### DESERET EVENING NEWS: MONDAY, SEPTEMBER 7, 1903.

another vein of mineral will also be found. From the lower end the tun-nel has been sent in 1.100 feet, so the great bore is nearly one-third com-pleted. It is large enough for the elec-tric motors that will be used for the ore cars, and which will take them a mile and a half below the mouth of the tunnel to the concentrator. The engine house at the mouth of the tunnel was destroyed by fire last Sun-day night. The fire broke out while the shift was at supper and in a very few minutes the building was entirely burn-ed. The machinery was only slightly damaged, but Surveyor Street, who had been surveying the railroad line to the millsite, lost all of his engineer-ing instruments, valued at \$250. Supt. Van Patton is steadily prose-cuting development work at the Conet, just above and adjoining the Cactus, and promises that he will make a show-

MAJESTIC SUIT.

Mr. Caughey's Attorney Gives a Little Inside History in the Matter.

LIGHT ON THE

SCORES PRESIDENT MUCKLOW.

Explains the Situation Under His Management and Criticizes Certain Of His Methods.

Quincy Ward Boese, attorney for C. J. Caughey, has addressed two letters to the stockholders of the Majestic Mining & Smelting company, which throw some light on the differences leading up to the sult filed recently in Connecticut, and which was mentioned in the Saturday issue of this paper. The first letter is as follows:

Dear Sir;-You have probably read in the daily papers that C. J. Caughey, suing as a stockholder of the Majestic company in his own behalf, and in be-half of such other stockholders as may choose to join him, has brought suit against William B. Mucklow, individu-ally and as a member of the firm of Chapman, Mucklow & Bosson, and against the Majestic Copper Mining & has brought suit

The suit is brought to compel the firm of Chapman, Mucklow & Bosson to ac-count for the stock of the Majestic com-pany received by them and the money that they received from its sale while acting as the company's fiscal agents, and also to compel Mr. Mucklow to return to the corporation 10,000 shares of its stock which Mr. Caughey claims was issued to him without consider-

In behalf of my client, 1 made a demand upon the officers and directors of the company to bring suit in its name, but for obvious reasons they paid no attention whatever to the demand, and thereupon Mr. Caughey brought the suit in his own name, joining the corpora-tion as a defendant, as the law requires in such cases.

The bill of complaint is long and is on file in the clerk's office of the Unit-ed States circuit court in Hartford. If you want any further information re-garding it, I shall be most happy to ve it to you upon receiving such equest. Yours truly, QUINCY WARD BOESE. Attorney for the Complainant, equest.

THE SECOND LETTER.

As will be seen from the second let-As will be seen from the second let-ter, which follows, Mr. Boese takes oc-casion to criticize President Mucklow and certain methods which he is alleged to have resorted to in the handling of the company's affairs. He says:

In behalf of Mr. Caughey, the com-plainant in the suit brought in the United States circuit court for the Distric of Connecticut, as well as for many oth er stockholders. I desire to bring to your notice the serious condition of the affairs of the company, evidenced by the

We have to assume that these state-ments are made in his capacity as president of the Majestic Copper Min-ing and Smelting company, though

to manage the affairs of the Majestic company, I am sure you could not find it better than in the statement which I have quoted above, which said state-ment is signed by Mr. Mucklow. In the circular of which I have spok-en hereinabove, entitled "Greeting \* \*," and which, you will remember, is signed by eight of the directors, ap-peared the resolution authorizing the company to borrow \$350,000, and just above the signatures of the directors appeared the following statement: to manage the affairs of the Majestic

above the signatures of the directors appeared the following statement: "\* \* We need scarcely say that we thoroughly believe in the magnitude and immense values of the Majestic properties, and as an earnest of our faith in the company, and also in the proposed loan, we, the undersigned di-rectors, have agreed to subscribe for not less than \$100,000 of the proposed loan of \$350,000, which we believe will convince every stockholder of our con-fidence in the security and wisdom of the plan, \* \* \*" From the very best information ob-

just above and adjoining the Cactus, and promises that he will make a show-ing that will eclipse the famous New-house mine. The property is equipped with a fine plant and the shaft has reached a depth of 262 feet. There is a great showing of ore on the 100, from which some beautiful copper has been taken, and cross-cutting has commenc-ed on the 200. The apex of the great vein crops out at this point and can be plainly seen cutting through the bill. the plan. \* \* \* " From the very best information ob-tainable-though I must admit that the officers themselves have not answered my communications-my clients learn that the directors have subscribed less than \$25,000. Was this statement quoted above spread broadcast among the stockholders simply to induce them to suppy the whole 350,000, and, if the directors "have agreed" to subscribe for not less than \$100,000, why it is that they have not kept to their agreement? It is because they, too, have lost faith

