## MINING, BUSINESS AND STOCKS

## DALY-WEST THE FEATURE AGAIN.

Park City Stock Made Advances On the Mining Exchange Today.

#### MAY DAY WAS SOME WEAKER

Uncle Sam Consolidated Also Dropped A Few Points-Closing Quotations and Sales.

Whether the statement made by Dr. A. W. Watts of Boston, who will be elected a director of the Daly-West next week relative to physical conditions at the mine had any effect or not, the fact remains that the stock stiffened considerably today, both in the east ed considerably today, both in the east and locally. It went up \$2 a share and sold during the regular call of the mining exchange at \$17. It is understood that Dr. Watts has expressed the opinion that the big Park City bonanza is on the eve of some important changes which will make practically a new mine out of it. May Day was not in as good form today, and he stock closed lower. Star Consolidated stiffened, while Uncle Sam Con, moved backward several points. Tetro also closed lower. The closing quotations and sales

NEW ENGLAND MINE.

Machine Drills Wift be Working in a

Day or Two. Henry M. Adkinson, manager of the

New England Gold and Copper com-pany's mines at Binsham came in from camp last night and reported that some delay had occurred in the starting of the machine drills, but that they would probably be working within the next day or two. Mr. Adkinson expects to turn out a big lot of concentrates during the present year. The crushing capacity of the mill is to be increased and equipment added which will practically double the current of the contract of the tically double the capacity of the plant, or up to 50 tons a day. In addition to this shipments of high grade ore will

#### FOR GOLD CRATER.

A Lot of Sacks Sent in to be Filled With

A load of 1,700 sacks was taken to Gold Crater during the week for the Gold Crater mine, one of the Curtis and Ridge properties upon which shipping ore has recently been opened up, says the Goldfield News, There is some considerable quantity of ore on the dump that will ship and enough exposed to warrant the expectation that shipments will be maintained at regular intervals for some time. This will be the first shipper from the new district, and it is due to the energy and progressiveness shown by Mesers. Curtis and Ridge, that the camp has at last developed a producing mine. Recent reports from producing mine. Recent reports from there are to the effect that the show-ing on several of the properties under development has materially improved during the past 10 days. This is par-ticularly true of the Hub, one of the Inman properties, where a splendid ap-pearing body of quartz was disclosed several days ago. Assays have not been taken but the ore pans very well, indicating good shipping values. A sample of this quartz, that weighs probably 30 pounds, has been brought to town and may be seen in the window of the

#### BINGHAM TO REDUCE.

Will Pay More Attention to Custom Ores and Less to Its Own.

the Bingham Cons. dated Mini company, the statement has been given out that the company will again reduce the shipment of ores from its own mines in the near future for the purorse of making room at the smelter for about 200 tons of ore daily from the Boston Consolidated property, and also, a little later, for concentrates from the Newhouse Mines and Smelters corporation, whose mill is about ready to be-gin operation. "The Bingham management prefers to smelt a larger tonnage of custom ores," says the statement, "for the present and to meanwhile continue the development of its own mines. The Bingham's Commercial mine yields ores which contain satisfactory copper gold-silver values, and, at the time time a substantial excess of iron, and the management feels that this character of ore will be greatly sought for its fluxing qualities a few years hence. When sufficient iron can be obtained from custom ores to make a proper smelter charge, therefore, it is to be ex-pected that the commercial shipments will be reduced, and that the mine may be closed down for brief periods.

be closed down for brief periods.

