

Canal Water is Now Settling City's Dust.

Proplexing Problem is at Least Temporarily Successful in the Interest of Public Health And Comfort—Mayor Morris Points Out that Trouble Cannot Last Very Long—Permanent Solution Next Year.

The scheme of using water from the city canal which flows along the street gutters for filling the sprinkling carts and sprinkling the streets of the city without using any water for that purpose from the city's water mains has proved entirely satisfactory and today the dust on the streets will be pretty well laid. A feasible plan for using this water in the sprinkling carts was decided upon by Mayor Morris several days ago, and the plan was put into operation by Street Supervisor Seddon and others connected with the city's waterworks system yesterday afternoon.

STEAMERS PUMP WATER.

In addition to loading the sprinklers by means of flumes running directly from the canal and also by means of flumes running directly from the canal and also by means of pipe lines connected with it another plan proposed by Mayor Morris was put into operation last night, when steamer No. 1 from the fire station was sent into the interior. What did the steamer prove? It failed to obtain sufficient water from the gutter to fill the sprinkling carts but it also proved that if necessary water from that source can be used in fighting fire.

PORTABLE DAM.

A portable dam was built across the gutter on the east side of State street near First South and a line of hose was laid from it to the steamer. Pumping was started and 300 gallons of water per minute passed through the hose. State street and upper East Temple street were given a good soaking by the

moving the steamer about in different localities and it was shown that a 700-gallon sprinkling cart can be filled by the engine in four minutes.

SCHEME WORKS WELL.

The steamer will be used in filling the sprinklers for the business districts probably during the remainder of the dry season. This will be the flumes and sprinklers connected with the canal the flowing water to be used in the northwestern part of the city should furnish enough water to properly sprinkle the streets without drawing from the city's system.

MAYOR MORRIS VIEWS.

Mayor Morris when spoken to today desired that the present situation could not last very long. In the very nature of things it would be solved very soon. Sprinkling time is almost over for this year. Fall storms are certain to come at no distant day. In the meantime the steamer will be used to draw out the ditch for allowing the dirt will continue as long as necessary. And better than all else the great and important work of providing the city with a permanent and adequate water supply is already under way and heavy progress is being made.

It is the opinion of the Mayor that three times the amount of water the city now has will be added to its general supply by July 1. The whole question, which has been brought with such difficulty, would have been months nearer a solution had it not been for those persons who did what they have done to the project.

In addition to what was done last night," said he, "this morning I have a steamer out at North Temple and Main streets where sprinkling carts are being filled at the rate of two carts every three minutes. On the west side there is a large stream which is being filled by a pump while on the east side there is a large stream from which sufficient water can be obtained. On State down to First South street from South Temple, pipes are being laid and this afternoon we will be using water thus obtained to keep the streets sprinkled."

parochial school as the solution of this difficulty. God spare the day when the liberty seeking American nation shall allow the establishment of the parochial school system (Apologetics). At the same time, the speaker quickly remarked that he did not select any particular church or sect; he would make them apply to all—and he would never allow the entering wedge to begin anywhere, as he would end in ruin. He also inveighed against time-serving in any teacher, and held strongly for the maintenance of the highest ideals. "Have ideals," he said, "for yourself and your pupils, and by which you can cherish what is worthy and valuable in yourself."

DON'T COMPLAIN—WORRY.

Mr. Goshen cautioned his hearers against imagining that they were the hardest worked people on the face of the earth, as they were not more than one-half the class in the community, among whom the exigencies of the home called for the exertion of one's powers to the limit.

SALARIES TOO LOW.

"Don't find fault; don't wear that wretched look that you never does more than he is paid for, never is paid for more than he does."

The speaker then referred earnestly to the altogether unaccountably low estimate placed by so many taxpayers on the monetary value of school teachers. "A teacher may need to contribute to pay much more money to a trainer of blooded horses than to those who are in charge of their boys and girls! (Sensation.)

"Set the standard of instruction as high as you can, and demand the best service of the best men and women to be had."

DON'T BE GLOOMY.

Continuing, Mr. Goshen advised, "The greatest gift you can give your pupils is yourself. No man or woman has the right to be a teacher unless he or she is fit. Better let the boy and girl be exposed to a pestilence than expose them to the association of a teacher who carries in his breath the taint of pessimism. Society has the right to demand that a teacher is implanting an optimistic spirit in our youth."

LET IN THE LIGHT.

"Optimism opens the windows of the soul of the mind; pessimism blinds and devitalizes." Bring an earnest and enthusiastic nature into your work. What you do ought to go to good impressions to a child who is enabled to bear up more bravely and better than ever during their lives."

CEVIC AFFAIRS.

In closing, Mr. Goshen strongly advised the educators like all other men in civic affairs, that the practical in life's affairs entered into when the daily affairs of a community are considered with the true spirit of manhood and womanhood that they should never trust better, nobler citizens wherever their lot may be cast in after life!

Sup. Christensen closed the meeting with an earnest appeal for the maintenance of the City Teachers' Association, and for active co-operation with the Ladies' Literary Club in educational work.

PERSONALS.

Mr. and Mrs. C. L. Durrans of Rexburg, Ida., are in the city.

Ben Burk of Holbrook, A. T., has been appointed post carpenter at Fort Douglas.

