About fifty women graduates of the various colleges recently met in Boston to discuss the higher educa tion of women. It was decided that physical culture is the great neces. sity for American women, and the establishment of a department of physical education in the schools of Trade by the committee specially was urged.

A fruitful crop of litigation is like ly to grow out of the introduction of the electrical storage liatteries which have been attracting so much attention of late. In England, Faure and Sellon are having a lively discussion on the subject; and in this country, Brush, Edison, and Keith are claimants for priority of invention.

To the President and Members of Zion's Board of Trade: Gantlemen-Your committee on Territorial Fe'rs, Fair Grounds and Exhibition Buildings, appointed in April last remoted to live to interview to the faith we may say that power is knowledge, and as the maxim works both ways, we can say that it is a good one. When a person is asked to have faith he is not asked some thing unreasonable, but simply to

The Supreme Court of the United States has rendered a decision in the case of U.S. vs. Carll, that an indictment for passing counterfeit money must allege, in addition to pared and parsed both branchess of the passing of the note or coin, that the defendant knew it to be false, ever the bill was vetoed by Goverforged, counterfeited, and altered, and a conviction of the accused will not cure a defective indictment in this respect.

The Sacramento Record Union cites the following to show that Chi-cago is a "terrible example:" "In a space five blocks one way by four another, there are 500 liquor saloons, purpos 200 houses of il-fame, 150 concert saloons, gambling houses and pool rooms. This section is frequented dally by 12,000 young men, who spend in these places \$100,000." And yet Chicago is very anxions to legislate Utah into the usages of "Christian civilization."

Russia is trying its hand at regulating the liquor traffic. A decree recently signed by the Emperor, is of the most stringent character. There is to be only one liquor shop in a village, and where two or three villages are almost continuous, the one shop must suffice for their combined innabitants. The liquor seller individuals have replied that my re-quest was unreasonable, that before they could do such a thing they would have to enslave their minds must be a native of the village, must be appointed and paid by the Common Council, and must sell food as well as liquor. If he allows any and restrain their freedom o person to get drunk, he is liable not only to dismissal, but to fine and Imprisonment. If any Russian village is reported to the authorities to be addicted to drunkenness, the sale of liquor may be interdicted for as thing was ridiculous long a period as may seem necessary.

In criminal trials there are generally questions of fact to be determined and also questions of law. The theory usually laid down in respect to these two different issues is that the jury decides the former and the judge the latter. If the facts alleged be admitted by the defence, the judge proceeds to prononnee on the law involved in the centralized by the efforts of thinking and intelligent men, and in time w case and, sometimes, there being nothing left for the jury to deliberate upon, he directs them as to their verdict.
