Friday, - . May 24, 1872.

MUCH talk has been indulged in conand the community at large to the de- of the richest States in the Union. skelter, pell mell, hurrah for hell race ington and elsewhere extended to suftend of auriferous or argentifer ous promist. It means the production of nothing, but the expenditure of at least one dollar for every dollar of preclous metal found in the earth. It means the destruction of peace and good the destruction of peace and good the late storms, reported at washing the Mormon Battalion were at work on ington and elsewhere extended to suftend the mill for Marshall & Co., all of whom left their work and commenced washing out gold, and that was the end of the mill-building. Marshall, Weimer, Bennett, and Capt. Sutter claimed the right to the discovery, and charged every man who worked there ten per cent, of what they found. Some of the the destruction of peace and good order, the abandonment of principle, the wreck of morals, and the debauchment and dissipation of commuthe setting up of a standard for the riotous rallying of the most lawless and most desperate classes in the whole nation. It means putting a premium

upon the insane hurry to get/rich.

Some people may see in these things desirable results. We must confess desirable results. We must confess that we do not. We have conversed with persons of intelligence, experior extensive characteristics, and high the papers, that he gave utterance to an correctness.—Sam. Brannan in Calistoga immediate and every day utility, in preference to encouraging the wild rush after gold and silver, the erals. To us it appears of the nature of a libel upon the best human nature to say that the presence powerful and effective inducement to the settlement of any region that is in any wise capable of sustaining human pursuits. Again this great hullabaloo is about gold and silver. One seldom if ever hears of any hue-and-cry over the discovery of iron and coal, minerals far more commonly and extensively useful than either gold or silver. It is true, we did hear a little teapot tempest over the Ogden tin discoveries, but all that has subsided into serenity now and nobody's sleep is disturbed on that matter. For our own part we never could see why a community of 100,000 people, be the same 50,000 more or less, should neglect their proper business and run wild after a few ounces of gold or silver or "tin" of any kind, scarce as deposits of those metals are, when that community can make itself a thousand times more comfortable by developing the agricultural, manufacturing and commercial facilities of the country, the neglect their proper business and run

with the French indemnity spolls. We blame no one for wishing to see Utah escape these evils, or be afflicted with them as lightly as possible. Of the two, it is infinitely better for any community to plow and sow, and reap and mow, to handle the saw, the hammer and the file, and to engage in legitimate commerce, than to run recklessly blame no one for wishing to see Utah mate commerce, than to run recklessly after either gold or silver mines.

England's greatness manifestly arose and depends not upon the insane rush after gold mines, but upon the steady, enterprising, energetic and skillful development of her agricultural, manufacturing, and commercial facilities. Afternoon Dispatches. We are not of the class who believe that agriculture alone will make any people rich, unless their wants are exceedingly simple and few. But agriculture is the foundation of the solid prosperity of a nation, and manufactures and commerce are also essen-Mining, that is, for the precious metals, comes last. It can be very well done without, and it is ever a business dangerous to the steady, solid, permanent prosparity of any nation. If the man who makes two spears of grass grow where one grew before, is a public benefactor, then the man who makes acres of grass and grain and fruit and timber and tens of flesh grow where none grow before, must be much more of a public benefactor, and just such public benefactors have the members of this community at large been. It is therefore sheer importinence for any one to bring against them the flippant charge that they have not encouraged mineral development, that is the furious, demoralizing acramble after gold and silver deposits. It is by no means demonstrated that the man who spends five dollars in digging half a dollars worth of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is are the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is much of gold or allver out of the sarth is save the man who appears of grass grow was elected permanent chairman. Resolutions were adopted favoring the resolutions were adopted favoring the resolutions of the national debt, an early settlement of the Alcoboma claims, the recognition of the elight-hour law, a low interest, national engouration of the said part of the same and tens of sale provided favoring the resolutions were adopted favoring the sarth in and vice-President. Resolutions were adopted favoring the residuation of the slight-hour law, a low interest, national was allow fate of the allow fa without, and it is ever a business dandollars' worth of gold or allver out of the Bari savages, who proved treacherthe earth, is much of a public benefac- ous.