"The development work of the past two or three years has blocked out a very large tonnage of ores in the Dalton & Lark, Miner's Dream and Brooklyn mines, and of late a considerable proportion of the company's output has come from these properties. In view of the fact, however, that the Mascotte tunnel, now being driven by the company, will cut under these mines, several hundred feet below their deeperst workings, six months to a year est worldings, six months to a year nence, and provide an avenue through which their ore can be extracted at a saving of full \$1 per ton, it is natur-ally preferred not to draw heavily on their resources until this tunnel is com-

"The Eagle and Blue Bell mines are also in process of development, and the company cannot as yet, because of incomplete equipment, extract tonnage from these properties with economy. It will be seen, therefore, that the mans of the Bingham company are far-reaching and comprehensive. Though it is es-timated that there is now in sight a five years' supply of cre—at the rate of 15,000 tons monthly—the desire is to continue to add to this tonnage unif the long tunnel is completed and other arrangements perfected which will enable the company to very greaty increase its production at materially reduced coats. As development work is now progressing, there is reason for the bellef that nearly 2.000,000 tons will be added to the amount of ore in sight in the bingham mines during the present

#### NEW SLI'ES PLANT.

One is to be in ta ed at Ramberger-De-

Lamar Mine. Representatives of the various ma-chinery firms have frequented the of-fices of the Bamberger-DeLamar mines for several days and it has developed that the object of their calls there was for the purpose of consulting with Supt. Frank P. Swindler relative to the

Supt. Frank P. Swindler relative to the construction of a new slimes plant, which is shortly to be added to the present mill equipment. Bids are now being received by Supt. Swindler and the contract will probably be let before the official leaves for camp again.

At the mill is a large tailings dump, which contains values worth saving and it is the intention to work them over. This dump was formed parily during the days when Capt. DeLamar operated the dry process mill which caused many of the employes who worked in it to go to an early grave. The tankage necessary to handle 750 tons of ore per day is to be installed.

Supt. Swindler says conditions generally at the mine are better now than they have been for a long time and the they have been for a long time and the outlook for the future is inded promis-

## CONCENTRATOR FOR SILVER SHIELD

Manager Joseph Recommends Construction of Plant During Present Year.

#### BIG BODY OF LOW CRADE ORE

Has Been Developed in Mine--Water Has Caused Some Trouble-

Will Make Money.

Manager Harry S. Joseph of the Silver Shield mine of Bingham has advised the stockholders of that company that the mine is in need of a concentrating mill and recommends steps in that direction be taken early in the spring. In a letter, which went into

the mails last night, Mr. Joseph says:

"The developments of the past few months have shown that we are nearing the stage of getting a mine. The water has been a very serious problem, as it appears we have not only struck the water of the upper or old workings of the mine, but apparently living springs at the same time. We have a large body of ore, not, however, we believe, the old bodies left in the old workings. The body or ore we now have consists of about three feet of first class, and an apparently indefinite amount of milling ore, the extent of which we have not yet determined. Before we can do much ore extraction we will be compelled to make numerous openings into it in order to drain off openings into it in order to drain off

openings into it in order to drain off the water.

"At this writing it appears that it will also be wise for the company to erect a concentrating plant in the spring to handle the milling ore and put it into a commercial product. The wet and slushy condition underground makes a very disagreeable task for the minure and a constant changing of men, hence slow progress at present. The end of the year 1905 should see the Silver Shield at least paying its own way.

## SICKNESS AT GOLDFIELD.

C. C. Higgins Says Stories Sent Abroad Are Exaggerations.

C. C. Higgins, who was formerly connected with the broker's fraternity here has written from Goldfield that the stories sent abroad about an epidemic prevailing there have been greatly exaggerated. White some sickness exists, he states, there is no necessity for alarm. A numer of cases of smallpox have been reported and there has been some preumonia, but he finds has been some pneumonia, but he finds that it is almost invariably the case that the victims are men who have not taken proper care of themselves.

#### THE FRISCO CONTACT.

In Boston, which is the headquarters | Installation of New Hoisting Plant is Progressing Favorably

> D. P. Rohlfing, manager of the Frisco contact mine at Frisco, Beave county, departed for that property las ight to loook after the installation of the boilers ordered recently and to note the progress being made with the erection of the new hoisting plant. It will not be many months before the Frisco contact will be shipping.

