

LOADING WOOL COMES UP AGAIN

This Time It is Said an Injunction
Is to Follow.

MAY ENTER AN AGREEMENT

Rumors Point to All Lines Coming to
An Understanding on the Vexed
Question.

There are all manner of rumors rife in the street today regarding the much-repeated question of loading of wool with every indication that there are some badly scared officials on the lines between the Missouri river and Chicago. The story is to the effect that the interstate commerce commission will be asked to take steps under the Elkins law to bring an injunction against the railroad companies restraining them from indulging in the practice of loading wool. All the railroad men are reticent regarding the matter; only two were found who stated that they had received dispatches and correspondence upon the subject. "I do not know," said one, "that it will reach the injunction stage, as an effort is being made to get all the lines to enter an agreement to cease loading wool. From the way things are shaping I look for something to drop in this direction this week. If an agreement cannot be reached then proceedings will probably follow as promised."

There was an effort to make an agreement of this nature before the wool season opened, but it fell through with the result that all the lines are now loading wool as in the past few years. In this connection Commercial Agent Giesby of the Rock Island has been called into Denver to attend a meeting of freight and traffic officials on Wednesday. It is asserted that wool matters will not be the least of the things that will be brought up.

GETTING READY.

Engineer McCartney of San Pedro
Now in Los Angeles.

Engineer H. M. McCartney of the San Pedro, Los Angeles & Salt Lake has arrived in Los Angeles and is now in consultation with Chief Engineer Hawgood on matters pertaining to the construction of work at this end of the line. It is expected that he will return to Salt Lake at the end of the week and proceed to carry out the instructions received from headquarters.

WOOL OUTLOOK.

Railroadmen Report on Utah, Idaho,
And Wyoming Outlook.

From reports brought in by railroadmen who have just returned from the hearing committee, it is not yet beginning to move very fast. Commercial Agent Williams of the Milwaukee is the authority for the statement that at Black Rock nearly half the clip is contracted for, the only big clip, however, that has moved being that of A. S. Nielson, 150,000 pounds, which went at 14 cents. Contracting agent McKellar reports that there is nothing moving in Wyoming, all that had been done last week being the sale of the Pete Hansen clip of 21 bags at about 13 cents, which is now moving out of Rawlins. D. J. Lindsay of the Chicago & Northwestern states that with the exception of a car at Bliss and another at Nyassa, nothing has been done during last week. The two cars respectively were sold by J. Gridley and Ward Bros. at prices in the neighborhood of 13 1/2 cents. The Oregon Short Line announces that arrangements have been made to handle the clips at Faust, 20 miles south of Terminus, on the construction trains. All there will be about 25 cars out of Faust. The first four will go east in the Lexington cut-off May 1.

SPIKE AND RAIL.

D. J. Lindsay of the Chicago & Northwestern returned from Idaho yesterday. Traveling Passenger Agent Massey of he Boston and Maine is in Salt Lake today on his annual trip.

On Saturday the Rio Grande Western will run a special excursion to Provo on the occasion of the L. D. S. university outing. On Sunday the same will run an excursion to Ogden or the mail carriers.

Car Accountant Brewer of the Oregon Short Line has returned from a trip to the east.

General Passenger Agent D. E. Burey of the Oregon Short Line has returned from his trip to Portland.

Engineer Vall of the Salt Lake & Ogden left last night for Humboldt, Nev., in business connected with the Nevada Midland.

THE MORMONS IN JAPAN.

Elder Taylor Writes to His Father of
Work Being Done There.

Elder Joseph E. Taylor of the presidency of the Salt Lake stake is in receipt of a letter from his son, Alma J. Taylor, dated Tokyo, Japan, April 1, in which he says:

"Active missionary labor has been commenced. The first of a series of tracts has been prepared setting forth the purpose of our mission; also the import of the Gospel message to be introduced by the Elders.

