

TELEGRAPHIC. CONGRESS PROGRAM.

Bill Admission Bill May Pass the House this Week.

HAWAIIAN MATTERS PENDING.

The Federal Election Laws Repeal Bill—Ready to Defend the President's Policy.

WASHINGTON, D. C., Dec. 10.—The tariff bill will not come up in the House before a week from tomorrow at the earliest. The majority bill will be filed Wednesday, but it will be some days later before the Republicans have their program prepared.

The Utah admission bill will come up during the morning hour tomorrow. The Republicans will probably postpone it indefinitely, and this will return the bill to its place back on the calendar. Kilgore expects that before Saturday night the bill will have been passed by the House and sent to the Senate.

It is impossible that Hawaiian bills may come up in the House before the end of the week. It is not thought the Democrats will resist consideration of the resolution. Kilgore's bill to reorganize the Federal civil service will be vigorously fought in the Senate by the Republicans, who expect to prevent its passage, but fail to gain party advantage by passing their views on record. A bill will endeavor to limit the number of members of Congress and should be voted. Next action will be considered at once.

Morrill is expected to make a speech this week on those portions of the President's message relating to the tariff and internal revenue.

It is expected that the Hawaiian question will come up in the Senate in connection with the President's special message. A large number of Democratic senators stand ready to second Cleveland's policy.

New Hawaian Capital.

NEW YORK, Dec. 10.—The Hawaiian representatives of the Hurst cabinet I am requested by Mrs. Mackay to say in no part that certain statements in the speech of Princess Calista's court are however true. She never said that she would not go to Honolulu. At the same time, but on the contrary they spent much of their married life in her home at Pearl, and she is in no way the cause of the difference between them. The practice hereof is to keep the press informed of our progress, but with the highest possible discretion. The dispute between Mrs. Mackay and the prince was on account of his extravagance and debts.

CIVIL SERVICE REFORMS.

The Report of the Committee on Civil Service for This Year.

WASHINGTON, D. C., Dec. 10.—The Majority report of the civil service committee for the current year is a document of about 15,000 words. It contains the salary limits in the service in the custom house, and recommends classification by grades. An important part of this view the subcommittee came to the conclusion in the railway mail service.

The report says in the unclassified service, taken as a whole, the governmental methods of the United States are utterly indefensible, from the standpoint of decency and morality, and as different from those of any other intelligent nation. While well in the country, to discuss the arguments advanced in their favor with anything like interest. The report lists our system to those employed in Morocco and Turkey.

The number of persons connected with the civil service in the United States is about 200,000.

The minority report of Commissioner Johnson approves the extension of the classified service to the free delivery postmen as firemen, sailors, and marines to the cause of civil service reform.

Frosty Weather from the Far East.

REPORTER.—Dec. 10.—An attempt to run the express car on the Erie train was made last night. At the moment the train stopped the glass door of the express car was smashed and a soldier entered. Messenger Weekly was arrested, and the strong words of the rider and flung him from the car just as the train moved off.

Frost in a Chicago Hotel.

CHICAGO, Dec. 10.—A fire which had been burning in the Great Northern hotel early this morning caused great excitement among the guests. The flames burst forth while the hotel was being decorated for Christmas. The fire was extinguished and the damage was slight. An autopsy showed distinct traces of gasoline.

BRIEF TELEGRAMS.

The funeral of Professor Tyndall took place at St. Stephen's, and was attended by many notable people.

A royal order is published, charging King Criollo with the formation of a new ministry for Italy.

Mr. Adolph Sutro, wife of Adolph Sutro, the famous capitalist and philanthropist, died today at San Francisco.

The death of General Francis L. Smith, which was followed by the World War, when he was now willing to leave for a considerable amount of time, has been appointed him a Chamberlain of the Household and Stewart, an honorary title of the household of the late father.

A NOVEL BACK.

Louis W. Beck His Associate Against Any American Engine.

NEW YORK, Dec. 10.—Another international race is in progress. New York has been won by the British. The competitor is Fred Charles Luty of Liverpool, who arrived here on the steamer New York yesterday. He is the inventor of the famous marine engine.

This world's speed record from Paris to New York is held by the British. F. C. Luty, who is now willing to leave for a considerable amount of time, has been appointed him a Chamberlain of the Household and Stewart, an honorary title of the household of the late father.

THE AT ARTWORK.

A Historical Landmark Destroyed by the Flames.

ANSWER, Dec. 10.—Last night there was an intense fire in this city. A grain warehouse called the Standard Millhouse, located on the square of grain, was completely destroyed. The ships in the docks in the vicinity were removed before the flames reached them. The damage in grain destroyed is \$500,000.

stone, and the loss on the building is estimated at \$1,000,000.

The Standard Millhouse, destroyed by this morning, was one of the principal landmarks of the city. The building was known in 1851 and was erected by the firm of George and Son.

At midnight two men were seen to leave the warehouse and run along the quay. It is believed that they were arsonists. The Standard Millhouse was a popular eating place, and many were found with smoking pipes. The rooms, offices and public areas were cleaned but no unusual efforts to minimize the damage. The door was left open all night, and the windows were broken and remained many years.

The warehouse belongs to the city, and was leased for a million and a quarter years. It contained about \$100,000 worth of grain, and the value of the grain is about \$100,000.

The Standard Millhouse is the largest in the city, and was used for grain storage, flour, meal, and other products.