#### BINGHAM PORPHYRIES. Campaign of Development Inaugurated By Bingham Con.

The Boston Consolidated Mining company is pushing its campaign in the development of the Bingham copper bearing porphyries, which cover a large portion of its vast domains in the "Camp of Copper." An arrival from Bingham last night brought in the in-formation that the tunnel started by Supt. Louis S. Cates on the main Bing-Supt. Louis S. Cates on the main Bingham canyon side, had penetrated the mountain close to 100 feet. It is understood there is to be no let-up in this work until the completion of the proposed 1,000 ton concentrating mill, which will probably be towards the close of the present year. The tunnel is located a short distance above the tracks of the Copper Belt railroad where the ore can be brought down to the probable location of the ore bins by a gravity tram. While the late snow storms have been severe, the managestorms have been severe, the management of the Copper Belt has kept the Boston Con. branch up Carr Fork can-yon open and ore was brought down from the mine yesterday and today.

#### CONCENTRATES.

The Silver Shield assessment of 11/2 shares becomes delinquent on March Mining company, is in Park City today. C. A. Short has arrived in the city

from Fay, Nev., where he has large mining interests. General Manager Duncan McVichle of the Bingham Consolidated is on his way home from Boston.

Manager J. G. Rhodin of the American Flag mine will depart for the east

on a business trip in a few days. The Mammoth Mining company will

receive a settlement for 92 gold-silver ores this afternoon. Henry Catrow, managing director of the Ohio Copper company at Bingham

is in camp today on an inspection trip The assessment levied recently on the stock of the Sheba Gold and Silver Mining company of Nevada becomes delinquent today.

Supt. Frank G. Janney of the Utah Copper company's mill, came in from camp last night to confer with General Manager Jackling.

H. L. Frank of Butte, who has aquired extensive mining interests in the camp of Goldfield, Nev., is preparing to install mill facilities capable of handling 250 tons dally.

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, \$38,600; base bullion, \$31,700.

E. A. Milner of El Campo, Mex., has

#### SMITH'S FLOUR.

arrived in the city to visit with his parents, who will shortly celebrate their fifty-sixth wedding anniversary.

President John Dern of the Uncle Sam Consolidated expects to leave to-night for Tintic to inspect the new strike in the property of that company, Having completed his examination of the United States Mining company's properties at Bingham, J. Park Chan-ning departed for the east again yes-terday afternoon.

M. M. Johnson of the Newhouse staff, has returned from a professional trip to British Columbia. He was accompanied by Phillip Livermore, a student in metallurgy, and a friend of Samuel Newhouse.

The Goldfield-Guerdon Mining company of this city has filed articles of incorporation with the Wyoming secretary of state at Cheyenne. The company has an authorized capitalization of \$1,000,000, divided into 1,000,000 shares of \$1 par value, fully paid and non-assessable, with \$500,000 in the treasury.

Persons who arrived during the week from Rhyolite, the new and booming town of the Builfrog district, report that the place continues to grow rapidly. There are now about 350 people in the town and building is progressing as fast as material can be secured. Four store buildings are now in course of construction, the lumber for the build-ings having just been delivered. Seven carloads of lumber consigned to Rhyol-te from Ogden are now at Los Vegas awaiting transportation. - Goldfield

Steve Curry, who arrived in camp the first of the week from Bullfrog, confirms the first reports of the exceptionally rich strike on the Arnold claim, owned by Judge Ray and associates. Mr. Curry states the ledge containing the streak of high grade ore is fully 7 feet in width and has been opened along its strike for fully 1,100 feet. The property is situated approximately 3. property is situated approximately 3,-000 feet north of the Ladd and Benson group on Ladd mountain and the min-eral belt is believed to extend for some distance to the south.—Goldfield News.