"The translation of Mr. Takahashi's tract, concerning which President Grant made full explanation when in Utah last year, has been completed, mainly by ourselves, which embodies in succinct form the history of the Church from its commencement; also some of its prominent doctrines. Mr. Takahashi is writing it in Chinese characters and preparing it for the printer. President Grant has ordered 2,000 copies of the English translation for distribution among the English speaking people.

"As was done in the case of the first our missionaries some time after their arrival in Yokohama; the governor of the province has been officially notified of the arrival of the last contingent and he object of their coming to Japan.

Yesterday Brother Grant visited the officers of the L. M. C. A. to see if they would rent their large hall to us in which to hold meetings, to which they readily assented, fixing the price at \$15. This morning at 5 o'clock, the mailman brought a letter stating they were very sorry but the officers could not rent the hall to us! No reasons assigned. This incident is only a repetition of similar action in nearly every town where our Elders have sought to introduce the Gospel.

"There are several other halls, however, in this city, one of which we expect to be able to rent, in which the principles of the Gospel will be plainly set forth by our Elders."

"Elder Ensign has won for himself some very favorable comment as a singer of more than ordinary ability; in fact, he is dubbed as an artist in his line; and we are the recipients of much favorable recognition in consequence."

"Now that we have become to some extent conversant with the Japanese tongue (which by the way is most intricate and complex) we will, whenever opportunity offers, consult the archives of this land and try to obtain the correct historical data concerning the origin of this wonderful people. I consider that a great deal of what has been written in regard to this matter is more or less doubtful."

"The well informed among them resent with forcible emphasis any intimation of their relation to the aborigines of America whom they consider as nothing more than savages and an undesirable element."

"The death of all the members of the colony (Grantville) is all that could be desired. Elder Stoker, who had been suffering from a badly sprained ankle, which refused to yield to ordinary treatment in a hospital, and which caused him much anxiety, was healed by the power of God through fasting, prayer and anointing with oil."

Elder Taylor sends his kind regards to all his friends in Zion.

For liver troubles and constipation There's nothing better in creation Than Little Early Risers, the famous Little Pills.

They always effect a cure and save doctors' bills.

Little Early Risers are different from all other pills. They do not weaken the system, but act as a tonic to the tissues by arousing the secretions and restoring the liver to the full performance of its functions. Naturally—Z. C. M. L. Drug Store, 112-114 Main Street.

LAWYERS BANQUET.

Two or Three Take Umbrage at Remarks Attributed to Prest. Smith.

The Utah Bar association held its annual banquet on Saturday night at the Commercial club. The affair was well attended and counted a success. There was considerable speculating and some of the speakers made a few remarks recently delivered at the Tabernacle by President Joseph F. Smith, a portion of his remarks being interpreted as antagonistic to lawyers as a class. Willy Brown and Judge Whitecotton were those who apparently felt most hurt.

President Andrew Howard clearly saw the point and admonished the profession that it should not be so sensitive when it came to the matter of a little criticism outside of their profession. Judge Powers acted as toastmaster. The following was the full program:

Welcome by the president, introducing Andrew Howard.

Toastmaster of the Evening—in view of the pending libel law of Pennsylvania, we claim no right to assume no responsibility. Every tub stands on its own bottom—tonight—O. W. Powers.

"A Prototype of the Learned Profession, or the Intellectual Indian, Who First Gathered Dried Snakebites, Bartered Charms and Led the Can-Can Round the Corners of His Tribe"—W. L. Magnuson.

"The Lawyer as a Patriot and Hero (I am a mortal man again—a lawyer, my martial part I have put off)—H. L. Lane.

"Utah Bar Reminiscences, Fore and Aft (Thou shalt not live on this side of the world, feed well, drink tobacco, and be honored; but thou shalt be acquainted with all sorts of men)—C. W. L. Stevens.

"The Lawyer (or those of him—not excepted—who have become the champions of the captains of industry)—George H. Smith.

"Are We Persons Non Grata? (Use every man after his desert, and who should 'scape whipping?')—W. L. Brown.

"Professional Modes of the Hour; or Do Contingent Fees Enable the Corporation Lawyer to Live?—Waldemar Van Cott.

