

WEST HAS LOTS OF IRON. .031/2 "Using the Utah deposits as a basis of comparison, and excluding the Mex-ican deposits which the writer has not seen, the tonnage of iron ore of all grades in each of the better known districts of the west and adjacent parts ip the situation in half a dozen of British Columbia would not surpass that of one of the other Lake Superior ranges, but it is extremely likely that as deep exploration of the presently known deposits continues, and as fur ther deposits are found, as they un-doubtedly will be, that the aggregate tonnage of ore in the west will equal a considerable part of that of the Lake Euperior region, and one would be rash to conclude that it is impossible that an amount of iron ore may be found in the west fully equivalent to that in the Lake Superior region, "If these data approximate the truth, there seems to be little cause of alarm that North America will really suffer for lack of iron ore for a con-siderably longer period than required for the exhaustion of the for the exhaustion of the presently known tonnage, as estimated by Tornebohn and others, at the present rate of increase of production. The time of exhaustion is not likely to come before that calculated on the same basis for the world's reserves, and probably not then. It may be argued that the use of lower grade ores in Europe and England than in the United tates is itself evidence that the exhaustion of reserves is farther in the future for the United States than for Europe or Eng-

plans have been totally disorganized and it is now impossible to say when Corn rose to 47% on light receipts.

Barney, vice president; Jesse Smith, secretary and reasurer; Harry Cluff and Wm, J. Gardner

WHY

WHY have a torpid liver when Herbine, the only liver regulator will help you? There is no reason why you should suffer from Dyspepsia. Constipation. Chilis and Fev-er or any liver complaints, when Herbine will cure you. F. C. Waite, Westville, Fla. writes: "I was sick for a month with chilis and fever, and after taking two bot-tles of Herbine am well and healthy." Bold by Z. C. M. I. Drug Dept., II3 and 114 South Main Street. B

land.

HIGH GRADE ORE IS LIMITED. "But as it becomes more and more obvious that the end of the supply of higher grade ores in the United States is not indefinitely in the future and may even be within a single lifetime, there is likely to be an increase in the tendency to conserve the higher grade ores, and especially the Bessemer ores, and draw more largely on the lower grade supples, a tendency favored by the concentration of control in a few hands. This tendency has already be-come well defined, as shown by the fact that pig iron production has not the west of the discovery. in recent years increased as rapidly as iron ore production. It is not at all unlikely that even the next decade may see important changes in this direc-tion. This will give values to properly

beated low-grade ores. It will ulti-mately mean higher cost for iron, changes in the relative importance of processes for conversion of iron, pos-sibly changes in the geographic distribution of different phases of the iron adustry, and a modification of the reations of the North American iron rade with that of the rest of the trade world.

"Suffered day and night the torment

of itching piles. Nothing helped me un-til I used Dom's Ointment. It cured me permanently."-Hon. John R. Gar-rett, Mayor, Girard, Ala,

negotiations will be taken up where they were interrupted. When questioned regarding the exent of the disaster which has overtak-en the devastated city Mr. White sums

"San Francisco was a beautiful city, and now it's all gone." ALKALI FLAT DISTRICT.

Strikes Made in Which Assay Returns Show as High as \$300.

The Yerington (Nev.) Times has the following to say with regard to the recent strikes in the Alkali Flat district, about 20 miles west of Yering-

Word of the strike was brought to town and a rush began for the new diggings. The first discovery was made by Messrs. Campbell and Ken-nedy, the former a Cripple Creek prospector and the latter from Goldfield. They have a five-foot ledge of ore which pans freely, and assays give re-turns of from \$20 to \$300 per ton. The ledge runs east and west and can be traced on the surface for a distance of several hundred feet. There are other ledges and croppings in the vicinity, and people from this place have made from 75 to 100 locations in the new district during the week. A dozen tents are pitched in the vicinity, and W. L. Brandon has located a townsite at the lower edge of the hills in which the

strike was made. The discovery is in the low range of hills at the northeastern edge of Al-kall Flat, about two miles east of the wagon road running from Dayton to Wellington. The nearest way to reach the country is from Yerington, which is about 20 miles distant to the east. Samples of ore from the ledge of Campbell and Kennedy show it to be a brown iron-stained quartz and por-phyry with some lime, and presenting hyry with some line, and premass-he appearance of a burnt-up mass-ut it carries the gold. People are still backing into the district. Wood and the flocking into the district. Wood and water can be obtained a few miles to

## CONCENTRATES.

The Ploneer Sampler asknowledges receipt of four cars from Tintic, three from Brighton, and one from Alta.

John J. Daly, manager of the Daly Judge, returned yesterday from San Francisco, and left immediately for the Egg plant, per lb......25 mines at Park City, The Taylor, Brunton Ore Sampling

Company have received 20 cars from Tintic, two from Idaho, three from Bingham and one from Nevada.

Jno. Weber, manager of the Sapho Mining company of Ely, Nev., expects to leave Salt Lake for Ely in a few days.

Messrs, Nulty & Cocking put through deal Saturday, whereby J. M. Ful-on and associates for a consideration of \$30,000 became owners of the ngs of the former in the vicinity of he Rocky Hill mine, says the Virginia lity Chronicle.

LOCAL MARKETS.

The San Francisco disaster has of that point, but they continue to be shipped in here from the vicinity of Sacramento. Good supplies contention are being received from there, with other minor vegetables, and the fish is coming from northern points. Cars of large and very sweet oranges are in, also several car. of potatoes, but poultry is scarce. Hay is still high, but is weakening, as the spring progresses, and the alfalfa will soon be ready to cut. There is a slight rise in eggs wholesale because of a temporary scar-

wholesale because of a temporary scar-city. Wax becans are in the market. There is considerable of a change in the local fish markets, with smoked halibut, oysters, perch and shad roe out, and pike, barracuda and crabs in. The prices obtaining today are as fol-lows: lows:

tween Eighth and Ninth South take this matter in charge. The city Great Western Mill & Building council has appropriated \$250 and over \$200 was contributed by members company, 40 south Second West 1,000 Freed Furniture company, rear present with a promise of much more

tee, and committees were appointed to

matter up in the various wards and a large amount of food stuff was given in addition to what will be sent in cash. The car will contain about \$2.000 worth of supplies, consisting of cots bedding, food and other supplies, and every effort will be made to have it leave this afternoon for San Francisco. A number of Lehi people are on the anxious seat because of relatives be-ing in San Francisco. Don V. Harwood, son of James Harwood, is there practising law; Mrs. Ira D. Wines and daughter, sister of Mrs. James Har-wood were at the St. Francis. A son of Mrs. Harriet Wilson was working in a hotel there and Mrs. M. W. Ingalis has two brothers and one sister besides a number of other relatives in and around San Francisco.

The M. & M. society when it arrives in Lehi next Friday morning on its way to Manti, will be met by the greater part of Lehi's people at the Rio Grande depot and will be accorded a most hearty welcome during the short stay here.

#### BEET PLANTING.

Beets are being planted very fast throughout the county these fine days, and it is expected that nearly all the beets will be planted this week. Many more beets will be planted than was anticipated in the early spring and the prospects for a good crop are most flattering. A great number of the public school

pupils went to Eureka Saturday on the county school excursion, all of whom had a glorious time. Next Saturday the home dramatic

the new tabernacle.
