

MINING, BUSINESS AND STOCKS

BRISK TRADING ON THE EXCHANGE

Several Tintic Stocks Were on Active List During the Forenoon Calls.

COPPER GLANCE CALLED FOR.

Ohio Copper Brought Out—Newhouse At \$19.62½—Closing Quotations and Sales.

The forenoon sales on the floor of the Salt Lake Stock and Mining exchange exceeded slightly more than \$29,000, representing the selling value of 28,557 shares. Lower Mammoth was the first seller, the stock commanding a strong figure. May Day received attention and 1,500 shares offered at 26½ cents were taken. A few shares of Ontario, offered at \$8 were taken, while Silver King found a buyer at \$22. Beck Tunnel moved up slightly and Columbia Co., remained firm at \$5. Daly Judge was offered freely, but sold down.

Several of the unlisted stocks participated in the transactions. Copper Glance was the most active, 3,000 shares selling at 24 cents and 25½ cents. Cedar was active, selling at 50 cents, while Cedar Extension was offered at 20 cents. Two hundred shares of Ohio Copper found buyers at \$5.10 and \$5.15, and 200 Western Nevada changed hands at \$15.52. Newhouse sold at \$19.62½, and 150 shares of Mason Valley was sold for \$2.45. Several bids of 33 cents were heard for Wheeler Gold.

The closing quotations and sales were:

AT THE CENTURY.

Present Conditions at This Property Are Very Satisfactory.

Manager P. W. Madsen of the Century Gold Mining company, has returned from a trip to the property of that corporation in the Park Valley mining district and reports that conditions there are very satisfactory. The mill is in operation and turning out bullion, evidenced by the fact that the mine is again on a dividend basis. The next distribution of \$3,000 will be made on the 25th inst. to all shareholders of record on the 2nd.

ABOUT UTAH COPPER.

Says a Boston exchange, it is stated that all attention has been made to the stock of the Utah Copper company on the New York Stock exchange. As is well known, the Refining, American Smelting & Refining interests, own a very large block of Utah Copper stock and control the management of the company. John Hays Hammond is managing director of the company. It is claimed that the Utah Copper has increased its output rapidly to 12,000 tons of ore daily, making its production approximately 125,000,000 pounds of copper annually. It would seem, therefore, that there are possibilities of an ultimate valuation of \$100 to \$200 per share for the stock.

STANDARD COPPER DEAL.

Merger of Two Bingham Mines is Now Near Consummation.

It was learned today that an important meeting of the directors of the Bingham Standard Copper company was held yesterday at which the matter of consolidation with the Bingham Central company was discussed. It seems to be the prevailing opinion among local mining men that the deal for the merger has been practically arranged and only a final official sanction. Manager Jackling of the Bingham Central company is due to arrive from the east tomorrow and final talking up of the deal appears to depend upon his coming.

HE LIKES YERINGTON.

Charles D. Rookledge Returns Boiling Over With Enthusiasm.

Although he has had unbounded faith in the future of the Yerington copper camp for some time, Charles D. Rookledge, one of the owners of a heavy stock interest in the Yerington Copper company, has returned from this Nevada district more enthusiastic than ever and is particularly optimistic about the future of the company. The late strike, mention of which was made in the "News" several days ago, is fully as good as stated and Mr. Rookledge believes that development has reached the point where some of the other mining companies operating in the same region will have to be satisfied with a notice. He considers the Yerington Copper an excellent distinction of being one of the big mines of the district and there are several of them, among the lot being Nevada Douglas, Mason Valley, Bluestone and Ludwig.

Mr. Rookledge explains that the Yerington Copper locations extend along the mine for a distance of 1,600 feet and for a mile to the west. The recent strike was made in the main tunnel at a distance of 400 feet from the surface. It was expected, where a full face is exposed, the whole thing averaging about 18 per cent copper. About two feet of the vein is a sulphide ore, the balance being oxidized.

The company is figuring in putting in machinery right away and will probably be the first mine in the district to get an air compressor installed.