United States Dental Surgeon W. H. Ware and wife have arrived from Douglas.

Mr. Sidney Reeves, who has been up from Mercur on a visit, returns south in the morning.

Contractor R. F. Faris of Boise is at the Konyom, having come down to look after laborers, who seem rather scarce up north.

Miss Anna and Miss Mary Grant, daughters of Elder Huber J. Grant, have returned home from an extended visit to their father in Europe.

James C. Leary has returned from southern Idaho, where he reports the season is as dry as in this part of the country, and this is in consequence much drying up with the crops and on the ranges, and livestock is showing the effects of it.

J. J. Richardson, proprietor of the Deseret Democrat, Iowa, passed through Salt Lake today on his way to the Portland fair. Mr. Richardson has been a western newspaper man for 50 years and has had equal eminence as a stock breeder. Among his Salt Lake friends he numbers Hon. John T. Caine, George M. Cannon and others. Mr. Richardson was member of the Democratic national convention that culminated at Cleveland in 1892, and in that convention was a member of the committee which fought the famous contest between the regular Democrats and the Tucuaras from Utah. He cast his vote in favor of the regular delegation, and has ever since taken a warm interest in Utah political affairs.

MEETING MONDAY NIGHT.

The regular meeting of the Pioneer Club Sunday School Union will be held Monday evening at 8 o'clock in the hall. The meeting will be addressed by members of the general board, and it is anticipated that all present will have a most enjoyable time.

REGISTRATION QUERY.

Question About Striking Off Names Referred to County Attorney.

In preparing for the registration for the coming city election County Clerk Eldredge has come across a matter which will have to be determined before the registration lists are made. The records of the county can be opened for additional registration on Oct. 17 and 31 of this year. It appears that a number of new names were added to the registration lists in the city just before the special election held in October of this year. The present law provides that there shall not be a special registration for either a special or school election, but the lists were used during the preceding regular election which he used for such special election.

REGISTRATION FOR PARDON.

The section of the new election law passed by the last legislature which applies to the matter in question follows in part:

"For municipal elections the official register of the law, general election shall be revised by adding thereto the names of all persons registered on the proper days thereafter prior to the municipal election, and for school and school elections there shall be an special registration of voters, but the official register last made or revised shall constitute the official register for such special election."

MEETING MONDAY NIGHT.

The regular meeting of the Pioneer Club Sunday School Union will be held Monday evening at 8 o'clock in the hall. The meeting will be addressed by members of the general board, and it is anticipated that all present will have a most enjoyable time.

CONTINUED FROM LAST MEETING.

PARDON FOR PAROLE.

Glford R. Averett, assault with deadly weapon, convicted in Seventh district court, Washington county, sentenced April 19, 1905, by Hon. J. F. Chidester, presiding judge, to three years in state prison. Granted.

Thomas Irland, adultery, convicted in Sixth district court, Garfield county, sentenced Nov. 30, 1905, by Hon. J. F. Chidester, presiding judge, to two and one-half years in state prison. Granted.

FUNERAL PRIVATE.

The funeral services over the remains of the late Francis Adams, aged 21 years, wife of Alexander Adams and daughter of Mr. and Mrs. Francis Adams, will be held Sunday at 3 p.m. from the family residence, 67 south Third West street, this city. Friends are invited to attend.

FUNERAL NOTICES.

The funeral services over the remains of the late Francis Adams, aged 21 years, wife of Alexander Adams and daughter of Mr. and Mrs. Francis Adams, will be held Sunday at 3 p.m. from the family residence, 67 south Third West street, this city. Friends are invited to attend.

PRE STAGE.

Will help you no matter what business you are in. You cannot have the proper prestige with a bad looking mouth.

ILLNESS DELAYS

SHOCKLEY TRIAL.

Owing to the illness of Attorney H. A. Smith, who is defending James M. Shockley in his second trial for the murder of Amasa L. Gleason in this city on Jan. 6, 1904, the further trial of the case was this morning continued until Montay morning by Judge Armstrong. Mr. Smith was present in court and remained while District Attorney Loofbourough examined the jurors on the special venire issued yesterday on their voir dire. The further trial of the case was then continued.

Out of the 75 jurors on the special venire, 14 were not served and six did not appear in court this morning when their names were called. They were excused on their voir dire examination and were replaced by 12 others, leaving about 10 till he could take his place.

At the afternoon session yesterday one more juror was accepted, making a total of eight now sworn in to try the case. The one accepted yesterday afternoon is John Powell, a defendant to that trial, and John J. Hill, a member of the defense.

At Washington I found Secretary Stanton had gone home for the day, and I went to his house to his study.

Stanton delivered the package, and told me the story of the capture and killing of Booth.

I asked him to say anything about it till he could take his place.

SECURING THE BODY.

That night the adjutant general, the attorney general, colonel Barker, General Alger, my messenger, and myself went to the meet the John S. Ids and did so below Mt. Vernon. We had a force of marines aboard, and the prisoners and the body was transferred, the soldiers going on up to the landing.

The "ids" out for miles on the river.

At the landing we got into the boat.

There were 12 men in the boat.

We were 12 miles from the mouth of the river.

At the mouth of the river we took a boat and went ashore to get the body.

There were 12 men in the boat.

We took the body and went ashore to get the body.

There were 12 men in the boat.

We took the body and went ashore to get the body.