Mucklow In Mucklow? My clients are adivised that the in-debtedness of the company at the present time is in the vicinity of \$75,-000, possibly \$100,000; that much of this is of such a character that it must be non of this city made a trip of inspection to the properties of the Old met promptly, or else proceedings may be taken against the corporation, which proceedings will jeopardize seriously

spection to the properties of the Old Imperial Mining company in Nevada, Concerning It and the condition in which he found the properties, the Miner of Cherry Creek says, Sylvester Cannon, M. E., of Salt Lake City, was in camp last week for several days inspecting the properties of the Old Imperial Mining company, in which he is financially interested. Mr. Cannon is well pleased with the progress of the development and char-acter and value of ore in the New Century mine, which is now being de-veloped in shaft and drifts, and is confident that his company has one of proceedings will jeopardize seriously the value of your stock. In a discussion of the affairs of the corporation swith A number of the stockholders, representing directly and indirectly at least 100,000 shares. I have been requested to confer with certain well known business men and financiers to ascertain if they will act as a stockholders' protective commitas a stockholders' protective commit-tee, the object of the committee being to take such steps as it may deem wise for the benefit of all the stockholders. Inasmuch as the gentlemen spoken of confident that his company has one of the most promising gold-silver pro-perties in eastern Nevada. About 80 feet of drifts has been run east and west in the New Century mine from have not had time to inevatignte the matters relating to the company, I am not prepared to announce their names, but I hope to do so early in the coming week. In the meantime I trust that you the 250-foot level. Manager P. H. Cannon is still driftand all of the stockholders, for your own good and for the benefit of one another, will join with Mr. Caushey and co-operate with him in his efforts to secure a management which shall have sufficient standing in the finan-elal world to obtain the confidence of bankers, as well as of the stockholders

it large Please bear in mind that the suggest, d committee will be entirely independ ent and will have no affiliations with either of the interests which have been contending for the control of the prop-ertl. It will look solely to the advance-ment of the interests of the stockhold.

erty. It will look solely to be advance-movement I shall be pleased if you will communicate with me at the earliest possible moment. Yours truly, QUINCY WARD BOESE, Attorney for the Complainant.

SILVER KING CONTACT. Manager Mayne Believes He Has it in Minola Ground.

### CONCENTRATES.

The shaft at the Black Jack mine is completed to the depth of 1,200 feet.

The Manhattan delinquent sale oc-curs on Thursday.

There are rumors of a dividend from the Gemini in October. There was no call on the exchange

today and very little business of any kind on the curb. Martha Washington stock brought

a fraction over 21/2 cents a share at the delinquent sale on Saturday. The Dewey mine near Ibapah has made a 1,500 pound shipment which it is expected will bring the sum of \$500.

The Majestic suit, mentioned in these columns on Saturday and further gone into in this issue, was begun some months ago and made returnable the first Tuesday in September.

A Tintic paper says: The California, claim, which was sold at auction in Nephi last week by Frank McHatton, administrator of the esate of Peter E. Williams, deceased, was bid in by De-los Lombard in the interest of Salt Lake parties, for \$400.

Explaining the advance in silver a New York writer attributes it to an increase in demand and says: The purchases of silver by the Philippine government, by India and by France have constituted the increase in the demand; and the advance in the price of silver, it is thought, has been stim-ulated to some extent by the belief, or the hope, that through the efforts of the joint commission, representing the hope, that through the efforts of the joint commission, representing Mexico, China and the United States, some measure may be devised by in-ternational action to keep sliver per-manently at a ratio of about 32 to 1 with gold, in accordance with the plan of the Philippine currency. At this ratio the price of sliver would be been with goin, in Access currency. At this of the Philippine currency. At this ratio the price of silver would be about 28 15-16d, which was the average price in the calendar year 1894 when the high price was 51% and the low price

NEVADA MINES.

Salt Lake Man Finds the Old Imperiat

In Good Condition.