Conditions at the Wheeler Gold property are also of a most encouraging character.

AS TO EAST BUTTE.

Important Copper Interests Will Likely Take Over Mine.

There is every reason to believe that the East Butte Mining company will be taken into the control of very important copper interests, says a Boston exchange, and on terms that will place the company in the front rank of Butte mining companies.

It is learned that the situation at the East Butte is peculiarly and dangerously situated in the Butte district. It occupies a unique position, in that it is one of only two or three independent producing companies of any account in the district, and the developed portion of its holdings in the heart of the Amalgamated territory. This latter fact creates an interesting situation, as it does not seem likely that the Amalgamated would permit other interests to take control of East Butte. Should rival interests attempt it, it is not at all improbable that counter propositions would follow.

It is known that offers for treasury stock and a control of the stock of the big mine have been made on a basis of \$15, \$20 and \$25 for different lots, the money for the treasury stock to be employed in building a large yet reserved. The offer has not yet received consideration by the officials of the East Butte, but the deal would be of such vast and significant advantage to the company that it does not seem likely it would be turned down without better reason than can now be imagined.

MINERS LAID OFF.

Bisbee, Ariz., Feb. 14.—Seven hundred miners were laid off in Bisbee yesterday. The reason given was that there was a shortage in fuel and lumber and that in order to make some necessary repairs it was decided to close down the mine for a few days. Today the Big Spray shaft of the Copper Queen company was idle. This is one of the big producing shafts of the district and employs about 600 men. The announcement is made that in all probability the Cesar shaft will be idle tomorrow. There is a general belief that the situation is directly due to the attempt being made by organizers of the Western Federation of Miners to make Bisbee a union camp. The officials of the company, however, refuse to admit that this is the cause of the company's action. The men laid off are leaving for other camps in Mexico and Nevada.

NEW ENGLAND OF BINGHAM

Manager Henry M. Adkinson Making a Splendid Record at Old Nast Property.

LATE DEVELOPMENTS THERE

Have Been of a Most Important Character—Everything Choked With Ore.

Henry M. Adkinson, manager of the New England Gold & Copper company's mine at Bingham, is making a great success out of the old Nast mine, and some of his neighbors in the copper camp are just beginning to find out that the New England is one of the best paying "little" mines in Utah's big copper camp.

There was a time when the Nast was somewhat the laughing stock of Bingham. But that was before Mr. Adkinson came out from the east to take a look at it. A preliminary examination convinced the present manager that the ground was possessed of a good deal of merit and it was only after having thoroughly satisfied himself on this point that he accepted the proffer of the position which he has so ably filled during the past two or three years. The result of Mr. Adkinson's work has been most gratifying to officials and shareholders as well as to himself, and his record there entitles him to be classed among the leading lights of his profession. He has clearly demonstrated at the New England that he has no superiors as a mining engineer and as a successful mine manager. If the cost sheets count for anything, he has few equals.

A well known mining engineer who made an inspection of the mine a few days ago brings the information that late developments have been of a most important character and relates that on the 2nd inst. a chimney of ore, 60 feet in diameter, was blown out of the mine. The ore is still being followed and in no place has it narrowed down to a mere trickle. The ore and the vein has been drifting on for over 30 feet. The ore is said to be of an excellent grade, much of it containing high grade shipping values. However, the bulk of it will go to the mill.

"The fact is," said the engineer, "the mine has opened up in such a shape that Mr. Adkinson can fairly claim that the mill and crude ore bins. Conditions have reached the point where the matter of increasing the output of the mine will receive consideration. The mill is running steadily and turning out an excellent grade of concentrate; there were over four carloads of concentrate in the bins on Monday and the ore is being shipped out in a regular way up to its capacity. While the mill is being given an opportunity to catch up, the mine management is taking advantage of the full pit in the various chutes for later stockpiling. "Work is also being rushed on the new mill construction. This task was undertaken only about two weeks ago, but the superintendent is up and on the roof on the building is being made higher to make room for the additional equipment ordered sometime ago."