Dr. Albert Watts, who will probably be elected to a place on the board of directors of the Daly-West Mining company, has just completed an ex-amination of the big Park City bonanza, and has expressed himself as being very well pleased with conditions and will go to the annual meeting in Denver next week, a staunch supporter of Pres-ident Bamberger and his administration. Dr. Watts expects to accompany Treasurer McCornick and General Man-ager Ernest Banfberger, when they leave for the Colorado capital the last of the week.

The bids for the construction of the new smelter to be erected at the Lost Packer mine in Idaho were opened yesterday and during the afternoon the contract was awardd to Clement & contract was award to Clement & Strange, local representatives of the Colorado fron Works company. The material is to be delivered at Mackey, Ida., not later than May 1. From there it will be hauled a distance of 140 miles to Loon Creek, where it will be set up. The equipment consists of one matting furnace and all necessary machinery to bring the caractery up to 150. chinery to bring the capacity up to 100 tons of ore a day. Just as soon as spring opens the Lost Packer camp will

Stock Broker Bannon, who attempted have Barton Pittman expelled from the Tonopah stock exchange, has fail-Mr. Pittman has been entirely exonerated. Several days ago, it appears, Pittman made a bid for a big block of shares in the Jumbo Extension, a big property in southern Nevada. When it came to the showdown Bannon, the broker, could not make good. The result was he is said to have lost \$50,000 in the transaction. Bannon, thinking Pittman had manipulated the mar-ket, attempted to have him unseated. Through an error the report was sent out that it was Key Pittman that had been suspended. This report was unfounded. Barton Pittman assumes all blame in the matter, but, as the result was never under the ban of the stock exchange.-Reno Gazette.

#### Standard Oil Dividend.

New York, Feb. 15.-The Standard Oil company of New Jersey has declared a dividend of \$15 per share for the first quarter of 1905, payable March 15. For the same period last year the company paid a \$16 dividend.

#### Violation of Patent Right Decision

St. Louis, Feb 15 .- Judge Elmer B. Adams of the United States circuit court, in an opinion on a demurrer, has decided that the officers of a company guilty of violation of patent rights can-not be sued personally for damages unless they have taken active interest in seeing that the patent was violated and received personal profits from the results. The suit in question was that of the

inventor of a new method of purifying and whiting flour, who asked for the proceeds that have been realized since May 19, 1804, the time the patent was taken out, by the defendant in using his method of purifying their goods without regard to the rights possessed by the

## STOCKS DISPLAYED STRONGER TONE.

Opening Dealings Showed Prices Generally Up All Around.

#### UNION PACIFIC VERY STRONG.

Went Above 125 and Imparted Strength to Other Transconcontinental Properties.

New York, Feb. 15 .- The opening dealngs in the stock market today . d prices a fraction all around. A pause in the advance occurred when Reading was again sold freely. The stock, however, met support after it touched 84% and was also sustained by the buoyant rise in Ontario & Western to 50%. Western stocks were lethargic, but without weakness. Amalgamated Copper was taken in round amounts on its way up to 75% and the metal stocks generally were firm. Federal Mining advanced 6 points. Southern Pacific preferred rose 1%. Many important stocks hung back but gains in special stocks kept the undertone firm. Sugar rose actively 1%. Union Pacific and Reading rose a fraction before noon, but the activity of the market declined,

Bonds were steady at noon. Operations on the rise were conducted with more confidence in the early after-noon in view of the increasing demand the western representative stocks. Union Pacific headed this group and its rise to above 125 imparted a decided derise to above 125 imparted a decided degree of strength in the other transcontinental stocks. St. Paul, New York Central and Southern Pacific were moved up in the neighborhood of a point and Southern Pacific were gained 2½, Pressed Steel Car preferred gained 2½, Pressed Steel Car preferred dropped to 88.

The rise in prices of rairroads paused, but the New York tractions gained about a point each. Hocking Valley advance 2½, Great Northern preferred 1½ and Canadian Pacific 1, Chicago, St. Paul, Minneapolis and Omaha dropped 5.
