

THE EVENING NEWS.

Wednesday, October 20, 1899.

LOCAL AND OTHER MATTERS.

MILITARY.—Yesterday afternoon the roads leading to Camp Wasatch presented an unusually lively appearance, being lined with baggage wagons en route for the mountains.

This morning the main body of the militia moved out of the city, en masse accompanied by bands of music, creating a very picturesque and lively appearance.

Camp Wasatch when viewed from the bench at the north end of the city, with its innumerable tents glistening in the sunshine, is an imposing sight.

PENITENTIARY DAMAGED.—Late on Monday night or early Tuesday morning the high wind, which was prevailing at the time, carried away a considerable portion of the roof of the Penitentiary. Warden Rockwood informs us that the work of reconstruction is going vigorously ahead, and in a very few days the guests of the public domiciled there will again be comfortably housed.

FATAL ACCIDENT.—It is with extreme regret that we record the accidental death, by shooting, on the 13th inst., of James David, son of Robert and Ann B. Wilson, of Eden, Ogden Valley.

The poor boy, not quite thirteen years of age, was in the mountains with a young man, his cousin, getting wood. During a previous trip for the same purpose they had seen a bear, and this time had taken a gun and ammunition, with the design of dispatching "bruin" if they could find him. After loading their wood they determined to have a hunt for the bear, and the boy was taking up the gun, loaded and lying in a bush close by, when it went off, the ball entering his left side, below the ribs, coming out close to his back bone. The poor fellow was taken to the home of his parents, where he died the next morning.

MISCHIEVOUS BOYS.—We wish to see the boys of our city and Territory excel in good behavior as well as in other things, and we have reason to believe that as a general thing they do excel. There are, however, exceptions, who endeavor occasionally to make their presence known by some act of mischief or ill-behavior. An instance of this kind came under our notice last evening. On nearing the bench, at the upper part of East Temple St., our attention was drawn to a string stretched across the foot path, fastened on one side to a fence and on the other to a tree, which had evidently been placed there for a "lark" by boys. The sun had gone down, and the moon not yet risen, consequently it was too dark to notice so unusual an object in such an unexpected position; and a gentleman passing, narrowly escaped having his eye severely injured by it, causing him much pain and inconvenience for a time.

We trust parents will take the trouble to explain to those of their offspring who are likely to participate in such mischievous amusement, the fable of "The boys and Frogs," and give them to understand that such tricks are sometimes fraught with lamentable consequences.

INFORMATION WANTED.—Of August D. Ferron, who left San Francisco some fifteen months since. When last heard from he was at Echo, working with an engineering party on the U. P. R. R. Any tidings of his whereabouts, sent to Hon. W. H. Hooper, M. C., Salt Lake City, will be very acceptable. California and Rocky Mountain papers please copy.

NEIL WARNER AT OMAHA.—The Omaha Herald, of Sunday, 17th inst., says that on the next evening Neil Warner would commence an engagement of five nights at the Academy of Music in that city, his Eastern engagements preventing a longer stay. The pieces selected were "Macbeth," "Richard III," "Hamlet," "Richard III," "Ingomar," and "A New Way to Pay Old Debts."

The same paper announces the appearance in that city of "Col. James Pipes," who had "just returned from a highly successful trip to Salt Lake."

"MESSENGER OF HEALTH."—We have received the first number of the "Messenger of Health," a sparkling eight page quarto, published monthly, at one dollar a year, by Dr. Morrill, of Boston, Mass. It contains much excellent reading matter, on health, hygiene, antidotes for poisons, &c., and if the Doctor makes it as good as he promises, a large circulation will be almost sure to reward his efforts. One feature, promised to commence immediately, is unique, and is sure to gain for it considerable popularity,—that is a biography of the medical "quacks" of Boston and other large cities in the Union. The work can be procured at James Dwyer's Railroad News Depot, East Temple St.

ACOUSTIC TELEGRAPH.

A series of experiments with the newly-invented Acoustic Telegraph were made on Thursday last, at the Fulton Ferry Houses, Brooklyn, in the presence of a number of gentlemen, who were as much astonished as gratified at the accuracy of the general messages that were transmitted by the acoustic telegraph through wires connecting two houses 150 yards from each other. The first message sent was that of the Rev. Dr. Deems: "He that hath ears to hear, let him hear." The Rev. Dr. Hall asked: "How long before the new bridge is to be built, and what about stock in it?" Mr. Samuel Orchard inquired: "Can a man be held responsible for the place of his birth without having been consulted by his parents?" The Tribune reporter asked: "What is the time at the ferry?" and Dr. Boscowitz inquired "the relative diagnosis between rubella and scarlatina." These messages were all transmitted safely and much more accurately rendered than ever could have been anticipated.