A week or two ago Sylvester Q. Can-

000 of Its Bonded Obligations. Of the United States Mining company, operating at Bingham, the Boston News-Bureau has the following: "The United States Mining company is today (Tuesday last) paying off at the American Loan & Trust company

most of them are on the letter-heading of Chapman, Mucklow & Bosson, You probably received a bundle of papers shortly after May 16, 1903, consisting of various circulars, viz.: "Greeting from the board of directors to the stockhold-ers \* \* \*," "To the 'Malest'o' the board of directors to the stockhold-ers \* \* \* " "To the "Majesto" Stockholders," "Twenty stockholders express their convictions," "Report of Col. William A. Farish, General Man-ager," "A Letter," and an agreement to loan the company money. The contents of these various docu-ments was interesting, although con-tradictory, and the immediate effect

tradictory, and the immediate effect was the depreciation in value of the stock, which had been selling at be-tween \$4 and \$4.50 per share, to less than \$2 per share. In behalf of certain stockholders, I wrote a letter to Mr. Mucklow criticis-

ing his plan for raising money and stating that I thought, from a business standpoint, it was outrageous that a company which, according to the cir-cular entitled "To the 'Majestic' company which, according to the cir-cular entitled "To the 'Majestic' Stockholders," had assets worth \$10,-000,000 should have to pay the extor-tionate interest offered in the circular, amounting to 46 per cent. I received in reply a letter from Mr. Mucklow, and, after I had written to him a sec-ond time, I received a visit from him. He acted in such a peculiar, unbusi-ness-like manner at this interview that I was convinced, and I so advised my ness-like manner at this interview that I was convinced, and I so advised my clients, that we could not expect any-thing but disaster if he and his board of directors—(because Mr. Mucklow stated that they were "his board")— remained in control of the affairs of the corporation. However, Mr. Caughey and other gentlemen were loath to take any steps at that time which might affect the credit of the company and desired to give Mr. Mucklow roll and desired to give Mr. Mucklow full opportunity to work out his plan for for that reason the bill of complaint was not filed six weeks or two months

Let us see what the situation is under the Mucklow management: Ac-cording to the circular "To the 'Ma-jestic' Stockholders," which circular is dated May 16, the company was en-tically from from doht tirely free from debt. I quote the circular

"Fourth-there are no debts what-ever owing by the Majestle company. Not a single note or obligation is outstanding.

"Seventh-The smelting plant will be in full operation in a few weeks, when the net income of the company will be in excess of \$100,000 a montht." If we are to believe these state-tents, at that time the finances of the company were in a flourishing con-

the company were in a fourishing con-dition and an income of \$100,000 a month was assured to the company in the course of "a few weeks," Now, let us refer to the circular which was issued by Mr, Mucklow under date of Aug. 22, three months later, which you have probably before you now.

you now, "In fact, it looks as though everything was coming our way except the money from stockholders on the loan, and I am greatly perplexed and handi-capped by reason of this failure. I am short nearly \$30,000 in connection with the July payroll, which is due to-day (Aug. 22), and I am, therefore, making a strong personal appeal to 200 of our leading stockholders is made 200 of our leading stockholders to send immediately from \$250 to \$1,000 each to send immediately from \$250 to \$1,000 each so that I can remit the necessary funds to pay the labor bills and supplies. Unless I secure this money the credit of the company will suffer materially, and I may find it necessary to shut down for the time being." If evidence was needed to prove that I was correct in the opinion which I expressed regarding the mability of Mucklow and "his board of directors"

silver King graunds. The fine grade of quartz is literally saturated with py-rites of iron, some of the latter existing in such a finely divided state that a in such a finely divided state that a a strong lens is necessary to determine their presence. The black oxide of man-ganese is also present in large quanti-tics. Where penetrated the ledge meas-ures about 30 feet thick and lies on the 500-foot level of the Minola shaft. A drift will be run both ways from the shaft on the strike of the contact and lates it is the interplate to so some later it is the intention to so so more sinking.

TINTIC ORE SHIPMENTS.

Mines of District Sent 149 Cars of Ore To Smelters Last Week.

Special Correspondence.