"The Outlook for Our Cult in Greater Salt Lake; or Successful Advocacy in the Last Judgment"—Daniel Harrington.

"How It Seems to Run for the Supreme Bench, Especially When You Have to Walk from Pangloss to Beaver"—J. W. Whitecotton.

FAILED TO APPEAR.

Plaintiff in Damage Suit Was Not There to Testify.

Thomas Moran, a laboring man, seems to have no use for \$1,500 and costs, or perhaps he thought that he would not get it anyhow, and so did not appear in the federal court yesterday when his case against Flick & Johnson Construction Co. was called.

Last January Moran, through his attorneys, Heywood & McCormick, filed a damage suit to the extent of five typewritten pages, wherein he asserted that he had been so badly injured on the Lexington cut-off last November owing to the negligence of defendants that life was a barren waste to him from that time forth.

As he did not appear this morning to testify, the case was dismissed on motion of defendant.

BALTIMORE CONFERENCE.

Addresses Made by Elder Richards and President McQuarrie.

(Special to the "News.")

Washington, D. C., April 27.—The Baltimore semi-annual conference of the Eastern States mission of the Church of Jesus Christ of Latter-day Saints convened Sunday at Cockey's hall, Green Mount avenue and Middle street, Baltimore. Elder N. S. Timponson presiding. Addresses were made by Elder Gomer Richards of the West Pennsylvania conference, and President John G. McQuarrie of the Eastern States mission. The latter's theme was "The Redemption of Zion." Five new members were baptized into the Church by Elders Jno. H. Morley and N. S. Timponson. There were about 100 people present at the services. Elder Timponson said that about one-fourth of those were members of the Church and the others were investigating the faith.

WHAT TO EAT.

This matter will be found to be entirely different from and superior to the usual run of food articles. In that every item is a nugget of culinary wisdom and eminently practical. Conducted by Katherine Kurtz, Marquette Building, Chicago, to whom all inquiries should be addressed. All rights reserved by Banning Co., Chicago.

Menus for Next Three Days.

WEDNESDAY.
BREAKFAST.
Fruit. Cream. Baked Potatoes. Coffee.
Cereal. Boiled Mackerel. Roll.

LUNCHEON.
Tongue Salad in Jelly. Sweet Orange Omelet. Cocoa.

DINNER.
Mock Bisque Soup. Veal Cutlets. Flemish Sauce. String Bean Salad. Chocolate Pudding. Coffee.

THURSDAY.
BREAKFAST.
Fruit. Cream. Baked Potatoes. Coffee.
Cereal. Boiled Mackerel. Roll.

LUNCHEON.
Curried Eggs. Rice. Cinnamon Buns.

DINNER.
Mutton Broth. Stewed Chicken. Cold Slaw. Fruit Salad. Coffee.

SCIENTIFIC MISCELLANY.

The lesson in associating ideas that Pierre Hachet Souplet has taught a parrot is a wide vista of possibilities in animal instruction. Polly was brought daily into the laboratory, and soon learned to name a "cupboard" and a "cage" and to say "Polly" when her master went up the latter. The reward of correctness was the opening of the cupboard to allow the bird to fly out to her cage. One day, when Polly was brought in, the cupboard was near the ceiling and the ladder stood with other articles in a corner, the purpose being to test her ability to put together the words she knew. The experiment was a failure. The next day Polly, in a furious temper, struggled to break from her cage, but at last escaped the cupboard near the ceiling, when she instantly exclaimed, "Ladder—cupboard." This remarkable sentence making was promptly rewarded.

A new variable star which has been under observation at the Potsdam Observatory for more than a year, proves to be of extraordinary interest on account of its short period. Its cycle of light changes being completed in four hours—more than three hours less than that of any other known star. The magnitude varies from 8.8 to 7.9, and it is supposed that the changes must be due to the revolution of two bright bodies at short distance around their center of gravity.

