DEMAND FOR SILVER.

Particularly for the Dollars Coined the Present Year.

FREE SILVER IN THE TREASURY.

Is Be Exchanged for Lawful Money—Millions Coined the Last Year.

WASHINGTON, Sept. 9.—The treasury officials are busy in receipt of a large number of requests asking for silver dollars of the year's coinage in exchange for silver certificates or other lawful money. Many of these requests come from persons who seem to doubt the truth of the monthly coinage statement, while others ask for shipments of 1896 dollars with a view of securing souvenirs that no silver dollars are now being coined. These requests have been complied with as fast as received, as the treasury officials desire to call public attention to the fact that when silver dollars are ordered in sums of multiples of 2500 they are shipped at the expense of the government, but when smaller sums are ordered the shipments are made at the expense of the person ordering. There is now in the treasury $10,850,383 in free silver, that is, silver which may be obtained in exchange for any lawful money, but the demand just now is so keen for 1896 dollars that it seems probable that by the beginning of October the department will be compelled to decline to pay out silver dollars except in exchange for silver certificates of those coined before of 1890. The law requires certain amounts of silver to be held in the treasury to cover outstanding silver certificates and treasury notes, and when the minimum is reached silver payments will be refused, even in exchange for gold or in payment of warrants on the treasury.

The number of standard silver dollars coined during last August is shown by the official statement to have been 2,500,000; since February 1st last 11,212,412; and since November, 1890, 15,150,631. The coinage value of the stock of bullion now on hand and on the way to the mints are now at work is $160,745,295; and it is said to be altogether probable that coinage will be continued at least until the stock of standard dollars of 1890 has been increased to about 30,000,000, where it stood when the present administration came into office.

Storm in the East.

BOSTON, Sept. 9.—The first West Indian hurricane of the season arrived off this city today, after a long and eventful journey from the tropics. The storm center tonight is somewhere southeast of Nantucket, but so enormous is the disturbance that a heavy rainstorm is sweeping the entire New England coast from Eastport to Block Island, where the surf, aided by one of the highest tides of the year, is threatening destruction to hundreds of the sea shore cottages and other property along the water front.

The great height of the tide this morning warned many of the cottagers along the shore, and many abandoned their summer homes this afternoon.

OFFICIAL DENIAL.

London Financial News Never Published a Silver Editorial.

WASHINGTON, Sept. 9.—Copies of the following editorial paragraph from the London Financial News were today distributed by the Republican congressional campaign committee:

"We have received numerous letters from American correspondents requesting us to explain the following article from the Financial News, and which have been printed in various western papers as campaign literature. One says distinctly that the article is taken it is from the London Financial News of March 30. No such article was ever printed by us, and its whole tenor is directly opposed to the view we have taken of the effect of free silver coinage. We have persistently pointed out that it spells repudiation and withdrawal of all European capital."

The action of the committee is due to the publication in the West of an article credited to the London paper in which the position was taken that the embargo by the United States would destroy English trade supremacy.

Depew Boners a Rumor.

NEW YORK, Sept. 10.—The World this morning says: Chauncy M. Depew was asked as to the truth of a report that there was friction between him and W. K. Vanderbilt and that in the event of Mr. McKinley's election he would resign his presidency of the N. Y. At present or six months for the last five years similar reports have been set in circulation. My friends have discovered on every occasion that they emanated from Wall street and Chicago, and I was warned generally for the purpose of affecting the market. Mr. Cornelius Vanderbilt is equally regarding the report and I am going to see him to-morrow. During my father's illness, William K. Vanderbilt has assumed the position he occupied in reference to certain properties before he became ill. My relations with them are most cordial. I have no political ambitions. These reports tend to annoy me, but I pay no attention to them now."
