

Star Consolidated and Butler-Liberal Showed Some Gains.

The forenoon sales of the mining exchange did not exceed but little over \$4,000, and with the exception of Star Consolidated and Butler-Liberal, there was no upward tendency in prices. There was only two lots of Star Con.

the verdict of the major when he comes into the city, that the property looks fully 25 per cent better to him than it did when he went east. Of course, Maj. Caitrow anticipated that the Winnemuck mill would be in operation, and that the ore shipments account would show a larger balance account would show a larger balance on the right side than it does; but he overlooked the fact that annoying de-lays are likely to occur with any proping. erty while radical improvements are being made, such as was the case of the Ohio. Secy. Henry Caltrow said this morning that the crushing rolls, which have kept the starting of the mill back, were shipped today; so, it begins to look as if the date of starting is not far off. It is being planned to make the initial run on Monday

manager, has made some cheerful developments and, it will undoubtedly be July 1. 1903, to Jan. 1, 1904, amounted to 1,574 tons of dry, first class ore. The first class ore netted \$29,397.24, or an average of \$18.68 per ton, while the ond class or milling ore netted \$9,533.68, or an average of \$6.08 per ton, making a grand total of net receipts for ore marketed during six months amounting

MAE DAY MINE.

Copper Has Been Encountered in the 160-Foot Tunnel.

G. T. Wilson, the owner of the May Day roup in Ten Mile, was in Marysvale the past week, says the Free Lance, and during his stay, spent con-siderable of his time at his property, getting things in shape for the work

going on. The Mae Day group consists of five claims, and the property considered by all who know of it, to be a most pro-mising prospect. Copper is the pre-dominating metal, and in the main tunnel, now in 160 feet and running in quartz all the way, the average re-turns the entire length, in the red metal, averaging \$2 per ton. Mr. Wilson has considerable faith in

this section and in his property, as was demonstrated from the fact that while here he let a contract to Len Calloway, and work is going right ahead.

TEACHERS.

Dr. Talmage's new book, "The Great Salt Lake (Present and Past)," should be in the hands of every educator. The amount of information it contains re-All who desire to consult the list of the representative professors and music teachers of Salt Lake should read the "Musicians' Directory" in the Saturday "News."

charges and also sampling and assay "There is at present about 80 tons of

first class ore at the sampler to be set tled for and about 175 tons of second class or milling ore in he bin. "The Liberal ground was prospected by 251 feet of drifting through the But-ler tunnel, opening up the bedded vein in that claim, which a former manage ment failed to accomplish through the Liberal tunnel, having followed a fissure vein. A raise of 65 feet was also driven to tap the ore body above.

"The east or main drift in Ben Butler ground proper was extended 100 feet and a crosscut of 100 feet was run from there to intercept the bedded vein. This work was done by contract.

"No. 2 raise was extended 40 Other drifting, amounting to 470 feet, was done in different parts of the mine. "In order to open up the ore bodies elow our present workings, the board d directors decided to start a new tunnel at a lower elevation, but to accom-plish this, it was deemed expedient to acquire the Fourth of March claim, which was purchased for \$4,500. That new tunnel will drain all our present New York, 12.-Bulter, unsettled, rCeamery, 15/23; state dairy, 15/20, Eggs-Steady, Western, 21/031. Refined quiet; crushed, 5.05; powdered, 4.50; granulated, 45 drifts and give us a great deal of stop. ing ground, exposing large bodies of copper sulphides, which are known to

exist in that country at depth. "This is considered by competent and experienced mining engineers to be the cheapest and most effective plan to prospet our veins below the water level. The ore bearing bedded vein, being very flat, could not be advantageously prospected by a vertical shaft, the hoisting of waste and ores, as well as the pump-ing of water, costing more than the low grade sulphide ores of Bingham camp would warrant."

THE LOWER MAMMOTH.

Financially speaking the Lower Mam-moth did not end the year with as fat a bank account as the Butler-Liberal did. While the fiscal year closed with a balance of \$1.329.62 in the treasury, the cur. rent expenses for the month of Decem-ber have not been met; so, in fact, a ber have not been met; so, in fact, a deficit exists to the amount of about \$3,000, according to a statement made by Secretary Cordell. The year began with a balance of \$6,589,62, but then, as now, the bills for the last month of the year had not been paid. A feature of the meeting was the re-

tirement of President and General Manager James Chipman and W. S. Chipman from the board of directors Chipman from the board of directors and the substitution of Simon Bamber-ger and W. S. McCornick, Solon Spiro was succeeded by Hugh Park, The new board consists of the following: Simon Bamberger, John Dern, W. S. McCor-nick, A. C. Ellis, Jr., H. G. McMillan and Hugh Park. A meeting will be held within a few days for the purpose of organization.

of organization. Receipts from the sale of ores during the year amounted to \$54.488.55, this sum and the \$6,589.62 on hand at the beginning of the year, making the to-tal receipts \$61.078.17. The disbursements were divided into four classes, as follows: Mine account, \$47.619; ore ac-count, \$9,969.38; general expenses, \$2,-160.63; cash on hand, \$1,329.16, making the total \$61,078.17.

The crude ore shipped from the mine during the year amounted to 6.215423 pounds, which sold for \$28 665.19. There were also shipped during the year 5.621.-544 pounds of ore from the dump, which, after deducting \$565.61 for hauling, net-ted the company \$6.024.42. In the crude ore shipped out of the mine and from the dump there was 107.043 ounces of silver, 122.27 ounces of gold, 44.487 pounds of lead and 920 pounds of cop-per. In addition, the excess of iron over silica in the ore sold brought the ompany \$3.027.54.

of conditions at the property, it is said that both the 1,100 and 1,200 levels are looking very well. There is a lot are looking very well. There is a lot of low grade ore in sight in the mine, and not a little first class. About 40 men are employed.

This is What They Soy.

Those who take Hood's Sarsaparilla for scrofula, eczema, eruptions, catarrh, rheumatism or dyspepsia, say it cures promptly and permanently, even after al other preparations fail. You may take this medicine with the utmost con-fidence that it will do you good. What it has done for others you have every reason to believe it will do for you. Constipation is cured by Hood's Pills. 25c.