The Board of Indian Commissioners

However, when a community have properly developed their agricultural, manufacturing and commercial facilities, if they really need a little gold and silver, we never heard a sensible man oppose the proposition for such a community to develop their gold and silver mining resources, if they have any, even though a dollar's worth of the procious metals should cost two or five children and the summer and to arrange a council with the warlike Sioux in Upper Missouri agencies, and the Shoshour, Bannock and Uter reservations, and to arrange a council with the warlike Sioux in Upper Missouri. Other contracts will be awarded next week. precious metals should cost two or five dellars' worth of labor to procure it. We have heard no person of intelligence oppose the prosecution of gold or silver mining as a steady, regular, legitimate, paying business, but we think all intelligent men would depresate the fact of a community forsaking the indubitably useful and productive

pursuits of agriculture, manufactures, and commerce for the feverish and ofttimes to many ignus fatuus pursuit of gold and silver mining.

MINERALOGICALLY Virginia is looking up. Her coal fields are attracting great attention from capitalists. Scientists and others say the Old Dominion possesses unlimited supplies of coal, iron corning the reported opposition of the and limestone, that only need capital, principal citizens of this community energy and railroads to make her one

velopment of the mineral interests of Per contra, the meteorological and agthe Territorty. Those who invelgh ricultural prospect is not so bright this against the citizens upon this account season, for it is reported that the drouth consist chiefly of two classes -the mis- there is really alarming, or was a week informed or ignorant, and! the malig- ago. Crops were then suffering greatly, nant intriguers who willfully misrepre- the wheat stalks being more than half nant intriguers who willfully misreprethe wheat stalks being more than half necessary supplies on Sutter's account sent. In the ordinary run of things burned up, beyond redemption to full until the mill was in running order, what does "mineral development" yield by any quantity of rain. The otherwise they would not have taken to tobacco crop also was badly damaged, 1848, when Marshal let the water into those who thirst for gold. It means a frantic rush to some big thing and real color diggings, where if hogs do not run about with knives already in their was similarly gloomy. It is to be wife of Welmer, his partner, who was the supposed to the gold—at the bottom of the race, and gave it to the wife of Welmer, his partner, who was throats gold and silver can be hoped that Utah is not monopoliz-had by the shovelful. It means the hasty abandonment of all steady and legal lore and the judges' justice. Posproductive business and a mad helter sibly the late storms, reported at Wash-the Mormon Battalion were at work on

California Gold Discovery. When, Where and by Whom it was

I observe an article in your last week's paper, copied from the Oregon Bulletin, giving an account of the discovery of gold on the American River, California, in January, 1848, in which there are several important mistakes. The facts

Captain Sutter made a contract with Marshal, Weimer & Bennett to put up a saw-mill in the fall of 1847 on the south fork of the American River, where the town of Coloma now stands. Having a store at the fort at that time, I agreed to furnish them with all the and found good diggings about twenty-five miles below, on an island which one at Coloms. Any other statement made in the article alluded to I deem

A New Immigration. Bhout the middle of the sixteenth century one Mennon Simonis, with a number of families, emigrated from the Netherlands to Prussia, or to what is now a part of Prussia, for Prussia was then but a small Margravate. They had a peculiar religious fatth, something like that of the Quakers or Friends, which among other things forbid them from engaging in war, of which Charles V. and Philip II. had given them by far too much. They increased to some hundreds of families, and in a century and three quarters, utmost to carry on the Seven Years' War, he called on these Mennonites for aid, and they refused on religious grounds. That king, without any sense of religion himself, and with a disposition leaning strongly toward absolutism, was offended with them and their privileges were ed with them, and their privileges were with them, and their privileges were withdrawn, among them that of owning land. Czarina Catharine, herself a German by birth and education, and a Lutheran in religion, though she had united with the Greek Church upon her marriage to Peter III., invited the Mennonites into Russia, where she offered them liberal endowments in land and money to pay for their trans. more comfortable by developing the agricultural, manufacturing and commercial facilities of the country, the two former of which produce articles of undeniable and general utility, and the latter aids in their economic collection, preservation and distribution.