The invention is a battery that works without electricity through a wire that does not call for the protection of insulators, nor tall massive poles, and that delivers a message through wire of any length, one-eighth of an inch in diameter, submerged in water, buried in the ground or suspended in the air. The battery consists of a solid iron cylinder one foot long or more, and four inches in diameter in facial and general, but toward the other end, which becomes conical and tapers like a minnie ball, is an aperture, admitting the entrance of a metallic wire, the medium of communication, the whole supported by solid iron frame-work, and weighing not more than 100 pounds. At the facial end of the cylinder is a hollow hemisphere of iron, whose interior surface is covered with silver plate, constituting an elliptical mirror, having a solid rim one inch in diameter. The face of this rim is ground so smooth that when it is placed in contact with the face of the cylinder, no air can intervene, and it is held and kept in this position by a strong spring 12 inches long, arched above and supported by the frame work and curved below, so as to form the signal key, by which the battery is worked and made to evolve sounds from the organic atoms of the air which surround and press upon the face of the rim and of the cylinder, with a force equal to fifteen pounds on the square inch, the moment one face is separated from the other. The distance of this separation is graduated by two metallic bars, which constitute the Diastolic Staff and from each bar a different order of sound is created called the vowel and the consonant sound respectively. By uniting in regular order the first and second order of sounds, the Fulcimen or third order is produced. By uniting the second and first order, the Bifucimen or fourth order is generated, and in commingling together the first and second primary orders, the Valorem or fifth order of sound is created, and together they represent and express any specific symbolic formula of sounds, each letter of the English Alphabet, and each Arabic Notation; and each one is so characteristic and expressive of itself that no mistake can occur in translating a message. The inventor is Dr. Lancelot Hope Everitt, of New Orleans, Louisiana, who was elected a member of the Royal College of Surgeons in Edinburgh some years ago. The Doctor's theory is that sound is a triune molecule of matter—silent inertia, simple force and explosive sound—and exists in all the organic atoms of the world. That he can evolve these molecules from the organic atoms of the air in such a way, by means of the Acoustic Battery, as to collect them into two dissimilar runs of sound, which he converts into two primary orders. When thus evolved the hemisphere mirror reflects them through the solid cylinder, which then inducts them into the cone of the wire, through which it passes with great velocity to the distant end of the wire. This end is all the time in contact with a glass bell made for the purpose.

When a message is about being sent a tattoo is sounded by the battery and this rings the bell so loud you can hear it twenty feet off. The message then follows in symbolic order, and as they chime their intonations upon the bell they are easily interpreted by the receiver of the message.—New York Tribune.

Punch says to find the shortest way to a female's heart under any given circumstances, first: If she is married and a mother, praise her children. If she is married, but not a mother, praise her husband. Second: If she is unmarried, but engaged, praise her lover. If she is unmarried and disengaged, praise herself.

Special Notices.

Barnett's Condition for the Hair is unequalled.—True Prop. Boston.

Barnett's Facial is real y a wonderful perfume.—Harford Courant.

Barnett's Kallison for the Complexion is steadily growing in the estimation of ladies as it becomes more generally used.

Barnett's Flavoring Extracts to be obtained must be demanded. Poor substitute flavors are plenty.

Whitcomb's Asthma Remedy.—In no case of purely Asthmatic character has it failed.

"THERE'S NO SUCH WORD AS FAIL."—This is absolutely true in using Dooley's Chemical Yeast Baking Powder, for so perfect is the combination of the ingredients entering into its manufacture, that good biscuits, rolls, or pastry, both light and nutritious, can be made every time. It is always ready, always reliable, and requires but half the quantity of those of ordinary manufacture, and is, consequently, cheaper. For sale in packages to meet the wants of all, by grocers generally.

When every other prescription has disappointed expectation, in cases where the system is suffering from the effects of mineral medicines, the powerful vegetable corrective—Red Jacket Bitters—will restore the tone of the digestive apparatus, quiet the nerves, and arrest the action of the poison upon the secretory organs and the blood.

LUMBER, Shingles and Lath

I keep constantly on hand
LUMBER, LATH AND SHINGLES
OF THE BEST QUALITY, at my
LUMBER YARD, 16th WARD.
I intend to sell

JOSEPH CHAMBERLAIN.

TESTIMONIAL.

A token of respect to the skill of Dr. A. A. BARNETT, I hereby publicly testify that I have been subject to deafness for eight years, and to Dr. A. A. BARNETT, I am indebted for my recovery. I was able to hear distinctly every word spoken at the service in the Tabernacle on Sunday. Any one acquainted with me, will receive this testimonial, given freely, as strong evidence in favor of his ability.

CITY CREEK FOUNDRY MACHINE SHOP.

THE PROPRIETORS take pleasure in announcing to the citizens of the Territory that they have erected a

A MACHINE SHOP AND FOUNDRY
North of Pres. Young's premises
in which they have all the facilities of

MACHINERY, IRON AND COKE
TO
CAST, TURN AND FIT UP

ALL KINDS OF MACHINERY
Steam Engines,
AND
MILL WORK

Of every description,
MADE TO ORDER.

BRASS CASTINGS
AND
COPPER SMITHING.

The Foundry will be conducted so that all work will be executed with neatness and dispatch.

TERMS REASONABLE.

50 GOOD TIE LAYERS WANTED

ON THE UTAH CENTRAL RAILROAD.
Apply to
DAVID McKENZIE,
Pres. Young's Office.

NOTICE:

THE parties who took away a sack of Bedding from the Tithing Office Yard on Wednesday last, the 18th inst., will please return the same and save further trouble.