Some of the 500 asteroids so laboriously found within the last century are liable to become comets. Prof. E. S. Pickering points out that 65 of them have not been observed within five years, while about 25 have escaped notice for 10 to 20 years, as their orbits are but imperfectly known, there is risk that when next seen these little planetary companions will not be recognized.

Comets shed a portion of their tails. Prof. Lewis Swift tells us, and, as they have been doing this since creation, the probable result is a ring of nebulous matter surrounding the earth and possibly extending to Neptune's orbit. Reflection of sunlight from these castoff tails of comets is Prof. Swift's explanation of the zodiacal light. This light, which is just beginning to attract the serious attention of astronomers, is a faint glow seen in the west after sunset and in the east before sunrise, and it takes the form of a cone 25 degrees wide at the base and often extending nearly to the zenith. While in some countries or places it is seen only in spring and autumn, in the west in the latter, it is visible throughout the year from the Lowe Observatory in southern California. Even more mysterious is the Gegenschein, a faintly shining circle in the midnight sky exactly opposite the sun, and sometimes joined to it by a band of light of scarcely perceptible light. While making his guess, Prof. Swift doubts whether the cause of these phenomena will ever be proven.

Ozonizing apparatus, for vitalizing the atmosphere of the sick chamber, may become a necessary part of the physician's outfit. Dr. J. R. S. Barnes, an English medical man, reports having used the ozonizer in a severe case of pneumonia, complicated with pleurisy, and the result was an immediate and important change in the air of the room, which was followed by rapid improvement of the patient's condition. Ozonizers are being used also for bettering the air of factories.

The shape of the rudder of a vessel seems to be of more importance than has been generally supposed. Experiments in Scotland by J. Foster King indicate that the rectangular form has decided advantages, as it presents a larger surface at the load line under all conditions, and requires a smaller stock and working gear than any other shape. With a narrow rudder, the narrow blade is as effective as the broad one, while it can be set more rapidly.

The 60 mastodons found in New York have been along well marked belts, the feeding places having been old river banks.

The Russian feat of reanimating the heart of a child that had been dead 20 hours is shown by Dr. R. Runme to be nothing new. The heart is not the delicate organ generally supposed, and for a long time physiologists have understood the possibility that it could be restored to action, the effect being of shorter duration in the human heart than in that of lower animals. A current of arterial blood, or a solution of salt charged with oxygen, is a common means of restoring the beating to dead hearts. By massage, exposed heart, being rhythmically rubbed with the right hand, Prof. Prus of Lemberg has succeeded in reanimating 15 hearts out of 100, and by combining massage with electricity, M. Batelet of Geneva has revived dead dogs and kept them alive as much as 24 hours. Human beings have been revived by the latter method, though only for a short time.

A dust fall of February has been traced over 14 counties in England, eight in Wales and one in Ireland, and it has been reported from numerous places on the continent. The dust, which was a fine, white, like smoke, while near Southampton the cloud was so dense that a person could not see to read at noon. Like the falls of 1861 and 1862, the dust is supposed to be of desert origin, probably from northern Africa, and does not appear to be volcanic.

The cradle of the human race is still being sought. The widely accepted theory of Max Muller, based on language, teaches that early home was in India; but some ethnologists are now inclined to agree with Prof. Hirt that the Aryans first lived in the territory north of the Carpathian mountains, near the boundary line between Austria-Hungary and Russia, now occupied by Letts and Lithuanians.

In his latest researches, Prof. Curie has found that radium keeps its own temperature at 1.2 C. above that of the atmosphere. This paradoxical substance emits more than enough heat to melt its own weight of ice, yet there is no combustion, nor chemical nor molecular change.

Recent observers have found that plumb lines for accurate work should be of copper or bronze. A steel wire in a deep shaft was slightly deflected by the earth's magnetism.

Pygmies are now found only in the interior of Africa. A German anthropologist shows that they once lived in Switzerland and Alsace, and in Elbe down to the tenth century, and that some of the Alsace race were less than four feet in height.

