do Away With Dyspepsia, Stom-ach Trouble and Make Meals a Pleasure.

Common Sense

When your stomach goes on a strike and mass meetings of indignation are held all over your body, then it is that you should sit up and take notice. It is clearly and only a question of common sense—is this thing called Dyspepsia. Take awy, by abuse, over eating, excesses and high living, the things which the stomach needs and you have dyspepsia and indigestion; then other maladics follow these—this is common sense.

then other maladies follow these-this is common sense. The stomach is willing enough but you won't let it do its work. You take away the materials which are so necessary for it to use. Give back these materials and dys-pepsia and indigestion flee and the whole machinery of man begins slowly to move and do its work. What the stomach needs is nerve

whole machinery of man begins slowly to move and do its work. What the stomach needs is nerve force, fluids for its digestive glands, nourishment and power. All these ne-cessities it takes from the blood. If dyspepsia gives nothing to the blood, the blood gives nothing to the stomach. This is common sense also, pure, simple and unalloyed. Stuart's Dyspepsia Tablets are com-mon sense presed by high power into tablets. In these tablets are powerful essences which go into the stomach, di-st food, stop gas making, prevent decaying of food, enrich the gastric juices, are absorbed by the blood and thus give it strength to furnish a bet-ter fluid for digesting the next meal. Every physician knows what comprises these tablets; every druggist has the same knowledge also. They are na-tural common sense digesters which do the work for the stomach quickly and well. promises and prophecies unfulfilled for a period of 12 years, with this record of a hunt for an issue upon which to achieve the presidency, with this record of repudiation, of nega-tion and of running away from na-tional responsibilities. Mr. Bryan comes forward and asks that the peotional responsibilities, Mr. Bryan comes forward and asks that the peo-ple now give him an opportunity to put into operation new reforms in re-spect to trusts and in respect to guaranty of bank deosits, wholly un-tried, wholly theoretical, and, on their face, bearing evidence of their im-practicability and of having been de-vised by the ready brain of one look-ing for plausible arguments rather than real reforms. He only in a qual-ified way approved the postal savings banks recommended by the Republi-can platform, which is a tried and proved means of encouraging the wage earner and small fairmer to make deposits in a bank absolutely se-cure; but much prefers a system which, takes a man's money to pay another man's default, and which, in-stead of strengthening our banking character and experience and capital, and offering inducement to reckless and speculative bankers without char-acter or capital.

and speculative bankers without char-acter or capital. "The record of Mr. Bryan, and his character, as it is understood by a 12 years' acquaintance with him, have impressed the business com-munity of this country and those whose judgment determines whether or not capital shall be invested, that he is, not a safe man with whom to try experiments in government: that or not capital shall be invested, that he is not a safe man with whom to try experiments in government; that he loves financial theories that are full of sophistry and are impractical; that he advances propositions with but illitle sense of respect as to how they may be carried out in practise, and that he gives but little attention to the welfare of the conservative business community in suggestions of reform. Certainly his record justifies this judgment of him by the busi-ness men. If he were to be elected, unquestionably because of his record, however much now he may seek to pose as a conservative—because of his record, because of the failure of theories which he has proposed for the last 12 years; his election will mean a paralysis of business, and we should have a recurrence of the dis-enterned and the set Demo-

ward the Debs and Haywood Follies.

St. Louis Sept. 22 .- J. W. Van leave president of the National Manufacturers' association, in a speech tonight at the banquet of the Missouri Manufacturers' association at the Southern hotel, said that the American Federation of Labor played a confidence game on President Roosevelt and other party leaders at Washington last winter.

"We saw in Washington," said Mr Van Cleave, "party leaders and civic bodies invite representatives of the American Federation of Labor into their councils and ask them what legislation they wanted. We saw the president of the United States make president of the United States make treaties with those labor officials with almost as much formality as he would with diplomatic representatives of Great Britain, Germany or any other great power. What enabled the federation to play this confidence game on the party leaders and the president? Organization." Mr. Van Cleave urged that em-ployes organize saving in all our fac-

ployes organize, saying in all our fac-tories we must insist upon the open shop. "The labor societies have made union among us imperative and at the

union among us imperative and at the same time have shown us what union can accomplish. We must get to-gether so we can wield an influence to elect courageous and special spir-ited men to office, and we must aid them while in office in enforcing the statutes and the ordinances against law breakers of all sorts. "How did we prevent the federa-tion's politicians from coercing the Republican party in the Chicago con-vention in June from putting their anti-injunction and pro-boycott de-mand into the platform? In response to our appeal 20,000 telegrams of protest deluge the resolutions com-mittee and the convention leaders and to our appear 20,000 telegrams of mittee and the convention leaders and the labor unions' anti-American plot was foiled. Socialism is absorbing unionism. The drift of most of the unions is strongly toward the Debs and Haywood follies. Some of the unions have embraced these follies already. Every year the Socialists make a strong fight to control the American Federation of Labor. "They are by far the best organ-ized, the most aggressive and most re-sourceful of its members. The blun-dering of the ignorant and arrogant persons who are the head of the fed-eration renders it inevitable that the Socialists will **x**et control of the league in the end."