The New England mine is situated in the upper part of Bingham and sides with the Boston Consolidated.

IN SEVEN TROUGHS.

The fact leaked out today that a syndicate of prominent Salt Lake, who have been steadily and turning out an excellent grade of concentrate; there were over four carloads of concentrate in the bins on Monday and the ore is being shipped out in a regular way up to its capacity. While the mill is being given an opportunity to catch up, the mine management is taking advantage of the full pit in the various chutes for later stockpiling. "Work is also being rushed on the new mill construction. This task was undertaken only about two weeks ago, but the superintendent is up and on the roof on the building is being made higher to make room for the additional equipment ordered sometime ago."

The annual meeting of shareholders of the Morrison Mining company is scheduled for next Saturday afternoon. At M. Johnson, chief of the Newhouse shaft in Beaver county last night.

The ore and bullion settlements reported last yesterday afternoon by McCormick & Company were: Crude ore

SPRING DAYS

Make us think of homes and home building.

These thoughts call to mind **FOREST DALE.**

We do not suppress ALL of our lots will be sold until early summer is here. But those who buy now have a choice of location that those who select lots later will not have. This is an advantage worth while. You can make soil but not location. So it is to your interest to buy NOW.

The prices have not been advanced, and if you are the right people will make good neighbors you can pay all cash or buy on installments with deferred payments at 6 per cent interest. No trouble to show the property or to tell you about its advantages.

GEORGE M. CANNON CO. Rooms 412-513 Templeton Bldg. 'Phone Bell 57.

and concentrate, \$18,000; base bullion, \$4,000.

A bulletin received over the Pollock wires today conveyed the information that an important strike had been reported in the Goldfield Bar property at Goldfield.

Edward Copley has arrived from Chicago and will open an office here. He leaves on a trip to the Nevada Superior company's property in Humboldt county, Nev., next Saturday.

The directors of the Butte Condition company at a meeting yesterday decided to increase the quarterly dividend from 40 to 30 cents a share. The next distribution will be made on March 19 to all shareholders of record on the 24th inst.

Director J. B. Graham of the Gold Butte company has sent word that he expects to reach Salt Lake from Gold Butte, Nevada, not later than Saturday morning. While he did not go to the city today, he received today, he reported conditions at the Gold Butte property as being satisfactory.

J. H. Edgerly, vice president and general manager of the Chicago-Utah Copper Mining company at Morgan, has been in the city today. He reports the shaft 150 ft. down on a 1½ ft. vein averaging in yield 45 per cent copper, 38 ounces silver and some gold. He commends the prospects highly encouraging.

The Copperfield Mining company of Salt Lake, which owns a property on Silver Island in the Great Salt Lake, has filed articles of incorporation. The capital stock is \$100,000, divided into 100,000 shares of 10 cents each, and 400,000 shares are set aside as treasury stock. The officers of the company are: President, E. B. Taylor, vice president, James Chipman; secretary and treasurer, Thomas M. Wheeler. These, with J. William Knight, A. W. Hart and J. W. Taylor, compose the board of directors.

LOCAL MARKETS.

The local markets are well supplied today, with a variety of good things. These include cars of bananas, with Redlands, Newhall and Duarte oranges from southern California. These oranges are said by the commission men to be the finest ever brought here, and will find a ready sale. In a week or so the local market will be flooded with lower. The receipts also include carloads of apples from Utah, fancy express shipments of tomatoes and pine apples from Florida, with carloads of shipments of oranges from Moapa and southern California. Since the building of the San Diego road, the southern growers have divided with the local market, and the Salt Lake market, with the chances increasing for southern Utah and Nevada in competition. Potatoes are coming in, but the roads are drying up, wheeling is becoming easier, and more poultry is being brought in. Fine chicken halibut is being received from the coast; also, the market is well supplied with fish. Prices obtaining in today's local markets are as follows:

Timothy, per cwt.	1.95
Alfalfa, per cwt.	1.75
Corn, per cwt.	1.40
Wheat, per cwt.	1.40