Gold and silver ruined Spain and Mexico. The same means is contributing much to the present prevailing debug of the country of Washington, without coming to manufacturing and commercial facilities of the country, the two former of which produce articles of undeniable and general utility, and the stroyed, and other damage done.

JOHN W. LOWELL-GEN'L AGENT, SALT LAKE CITY, UTAH. ese Wagons are designed especially for the Utah and Montana trade, with many important this section. hey are made of the toughest Oak, Ash and Hickory that the forests of Ohic, Michigan and Wisconsin can furnish.

This timber is thoroughly seasoned, being kept from three to five years in open sheds. The fubs are then subjected to a degree of heat sufficient to make them perfectly dry, without in-

This timber is thoroughly seasoned, being kept from three to make them perfectly dry, without in.

Hubs are then subjected to a degree of heat sufficient to make them perfectly dry, without in.

Hubs are of black Locust, and warranted not to check.

The flutes are soaked in boiling oil before being painted, and will not shrink.

The entire wood work of these wayons is seasoned, so as to stand the severe test of this perfectly dry climate.

They have cips around front Axle for the hound brace, and stay-chains instead of a boilt through the Axle. The Tires are fastened with the famous double-beaded California Rivet. On through the Axle. The Tires are fastened with the famous double-beaded California Rivet. On through the Axle. The Tires are fastened with the famous double-beaded California Rivet. On through the Axle. The Tires are fastened with the famous double-beaded California Rivet. On the sall medium and heavy Wagons the tire is one eighth inch thicker on hind than forward wheel all medium and heavy Wagons the tire is one eighth inch thicker on hind than forward wheel. They are the best proportioned and best ironed Wagon that ever crossed the Missouri river.

The bottoms of Boxes have double cleats in the centre secured by double straps that hook over the top, instead of being simply rivited to the sides of the box.

Both lower and top boxes are ironed on top.

We mae a Patent Thimble Skein of our own make, set by a Patent Axle Guage, which secures perfect uniformity, and makes the Lightest Draft Wagon that can be made.

We mae the Patent Bent Hound on the smaller sizes.

We have no hesitation in saying that our California Brake is the very best. We have bathened an improvement by which they can be used without the box being on the Wagon. N. R. ented an improvement by which they can be used without the box being on the Wagon. N. R. this improvement can be used by no other manufacturer.

The bolisters are iron plated, and there are corresponding plates on the edges of the box. They have our Patent Secket for

Sold in 1870 127,833 Machines! SEWING MACHINE SALES FOR 1870. "The magnitude to which the manufacture of Sewing Machines has attained is shown by the "SWORN" returns (to which any one can have access) of the manufacturers for the year 1870 to the owners of the leading patents, on which they pay a royalty. According to these returns the number of machines sold by each manufacturer in 1870 is as follows:

Wheeler & Wilson 83,208 Gold Medal Howe 75,156 Kina Florence Strover & Baker 57,402 Empire Finkle & Lyon Wilson & Globs 28,890 American Buttonhole & Overseaming 14,573 Wilson And several other companies who sold a few It will be seen by this table that the popularity of the Singer Machine for exceeds that of all others, their sale being one-half greater than even that of the famous "Wheeler a Wilson" machine. This is owing to the fact that the Singer Company have lately commenced making, besides their old and wall-established manufacturing machine, what is known as their "New Family Machine," which is selling at the rate of time to one better than their old style." Their total sales for 1863 were 84,781 machines against the 127,833 of 1870, showing an increase of one-half in the latter year."—New York Sun.