The automatic baby nurse of a Swiss mechanic, set in motion by air waves from the baby's crying, has a photograph that sings a lullaby and clockwork that rocks the cradle.

In the body changes that take place as you grow old, the metabolism and other physiologists suppose that an important part is taken by the phagocytes, or devouring cells. Some years ago it was made to appear that some of these cells are color

FRIDAY.
BREAKFAST.
Fruit. Cream. Baked Potatoes. Coffee.
Cereal. Boiled Mackerel. Roll.

LUNCHEON.
Broiled Smoked Salmon. Stewed Potatoes. Cocoa.

DINNER.
Pea Soup. Fillets of Fish. Breadcrumbs. New Potatoes. Brown Tomato Sauce. Baked Onions. Lemon Souffle. Coffee.

SATURDAY.
BREAKFAST.
Fruit. Cream. Baked Potatoes. Coffee.
Cereal. Boiled Mackerel. Roll.

LUNCHEON.
Deviled Crabs. Cheese Sandwiches. Fruit. Coffee.

DINNER.
Vegetable Chowder. Broiled Steak. Creamed Carrots. Apple Pudding. Combination Salad. Coffee.

Puree of Spinach.
Cook the spinach in its own juices if young and tender, but if rather old use plenty of boiling water. When tender drain and chop crosswise until very fine; season with salt and pepper to taste and add as much butter as four mashed potatoes. Add a little lemon juice or hot vinegar and if too stiff moisten with a little liquor from milled meat. Arrange as a purée around a platter and place the boiled beef or tongue in the center.

valuable Suggestions for the Kitchen and Dining Room.

WORMS
If your child is restless at night, grinds its teeth, weeps, is constipated, craves indigestible food, is fretful and peevish, you can be sure it has WORMS.
Klappan Worm Killer will expel them and restore the child's health. These tablets are pleasant to take and won't harm the most delicate child. Send a box at drugists, or by mail from Klappan, 152-157 Main St., East Side.

esters, and that they whiten the hair by eating the pigment grains and conveying them into the skin or out of the organism. On further study the theory has been evolved that old age itself is due to phagocytes that destroy the nerve cells. The nerve eating cells have been found in the brains of many old people and old mammals, as well as in persons suffering from nervous disease, but in no case have they been known to reach such development—or to have so nearly taken the place of the nerve cells—as in the brain of a parrot that died at the great age of 81 after some years of feebleness and senility.

Constipation Makes Bad Blood.

MULL'S GRAPE TONIC CURES CONSTIPATION
Constipation is the rotting and decaying of undigested food in the alimentary canal. Disease germs arise from this festering mass, which find their way into the blood. The blood becomes impure and shortly the entire system gives way to the unhealthy condition.

You cannot cure a case like this by taking pills or other common cathartics. A laxative will not do. A blood medicine is ineffective. Mull's Grape Tonic is a gentle and mild laxative in addition to being a blood-making and strengthening tonic which immediately builds up the wasted body and makes rich, red blood that carries its health-giving strength to every tissue at every heart beat.

Mull's Grape Tonic is made of pure crushed fruit juices and is sold under a positive guarantee. All druggists sell it at 50 cents a bottle. Send 10c to Lightning Medicine Co., Rock Island, Ill., to cover postage on large sample bottle.

For Sale in Salt Lake City by Neiden-Judson Drug Co.

BIGELOW CARPETS

The Carpets made by this Company have received the highest award wherever exhibited, including Gold Medals at the Paris Exposition, 1878, and at the Centennial, 1876.

Their deserved reputation for excellence of fabric, richness and durability of color, novelty and beauty of design, has led to frequent infringements, and inferior goods have often been palmed off in their stead. For the protection of the public the Company has adopted as a trade-mark the word "BIGELOW," which will be woven (at every repeat of the pattern) in white capitals into the back of the fabric. Customers will therefore have merely to examine the back of a carpet to be certain that they are getting the genuine Bigelow Carpets.

These Goods can be obtained from all first-class dealers. BIGELOW CARPET COMPANY. NEW YORK.