Eureka, Utah, Sept. 5 .- The shipments Eureka, Utah, Sept. 5.—The shipments for the week from Tintic district amount to 149 cars of ore 35 of which come from the fron properties of the Black Jask, Noon and Dragon Mining companies. The United Sunbeam again appears as a shipper as also does the ay Day. The shippers are Bullion-Beck, 3: Black Jack, 7; Centenniai-Eureka, 29: Cartes 5 Dragon Ico. Beck, 3: Black Jack, 7: Centennial-Eureka, 32: Carisa,5; Dragon Iron Mine, 24; Grand Central, 26; Gemini, 14; Noon's Iron Ming, 4: May Day, 1: Martha Washington, 2: Mammoth, 2: United Sunbeam, 2: Victor, 3; Yankee Cons., 9. Three carloads of concen-teriors. trates were shipped from the May Day

All the mines throughout the Tintie district wil be closed next Monday-Labor day-to give their employes an opportunity to fitly celbrate their holi-day.

### THE COPPER GULCH.

11619.

#### Great Activity at This Promising Beaver County Mine.

According to the Milford Times there is great activity at the properties of the Copper Gulch down there. With four hoists in operation-the Cactus, Comet and two on the Blackbird-within a stone's throw of each other, it looks very much like something do-It looks very much like something do-ing, and there is every indication that a great copper camp is to be built up at this point. Supt. Stingley of the Cac-tus extended every oourlesy and pilot-ed the Times man through the laby-rinth of underground workings. There is really nothing that can be added to what has already been sold concerning the Cactus of the Cactus what has already been said concerning the extent and value of the Cactus ore bodies. Three separate velns have been opened and nowhere is the ore body less than 40 feet thick, while in places it is over 100 feet thick. And it is all ore. There will be no sort-ing, except to separate the very high grade, which will go direct to the smel-ter, from the medium grade, which gees to the concentrator. The ore is of such wonderfully easy concentration that the action of the atmosphere and rains upon the big dumps has in many places effected a separation and con-centration plainly visible. The ore bodies are of such magnitude that those places effected a separation and con-centration plainly visible. The ore bodies are of such magnitude that those connected with the property, who see whe workings every day, really cannot comprehend or realize how much ore there is, but they do know that there is more than will ever be worked out dur-ing their day.

ross-cutting still continues on what has been called the "blind iedge," which was encountered on the 600 while runwas encountered on the 600 while run-ning the working tunnel. This vein, which evidently parallels the one first onened, has been gone into for a dis-stance of 40 feet, with no wall yet. The ore looks even better than that in the other workings and the values compare very favorably with those of the other veins. The working tunnel is now 700 feet from the shaft, and is in very hard granite, but the ground will be softer when the porphyry belt just ahead is reached, and it is believed that

which should give an output of be-tween 240,000 and 250,000 pounds of bullion weekly and bring the company's net earnings above the \$100,000 per month mark.

"The management of the United States Minng company has naturally been disappointed in the operations of its smelting plant, but its experience has been no different from that of nearly all new smellers. It took the big American Smelling & Refining company's plant in the Salt Lake val-ley a year to get running properly, and

ley a year to get running properly, and the big Washoe plant longer than this, while the Highland Boy plant did not operate smoothly inside of six months from its completion. "The United States company has been operating three furnaces with good success since it discarded its au-tomatic feaders and with an interaction." tomatic feeders, and with an increased labor force and increased efficiency of

its employes, there is reason to believe that the most of its troubles are over. that the most of its froubles are over. It is the expectation that during Sep-tember the company will be able to handle at least 20,000 tons of ore. "The Roebling firm of Trenton, which built the United States company's tramway from the Bingham mines to the smelter, has had a corps mines to the smelter, has had a corps of expert mechanics at work upon the trainway for some weeks, and the train is again working steadily, moving 500 tons of ore daily from the mines to the smelter. There has, however, never been any difficulty in securing an ade-quate supply of ore; the difficulty has been in its treatment. At one time there was \$300,000 worth of ore in the smelter bins awaiting treatment."

# ACCERCICACION A Mr. and Mrs. A. E. Welby announce the engagement of their daughter Wil-helmina Cecelia to Frederick A. Earis, the wedding to take place Sept. 24 at St. Mark's cathedral. Mrs. George R. Hancock will entertain at luncheon tomorrow for daughter, Miss Hollister Hancock. Mr. and Mrs. Edwin Ferry and Mr. and Mrs. J. R. Walker are camping on Snake river. Mrs. Fred T. McGurrin and Miss Jennie Sullivan will spend the next month in Montana.