ret guns on the French armored cruiser Latouche Treville exploded with ter-rific violence, completely wrecking the after; turret and killing outright the entire gun crew of 13 men. A number of men were seriously in-jured, some of them probably fatally. The accident was similar to that aboard the gunnery schoolship Tu-renne, off Les Salins d'Hyeres, Aug, 12 last, when, by the bursting of the breach of one of the guns, six men were killed and 18 injured. The drill today had been proceeding for a con-siderable time when, without warning, the whole turret seemed to blow out. Dismembered bodies were thrown in all directions and several of them were hurled into the sea through the great breach caused by the explosion. The spectacle was horrible, the dead and wounded, together with shattered arms and legs, littering the decks. A call to quarters was sounded and as speedily as possible the wounded were carried two. Happening so soon after the acident on the Turenne, the ex-plosion today has caused a sensation in naval circles, and doubtless will lead to a most rigid investigation. FATAL FIGHT BETWEEN RANCHERS AND HORSE THIEF

Great Falls, Mont., Sept. 22.-Word has been received here of a battle be-tween two ranchers and a horse thief near Dorsey, in Meagher county. The sheriff of that county received word that a man wanted in Gallatin county was near Dorsey, and he telephoned a rancher to try and locate him. The rancher got a neighbor to help him and they soon located the thief. Riding past him and then wheeling, they or-dered the man to throw up his hands. Instead, the thief opened fire, wound-ing one of his pursuers, while the other hit the thief. The latter started into the timber, and it was later found that he had spent some time in a deserted cabin. He had dropped his gun and cartridge belt, the latter showing a builet hole through it. From the amount of blood on the ground it was evident that he had lost a good deal Great Falls, Mont., Sept. 22 .-- Word

Whitney's History of Utah at Half Price.

The Deseret News takes pleasure in announcing that it has secured the sole rights to the HISTORY OF UTAH, by Orson F. Whitney,

originally published by the George Q. Cannon & Sons Co. This work, which was begun in 1890, and printed in three large volumes (the fourth volume issued being biographical, and not a part of the direct history of Utah), is one of the largest and most exhaustive histories ever compiled of any western state. The three volumes bring the history of the state from the foundation down to the year 1890, at the time of the issuance of the manifesto, and includes the history of the Church from its organization in New York. The first ten chapters are devoted to this subject.

In the three volumes are included 235 full page steel plates, mostly portraits of leading figures in the history of the State, originally obtained at a cost of many thousand dollars. The volumes each contain approximately 800 pages, a total of 2,351 pages in the three. The binding is quarto size, full morocco with gilt edges, no other style of binding being issued.

The three volumes were originally sold at \$30.00, and several thousand sets were placed throughout the state at that figure. The "News" having obtained the unsold copies of the edition, will place them on the market at the coming October Conference and sell to the first comers at HALF THE ORIGINAL PRICE, OR \$15.00 FOR THE THREE VOLUMES. NO single volumes will be sold. Without doubt many libraries throughout the country will avail themselves of this rare opportunity, and Utah people who desire to add this work to their libraries are urged to call at the Deseret News book store and inspect the work during Confer-

The low price at which this rare work is offered will undoubtedly exhaust the edition in a short time. The work will then be our or FRINT, so that every book-lover should avail himself of this last

The original subscribers, who already have the first three volumes of the History of Utah are entitled to the fourth volume (containing individual biographies) free, by addressing George Q. Cannon & Sons Association.

The "News" has no interest in the fourth volume, the work being complete as above stated, in the three volumes, now offered at \$15.00.

Mr. Taft reviewed Mr. Bryan's career as a public man, and contin-ued: "In 1906 Mr. Bryan went around the world and on his return was berafded with the statement that in his visit around the world he had so gained information and knowledge that he had become safe and sane; that he was a conservative, and all the Democratic party awaited his coming with great interest. Immedi-ately upon his arrival he dispelled this arroneous impression by declaring that he was convinced that the only solution of the railroad question ultimately would be government ownership. He had previously de-clared in favor of mational initiative and referendum and also in favor of the election of federal judges. All these most radical propositions have now been excluded from the Demo-cratic platform. They do not meet such popular approval as to justify their being brought forward as a means of acquiring office in this rampaign, but they show the instabil-ity and variability of his views, and they justify the fear that so many people of this country have in re-spect to the danger to which the pub-lic weal may be exposed should he be put at the helm. UNFULFILLED PROPHECIES. "And now with the record of UNFULFILLED PROPHECIES.

Chicago, Sept. 22.-John Simons, said to be a note broker of Niles, Ohio, was arrested here today in connection, it is alleged, with a \$25,000 bank robbery at Niles. All That You Need Is in Wheat

Whatever you need to accomplish through food, the ideal food is whole wheat.

Anything else will do less than whole wheat, providing the wheat is digestible. That is the vital point.

Mapl-Flake

The Food That's All Food

The verdict of the ages is that whole wheat is the premier food of the world. In no other grain are all the

food elements stored in such balanced form.

So wheat can best do whatever food can accomplish. Anything -however good it may bewill do less.

But wheat-to be available-must be wholy digestible. That is the main reason for Mapl-Flake.

We take the finest whole wheat and steam-cook it for six hours. Then we cure it for days-a partial digestive process.

Then each separate berry is flaked as thin as paper, and toasted in a heat of 400 degrees. In a flake, that fierce heat can attack every atom. The particles are separated so the digestive juices can get to them. In any other form that is out of

the question. In most forms of whole wheat not one-half will digest.

That is why our process requires hours. That is why our wheat 96 hours. is flaked.

The food value in wheat is value-less to you unless it is utilized. We prepare the wheat so that every whit is digestible.
